Investment strategy

As part of the active management of the sub-fund, the manager uses macroeconomic, market and credit analysis in order to identify securities with a potential return that is advantageous in relation to the risk incurred. The selection and weighting of the sub-fund's assets, and therefore its performance, may or may not deviate significantly from the benchmark.

Investment goal

To increase the value of your investment over the medium term. Under normal market conditions, the sub-fund invests mainly in high-yield corporate bonds denominated in Euro. The sub-fund may use derivatives to hedge against market fluctuations and to reduce its costs, and also to generate additional income.
