This Sub-Fund is not managed by us in reference to a Benchmark. We follow an active management approach.

The Sub-Fund follows the KPI Strategy (Absolute) and promotes responsible investments by applying a sustainability key performance indicator ("Sustainability KPI") to provide transparency on the measurable sustainability outcome pursued by the Sub-Fund's Investment Manager for the shareholders. Sub-Fund's pre-contractual template describes all relevant information about the strategy's scope, details, and requirements and applied exclusion criteria.

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the Fund.

The categorisation of the Fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

### Why is the Fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the Fund went up and down in the past. The units of a Fund of category 4 might be subject to medium price fluctuations based on historical

volatilities.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the Fund into bonds or money markets instruments. Issuers of these may fall into insolvency or suffer economic problems, in which case the interest on and/or capital of these assets may not be completely paid and/or the price of the assets may drop.

The Fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the Fund price may fall.
