Investment strategy

Under normal market conditions, the Portfolio typically invests at least 80%, and not less than two thirds, of its assets in equity securities of companies that are organised, or have substantial business activities, in the Eurozone. These companies may be of any market capitalisation and industry. The Investment Manager intends seeks to select securities that it believes are undervalued and offer attractive shareholder returns. The Portfolio may be exposed to any currency. The Portfolio uses derivatives for hedging (reducing risks), efficient portfolio management and other investment purposes.

Investment goa

The Portfolio seeks to increase the value of your investment over time through capital growth.
