Date of production of the KID: 26 September 2024.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Alpinum SICAV-SIF is an alternative investment fund (AIF) incorporated in the legal form of a "Société d'Investissement à Capital Variable – Specialised Investment Fund" (SICAV-FIS) in accordance with the Luxembourg 2007 Law relating to Specialised Investment Funds.

Term

The Product does not have a maturity date (the Product has been established for an indefinite period of time). The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.

The recommended holding period (RHP) is displayed in the section "How long should I hold it and can I take money out early?".

Objectives

The Sub-Fund seeks to achieve its investment objective by gaining exposure across a range of market sectors, worldwide in fixed income securities offering a range of maturities and credit ratings issued in various currencies, as well as in derivative financial instruments. The Sub-Fund will be exposed to global fixed income instruments with an initial focus on securities issued or trading in European countries, as well as in the United States of America. Fixed income instruments held may include bonds (government/corporate), bank loans as well as asset-backed securities and credit default swaps. In addition, the Sub-Fund may invest in other fixed income focused funds, certificates, fiduciary deposits and cash. Sustainability risks are not systematically integrated on the basis of the investment strategy and the type of underlying investments. The return of the fund depends primarily on the development of capital markets. To varying degrees, it will be a function of the following components: equity market development and dividend payments, development of interest rates, creditworthiness of the entities issuing the invested instruments and interest income. The return may also be affected by currency fluctuations, where active or unhedged positions exist. Income of this share class is reinvested. The exchange rate risk of the share class currency is to a large extent hedged against the currency of the fund.

Intended retail investor

This fund applies to professionally managed discretionary mandates for retail investors with an expert financial understanding, who can accept a possible loss on the investment amount. The fund is aimed at growing the investment value, while requiring acceptance of certain restrictions to accessing the capital. With their investment in this fund, investors can satisfy medium term investment needs. The fund can be acquired by professional investors and through selected distribution channels only.

Depository

UBS Europe SE, Luxembourg Branch

What are the risks and what could I get in return?

Indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level. The past may be a poor predictor of the future and, hence, the actual risk of losing money may vary significantly.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The product may be exposed to further risk factors such as operational, political and legal risks which are not included in the summary indicator. Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performances of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		CHF 10 000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	CHF 5 420	CHF 6 220
	Average return each year	-45.8%	-14.6%
Unfavourable	What you might get back after costs	CHF 8 680	CHF 8 810
	Average return each year	-13.2%	-4.1%
Moderate	What you might get back after costs	CHF 9 630	CHF 10 030
	Average return each year	-3.7%	0.1%
Favourable	What you might get back after costs	CHF 10 960	CHF 10 720
	Average return each year	9.6%	2.3%

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all costs of the product itself. The figures do not take account of your personal tax situation, which can also have an impact on how much you receive back.

Unfavourable scenario: This type of scenario occurred for an investment between 2017 and 2020.

Moderate scenario: This type of scenario occurred for an investment between 2016 and 2019.

Favourable scenario: This type of scenario occurred for an investment between 2014 and 2017.

What happens if UBS Fund Management (Luxembourg) S.A. is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to UBS Europe SE, Luxembourg Branch as depositary of the Fund, which is responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The table shows the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed that the product performs as shown in the moderate scenario.
- 10 000 CHF is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	CHF 734	CHF 1 012
Annual cost impact (*)	7.3%	3.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 2.6% before costs and -0.9% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	3.0% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to CHF 300
Exit costs	3.0% of your investment before it is paid out to you.	CHF 287
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.9% of the value of your investment per year. This is an estimate based on actual costs over the last year.	CHF 90
Transaction costs	0.5% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 48
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	CHF 0

For additional information about costs, refer to the prospectus, which is available at www.ubs.com/fml

How long should I hold it and can I take money out early?

Recommended holding period: 3 Year(s)

The recommended holding period for this product is 3 year(s). This is our recommended holding period based on the risk and expected return with the product. Please note that the expected return is not guaranteed. The more the actual holding period deviates from the recommended holding period for the product, the more your actual return will also deviate from the product assumptions. Depending on your needs and limitations, a different holding period may be suitable for you. Consequently, we recommend that you discuss this issue with your customer service representative.

The Company and its Sub-Funds allow each Shareholder of the Company, at any time, to request the Company to redeem all or part of its Shares as at a specific Valuation Day.

How can I complain?

If you have a complaint about the product, the manufacturer of the product or the person who recommended or sold the product to you, please speak to your client advisor or contact us at www.ubs.com/fml-policies
