Investment strategy

The Fund may use securities lending for efficient portfolio management purposes. The Fund may make significant use of derivatives (complex instruments) in order to (i) reduce the risk and/or generate additional capital or income and/or (ii) meet the Fund's investment objectives by generating varying amounts of leverage (i.e. where the Fund gains market exposure in excess of the net asset value of the Fund).

Investment goal

The objective of the Fund is to achieve high income, together with long-term capital growth. The Fund intends to invest primarily in debt instruments of issuers in emerging markets (including but not limited to debt issued by governments and companies, and convertible bonds). The Fund may invest in non-investment grade (lower quality) debt instruments. The Fund may invest in debt instruments which are in financial distress (distressed securities).
