Candriam Equities L Em.Mkt.I GBP Acc / LU1269737489 / A3C0EE / Candriam

Investment strategy

Shares of companies whose registered offices and/or primary activity are in emerging countries. The management team makes discretionary investment choices based on economic/financial analyses. The discretionary approach is based on a fundamental analysis aiming to select the best companies according to five criteria: quality of management, growth potential, competitive advantage, value creation and indebtedness. Sustainable investment as its objective. Environmental, social and governance (ESG) criteria contribute to the asset manager's decision-making but are not a decisive factor in this decision-making. For more information, please see the management company's website and/or the prospectus. The fund may make use of derivative products for both investment and hedging purposes (to protect against future unfavourable financial events). The fund is managed actively and the investment approach implies a reference to a benchmark (the index). The index measures the performance of the large and mid capitalisation equity segment across emerging markets countries.

Investment goal

The fund seeks to achieve capital growth by investing in the principal assets traded and to outperform the benchmark.
