What is this product?

Type

This product is an investment fund.

Term

The Fund is established for an unlimited duration, with the possibility for the Board of Directors to decide the termination of the Fund at its sole discretion.

Objectives

RBC BlueBay Euro Government Bonds belongs to the category of Single Manager Funds.

The Fund seeks to increase the value of its assets over the medium term, with a diversified and actively managed portfolio of Euro government bonds without any specific restriction on tracking error, by investing in euro denominated investment grade bonds and securities treated as equivalent to bonds issued or guaranteed by a member state of the European Union being part of the euro zone such as fixed-income and floating rate bonds, and also in derivatives on this type of asset. The minimum asset allocation in such securities will be of 60% of the sub-fund's net assets.

The Portfolio may also invest in euro and non-euro denominated investment grade bonds and securities treated as equivalent to bonds issued or guaranteed by a state outside euro zone such as fixed-income and floating rate bonds, other fixed and floating rate securities and in derivatives on this type of asset, including emerging markets and high yield securities if the issuer is part of the Reference Portfolio.

The following restrictions will apply to the sub-fund:

- Maximum exposure to fixed income securities rated investment grade, issued by entities domiciled in countries outside the European Union, whose sovereign long term debt rating is investment grade 35%
- Maximum exposure to corporate bonds guaranteed by a government issuer 20%
- Maximum exposure to high yield bonds 15%
- Maximum exposure to emerging markets bonds 10%
- Maximum exposure to covered bonds 5%
- Maximum exposure currency risk (on aggregate level) 5%
- Duration bandwidth +/- 2 years (compared to the Reference Portfolio)
- Asian issuers (including Russia, Middle East and Pacific) forbidden
- Allocation to equities forbidden

The sub-fund may invest up to 20% in bank deposits at sight, including cash held in current accounts with a bank accessible at any time.

Sustainable Investment Policy The sub-fund promotes environmental and social characteristics and qualifies as an investment product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector as set out in Book I.

The External Investment Manager adopts an approach to proprietary macro, credit and ESG research to help identify both long and short opportunities across a universe of alpha sources. Conviction score is driven by assessment of fundamentals, valuation, technicalities and ESG. The External Investment Manager conducts ESG analysis on in-scope sovereign issuers (and related), as well as corporate issuers, as part of the initial stage of the investment process which comprises of fundamental and ESG research, using its own proprietary issuer ESG evaluation framework. The analysis can be either a preliminary or detailed ESG evaluation to ensure the issuer is eligible for investment. Engagement is complementing the ESG integration approach.

The Sub-Fund plans to invest at least 90% of its net assets in assets that have been determined as "eligible" as per the ESG process in place. The Fund complies with the sets of exclusions applying to article 8 investment product on government and corporate issuers and as defined by the Management company policy.

Methodological limitations can be assessed in terms of: nature of ESG information (quantification of qualitative data), ESG coverage (some data are not available for certain issuers) and homogeneity of ESG data (methodological differences).

Relation to the Reference Portfolio This Fund is actively managed and is compared to the Bloomberg Euro Treasury 1-10 Year for performance and risk level indicator purposes. However, the reference to this Reference Portfolio does not constitute any objective or limitation in the management and composition of the portfolio and the Fund does not restrain its universe to the Reference Portfolio's components.

The Reference Portfolio does not evaluate or include its constituents on the basis of environmental and/or social characteristics and is therefore not aligned with the ESG characteristics promoted by the sub-fund.

The base currency of the Fund is EUR.

Income is systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

What are the risks and what could I get in return?**Risks**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of ABN AMRO Investment Solutions to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.abnamroinvestmentsolutions.com.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

What happens if ABN AMRO Funds RBC BlueBay Euro Government Bonds is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 EUR is invested.
