

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Aegon US High Yield Bond Fund

a sub-fund of Aegon Asset Management Europe ICAV

Euro Class K - Accumulation shares (ISIN: IE00BZCNV420)

## Objectives and investment policy

**Objective:** The investment objective is to provide long term capital growth.

**Policy:** This fund is actively managed. The Fund will seek to achieve its investment objective by investing at least 67% of its net assets directly in high yield corporate bonds, which may be at a fixed or floating rate and are rated by rating's agencies as set out below.

The investment manager's strategy is to seek to achieve high returns for the Fund while maintaining an average high yield bonds risk profile. The bonds held by the Fund will be primarily denominated in USD, although some portfolio securities may be denominated in EUR or in the currency of another European country which is not a member of the Euro and are issued by US companies or institutions.

The Fund may hold bonds which can be converted into shares in the issuer, or warrants over such shares received as a result of corporate actions. If the Fund is invested in any such bond which is subsequently converted into equity or warrants, the Investment Manager may in its discretion continue to hold such equities within the Fund for a period of up to one year after such conversion in order to determine the right moment to redeem the equity in the best interests of the Fund.

The Fund will invest primarily in high yield corporate bonds and notes whose credit rating is rated below investment grade.

The Fund may invest in financial derivative instruments for investment purposes and for the purposes of efficient portfolio management or hedging purposes.

The benchmark of this fund is Bloomberg Barclays US High Yield 2% Issuer Cap Index (Hedged to Euro).

The Fund is actively managed in relation to the benchmark. The degree of freedom from the benchmark is moderate.

## Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The currency of this share class is different from the base currency.

## Risk and reward profile

1	2	3	4	5	6	7
Lower risk / potentially lower rewards				Higher risk / potentially higher rewards		

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. The Fund has been categorised as 4 because it has a relative higher volatility compared to other bond funds as it invests in high yield bonds which have equity like features.

The Fund's risk and reward category is not guaranteed to remain unchanged and may shift over time. It is calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. Category 1 does not mean 'risk free'.

Note: as there is less than 5 years performance data available (see Past performance section), the risk/reward profile is calculated using simulated historical data.

**Credit Risk:** The Fund is subject to credit risk in respect to its investments and with regard to its contractual counterparties (such as hedge providers).

**Liquidity Risk:** The secondary market for sub-investment grade bonds is typically much less liquid than the market for investment grade bonds, frequently with significantly more volatile prices and larger spreads between bid and asked price in trading.

**Interest Rate Risk:** The Fund's exposure to market risk is mainly with regard to movements in the value of its investments, changes in interest rates that in the event the Fund makes any fixed interest investments, may decrease its net interest income. In the event of a general rise in interest rates, the value of certain investment in the Fund's assets may fall, reducing the net asset value of the Fund.

**High Yield Securities Risk:** Below investment grade debt securities are speculative and involve a greater risk of default and price changes due to changes in the issuer's creditworthiness. The market prices of these debt securities fluctuate more than investment grade debt securities and may decline significantly in periods of general economic difficulty.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus and the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.35%
Exit charge	0.35%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year	
Ongoing charges	0.42%

Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures, and in some cases you may pay less. You can find out the actual entry and exit charges from your financial adviser or distributor.

The ongoing charge is based on expenses for the year to 31 December 2021. This figure may vary from year to year. It excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

More detailed information on charges can be found in the 'Fees and Expenses' section of the Fund Supplement to the Prospectus and the Prospectus.
