Investment strategy

We take investment decisions on the basis of a thorough financial analysis of companies. This analysis is combined with an evaluation of financial markets through the identification of global trends, allowing us to build a concentrated portfolio of 25-35 high conviction stock picks, ensuring a sufficient risk diversification and promising investment opportunities on the long term. The Sub-Fund promotes, among other characteristics, environmental and social criteria, and the companies in which we invest are compliant with the 10 principles of the UN Global Compact at the time of the initial investment.

Investment goal

We aim to achieve a long-term growth of your capital by investing in shares of a limited number of attractive companies worldwide, including emerging countries.
