What is this product?

Type

Aegon Emerging Markets Debt Fund is a sub-fund of Aegon Asset Management Europe ICAV.

Term

The term of the Fund is unlimited and therefore there is no maturity date. The Fund Manager / Manufacturer may decide to terminate the Fund unilaterally as set out in the Prospectus of the Funds. Situations that give rise to an automatic termination are not foreseen in the Funds Prospectus, but may be foreseen by laws and regulations applicable to the Fund.

Objective: The investment objective is to provide long term capital growth.

Policy: This fund is actively managed. The Fund will seek to achieve its investment objective by investing at least 67% of its net assets directly or indirectly, in fixed income securities as listed below in US Dollars issued by governments, institutions or companies in emerging countries which may be fixed and floating rate.

The Fund considers an "emerging market" (Emerging Market) to be any country in the J.P. Morgan Emerging Markets Bond Index Global Diversified. In considering possible emerging countries in which the Fund may invest, the Investment Manager will place particular emphasis on factors such as economic conditions (including growth trends, inflation rates and trade balances), regulatory and currency controls, accounting standards, and political and social conditions. Within Emerging Market investments, the Fund seeks to participate in the more established markets which the Investment Manager believes provide sufficient liquidity.

The Fund may invest in government bonds, issued both by governments in developed markets and by governments in Emerging Markets, high-yield and investment-grade corporate bonds and liquid assets (such as cash and/or cash-like securities, for example, UK gilt-edged securities or money market instruments).

The Fund may invest in financial derivative instruments for investment purposes and for the purposes of efficient portfolio management or hedging purposes.

The fund promotes E/S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation (SFDR).

Other information: You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Benchmark: The benchmark of this fund is JP Morgan Emerging Markets Bond Index Global Diversified.

The Fund is actively managed in relation to the benchmark. The degree of freedom from the benchmark is moderate.

Income the Fund receives will be paid out every three months.

Intended retail investor

The Fund is designed for retail and institutional investors seeking pooled exposure to a variety of issuers in emerging markets and who are comfortable with a medium level of investment risk. It is expected that the Fund will be held by investors as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash. Share prices will fluctuate and may fall significantly in value. It is important to understand that the Fund should be viewed as a medium to long term investment. The Fund may not be appropriate for investors who plan to invest in the short term
