Investment strategy

The Sub-Fund will invest at least 67% of its net assets in convertible securities. Issuers of these securities may be located in any country, including emerging markets. The Sub-Fund will invest mainly in Investment Grade assets. The Sub-Fund will be exposed (through investments or cash) to other currencies than the base currency. The Sub-Fund may use complex financial instruments ("derivatives") such as futures, options, forwards and swaps to optimise the management of your portfolio or protect its value against adverse movements in financial markets. A derivative is a financial instrument which derives its value from the value of an underlying asset. The use of derivative is not cost or risk-free. The Sub-Fund is actively managed without reference to a benchmark.

Investment goal

We aim to provide capital growth, by investing primarily in a diversified portfolio of Convertibles and Exchangeable bonds globally.
