Important notes

The fund described in this Prospectus (including its annexes) and in the General and Special Fund Rules (*Verwaltungs- und Sonderreglement*) is an investment fund with various sub-funds under Luxembourg law (*fonds commun de placement à compartiments multiples*), which was set up for an unlimited period pursuant to Part I of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment as amended (hereinafter referred to as the "Law of 17 December 2010").

The purchase of units is based on the Prospectus, as well as on the "key investor information" (=key investor information in accordance with Directive 2009/65/EC or key investor document according to Regulation EU 1286/2014) and the General and Special Fund Rules of **Assenagon Credit** ("Fund"). The Prospectus consists of a general section and the annexes on the specific sub-funds ("Annex"), which contain an overview of the sub-funds. The specific characteristics of the sub-funds are described in the respective Annex and in the Special Fund Rules that apply to the sub-fund in question, which may contain regulations that supplement, and deviate from, individual provisions set out in the General Fund Rules. In the event of a conflict between the General Fund Rules and the Prospectus, the former shall take precedence.

As a result, investors making an investment in a sub-fund should also refer to the information set out in the Annex on the sub-fund in question, which contains supplementary information for investors in the various distribution countries.

The key investor information is prepared separately for each unit class. The key investor information includes useful information on the key features of the respective unit class and must be candid, unambiguous and not misleading. Updates of the key investor information can be accessed primarily at www.assenagon.com.

Pursuant to Article 161 of the Law of 17 December 2010, the key investor information will be made available to the investor at no cost before they subscribe to units – by the Management Company (or another natural or legal person, acting in their own name and at their own unrestricted responsibility) if the units are distributed directly – or by the distribution agent or a sub-distribution agent if one of these distributes the units.

Investors must be offered a copy of the Prospectus, the key investor information and the most recently published annual or semi-annual report free of charge before they subscribe for the units.

No information may be provided or declarations made if this information or these declarations deviate from the Prospectus the key investor information. Any decision to purchase units based on information or declarations that are not contained in Prospects, the documents referred to therein or in the key investor information are made exclusively at the investor's risk.

The authorisation and supervision of the Fund by the Luxembourg Financial Supervisory Authority, the CSSF (as defined below), must not, under any circumstances and in any form, be presented as a positive assessment by the CSSF of the quality of the units issued.

Investors are recommended to obtain information on any statutory or tax-related consequences, as well as on any foreign exchange restrictions or controls, arising pursuant to the laws of their country of nationality, the country in which they reside or the country in which they have their ordinary residence, and which could be relevant with respect to subscription for, or the purchase, ownership, redemption or transfer of fund units.

Under item 20, the Prospectus printed below explicitly refers to the general investment risks associated with an investment in a fund or sub-fund, while item A of Annex 1 for the relevant sub-fund explicitly refers, in particular, to the specific risks associated with an investment in the particular sub-funds. Furthermore, the Annex reminds investors that a sub-fund can employ derivatives, as well as other techniques and instruments, to implement its investment policy, investment objective and risk profile.

The fulfilment of investment objectives cannot be guaranteed.

Units in the sub-funds referred to in this Prospectus may not be offered, sold or delivered within the United States of America or to US citizens (see item 14).

By purchasing units, investors acknowledge the Prospectus (including the Annex), the General Fund Rules and the applicable Special Fund Rules, as well as all approved and published amendments thereof.

The Prospectus (including Annexes), the General and Special Fund Rules, as well as the respective annual or semiannual report, are available free of charge from the Management Company's registered office, from the depositary, from the paying agent and from the distribution agents, and can be accessed at www.assenagon.com.

Important data protection information

The law stipulates that all persons and entities who wish to make an initial investment in a fund (including natural persons, corporations and financial intermediaries) must furnish proper and sufficient proof of their identity before their initial subscription for fund units is accepted. Before an order is accepted, investors may be requested to provide further information, and an order for unit subscription or redemption may be deferred or rejected if an assessment leaves justified doubts as to the investor's identity or the authenticity or legal validity of an order.

This means that any questions that may be posed to the investor in connection with the latter's order must be answered. Any failure to answer these questions may prevent the purchase of fund units.

This data will be used, among other things, for record-keeping purposes, to process orders, to reply to requests, as well as for information on other products and services.

Confidential information pertaining to investors shall not be disclosed to third parties. Where permitted under the EU General Data Protection Regulation (GDPR) and other applicable data protection legislation, data may be shared and processed by external service providers in Luxembourg or abroad.

Investors have the right to inspect their data, request information on its use, and the right to rectify this data where appropriate.

This data will be retained for the duration of the agreement and will remain saved for the period of time stipulated by law.

Prospectus - General section

Management, administration and service providers

1. Management Company

The Fund is managed by the Management Company.

Assenagon Asset Management S.A. is a *Société anonyme* pursuant to Chapter 15 of the Law of 17 December 2010 of the Grand Duchy of Luxembourg and has its registered office at Aerogolf Center, 1B Heienhaff, 1736 Senningerberg, Luxembourg. It was formed on 3 July 2007.

The memorandum and articles of association of the Management Company were published on 31 August 2007 in Mémorial C No. 1,854 and were filed with the Luxembourg commercial register under no. B 129 914. The memorandum and articles of association of the Management Company were changed on 31 March 2014 and published in Mémorial C No. 1,590 on 19 June 2014.

The Management Company is responsible for determining and implementing the fund investment policy, as well as for the activities set out in Appendix II to the Law of 17 December 2010. It is entitled to take all management and administrative measures, and to exercise all rights associated either directly or indirectly with the fund assets, for the account of the Fund.

The Company's Board of Directors has appointed Mr Dr. Dr. Heimo Plössnig, Mr Thomas Romig, Mr Philip Seegerer, Mr Matthias Kunze, Mr Dr. Stephan Höcht and Mr Jens Meiser as Conducting Officers of the Management Company, and has transferred responsibility for all management activities to these Conducting Officers.

They are entitled to call upon external service providers in order to perform their activities.

The Board of Directors comprises the Remuneration Committee of Assenagon Asset Management S.A. This body decides the principles and implementation of the remuneration system.

The remuneration system used at Asset Management S.A. is based on the corporate strategy and contributes to achieving business objectives, rewarding correct behaviour, creating added value for shareholders and investors, and meeting the applicable supervisory recommendations. Taking excessive risks is not rewarded, but rather strongly discouraged. The remuneration system is compatible with and conducive to solid and effective risk management and does not encourage taking risks that are not compatible with the risk profile or the General Fund Rules. The remuneration system is in line with the business strategy, aims, values and interests of the Management Company, the Fund and its investors and includes measures to avoid conflicts of interest.

The objectives of the remuneration structure are based on the following principles:

- emphasising the long-term and strategic corporate objectives
- maximising the performance of staff and the company
- gaining and maintaining the best employee potential
- a simple and transparent remuneration structure
- remuneration based on the individual performance of staff members, the contributions of the business areas to earnings and the performance of the company as a whole
- different areas of activity and responsibility taken into account
- possibility of using variable components of remuneration in the event of a company profit

The principles of the remuneration system ensure that:

- where bonus payments are made, the employee's total remuneration maintains a balanced ratio of variable and fixed payments, with the components and their amounts varying in accordance with the employee and their position.
- only in exceptional cases may guaranteed bonuses be paid for the appointment of new staff with existing employment contracts.
- variable remuneration for employees is an effective incentive to conduct business in the interests of the company without creating a significant dependence on variable remuneration.

The principles of the remuneration system are reviewed at least once a year. Details of the current remuneration policy, including an explanation of how remuneration and the other inducements are calculated, are available via the website [www.assenagon.com/Investor information](http://www.assenagon.com/Investor%20information). A hard copy of this remuneration policy will be provided to the investor free of charge upon request.

The Management Company serves as the contact point for communication with the competent authorities in Luxembourg, Germany and Austria as well as for investor complaints.

2. Depositary

Brown Brothers Harriman (Luxembourg) S.C.A. has been appointed as the depositary of the assets of the Fund pursuant to the terms of a depositary agreement, as amended from time to time (the "Depositary Agreement"). Brown Brothers Harriman (Luxembourg) S.C.A. is registered with the Luxembourg Company Register (RCS) under number B 29923 and has been incorporated under the laws of

Luxembourg on 9 February 1989. It is licensed to carry out banking activities under the terms of the Luxembourg law of 5 April 1993 on the financial services sector. Brown Brothers Harriman (Luxembourg) S.C.A. is a bank organised as a *société en commandite par actions* in and under the laws of the Grand Duchy of Luxembourg and maintains its registered office at 80 Route d'Esch, 1470 Luxembourg.

The depositary shall assume its functions and responsibilities as a fund depositary in accordance with the provisions of the Depositary Agreement and the law of 17 December 2010 concerning undertakings for collective investment, as amended by Directive 2014/91/EU, the Commission delegated regulation and applicable Luxembourg law, rules and regulations (the "Law") regarding (i) the safekeeping of financial instruments of the Fund to be held in custody and the supervision of other assets of the Fund that are not held or capable of being held in custody, (ii) the monitoring of the Fund's cash flow and the following oversight duties:

- (i) ensuring that the sale, issue, repurchase, redemption and cancellation of the units of the Fund (the "Units") are carried out in accordance with the General Fund Rules and applicable Luxembourg law, rules and regulations;
- (ii) ensuring that the value of the Units is calculated in accordance with the General Fund Rules and the Law;
- (iii) ensuring that in transactions involving the Fund's assets any consideration is remitted to the Fund within the usual time limits;
- (iv) ensuring that the Fund's income is applied in accordance with the General Fund Rules and the Law; and
- (v) ensuring that instructions from the Management Company did not conflict with the General Fund Rules and the Law.

In accordance with the provisions of the Depositary Agreement and the Law, the depositary may, subject to certain conditions and in order to effectively conduct its duties, delegate part or all of its safe-keeping duties with regard to financial instruments to one or more correspondents appointed by the depositary from time to time. A list of such correspondents (and, if applicable their sub-delegates shall be available via the website www.assenagon.com/Investor information and will be provided to unitholders upon request. Regarding potential conflicts that may arise as a result of the appointment of sub-custodians, Brown Brothers Harriman (Luxembourg) S.C.A. is acting solely in capacity as depositary of the fund. Brown Brothers Harriman (Luxembourg) S.C.A. is not performing any market activities with any of the sub-custodians that may conflict with its depositary functions (e.g. prime-brokerage) and has not identified any potential conflicts to this particular respect. Regarding conflicts of interest generally, Brown Brothers Harriman (Luxembourg)

S.C.A. is also acting as the Principal Agent of the fund and shall do so in this regard in compliance with Article 25 (2) of the UCITS V Directive 2014/91/EU: Brown Brothers Harriman (Luxembourg) S.C.A. does not carry out any tasks in respect of the Fund or the Management Company acting for the Fund that could create conflicts of interest between the Fund, the Fund's investors, the Management Company and it itself, unless there is a functional and hierarchical separation of the performance of its tasks as depositary from its tasks potentially in conflict with these and the potential conflicts of interest are duly calculated, managed, monitored and disclosed to the Fund's investors. Brown Brothers Harriman (Luxembourg) S.C.A. endeavours to avoid conflicts of interest through, for example, Chinese walls. If conflicts of interest nevertheless arise, procedural measures such as the dual control principle or suitable escalation mechanisms help to manage these conflicts lawfully and fairly. When selecting and appointing a correspondent, the depositary shall exercise all due skill, care and diligence as required by the Law to ensure that it entrusts the Fund's assets only to a correspondent who may provide an adequate standard of protection. The depositary's liability shall not be affected by any such delegation. The depositary is liable to the Fund or its unitholders pursuant the provisions of the Law.

The Law provide for a strict liability of the depositary in case of loss of financial instruments held in custody. In case of loss of these financial instruments, the depositary shall return financial instruments of identical type of the corresponding amount to the Fund unless it can prove that the loss is the result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. Unitholders are informed that in certain circumstances financial instruments held by the depositary with respect to the Fund will not qualify as financial instruments to be held in custody (i.e. financial instruments that can be registered in a financial instrument account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary). The depositary will be liable to the Fund or the unitholders for the loss suffered by them as a result of the depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the Law.

The depositary or the Management Company may, at any time, and subject to a written prior notice of at least three (3) months from either party to the other, terminate the appointment of the depositary, provided however that the termination of the depositary's appointment by the Management Company is subject to the condition that another depositary bank assumes the functions and responsibilities of a depositary bank. Upon termination of the Depositary Agreement, the Management Company shall be obliged to appoint a new depositary bank which shall assume the functions and responsibilities of a depositary bank in accordance with the General Fund Rules and the Law, provided that, as from the expiry date of the notice

until the date of the appointment of a new depositary bank by the Management Company, the depositary's only duties shall be to take such steps as are necessary to protect the interests of unitholders.

3. Investment advisor or Investment Manager

The Management Company can entrust one or more investment managers with the management of the assets of one or more sub-funds. Subject to the Management Company's supervision, the investment manager shall be responsible for determining how the assets of the sub-fund for which it was appointed are invested and re-invested. The investment manager must adhere to the investment policy and investment restrictions of the Fund and the corresponding sub-fund (as stipulated in Annex I).

The Management Company can commission investment advisors to provide investment advice for one or several subfunds. Investment advice involves assessing and recommending suitable investment vehicles. It does not, however, involve taking direct investment decisions.

Any investment managers appointed by the Management Company are specified in Annex I for the relevant sub-fund.

4. Paying agent in Luxembourg

Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH") has been appointed as the Fund's paying agent, meaning that it is obligated to pay out any distributions, as well as the redemption proceeds for redeemed units, and to make any other payments for orders received from Luxembourg.

5. Principal agent

The Management Company has appointed Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH") as the Fund's registrar, transfer agent and administrator (collectively referred to as the principal agent).

In this connection, BBH shall, in particular, assume responsibility for accounting, including the calculation of the Net Asset Value, and for preparing the annual and semi-annual reports for the Fund, for keeping any unit registers and for transferring units in connection with unit issue and redemption.

BBH also processes subscription, repurchase and redemption orders and makes other payments to Unitholders for Units in the Fund in accordance with the requirements set out in the Prospectus, the General Fund Rules and the annual and semi-annual reports.

6. Information agent, market makers

a) Information agent

Assenagon Asset Management S.A., Munich Branch, has been appointed as information agent.

As the information agent, Assenagon Asset Management S.A., Munich Branch, shall ensure that the following documents are available free of charge:

- The Prospectus and the key investor information;
- The General Fund Rules;
- All of the documents listed under "Publications".

Information for investors shall be published at www.assenagon.com insofar as this is required by law in the Federal Republic of Germany. Furthermore, the issue and redemption prices shall be published at www.assenagon.com on every trading day in the Federal Republic of Germany, and can be requested from the information agent.

b) Market makers

In addition, the Management Company can involve brokers in issue and redemption transactions relating to the fund units for their own account and at their own risk ("market makers"). This shall not affect the investors' rights vis-à-vis the Fund. Where applicable, the involvement of a market maker is mentioned in the Annex I that applies to the relevant sub-fund.

Regulations governing the relationships between the Management Company and the market makers must be set out in an agreement.

In addition, the following conditions must be met:

- (i) The market makers' role must be appropriately described in the Prospectus.
- (ii) The market makers may only act as counterparties in subscription and redemption transactions with the explicit consent of the investors that initiated the relevant transaction.
- (iii) The market makers may not settle the subscription and redemption orders submitted to them in line with terms and conditions that are less favourable than those that apply to orders executed directly by the relevant UCI.
- (iv) The market makers must inform the principal agent in Luxembourg of the orders executed by them on a regular basis if such orders refer to registered units. This ensures that (i) the investor data is updated in the unitholder register and (ii) the certificates on the registered units or the unit confirmations can be sent to the new investors from Luxembourg.

7. Distribution agents and sub-distribution agents

The Management Company can commission one or several distribution agents to distribute the fund units. The distribution agents can appoint one or several sub-distribution agents. Both the distribution agents and the sub-distribution agents will process any subscription, redemption or conversion orders that they receive either directly or

indirectly via the principal agent. This ensures that these orders are settled in line with the terms and conditions

that would have applied if the respective order had been processed directly by the principal agent for the Fund.

Fund, sub-funds, units, net asset value, special characteristics

8. Fund, sub-funds and unit classes

The **Assenagon Credit** investment fund described in this Prospectus (hereinafter referred to as the "Fund") is an investment fund with various sub-funds under Luxembourg law (*fonds commun de placement à compartiments multiples*). It has been set up for a unlimited period of time.

The Fund is covered by Part I of the Law of 17 December 2010 and qualifies as an undertaking for collective investment in transferable securities with-in the meaning of the latest version of Directive 2009/65/EC.

The Fund has been set up as an umbrella fund, meaning that the Management Company can offer investors one or several sub-funds at its own discretion. The Fund consists of the totality of the sub-funds. The Management Company is entitled to launch additional new sub-funds and/or to liquidate or merge one or several existing sub-funds at any time. The Fund's reference currency is the Euro.

The sub-fund investors shall hold a stake in the respective sub-fund with the same rights and pro rata to the number of units held in the sub-fund in each case.

With reference to Article 181 of the Law of 17 December 2010, each sub-fund shall be liable only for the debt, obligations and liabilities that relate to this particular sub-fund. This means that each individual sub-fund constitutes a separate entity for the unitholders.

The units can be issued as bearer and/or registered units. Bearer units will be issued via the Central Facility for Funds (CFF) procedure at Clearstream Luxembourg. If registered units are issued, these will be entered in the unit register by the register and transfer agent after approval by the Management Company. In this context, confirmations of entry into the unit register will be sent to the unitholders at the address specified in the unit register. Unitholders are not entitled to the delivery of physical securities, irrespective of whether issued bearer units or registered units. The types of units are specified in the relevant prospectus annex for the sub-fund.

By purchasing units, investors acknowledge the General Fund Rules of the respective sub-fund as set out in this Prospectus, as well as in the General Fund Rules and the applicable Special Fund Rules. The General Fund Rules do not provide for any Annual General Meeting of the investors.

Unitholders may directly or indirectly subscribe to units in the relevant sub-fund via a nominee within the scope of the relevant statutory provisions. Unitholders who make use of a nominee may at any time apply to be entered as the unitholder in the unit register themselves instead of the nominee.

To the extent legally permissible, the nominee will subscribe to and hold the units in their own name, but for the account of the beneficial unitholder. The nominee will send the unitholder confirmation of subscription.

The Management Company advises investors that they may only assert the entirety of their investors' rights directly against the Fund if the investors are entered in the unit holders' register themselves and in their own name. In cases where an investor has invested in the Fund via an intermediary which has made the investment in its own name but on the investor's behalf, the investor cannot necessarily assert all investors' rights against the Fund directly or in full. Investors are advised to inform themselves of their rights.

The Management Company is entitled to issue two or more unit classes within each sub-fund, the assets of which shall be invested collectively in accordance with the investment objective of the respective sub-fund. The unit classes can differ in terms of fee structure, the minimum investment amounts, the distribution policy, investor eligibility, the reference currency or other special characteristics to be determined by the Management Company in each case. The Net Asset Value per unit is calculated individually for each unit class issued. The different characteristics of the individual unit classes are described in Annex I.

9. Issue of units

The Management Company is entitled to issue sub-fund units at any time and without restrictions. The Management Company is entitled to issue one or several unit classes within the respective sub-fund.

The initial issue date and, where appropriate, the initial subscription period for new sub-funds/new unit classes shall be determined by the Management Company and specified in the respective Annex. The Management Company can decide, at its own discretion, prior to the launch date to withdraw the offer of the respective sub-fund. The Management Company can also decide to withdraw the offer of a new unit class. In addition, the Management Company reserves the right to stop issuing and selling units at any time, or to refuse to accept excessive unit subscriptions insofar as the latter could have a negative impact on adherence to the investment strategy, meaning that a detrimental effect on existing investors could not be ruled out. In both cases, investors who have already submitted a subscription order shall be duly informed, and any subscription amounts already transferred shall be paid back. In this respect, investors are reminded that these amounts shall not bear interest in the period

leading up to the repayment. The Management Company can also decide that, following the initial subscription, it will no longer be issuing units in the respective sub-fund or a certain unit class.

Initial subscriptions for units in the respective sub-fund or in a new unit class shall be settled at the initial issue price plus any front load, as described in the respective Annex.

Subsequent subscriptions will only be settled on the Valuation Dates described in item 16. Subsequent subscriptions will be settled on the Valuation Dates described in item 16 and stipulated in the respective Annex, and the units will be issued at a price that is based on the Net Asset Value per unit. The subscription price may increase by a front load referred to in the relevant Annex.

The front load is charged in favour of the distribution agents and/or the Management Company. The front load may be increased by fees or other charges levied in the respective countries of distribution. If the legislation of a particular country stipulates lower front loads, the distribution agents commissioned in that country can sell the units subject to the maximum front load permitted in that country. In derogation of the maximum front load stipulated in the respective Annex, the distribution agent and/or the Management Company can charge different, lower front loads.

To the extent that distribution amounts and/or redemption proceeds are used directly to purchase units in the respective sub-fund or another fund managed by the Management Company, a reinvestment discount set by the Management Company and/or the distribution agent may be granted.

The minimum initial and subsequent subscription amounts may vary depending on the unit class. The Management Company reserves the right not to apply minimum initial and subsequent subscription amounts at its own discretion and taking into account the principle of equal treatment of investors.

The issue price is payable to the depositary in the currency of the individual sub-fund or the relevant unit class within the time period specified in the relevant Annex.

The units are issued in the form and denomination determined by the Management Company and described in the relevant Annex without delay following the receipt of the issue price by the depositary. Fractional units with up to three decimal places can be issued.

Subscription orders must be submitted in accordance with the provisions set out in item 12.

Subscription orders will only be accepted if they have been filled out in full.

10. Redemption of units

The investors can demand redemption of all or some of their units be redeemed on the Valuation Dates stipulated in item 16. The redemption orders shall be considered legally binding and irrevocable, without exception. All of

the required documents for redemption, as well as any certificates that may have been issued, must be enclosed with the order.

Investors declare that they agree to units being redeemed either directly or indirectly via the principal agent.

The redemption price shall correspond to the Net Asset Value of the units in the respective sub-fund/the relevant unit class. The redemption price may be reduced by the redemption fee stipulated in the Annex, which is identical for all redemption orders settled by the principal agent on a certain Valuation Date, in favour of the relevant sub-fund.

The redemption price shall be paid within the period specified in the relevant Annex following the later of the applicable Valuation Date and the date on which all of the required documents have been received by the principal agent. The depositary is only obligated to make payment to the extent that no statutory provisions, e.g. foreign exchange law provisions or other circumstances that are beyond the depositary's control, prohibit or restrict the transfer of the redemption proceeds to the applicant's country.

The redemption price shall be paid in the reference currency of the respective sub-fund/relevant unit class. The redemption price can fall short of, or exceed, the price paid at the time of subscription or purchase.

The Management Company is entitled to buy back units at any time at its own discretion and, in particular, in line with the requirements of the provisions set out in item 14. In such cases, the investors are obligated to return the units.

In the event that the number or the total net asset value of units held by an investor in the relevant sub-fund or in a given unit class falls below the minimum net sub-fund assets stipulated by the Management Company in the relevant Annex as a result of a redemption order, the Management Company can decide that this order is to be considered an order for the redemption of the investor's entire unitholdings in the respective sub-fund/in this unit class or that the sub-fund is to be closed.

If, on a given Valuation Date, redemption orders are received accounting for more than 10% of the net fund assets, either individually or taken together with other applications received, the Management Company reserves the right, at its sole discretion and taking into account the interests of the remaining investors, to reduce the number of units for the individual redemption applications on a pro rata basis. If an order is not executed in full on this Valuation Date because the Management Company makes use of its right to make a pro rata reduction, it must be treated, as regards the part that has not been executed, as if the investor had submitted a further order for the next Valuation Date and, if necessary, also for the seven subsequent Valuation Dates at the most. These orders shall be given priority over orders received for the subsequent Valuation Dates submitted at a later date.

Soft Closing

The Management Company is authorised to restrict the issue, redemption and conversion of units of a sub-fund in terms of transaction volume if and for as long as circumstances prevail that make such restriction necessary, in particular if there is a lack of liquidity on the financial markets. The Management Company shall duly inform the investors of the soft closing. If the issue of units in the Fund is restricted, the Management Company may decide, at the investors' request, that units from redemptions by existing or new investors may be bought and sold via a secondary market. The price of units traded on the secondary market depends, inter alia, on market supply and demand, other factors such as the prevailing conditions for the financial markets and companies, and economic and political conditions. In addition, such unit orders may result in costs over which the Management Company has no influence.

11. Conversion of units

Subject to the satisfaction of the relevant eligibility criteria, investors can have the Management Company exchange their units in the relevant sub-fund, either in full or in part, for units in a different unit class, a different sub-fund or a different fund managed by the Management Company. The units shall be exchanged on the basis of the Net Asset Value for the relevant unit class/sub-fund, which is calculated on the Valuation Date following receipt of the conversion order. In this respect, a conversion fee can be charged in favour of the distribution agent. This shall be set out, where applicable, in the relevant Annex.

12. Order acceptance regulations

Subscription, conversion and redemption orders shall be accepted by the principal agent and by the distribution agents and sub-distribution agents, and shall be settled based on an unknown Net Asset Value.

Subscription, conversion and redemption orders must specify the number of fund units, unless the corresponding Annex contains a provision to the contrary.

Subscription, conversion and redemption orders that have been filled out in full shall be settled in line with the order acceptance regulations set out in Annex 1 to the Prospectus. If subscription, conversion or redemption orders are processed via the distribution agents and sub-distribution agents, or by paying agents, different procedures and deadlines may apply; nevertheless, the aforementioned deadlines that apply in respect of the principal agent shall remain unchanged. The full terms and conditions for subscription, conversion and redemption of fund units are available via the principal agent, or via the respective distribution agents or sub-distribution agents, or via the relevant paying agent.

After processing the subscription or redemption order, the Management Company prepares an order confirmation on

a permanent data storage medium and sends it to the investor, unless this has already been done by the distribution agent or a sub-distribution agent.

The relevant order acceptance times are set out in the overview of the respective sub-fund.

13. Exclusion of market timing

The Management Company shall not permit any market timing practices for the Fund and, if it suspects that market timing practices are being utilised, it can take suitable measures to protect the remaining investors in the sub-fund. This means that the Management Company reserves the right to reject, revoke or suspend subscription or conversion orders if an investor is suspected of engaging in market timing practices. In such cases, the Management Company reserves the right to take appropriate legal action against the investor in question.

Payments received for subscription orders that are not executed shall be paid back by the depositary without any interest accruing on the amount paid.

14. Restrictions on the issue of units

The information contained in this Prospectus may only be disseminated, and the units described in this Prospectus only offered by way of public distribution in countries in which the Fund is authorised for distribution.

The Management Company can restrict or prevent unit ownership by certain individuals if it takes the view that such ownership could have a detrimental impact on the individual sub-fund, or could violate Luxembourg or foreign laws or other rules and regulations, or if this could result in the sub-fund in question becoming subject to the laws (for example the tax laws) of a country other than Luxembourg.

In particular, the units are not intended for distribution in the United States of America or to US citizens. By way of example, natural persons subject to tax in the US include individuals who

- a) were born in the US or one of its territories/areas subject to its jurisdiction,
- b) are naturalised citizens (e.g. green card holders),
- c) were born abroad as the children of a US citizen,
- d) are ordinarily resident in the US without being a US citizen or
- e) are married to a US citizen.

By way of example, legal entities subject to tax in the US include

- a) Companies and corporations organised under the laws of one of the 50 US federal states or the District of Columbia,
- b) a company or partnership organised under an "Act of Congress", or
- c) a pension fund formed as a US trust.

In addition, the units are not intended for distribution to the following investors ("non-permitted investors"):

- a) specified US persons,
- b) non-participating foreign financial institutions ("non-participating FFIs") and
- c) passive non-financial foreign entities with one or more substantial US owners ("non-financial foreign entities" or "NFFEs" with one or more substantial US owners),

in each case in accordance with the IGA between Luxembourg and the USA or in accordance with the provisions of FATCA.

Distribution agents that act as a nominee must be FATCA-compliant, e.g. as a "reporting FFI", a "non-reporting FFI" pursuant to a Model 1 IGA, a "participating FFI", a "registered deemed compliant FFI", a "non-registering local bank" or a "restricted distributor" pursuant to the IGA or pursuant to the FATCA rules. If the status of the distribution agent changes, it must inform the Management Company of this in writing within 90 days.

The Management Company can reject a subscription order at any time at its own discretion. Furthermore, the Management Company can buy back units held by investors who are excluded from purchasing or holding units, in return for payment of the redemption price, at any time.

15. Savings plan

Savings plans allow investors to accumulate assets in the long term. Investors make regular (e.g. monthly) payments of a certain amount which are then used to buy more units when sub-fund prices are low, and fewer when sub-fund prices are higher. This allows lower average purchase prices (cost average effect) to be achieved in the course of time.

16. Calculation of the net asset value

The unit value for the respective sub-fund/unit class is calculated in the relevant reference currency in accordance with the provisions set out in Article 9 of the General Fund Rules. The unit value for the respective sub-fund is calculated on every banking day in Luxembourg and Frankfurt am Main, with the exception of 24 and 31 December of each year, ("Valuation Date"), unless the Annex for the respective sub-fund contains regulations to the contrary. "Banking day" means any day on which the banks in Luxembourg and Frankfurt am Main are open for business. The Management Company can decide to calculate the unit value on 24 and 31 December of a given year, although the values calculated shall not be considered unit value calculations on a Valuation Date within the meaning of the sentence above. This means that investors cannot demand the issue and/or redemption of units on the basis of a Net Asset Value that was calculated on 24 and 31 December of a given year.

In order to determine the unit value, the value of the assets belonging to a sub-fund/to the unit class, minus the sub-fund/unit class liabilities, is calculated on each Valuation Date ("Net Sub-Fund Assets"). This amount is divided by the number of units in the sub-fund/unit class outstanding on the Valuation Date and then rounded to two decimal places ("Net Asset Value").

The respective Net Sub-Fund Assets are calculated based on the following principles:

- a) Assets officially listed on a stock exchange are valued at the last available price. If an asset is listed on several stock exchanges, the last available price on the stock exchange that is the principal market for the asset in question is used.
- b) Assets that are not listed on the stock exchange, but are traded on another regulated, recognised market that is open to the public and operates regularly, are valued at a price which must be no lower than the bid price and no higher than the offer price at the time of valuation and which the Management Company deems to be the best possible price at which the assets can be sold.
- c) Unlisted derivatives are valued on a day-to-day basis using a verifiable procedure to be determined by the Management Company. Pricing of these derivatives is based on standard criteria verifiable by the auditor.
- d) If the prices referred to under a) and b) above are not in line with the market rates, or if an asset is not listed or traded on a stock exchange or another regulated market, or if, in the case of assets that are listed or traded on a stock exchange or another regulated market, the prices calculated pursuant to the provisions set out under a) or b) do not appropriately reflect the fair value of the respective assets, these assets, as well as all other assets, shall be valued at their market value as determined by the Management Company in good faith and based on valuation rules that are generally accepted and can be verified by auditors.
- e) The pro rata interest accrued on assets shall be included to the extent that it is not expressed in the quoted price.
- f) The liquidation value of forwards or options that are not traded on stock exchanges or other organised markets shall be calculated in line with the principles set out by the Management Company on a basis that is applied consistently for all different types of contracts. The liquidation value of futures or options that are traded on stock exchanges or other organised markets shall be calculated based on the last available settlement prices for such contracts on the stock exchanges or other organised markets on which these futures or options are traded by the Fund; if a future, forward or an option contract cannot be liquidated on a day for which the Net Asset Value is calculated, the calculation shall be based on such value as the management may consider fair and reasonable.

- g) Cash and cash equivalents shall be valued at their nominal value plus accrued interest. Time deposits can be valued at the nominal value plus accrued interest, provided that a corresponding contract between the financial institution responsible for the safe-keeping of the time deposits and the Management Company states that these time deposits can be terminated at any time and that, in the event of termination, the realisation value is equal to this nominal value plus accrued interest.
- h) Target fund units are valued at the Net Asset Value most recently calculated and available. If the redemption of investment units has been suspended, or if no redemption prices are determined, the units, as well as all other assets, shall be valued at the respective realisable value as determined by the Management Company in good faith and based on the realisable value that would most likely be calculated.
- i) All assets not denominated in the fund currency shall be converted into the relevant fund currency at the last available exchange rate. Any gains or losses from foreign exchange transactions shall be added or subtracted.
- j) All other securities or other assets shall be valued at the fair realisable value as determined by the Management Company in good faith and based on a procedure stipulated by the latter.

The Management Company can choose to allow other valuation methods at its own discretion if it deems this appropriate in the interest of a more adequate valuation of a fund asset.

If the Management Company takes the view that the Net Asset Value calculated on a certain Valuation Date does not reflect the fair value of the sub-fund units, or if there have been considerable fluctuations on the relevant stock exchanges and/or markets since the Net Asset Value was calculated, the Management Company can opt to update the Net Asset Value on the very same day. In such cases, all subscription and redemption orders received for this Valuation Date shall be executed based on the Net Asset Value that has been updated taking into account the principles of good faith.

The respective Net Sub-Fund Assets may be reduced by distributions paid to the investors of the relevant sub-fund.

In the case of unit classes, the resulting unit value shall be calculated separately for each unit class based on the criteria set out below. The composition and allocation of the assets shall always be performed for the sub-fund as a whole.

17. Suspension of the issue, conversion and redemption of units, and suspension of the calculation of the net asset value

The Management Company is authorised to suspend the calculation of the Net Asset Value, as well as the issue, conversion and redemption of units, for a limited period if, and for as long as, circumstances prevail which make such suspension necessary.

This is the case, in particular

- a) during a period in which a stock exchange or another regulated, recognised market that is open to the public and operates regularly, on which a considerable part of the fund assets are listed or traded, is closed (except on customary weekends or public holidays) or trading on this stock exchange or market has been suspended or restricted;
- b) in emergency situations in which the Management Company cannot dispose of fund assets or in which the Management Company cannot freely transfer the consideration for investment purchases or sales, or cannot calculate the Net Asset Value properly; and/or
- c) during a period of disruption affecting the means of communication usually employed, or aids used to calculate the Fund's Net Asset Value or prices on the stock markets or on the markets on which a considerable portion of the Fund's assets are listed/traded
- d) During a period of temporary suspension of the calculation of the net asset value of a UCITS or UCI (or a sub-fund of one of these), in which the Fund is invested; and/or
- e) During a period in which the Board of Directors considers it impossible to value or sell assets due to particular circumstances.

The Management Company shall ensure that the investors are duly informed of the suspension. Investors who have submitted an order for the subscription, conversion or redemption of units for which the calculation of the Net Asset Value has been suspended shall be informed without delay of the start and – wherever possible – the anticipated end of the suspension period. If the issue of units in the Fund is suspended, the Management Company may decide, at the investors' request, that units from redemptions by existing or new investors may be bought and sold via a secondary market. The price of units traded on the secondary market depends, inter alia, on market supply and demand, other factors such as the prevailing conditions for the financial markets and companies, and economic and political conditions. In addition, such unit orders may result in costs over which the Management Company has no influence.

General investment policy, investment objectives, general risks

18. Investment objectives and investment policy

The Management Company shall determine the investment objectives and investment policy of each sub-fund. These are set out in detail in the Annex to this Prospectus that applies for the respective sub-fund. The investment objectives and the investment policy of each sub-fund shall be implemented in accordance with the investment principles and investment restrictions set out under item 19, and in line with the principle of risk diversification.

The Management Company can opt to make guarantees for particular sub-funds/unit classes. Further details are set out in the relevant Annex.

19. General investment principles and investment restrictions

The following definitions apply:

"Non-member state": A non-member state, within the meaning of this Prospectus, is any European country that is not a member of the European Union, as well as any country in America, Africa, Asia, Australia or Oceania.

"Money market instruments":

Instruments that are usually traded on the money market, are liquid, and the value of which can be precisely determined at all times.

"Regulated market":

A market as defined in Article 4, item 21 of Directive 2014/65/EU on markets in financial instruments.

"Law of 17 December 2010":

Law of 17 December 2010 on Undertakings for Collective Investment (including any subsequent amendments and supplements).

"UCI":

Undertaking for collective investment.

"UCITS":

Undertaking for collective investment in transferable securities which is subject to Directive 2009/65/EC.

"Directive 2009/65/EC":

Council Directive 2009/65/EC of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) (including any subsequent amendments).

"Directive 2014/65/EU":

Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments (including any subsequent amendments).

"Securities":

- Shares and other securities equivalent to shares ("shares").
- Bonds and other forms of securitised debt ("debt securities").
- Any other negotiable securities which carry the right to acquire any such securities by subscription or

exchange, with the exception of the techniques and instruments set out under item 19.5.

The investment policy of each sub-fund is subject to the following regulations and investment restrictions:

19.1 *The investments made by a sub-fund can consist of the following assets*

- a) Securities and money market instruments that are listed or traded on a regulated market;
- b) Securities and money market instruments that are traded on another regulated, accepted and duly operated market that is open to the public and in a member state of the European Union;
- c) Securities and money market instruments that are approved for official listing on a stock exchange in a non EU-member state, or which are traded on another regulated market in that country which is accepted, open to the public and is duly operating;
- d) Newly issued securities and money market instruments, provided that the terms of issue include an undertaking that application will be made for official listing on a stock exchange or to trading on a regulated market within the meaning of the provisions set out above under 19.1 a) to c), and that such admission is secured within one year of the issue at the latest;
- e) Shares or units in UCITS authorised pursuant to Directive 2009/66/EC and/or other UCI within the meaning of Article 1 (2) lit. (a) and lit. (b) of Directive 2009/65/EC which have their registered office in a member state of the European Union or a non-member state, provided that
 - these other UCI were authorised in accordance with legal provisions that subject them to official supervision which the Luxembourg supervisory authority that is responsible for the financial sector (the "CSSF") deems to be equivalent to supervision under EU law, and that there is a sufficient guarantee that the authorities will cooperate;
 - the level of protection offered to investors in the other UCI is equivalent to the level of protection offered to investors in a UCITS and, in particular, the provisions governing the segregation of assets, borrowing, the granting of loans and the short selling of securities and money market instruments are equivalent to the requirements set out under Directive 2009/65/EC;
 - the business activities of the other UCI are subject to interim and annual reporting that allows investors to assess the assets and liabilities, income and transactions during the period under review;
 - the organisational documents of the UCITS or this other UCI in which shares/units are to be acquired stipulate that it may not invest more than 10% of

- its assets in shares/units in other UCITS or other UCI.
- f) Deposits repayable on demand or deposits with the right to be withdrawn, with a term of 12 months at the most, made with credit institutions, provided that the credit institution in question has its registered office in a member state of the European Union, or, in the event that it has its registered office in a non-member state, provided that it is subject to supervisory regulations which the CSSF deems equivalent to those under EU law.
- g) Derivative financial instruments ("derivatives"), i.e. in particular, options and futures, as well as swap transactions, including equivalent instruments that are settled in cash, which are traded on one of the regulated markets referred to under a), b) and c), and/or derivative financial instruments that are not traded on a stock exchange ("OTC derivatives"), provided that
- the underlyings are either instruments within the meaning of this item 19.1 a) to h), or financial indices, interest rates, exchange rates or currencies;
 - the counterparties in transactions involving OTC derivatives are institutions subject to official supervision belonging to the categories authorised by the CSSF and
 - the OTC derivatives are subject to a reliable and verifiable valuation on a day-to-day basis, and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value on the Fund's initiative.
- h) Money market instruments that are not traded on a regulated market and do not fall under the definition set out above, if the issuer or issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that they are
- issued or guaranteed by a central, regional or local authority or central bank of a member state, the European Central Bank, the European Union or the European Investment Bank, a non-member state or, in the case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more member states belong, or
 - issued by a company whose securities are traded on the regulated markets referred to under (a), (b) and (c) above, or
 - issued or guaranteed by an establishment subject to official supervision, in accordance with criteria defined by EU law, or by an institution which is subject to and complies with supervisory regulations which the CSSF deems to be at least as stringent as those laid down by EU law; or
- issued by other bodies belonging to the categories authorised by the CSSF provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent and provided that the issuer is a company whose equity amounts to at least EUR 10 million (EUR 10,000,000) and which presents and publishes its annual accounts in accordance with Directive 78/660/EEC, or is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.
- 19.2 In addition, the individual sub-fund can**
- a) invest up to 10% of its net assets in securities and money market instruments other than those set out under 19.1;
 - b) hold cash and cash equivalents;
 - c) borrow for a short period of time in an amount corresponding to 10% of its net assets. Cover transactions in connection with the sale of options or with the purchase or sale of forward or futures contracts shall not be deemed to constitute borrowing within the meaning of this investment restriction;
 - d) purchase currencies as part of a "back-to-back" loan.
 - e) invest in other sub-funds of the Fund (if the Fund consists of more than one sub-fund) in accordance with the conditions set out in Article 181 (8) of the Law of 17 December 2010. Please note that the target sub-fund in turn is not allowed to invest in the sub-fund which acquired units in the target fund (ban on circular investments) and that, according to its organisational documents, the target sub-fund whose units are to be acquired may invest a maximum total of 10% of its assets in units in the Fund's other target sub-funds.
- 19.3 Furthermore, the sub-fund shall adhere to the following investment limits**
- a) Individual sub-funds may invest no more than 10% of their net assets in securities or money market instruments issued by the same issuer. Sub-funds may invest no more than 20% of their net assets in deposits with the same institution. The counterparty default risk in transactions involving OTC derivatives executed by a sub-fund may not exceed 10% of that sub-fund's net assets if the counterparty is a credit institution within the meaning of 19.1 f). In all other cases, the limit is 5% of the sub-fund's net assets.
 - b) The total value of the securities and money market instruments issued by issuers in which the sub-fund invests more than 5% of its net assets in each case, may not exceed 40% of the value of that sub-fund's net assets. This restriction shall not apply to deposits and

transactions involving OTC derivatives executed with financial institutions that are subject to official supervision.

Notwithstanding the individual limits specified in 19.3 a), a sub-fund may invest no more than 20% of its net assets, with the same institution, in a combination of

- securities or money market instruments issued by this institution and/or
- deposits with this institution and/or
- transactions involving OTC derivatives executed with this institution.

c) The limit specified in 19.3 a) sentence 1 amounts to a maximum of 35% if the securities or money market instruments are issued or guaranteed by a member state of the European Union or its political sub-divisions, by a non-member state or by a public international body to which at least one member state of the European Union belongs.

d) The limit specified in 19.3 a) sentence 1 amounts to a maximum of 25% for certain bonds, if these are issued by a credit institution with its registered office in a member state of the European Union which is subject to special official supervision due to statutory provisions on the protection of the holders of these bonds.

In particular, the proceeds from the issue of these bonds must, in line with the statutory provisions, be invested in assets that sufficiently cover the resulting liabilities for the entire term of the bonds, and which, in the event of default by the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.

If a sub-fund invests more than 5% of its net assets in bonds, within the meaning of the sub-paragraph above, that are issued by the same issuer, the total value of these investments may not exceed 80% of the value of the net assets of the sub-fund in question.

e) The securities and money market instruments referred to under 19.3 c) and d) shall not be counted towards the 40% investment limit provided for in 19.3 b). The limits set out in 19.3 a), b), c) and d) may not be combined, and thus investments made in securities or money market instruments issued by the same issuer or in deposits with this issuer or in derivatives issued by the latter pursuant to 19.3 a), b), c) and d) may not exceed a total of 35% of the net assets of the sub-fund.

Companies belonging to a group of companies with respect to the preparation of consolidated accounts within the meaning of Directive [2013/34/EU](#) or in accordance with recognised international accounting standards, shall be considered as a single issuer when the investment limits provided for under items a) to e) are calculated.

A sub-fund may cumulatively invest up to 20% of its net assets in securities and money market instruments within one group.

f) Without prejudice to the limits stipulated under 19.3 k), l) and m) below, the limits stipulated in 19.3 a) to e) are raised to a maximum of 20% for investments in shares and/or debt securities issued by the same issuer if the objective of the sub-fund's investment strategy is to replicate a particular equity or debt securities index that is recognised by the CSSF.

This is subject to the proviso that

- the composition of the index is sufficiently diversified;
- the index is an adequate benchmark for the market to which it refers;
- the index is published in an appropriate manner.

The Management Company confirms that the relevant Sub-Fund will maintain at all times an independent investment policy, even in the context of a replication within the said meaning, and that the Management Company or, where applicable, the Investment Manager appointed for the relevant Sub-Fund will as part of this investment policy be at all times able to differ from a too close replication of the relevant index or benchmark in the interest of the investors, in order to avoid "*closet tracking*" or "*index hugging*" as described in the ESMA statement dated 2 February 2016 on "*Supervisory work on potential closet index tracking*" (see as well the communiqué of the CSSF dated 28 July 2017).

g) The limit stipulated under 19.3 f) is raised to 35% where this is justified in light of extraordinary market conditions, in particular on regulated markets where certain securities or money market instruments are highly dominant. Investments may be made up to this limit with a single issuer only.

h) Notwithstanding the provisions set out under 19.3 (a) to (e), the individual sub-funds may, in line with the principle of risk diversification, invest up to 100% of their net assets in securities and money market instruments from different issues that are issued or guaranteed by a member state of the European Union or its political sub-divisions, or by a member state of the OECD or by public international bodies of which one or more member states of the European Union are members, or by other states recognised by the CSSF (Brazil, Singapore, Russia, Indonesia and South Africa), provided that (i) the investors in the Fund enjoy the same protection as investors in funds that adhere to the investment limits set out in 19.3 a) to g), (ii) such securities were issued in at least six different issues and (iii) no more than 30% of the net assets of the sub-fund are invested in securities from the same issue.

- i) A sub-fund may acquire shares/units in other UCITS and/or other UCI within the meaning of 19.1 e) provided that no more than 20% of its net assets are invested in shares/units in the same UCITS or another UCI.

For the purpose of the application of this investment limit, each sub-fund of an umbrella fund within the meaning of Article 181 of the Law of 17 December 2010 is to be considered as a separate issuer, provided that the principle of segregation of the obligations of the various sub-funds vis-à-vis third parties is ensured.

- j) Investments made in shares/units of UCI other than UCITS may not in aggregate exceed 30% of the net assets of a sub-fund.

If a sub-fund has acquired shares/units of UCITS and/or other UCI, the assets of the respective UCITS or other UCI do not have to be combined for the purposes of the limits specified in 19.3 a) to e).

If the sub-fund purchases shares/units in other UCITS and/or other UCI which are managed, be it directly or indirectly, by the same management company, or by another company with which the management company is linked by common management or control, or by a substantial direct or indirect holding, that management company or other company may not charge subscription or redemption fees on account of the sub-fund's investment in the units of such other UCITS and/or other UCI.

Furthermore, in the event that the sub-fund invests a substantial proportion of its net assets in shares/units in other UCITS and/or other UCI, the maximum amount of the share of management fees that may be charged both to the fund assets and to the UCITS and/or other UCI in which the sub-fund invests, shall be set out in the annual report of the Fund.

- k) For all of the UCITS managed by it, the Management Company may not acquire shares carrying voting rights to an extent that would allow it, on the whole, to exercise significant influence on the management of the issuer.
- l) Furthermore, a sub-fund may not, all in all, acquire more than:
- 10% of the non-voting shares of the same issuer;
 - 10% of the bonds issued by the same issuer;
 - 25% of the shares/units in the same UCITS and/or other UCI;
 - 10% of the money market instruments issued by the same issuer.

The limits set out in the second, third and fourth indent may be disregarded at the time of acquisition if the gross amount of the bonds or the money market instruments, or the net amount of the shares/units issued, cannot be calculated.

- m) The provisions set out above under 19.3 k) and l) are not applicable with respect to:

- securities and money market instruments that are issued or guaranteed by a member state of the European Union or its political sub-divisions;
- securities and money market instruments that are issued or guaranteed by a non-member state;
- securities and money market instruments that are issued or guaranteed by public international bodies of which one or more member states of the European Union are members;
- shares held in the capital of a company incorporated in a non-member state of the European Union, (i) which invests its assets mainly in securities issued by issuers having their registered office in that state, (ii) where under the legislation of that state, such a holding represents the only way in which securities from issuers in that state can be acquired, and (iii) insofar as the company adheres to limits set out above under 19.3 a) to e) and 19.3 i) to l) when investing.

- n) A sub-fund may not acquire either precious metals or certificates representing them.
- o) A sub-fund may not invest in real estate, although investments in asset-backed securities, or interest accrued thereon, or investments in securities issued by companies that invest in real estate and interest accrued thereon are permitted.
- p) Neither the Management Company nor the depositary may grant loans or guarantees to third parties at the expense of the respective sub-fund assets, although this investment restriction shall not prevent the sub-fund from investing its sub-fund assets in securities, money market instruments or other financial instruments within the meaning of 19.1 e), g) and h) above that have not been fully paid up.
- q) Neither the Management Company nor the depositary may engage in short sales of securities, money market instruments or other financial instruments referred to in 19.1 e), g) and h) above for the account of the individual sub-fund.

19.4 Notwithstanding any provisions to the contrary contained herein

- a) A sub-fund does not have to adhere to the limits set out above under 19.1 to 19.3 when exercising subscription rights attaching to the securities or money market instruments which form part of its assets;
- b) and, notwithstanding its obligation to ensure compliance with the principle of risk diversification, the individual sub-fund can derogate from the provisions set out above under 19.3 a) to j) during a period of six months after its authorisation by the CSSF;

- c) if it exceeds these provisions for reasons beyond its control or as a result of the exercise of subscription rights, the sub-fund must then adopt as a priority objective for its sales transactions, to rectify the situation, taking due account of the interests of the investors;
- d) in the case that an issuer forms a single legal entity together with several sub-funds where the assets of a sub-fund are exclusively reserved for the investors in this sub-fund and for the creditors whose claim has arisen in connection with the creation, operation or liquidation of the sub-fund, each sub-fund is to be considered as a separate issuer for the purpose of applying the provisions on risk diversification set out in 19.3 a) to g), as well as in 19.3 i) and j).

The Management Company is entitled to set out additional investment restrictions for the individual sub-funds insofar as this is necessary in order to comply with the laws and regulations in countries in which the units in a sub-fund are offered or sold.

19.5 Other techniques and instruments

a) General provisions

To ensure the efficient management of the respective sub-fund assets, or the maturity or risk management of the sub-fund assets, a sub-fund may use derivatives and other techniques and instruments. Item 19.5 and item 20 of this prospectus include data provided for in Section B of the Annex of the Securities Financing Transactions Regulation EU 2015/2365. More detailed and additional information, which needs to be disclosed to investors according to the Securities Financing Transactions Regulation will be provided to investors upon request.

Despite the Fund being authorized to use securities financing transactions and total return swaps, it is not currently the intention of the Fund to use external repo/reverse repo or securities lending agents for such techniques and instruments. Should the Fund intend to use them, the prospectus will be updated in order to disclose the costs of such agents.

If these transactions relate to the use of derivatives, the terms and conditions and the limits must be in line with the provisions set out in 19.1 to 19.4 above.

The Management Company only trades OTC derivatives and securities lending, repurchase and buy-back transactions with credit institutions and investment firms which comply with the requirements set out in 19.1 g) above and which the Management Company considers suitable in accordance with its risk management procedure. In particular, such counterparties must be based in an EU or OECD country and must have an investment grade rating of a recognised rating agency. Trading with counterparties without rating is possible, provided the Management Company considers the

credit rating as equivalent. Information about the counterparties used can be requested from the Management Company at any time.

Furthermore, the provisions on risk management procedures for derivatives set out in 19.6 must be taken into account. Derivatives can be used for hedging and/or investment purposes, as described in further detail in the applicable Annex.

The individual sub-fund may not, under any circumstances, deviate from the investment objectives set out in the Annex as regards transactions involving derivatives or other techniques and instruments.

b) Securities loans, repurchase agreements

In accordance with Luxembourg law, and in particular CSSF Circular 08/356, the Fund can employ other techniques and instruments based on securities and money market instruments. The Fund is entitled to conclude securities lending, repurchase and buy-back transactions for the purpose of efficient portfolio management, increasing returns and/or hedging. The Fund will not conclude any margin lending transactions. All securities, money market instruments and investment units held in the Fund may be transferred to third parties as part of securities lending, repurchase and buy-back transactions. By the same token, securities, money market instruments and investment units may be accepted into the Fund portfolio within the relevant investment limits through securities lending, repurchase and buy-back transactions. The expected portion of the portfolio which becomes the object of securities lending, repurchase and buy-back transactions will be mentioned in the Annex for the relevant sub-fund. The Fund may incur direct and indirect costs through securities lending, repurchase and buy-back transactions, which will always be concluded considering the best execution policy of the Fund, e.g. trading costs or costs for outsourcing management of the collateral pool. These costs will be borne by the Fund and paid to the respective counterparty or service provider, which are independent from the Fund and Assenagon. All remaining income will flow into the Fund.

c) Collateral management

The Fund accepts collateral in connection with securities lending, repurchase and buy-back transactions and OTC derivatives according to Article 4 of Delegated Regulation (EU) 2016/2251 and the associated maximum attributable amounts as per Annex II of Delegated Regulation (EU) 2016/2251.

Currently the Fund uses the below mentioned types of collateral with the associated maximum attributable amounts; the Management Company reserves the right to use other types of collateral and attributable amounts provided it is compliant with Delegated Regulation (EU) 2016/2251:

Collateral Type	Allowed Currency	Attributable amount (maximum of)
Monetary amounts	EUR, USD, GBP	100%
Government bonds issued by members of the Eurozone, as well as Sweden, Australia, Canada, the USA, the UK. Long-Term Rating (S&P) at least AA- or equivalent, Clearstream-able, residual maturity of less than 1 year	EUR, USD, GBP, CAD, AUD	99.5%
Government bonds issued by members of the Eurozone, as well as Sweden, Australia, Canada, the USA, the UK. Long-Term Rating (S&P) at least AA- or equivalent, Clearstream-able, residual maturity of between 1 and 5 years	EUR, USD, GBP, CAD, AUD	98%
Government bonds issued by members of the Eurozone, as well as Sweden, Australia, Canada, the USA, the UK. Long-Term Rating (S&P) at least AA- or equivalent, Clearstream-able, residual maturity of more than 5 years	EUR, USD, GBP, CAD, AUD	96%

The Management Company has implemented a collateral policy for the Fund. The collateral policy is adapted to all the types of asset accepted as collateral and meets the criteria below.

- a) Liquidity: All non-cash collateral accepted should be highly liquid and be traded at a transparent price on a regulated market or within a multilateral trading facility, so that it can be sold quickly at a price close to the valuation ascertained prior to the sale. The collateral accepted should also meet the requirements of Article 56 of the UCITS Directive.
- b) Valuation: Collateral accepted should be valued at least once each trading day based on market prices in accordance with the principles set out in the "Calculation of the net asset value" section. Assets which display high price volatility should only be accepted as collateral if suitable conservative haircuts are applied.
- c) Credit rating of the issuer: The issuer of the collateral accepted should have a high credit rating.
- d) Correlation: The collateral accepted by the Fund should have been issued by an entity which is independent of the counterparty and is not highly correlated with the performance of the counterparty.
- e) Diversification of collateral (asset concentration): Appropriate diversification with regard to countries, markets and issuers is to be observed for the collateral. The criterion for appropriate diversification of issuer concentration is deemed to have been met if, in the case of efficient portfolio management or in the case of transactions with OTC derivatives, the Fund receives a collateral basket from a counterparty where the maximum exposure

to a particular issuer is 20% of the Net Asset Value. If a UCITS has differing counterparties, the different collateral baskets should be aggregated in order to calculate the 20% limit for exposure to a single issuer. Notwithstanding this sub-item, the Fund can be fully hedged by various securities and money market instruments that are issued or guaranteed by a member state specified above in the table or one or more of its political sub-divisions, by a member state of the OECD or by a public international body to which at least one member state belongs. In this case, the Fund is to hold securities that have been issued through at least six different issues, with no more than 30% of the Fund's net asset value being invested in securities from a single issue.

- f) Risks in connection with collateral management, e.g. operational and legal risks, are to be determined, managed and reduced by risk management.
- g) If rights are transferred, collateral accepted should be held in safe custody by the depositary of the Fund. For other types of collateral agreements, the collateral can be held in safe custody by a third party which is subject to supervision and does not have any type of connection with the collateral provider.
- h) If assets are transferred to third parties in connection with derivatives and securities lending, repurchase and buy-back transactions, the type of safe custody for the assets lies within the discretion of the third party.
- i) The Fund should have the opportunity to realise the collateral accepted at any time without referring to the counterparty or requiring counterparty authorisation.
- j) Non-cash collateral accepted should not be sold, reinvested or pledged.
- k) Cash collateral accepted should only
 - be held as deposits repayable on demand with entities in compliance with Article 50 letter f of the UCITS Directive;
 - be invested in high-quality government bonds;
 - be used for reverse repo transactions provided these are transactions with credit institutions which are subject to supervision and the Fund can call in the full amount of money accumulated at any time;
 - be invested in money market funds with a short maturity structure in accordance with the definition in CESR's guidelines on a common definition of European money market funds.

Any collateral received and newly invested cash collateral must be appropriately diversified. The general risk information relating to market, credit,

counterparty and liquidity risk also applies to re-invested cash collateral.

d) Total return swaps

Total return swaps can track the performance of single securities or single indices or baskets of securities or indices 1:1. All types of Fund assets may be the object of total return swaps. The maximum leverage from the use of total return swaps and the actual leverage anticipated from the use of total return swaps are stated in the Annex for the relevant sub-fund. The composition of the basket underlying the total return swaps is determined solely by the Management Company and can be requested from the Management Company at any time. The Fund may incur direct and indirect costs through total return swap transactions, which will always be concluded considering the best execution policy of the Fund, e.g. trading costs. These costs will be borne by the Fund and paid to the respective counterparty, which is independent from the Fund and Assenagon. All remaining income will flow into the Fund.

e) Financial indices

Information about the financial indices currently used, their constituents, calculation and weighting adjustment frequency and any costs arising from adjusting the weighting within the indices can be requested from the Management Company at any time.

Sub-Funds of the Fund may, to the extent this is set out in their respective Appendix, (i) benefit from exposure to the performance of an index as benchmark, or (ii) use such an index in order to measure the performance of the relevant Sub-Fund.

In this context, the Management Company will ensure at all times that it only uses indices or benchmarks within the framework of the respective Appendix specific to the relevant Sub-Fund that are:

- (i) indices or benchmarks within the meaning of article 3 of the benchmark regulation (EU/2016/1011, the "**Benchmark Regulation**"); and
- (ii) offered by an administrator within the meaning of the Benchmark Regulation listed in the public register of administrators and benchmarks established and maintained by ESMA in accordance with article 36 of the Benchmark Regulation: <https://registers.esma.europa.eu/publication/>; or
- (iii) indices or benchmarks that
 - a) do not fall within the scope of the Benchmark Regulation and, for example, are only used for internal purposes, such as in the context of the risk management of a fund for the calculation of the relative value-at-risk; or
 - b) are excluded under the Benchmark Regulation.

The Management Company has prepared a written plan detailing the measures to be taken when a benchmark changes or is no longer provided. This plan is available to investors free of charge upon request.

19.6 Risk management procedure

A risk management procedure will be applied for the Fund, allowing the Management Company to monitor and measure the risk associated with the investment positions of the individual sub-funds, as well as their respective proportion of the overall risk exposure of the investment portfolio, at all times. As far as OTC derivatives ("over the counter" derivatives) are concerned, a procedure that enables the precise and independent measurement of the value of the OTC derivative shall be applied in this respect.

The Management Company shall ensure, for the Fund, that the overall risk exposure related to derivatives does not exceed the total Net Asset Value of the individual sub-fund portfolio. This risk shall be calculated taking into account the market value of the respective underlyings, the counterparty default risk, future market fluctuations and the liquidation period for the positions.

A sub-fund is entitled, as part of its investment strategy, to invest in derivatives within the limits specified in 19.3 e) above, provided that the total underlying exposure does not exceed the investment limits set out in 19.3 a) to e) above. If a sub-fund invests in index-based derivatives, these investments do not have to be counted as part of the investment limits set out in 19.3 a) to e) above.

A derivative embedded in a security or a money market instrument must be taken into account as regards compliance with the provisions referred to above.

The Management Company determines the total risk of the respective sub-fund in accordance with CSSF Circular 11/512 of 30 May 2011 and the ESMA Guidelines 10-788 of 28 July 2010. The Management Company can determine the total risk on the basis of the commitment approach, the relative Value at Risk (VaR) approach or the absolute VaR approach. The method used for the sub-fund is set out in the Annex.

When the total risk for the sub-fund is determined in accordance with the relative or absolute VaR approach, the anticipated extent of leverage and the potential of increased leverage is specified in the Annex. The anticipated extent of leverage is determined in accordance with the requirements of CSSF Circular 11/512 and the method used to determine the leverage is set out in the Annex.

If the sub-fund uses the relative VaR approach, information about the reference portfolio is also explained in the Annex.

20. General information on risk

An investment in a sub-fund is associated with risks; these risks can include or be related to stock and bond market risks, exchange rate, exclusivity, interest rate, credit and volatility risks, as well as sustainability risks and political risks. These risks can combine. Some of these risks are described in further detail below.

Potential investors should have experience of investing in instruments that are to be used in implementing the planned investment policy, and should be aware of the general risks of price fluctuations. These price fluctuations can cause the unit price to rise or fall. The use of derivatives, as well as other techniques and instruments, is associated with far higher risks than traditional forms of investment. In particular, investors should consider the following risks:

Market risk

The market risk is a general risk, meaning that it is associated with all forms of investment. The price and market development of securities depends, in particular, on developments on the capital markets, as well as the financial performance of the issuer which, in turn, can be influenced by the general situation on the global economy, as well as by the economic and political conditions in the relevant countries.

Counterparty risk

Counterparty risk is the risk incurred by the sub-funds that the contract counterparty will be unable to meet an obligation arising from this contract either in full or in part. Off-exchange OTC transactions or securities lending, repurchase and buy-back transactions can expose the sub-funds to risks as regards the creditworthiness of the counterparties and their ability to fulfil the agreement. Options, forward and swap transactions, as well as securities lending, repurchase and buy-back transactions, can expose the sub-fund to such risks if the counterparty is unable to fulfil its obligations either at all, or in part.

Important risk information on structured products

The market value of the derivative instruments used (swaps and options) is not only affected by the performance of the underlying (e.g. share, index, basket of shares, currency) during the term, but by other factors as well. Such factors include the term, the intensity of the expected price fluctuation of the underlying (volatility), the underlying's anticipated dividend payments, the interest rate and the yield curve. Even if the price of the underlying rises during the term, the derivative instrument may decrease in value due to additional factors which may multiply the change in the underlying. Underlyings denominated in foreign currencies bear an additional currency risk.

Credit risk

An investment in Sub-Fund units may be associated with credit risk. This relates to the issuer of debt securities or the reference entity/entities in the case of credit derivatives. Credit risk includes default risk (the risk that the reference entity cannot meet its payment obligations in full) and migration risk (the risk that the reference entity's credit rating will deteriorate, making default more likely).

Liquidity risk

In principle, the intention is that securities that can be resold at any time are to be acquired for the sub-funds. Assets that are not admitted to official trading on a stock exchange or included in an organised market, such as OTC derivatives, may also be acquired. Liquidity risks arise as a result of problems in selling securities or other assets. For example, if a position is particularly large or the relevant market is illiquid, a transaction may not be initiated or a position may not be sold at an advantageous price or not sold at all. In order to safeguard the interests of all investors, there may be temporary suspensions of unit redemptions or execution in stages, and in the worst case scenario, the sub-fund may be liquidated.

Country risk

Investors should note that, despite being solvent, foreign debtors may be unable to make payments on time, or at all, if their home country is unable or unwilling to make transfers. This could result in a scenario in which, for example, payments to which the relevant sub-fund is entitled are not made or are made in a currency that is no longer convertible due to foreign exchange restrictions.

Political risk/regulatory risk

Investments can be made for the Fund abroad. These are associated with the risk of unfavourable political developments, changes in government policy, taxation and other legal developments.

Settlement risk

In the case of investments in non-listed securities, there is a risk that the settlement process via a transfer system will not be performed as expected due to payment or delivery being delayed or not made as agreed.

Currency risk

To the extent that assets of a sub-fund are invested in currencies other than the relevant fund currency, the Fund receives income, repayments and proceeds from such investments in the currency in question. If the value of this currency falls against the sub-fund currency, the value of the sub-fund also falls.

Currency-hedged unit classes

The Management Company attempts to hedge the undesired exchange rate risk between the reference currency of a unit class that is offered with currency hedging and the reference currency of the Fund through the use of currency forwards. The Management Company can outsource this function to a third party. The unit classes for which such hedging is used can be found in the "Overview of the sub-funds" section in the Annex to the Prospectus. If hedging takes place, the effects of this are reflected in the Net Asset Value and thus in the performance of the unit class(es). In the same way, any expenses arising from such hedges are borne by the class(es) in regard to which they arose. It should be noted that hedges may be entered into for currency-hedged unit classes irrespective of whether the Fund's reference currency falls or rises against other currencies. If such a hedge is made, this may significantly protect the investor in the relevant class(es) against a depreciation of the Fund's reference currency against the unit class's reference currency, but it may also exclude the investor from the benefits of an increase in the Fund's reference currency.

It cannot be guaranteed that the currency hedge used can fully eliminate the exchange rate risk against the currencies of the underlying assets, including because more (maximum 105%) or less (minimum 95%) of the underlying assets may be hedged. The hedge between the reference currency of the relevant unit classes and the reference currency of the Fund does not necessarily involve hedging other foreign currency risks to which the sub-fund is exposed; these foreign currency risks are hedged under the above conditions, in particular for those unit classes for which the reference currency of the unit class is identical to the reference currency of the Fund and which are expressly stated to be currency-hedged.

Legal and tax risk

The legal and tax framework and the treatment of funds, any type of security, listed derivatives and OTC derivatives may change in a manner that is unforeseeable or cannot be influenced.

Derivatives

The sub-funds can employ derivatives both for hedging purposes and as part of the investment strategy. The derivative financial instruments can include, *inter alia*, conventional or exotic options, forward contracts on financial instruments and conventional or exotic options on such contracts, as well as swap contracts, especially total return swaps, on all types of financial instruments. Derivatives trading is employed within the investment limits, and serves to ensure the efficient management of the sub-fund assets, as well as maturity and risk management. In this respect, the time-limited rights acquired can expire worthless or diminish in value.

The use of derivatives may result in increased leverage in the Fund and thus in a greater range of NAV volatility.

OTC derivatives

The respective sub-fund can employ derivatives on interest rates, currencies, equities, indices and other financial instruments within the framework of the investment principles. If no market price is available for the aforementioned derivatives transactions, the price is determined at the time the transaction is concluded, and on each day on which the unit price is calculated, using recognised valuation models and based on the market value of the underlyings. The closing of the transactions and the prices determined will be documented.

OTC derivatives are unlisted financial instruments. This means that they are associated with a higher liquidity and counterparty risk compared with exchange-traded derivatives. The prices of OTC derivatives can be very volatile, and they may expire worthless. The International Swap and Derivatives Association ("ISDA") and the associations of the German banking industry, which are organised in the Central Credit Committee (*Zentraler Kreditausschuss – ZKA*), have drawn up standardised documentation for this type of transaction in their respective framework agreements, the ISDA Master Agreement and the German Master Agreement for Financial Derivatives Transactions (*Deutscher Rahmenvertrag für Finanztermingeschäfte – DRV*). Furthermore, the ISDA supervises the settlement of CDS contracts when a credit event occurs.

Securities lending, repurchase and buy-back transactions

The Fund is entitled to conclude securities lending, repurchase and buy-back transactions for the purpose of efficient portfolio management and/or hedging. These transactions are financial transactions negotiated on a bilateral basis. As a result, they are associated with increased liquidity and credit risk. The Global Master Repurchase Agreement ("GMRA") developed by the International Capital Markets Association offers standardised documentation for these types of transactions.

Collateral Management

The Fund must accept collateral to limit counterparty risk from derivatives and securities lending, repurchase and buy-back transactions from the levels prescribed by law. By the same token, the Fund may be obliged to pledge collateral to the respective counterparties so that they can hedge themselves against the Fund's credit risk. This management of collateral is associated with risks. Collateral received is subject to the same custody risks as other Fund assets. The Fund also bears the risk that reinvested cash collateral loses value (e.g. due to market movements or counterparty default). As the Fund has to repay the collateral providers the original collateral value received, the Fund bears the difference between the

original value of collateral received and the value after sustaining the loss. Moreover the Fund may incur additional losses in the event of a counterparty default if the value of the collateral pledged exceeds the market value of the hedged transactions. The Management Company thus seeks daily collateral netting, although extraordinary circumstances or contractual agreements, among other things, could render daily collateral netting impossible.

Exchange-traded derivatives

Exchange-traded derivatives are far more liquid than their OTC counterparts. The counterparty risk is normally borne by a clearing house. The prices of exchange-traded derivatives can also be very volatile, and they may expire worthless.

Sustainability risks

Sustainability risks are environmental risks, social risks, and risks associated with governance by a business or government (ESG risks). These are events or factors relating to the environment, social affairs or corporate governance, the actual or potential occurrence of which could have a negative impact on the net assets, financial position and results of operations, as well as the reputation of a company or country.

Sustainability risks can be triggered in particular by violations of international conventions on human rights, labour rights, child labour, and forced labour, of environmental agreements, and by corruption. Sustainability risks may cause other risks such as market risks, counterparty risks and reputational risks, and should be considered in these contexts.

Potential conflicts of interest

The Fund will ensure that transactions executed with counterparties on OTC markets are based on standard market conditions.

The Management Company and its affiliated companies may act for other funds or for third parties as an administrator, an investment manager, an investment advisor, a representative or in a similar service-provider role. In this case, the objectives and investment strategy of the Fund may contrast with those of other funds and mandates.

The objectives and investment strategies that the Management Company and its affiliated companies implement in

other funds and mandates could come into conflict with the objectives and investment strategy of this Fund and influence the prices and availability of securities and investment vehicles in which the Fund invests. Conversely, participation in certain investment opportunities can occasionally also occur in line with the implementation of the investment strategy of other funds and mandates. In such a case, participation in the relevant investment opportunities is allocated on a fair basis and taking account of factors such as the relative amounts of capital available for new investments, the compatibility of the objectives and investment strategies with regard to short-term market trends and taking account of the current portfolio. Such a view could, however, also result in allocations in certain positions not being split equally between the funds and mandates.

The directors and employees of the Management Company will devote time to the Fund in a fair manner. The Management Company and its affiliated companies shall not be prohibited from launching its other funds or entering into other investment management relationships or participating in other business activities, even if such activities are in competition with this Fund and/or will require a substantial amount of time from the Management Company or its affiliated companies. Likewise, employees are permitted to engage in similar activities, for example, working as an investment manager or in a similar position, even if this is in competition to the Fund.

In accordance with internal compliance guidelines and within the meaning of the employee transactions rule, the directors and employees of the Management Company may sometimes personally trade in securities and other instruments.

Employees are permitted to participate in investor conferences and events and, if applicable, also to give talks there. These events may offer the Management Company and its affiliated companies opportunities to come into contact with potential investors for the Fund and for other funds and mandates.

The list of aforementioned conflicts of interest does not necessarily cover all conflicts of interest that exist. If further conflicts of interest occur, the Management Company will seek to ensure that these are solved fairly.

The actual fulfilment of investment objectives cannot be guaranteed.

General information, costs, financial year, tax

21. Fund taxes

Pursuant to Art. 174 ff of the Law of 17 December 2010, the respective sub-fund assets are subject to tax ("taxe d'abonnement") of 0.05% p.a. in the Grand Duchy of Luxembourg. This tax is payable quarterly on the Net Sub-Fund Assets as at the end of the quarter. The taxe d'abonnement for sub-funds/unit classes reserved for institutional investors amounts to 0.01% p.a.

The sub-fund income is not subject to income, trade or wealth tax in Luxembourg. This income may, however, be subject to withholding tax in countries in which the fund assets are invested. In such cases, neither the depositary nor the Management Company is obligated to obtain tax certificates. Moreover, the Fund is not subject to any stamp duty. Any distributions to Fund investors are not subject to withholding tax in Luxembourg.

CRS

The OECD published the Common Reporting Standard (CRS) on 13 February 2014. The initiative is aimed at preventing tax evasion through foreign bank accounts and effectively ensuring that resident taxpayers pay tax on foreign investment income by means of an automatic international tax information exchange.

The CRS was developed by the OECD at the initiative and with the cooperation of the G20 states and the EU. It is conceptually based on Model 1 of the "Intergovernmental Agreement" (IGA) that a large number of countries (including Luxembourg) concluded with the USA.

The standard stipulates the scope of information to be exchanged on financial accounts, which financial institutions are obligated to report and what type of accounts and taxpayers must be reported.

The CRS scope is broader than that of the EU Savings Taxation Directive and covers all types of investment income of natural and legal persons (e.g. dividends, income from certain insurance policies and similar income) as well as account balances and proceeds from the sale of financial assets, in addition to interest payments. Not only banks and depositaries, but also other financial institutions such as brokers, undertakings for collective investments (UCI), and certain insurance companies may be classified as financial institutions required to report. The CRS also sets out the related due diligence to be observed in identifying financial accounts subject to reporting.

The EU implements the CRS requirements with the EU Directive 2014/107/EC dated 9 December 2014. Luxembourg undertook to implement the automatic exchange of information in accordance with the standard as of 1 January 2016.

Luxembourg financial institutions subject to reporting must integrate CRS requirements into the system of existing client analysis and the new client acceptance procedure.

Financial institutions are required to exercise particular due diligence under CRS, particularly in identifying the investors subject to reporting requirements, and to report them annually to the responsible financial authorities as part of the automatic exchange of tax information. Luxembourg has undertaken to record information on taxpayers in other signatory states from financial institutions domiciled in its jurisdiction – which also includes the Fund – and to make this available to other signatory states. As the Fund as such is not a legal entity, the Management Company will perform these activities.

These relate, in particular, to the following information:

- Name, address, tax identification number, countries of residence as well as date and place of birth of each person subject to reporting requirements
- Account number or unit register number
- Value of the units
- Investment income credited, including sales proceeds.

In connection with this, the unitholders are required to submit the necessary information and documents to the Management Company and permit the Management Company, to the extent necessary, to pass this information and evidence on to the Luxembourg tax authorities, which in turn pass the data on to the tax authorities of other signatory states.

Unitholders who do not comply with the aforementioned obligations must bear the costs resulting from this and exempt the Fund from any burdens and obligations. In addition, the Management Company may decide to demand the compulsory redemption of their units from these investors.

Investors are obligated to report without delay any change in circumstances which could affect and/or change their tax residence so that the Company can fully comply with its statutory reporting obligation.

The information provided here is based on the current legislation and practices of the tax authorities, and may be subject to change.

Investors are recommended to obtain information on any statutory or tax-related consequences (also as regards the application of the CRS and FATCA requirements arising pursuant to the laws of their country of nationality, the country in which they reside or the country in which they have their ordinary residence, and which could be relevant with respect to subscription for, or the purchase, ownership, redemption or transfer of units, and to seek advice where appropriate.

22. FATCA

The "Foreign Account Tax Compliance Act" ("FATCA" or the "FATCA rules") came into effect on 18 March 2010 as part of the "Hiring Incentives to Restore Employment Act" (the "Hire Act"), in order to encourage US taxpayers to report

their foreign accounts honestly and to combat tax evasion by US taxpayers.

The FATCA rules stipulate a US withholding tax of 30% on certain payments from US sources or certain pass-through payments (referred to as "passthru payments" in the FATCA provisions) to persons who have not complied with certain certification or reporting requirements. In order to avoid this US withholding tax, non-US financial institutions, such as the Fund, represented by its Management Company, must either (i) conclude agreements with the Internal Revenue Service (IRS) unless they are exempt from the FATCA rules or (ii) comply with local laws that serve to implement an intergovernmental agreement on the FATCA rules ("Intergovernmental Agreement" or "IGA"). IGAs are agreements between the USA and other states to implement the FATCA rules.

Luxembourg and the USA signed a Model 1 IGA in March 2014. The IGA means that the Fund needs to satisfy certain information and reporting requirements and has to report certain information and evidence to the competent Luxembourg tax authority.

The Management Company has decided that the Fund is to qualify as a so-called "restricted fund" and thus as a "non-reporting financial institution" within the meaning of the IGA.

In connection with FATCA, the Management Company is therefore entitled to ask all unitholders of the Fund to submit the documents necessary to prove their tax residence in order to be able to review on this basis whether they should be classified as specified US persons, non-participating foreign financial institutions or non-financial foreign entities with one or more substantial US owners pursuant to the IGA between Luxembourg and the USA or in accordance with the FATCA rules (collectively: "non-permitted investors"). In connection with this, the unitholders are required to submit the necessary information and documents to the Management Company and permit the Management Company, to the extent necessary, to pass this information and evidence pursuant to the IGA between Luxembourg and the USA on to the Luxembourg tax authorities, which in turn pass the data on to the USA's Internal Revenue Service. Unitholders who do not comply with the aforementioned obligations must bear the costs resulting from this and exempt the Fund from any burdens and obligations. In addition, the Management Company may decide to demand the compulsory redemption of their units from these investors.

Unitholders should note that units in the Fund must not be either directly offered or sold for the account of non-permitted investors and later transfers of units to non-permitted investors are prohibited. If units are held by a person who qualifies as a non-permitted investor, the Management Company may compulsorily buy back all or part of the non-permitted investor's units from such a unitholder in accordance with the provisions of paragraph 13 of this Prospectus.

Distribution agents that act as a nominee must be FATCA-compliant, e.g. as a "reporting FFI", a "non-reporting FFI" pursuant to a Model 1 IGA, a "participating FFI", a "registered deemed compliant FFI", a "non-registering local bank" or a "restricted distributor" pursuant to the IGA or pursuant to the FATCA rules. If the status of the distribution agent changes, it must inform the Management Company of this in writing within 90 days.

Investors are recommended to obtain information on any statutory or tax-related consequences in connection with FATCA and to seek advice where appropriate.

23. Fund costs

The Management Company can charge the individual sub-funds the types of costs specified in the relevant Special Fund Rules for the sub-fund and in the General Fund Rules.

The costs, expressed as a percentage of the Net Sub-Fund Assets, are set out in the Annex for the sub-fund in question. Details on their amount, calculation and payout are contained in the Annex for the relevant sub-fund. Costs actually incurred which cannot be specified as a percentage may be charged to the sub-fund assets.

All costs and fees are initially offset against current income, then against net capital gains, and then finally against the respective Net Sub-Fund Assets.

Nevertheless, the Management Company retains the right not to charge the respective sub-fund for certain costs which could be charged to the Net Sub-Fund Assets, but rather to bear these costs directly using the assets of the Management Company.

The costs, fees, duties and extraordinary expenses that arise in connection with a certain unit class are allocated to the corresponding unit class.

The costs, fees, duties and extraordinary expenses that are not attributable to a specific unit class within the individual sub-fund are charged to the unit classes within the sub-fund pro rata to the net assets of the corresponding unit classes.

The costs incurred for the formation of the Fund and the initial issue of units can be amortised over a period of five years at the most.

24. Distribution policy

The Management Company shall decide, for each sub-fund/ unit class, whether, as a general rule, distributions will be made to the investors from the sub-fund assets or the fund income will be reinvested. The specific distribution policy pursued by the sub-fund or unit class is set out in the Annex.

In the case of distributing units, the Management Company intends to actually make distributions. Income from interest, dividends and/or futures transactions, less costs ("net income"), as well as net realised price gains, can be

distributed. Furthermore, unrealised price gains and other assets can be distributed as long as the net fund assets do not fall below the minimum EUR 1.25 million threshold stipulated by the Law of 17 December 2010 as a result of the distribution.

The Management Company is authorised to make interim distributions.

In the event that a distribution is made in the form of bonus units, any remaining fractional amounts can be paid out in cash or credited. Distribution amounts that remain unclaimed five years after the publication of a distribution notice are forfeited and revert to the sub-fund.

It is, however, at the discretion of the Management Company to decide whether or not to payout distribution amounts, from the respective sub-fund assets, even after the five-year period has lapsed.

25. Financial year

The financial year of the Fund will end on 31 December of each year, and for the first time on 31 December 2013. The first financial year is an abridged financial year running from the initial issue date until 31 December 2013.

26. Term of the sub-funds

The sub-funds have been launched for an unlimited period unless the Annex for the relevant sub-fund contains provisions to the contrary.

27. Liquidation and merger of the Fund and the sub-funds

27.1 Liquidation of the Fund and liquidation of sub-funds

Neither investors nor their heirs/successors may require the liquidation and/or split of a sub-fund.

Individual sub-funds can be liquidated by the Management Company at any time. The Management Company will act as the liquidator as a general rule. Sub-funds must be liquidated in statutorily defined cases, as well as in the event of the liquidation of the Management Company. Any such liquidation will be published by the Management Company in the *Recueil Electronique des Sociétés et Associations* and in at least two daily newspapers in accordance with the statutory provisions. One of these daily newspapers must be published in Luxembourg. If circumstances arise resulting in the liquidation of a sub-fund, the issue of units will be suspended. Units in this sub-fund can still be redeemed provided that equal treatment of the investors is guaranteed.

The depositary will distribute the liquidation proceeds, less the liquidation costs and fees, to the investors pro rata to their respective units, upon instruction by the Management Company or, where appropriate, the liquidators appointed by the latter or by the depositary with the consent of the CSSF. Liquidation proceeds that have

not been claimed by investors by the end of the liquidation proceedings, will to the extent required by law in such cases, be converted into Euros and, following the conclusion of the liquidation proceedings, deposited by the depositary with the *Caisse des Consignations* in Luxembourg, in accordance with Article 146 of the Law of 17 December 2010, for the account of the eligible unit holders. These amounts are forfeited if they are not claimed within the statutory period.

If a sub-fund is a Feeder of another UCITS (or a sub-fund thereof), the liquidation or merger of the other UCITS (or its sub-fund) will lead to the liquidation of the Feeder, unless, with the CSSF's permission, the Feeder changes its investment policy within the limits of the Law of 17 December 2010.

27.2 Merger of the Fund and merge of sub-funds

The Management Company can, by way of a resolution passed by the Board of Directors, decide to merge or consolidate a sub-fund with another sub-fund of the Fund or merge or consolidate it with another fund (or a sub-fund of that fund), taking into account the provisions of the Law of 17 December 2010.

28. Coming into force of, and amendments to, the General and Special Fund Rules

The Fund's most recent General Fund Rules, which comply with the provisions of the Law of 17 December 2010, came into force on 9 December 2024.

A notice stating that they were filed with the Luxembourg commercial register was published in the *Recueil Electronique des Sociétés et Associations* on 9 December 2024.

The provisions set out in the individual Special Fund Rules for the respective sub-funds shall apply in supplement to or in derogation of the above.

The Management Company is entitled to amend the General Fund Rules of the Fund or the Special Fund Rules that apply to a sub-fund, at any time, either in full or in part. Any such amendments shall come into force, following approval by the CSSF, on the date on which the relevant document is signed, unless otherwise specified.

Any amendments to the General and Special Fund Rules will be filed with the Luxembourg commercial register. Furthermore, a notice on such filing will be published in the *Recueil Electronique des Sociétés et Associations*.

29. Publications

The issue price and redemption price of the sub-fund units, the General and Special Fund Rules, the Prospectus and the key investor information are available from the Management Company, the depositary, all paying agents and the distribution and sub-distribution agents, and can be accessed at www.assenagon.com. To the extent that

is required by law or if stipulated by the Management Company, the issue price and the redemption price for the individual sub-funds will be published in a daily newspaper, determined by the Management Company, in those countries in which the units are offered to the public.

Four months after the end of each financial year of the Fund at the latest, the Management Company will make an audited annual report available, providing information on the sub-fund assets, their management and the results achieved. The first audited annual report will be prepared as at 31 December 2013 and published by 30 April 2014 at the latest.

At least two months after the end of the first half of each financial year of the Fund, the Management Company will make an unaudited interim report available, providing information on the sub-fund assets and their management during the half-year under review. The first unaudited interim report will be prepared as at 30 June 2013 and published by 31 August 2013 at the latest.

The annual report and all interim reports of the Fund are available to investors free of charge from the Management Company, the depositary and all paying agents, and can be accessed at www.assenagon.com.

Furthermore, the documents listed below will be available for inspection at the registered office of the Management Company during normal business hours:

- a) The Memorandum and Articles of Association of the Management Company;
- b) The Administration Agreement together with the Registrar and Transfer Agency Schedule;
- c) The Depositary Agreement together with the Funds Transfer Services Terms and Conditions.

If the Management Company gives individual investors further information about, for example, the composition of the Fund portfolio or its performance, it shall fundamentally provide this information to all investors in the

Fund at the same time. The prerequisite for this is that an investor must request that the Management Company communicate this data, prove his/her unit ownership and sign a non-disclosure agreement.

Notices to the investors shall be published, if legally required, in at least one supra-regional daily newspaper in Luxembourg, otherwise under www.assenagon.com. Notices to investors holding units that are distributed to the public in other countries will be published in line with the regulations set out in the additional information for these countries. Information on the performance of the individual sub-funds over the past 5 years – to the extent available – will be included with the key investor information.

30. Governing law, place of jurisdiction and language

The General and Special Fund Rules, as well as those that apply to the sub-funds, are subject to Luxembourg law. The district of Luxembourg City has subject-matter jurisdiction over all legal disputes between investors, the Management Company and the depositary.

The Management Company and the depositary are entitled to subject themselves and the Fund to the jurisdiction and laws of any country in which the fund units are distributed to the public, provided that the claims are filed by investors resident in the country in question and relate to unit subscription and redemption.

The German version of this Prospectus and of the General and Special Fund Rules shall prevail, and shall take precedence in the event of any translation discrepancies.

With respect to units sold to investors in the respective country, the Management Company and the depositary are entitled to declare translations into the languages of the countries in which such units are distributed to the public as binding, both for themselves and for the Fund/sub-funds.

Additional information for investors in the Federal Republic of Germany

The following has been appointed as the information agent in the Federal Republic of Germany pursuant to §306a para. 1 nos. 2, 4 and 5 of the German Investment Code (Kapitalanlagegesetzbuch):

Assenagon Asset Management S.A.
Munich Branch
Landsberger Straße 346
80687 Munich
Germany

Telephone +49 89 519966-0

Fax +49 89 519966-311

E-mail: office@assenagon.com

www.assenagon.com

(Hereinafter referred to as the "Information Agent").

Orders for the subscription, redemption and conversion of units can be submitted to the Principal Agent.

Redemption proceeds, any distributions and payments from and to investors can be paid via the Principal Agent.

The following documents and pieces of information are available free of charge from the abovementioned Information Agent:

- Prospectus;
- Key investor information;
- General Fund Rules;
- current annual and interim reports and
- issue, redemption and conversion prices.

The contracts listed under "Publications" can be viewed at the premises of the above information agent.

The issue price and redemption price of the sub-fund units are provided at www.assenagon.com.

Notices to the investors will be published in Germany at www.assenagon.com.

The contact point pursuant to § 306a para. 1 nos. 3 and 6 of the German Investment Code is the Management Company

Assenagon Asset Management S.A.

Information on taxation of investors in the Federal Republic of Germany

The following information provides a general overview of the tax consequences of acquiring units in the investment fund for investors with unlimited tax liability in Germany, but cannot replace advice from a tax adviser based on your specific case.

The following tax information is not intended to provide or replace authoritative tax advice, and does not claim to cover all tax aspects that may be relevant in connection with the acquisition, holding or sale of investment fund units. The information is not exhaustive, nor does it take into account the individual circumstances of certain investors or groups of investors.

The following general tax information for investors with unlimited tax liability in Germany is based on the legal situation regarding tax following the entry into force of the new Investment Tax Act (*Investmentsteuergesetz*) (from January 2018). It includes the taxation of personal and business capital gains under the system of final withholding tax (*Abgeltungsteuer*) which is fundamentally to be applied to accruing investment income, advance lump-sum amounts (*Vorabpauschalen*), and realised redemption gains and capital gains.

Principles of investment fund taxation

Income from capital assets is subject to a tax deduction of 25 percent (plus solidarity surcharge and, if applicable, church tax). The income from capital assets also includes

income from investment funds (investment income) i.e. the fund's distributions, the advance lump-sum amounts and the gains from the sale of units.

1. Tax treatment of income for private investors

1.1 Withholding tax on income from capital assets

1.1.1 Single taxation rate with its own rules

In the withholding tax system, income from capital assets is fundamentally subject to a special tax rate of 25% plus the solidarity surcharge of 5.5 % and, if applicable, church tax, irrespective of the investor's personal income tax rate. However, if the investor's personal tax rate is lower than this, then it is possible to tax the investment income at this tax rate by means of an assessment (assessment option). The investor cannot claim actual income-related expenses as tax exempt in connection with the investment. The blanket allowance for savings income of EUR 1,000 (EUR 2,000 for joint assessment) applies as flat-rate compensation if the investor informs German credit institutions of it by means of a tax-exemption order. The blanket allowance for savings income can be claimed through the assessment route without a tax-exemption order. If the investor submits a non-assessment certificate, which is granted by the tax office for a maximum of three years, the entire distribution is credited to the investor in full.

Losses and negative income from capital assets cannot be offset against other types of income. They can only be offset against positive investment income and capital gains in the same year or subsequent years. For the purpose of offsetting losses, German credit institutions maintain so-called loss accounts for each individual.

The withholding tax will fundamentally be withheld directly by the German credit institution that pays out the investment income or redeems or sells the units as a tax deducted at source (*Quellensteuer*). No tax is deducted if the German credit institution has been issued with a tax exemption order and the blanket allowance for savings income has not yet been exhausted. Church tax is automatically withheld and deducted unless the credit institution is informed that it should not be.

1.1.2 Fundamentally discharging effect

The tax deduction at source has a fundamentally discharging effect for private investors, i.e. the taxation process is complete with the withholding of the withholding tax. This means that investors do not have to declare this investment income in their personal income tax return.

However there is a declaration and assessment obligation for the income from capital assets when this has not previously been subject to the withholding tax. This is particularly the case if the Fund units are held in a securities account at a credit institution outside of Germany. There is also an assessment obligation for fund income for

investors who belong to a religious community for which church tax is mandatory if no church tax has yet been paid, irrespective of the location of custody.

1.2 Tax treatment of fund income

Distributions, advance lump-sum amounts and capital gains of the fund are fundamentally subject to tax.

If the units are held in domestic custody, the institution maintaining the securities account will deduct the tax, taking account of any partial exemptions. If such units are sold by a private investor at a loss, then the loss can be offset against other positive income from capital assets. If the units are held in domestic custody and positive income from capital assets is generated at the institution maintaining the custody account in the same calendar year, the custodian institution shall offset the losses accordingly.

1.2.1 Distributions

Taxable distributions are generally subject to a tax deduction of 25 percent (plus solidarity surcharge and, if applicable, church tax).

1.2.2 Advance lump-sum amounts

The advance lump-sum amount (*Vorabpauschale*) is the amount by which the fund's distributions fall below the base income for the calendar year. The base income is calculated by multiplying the redemption price of the unit at the beginning of a calendar year by 70 percent of the base interest rate derived from the yields on public-sector bonds achievable in the long term. The base income is limited to the surplus calculated from the difference between the first and the last redemption price determined in the calendar year plus the distributions within the calendar year. In the year in which the units are acquired, the advance lump-sum amount is reduced by a twelfth for each full month preceding the month of acquisition. The advance lump-sum amount is deemed received on the first working day of the following calendar year.

If the domestic investor holds the units in a domestic securities account, the institution maintaining the securities account as the paying agent will not make the tax deduction if an exemption application issued for a sufficient amount is submitted to it before the specified date of receipt. Otherwise, the investor must provide the amount of the tax to be deducted to the domestic institution maintaining the securities account. To this end, the institution maintaining the securities account is permitted to debit the amount of the tax to be deducted from an account in the name of the investor that is maintained with the institution without the consent of the investor and, if applicable, in an amount higher than the balance of the account. If the investor does not meet his/her obligation to make the amount available to the domestic institution

maintaining the securities account, the institution maintaining the securities account must report this to the competent tax office. In this case, the investor must report the advance lump-sum amount in this respect in his/her income tax return.

Taxable advance lump-sum amounts are generally subject to a tax deduction of 25 percent (plus solidarity surcharge and, if applicable, church tax).

1.2.3 Capital gains at investor level

If units in the fund are sold after 31 December 2017, the capital gain is subject to the final withholding tax rate of 25 percent. This applies both to units that were acquired before 1 January 2018 and are treated as having been sold on 31 December 2017 and reacquired on 1 January 2018, and to units acquired after 31 December 2017.

In the case of gains from the sale of units that were acquired before 1 January 2018 and are treated as having been sold on 31 December 2017 and reacquired on 1 January 2018, it is of note that when these units are in fact sold, the gains from the notional sale that took place on 31 December 2017 are also to be taxed if the units were in fact acquired after 31 December 2008.

If the fund units acquired before 1 January 2009 are sold after 31 December 2017, the gain that arises after 31 December 2017 is fundamentally tax-exempt for private investors up to an amount of EUR 100,000. This exempt amount can only be used if these gains are declared to the investor's tax office.

When calculating the capital gain, the gain is to be reduced by the advance lump-sum amounts recognised during the time the investor has owned it.

2. Tax treatment of income for investors holding the units as business assets

2.1 Tax treatment of fund income

Distributions, advance lump-sum amounts and capital gains of the fund are fundamentally subject to income tax or corporation tax and trade tax. In the case of for business investors, they are generally subject to a tax deduction of 25% plus the solidarity surcharge, but – unlike in the area of personal capital investment – this does not have a discharging effect, but is to be credited as a prepayment against later income tax or corporation tax.

2.1.1 Distributions

Taxable distributions are generally subject to a tax deduction of 25 percent (plus solidarity surcharge).

2.1.2 Advance lump-sum amounts

The advance lump-sum amount (*Vorabpauschale*) is the amount by which the fund's distributions fall below the base income for the calendar year. The base income is calculated by multiplying the redemption price of the unit

at the beginning of a calendar year by 70 percent of the base interest rate derived from the yields on public-sector bonds achievable in the long term. The base income is limited to the surplus calculated from the difference between the first and the last redemption price determined in the calendar year plus the distributions within the calendar year. In the year in which the units are acquired, the advance lump-sum amount is reduced by a twelfth for each full month preceding the month of acquisition. The advance lump-sum amount is deemed received on the first working day of the following calendar year.

The advance lump-sum amounts are generally subject to a tax deduction of 25 percent (plus solidarity surcharge).

2.1.3 Capital gains at investor level

Gains from the sale of units are fundamentally subject to income tax or corporation tax and trade tax. When calculating the capital gain, the gain is to be reduced by the advance lump-sum amounts recognised during the time the investor has owned it.

Right of revocation

If investment units are purchased as a result of oral negotiations held outside of the permanent business premises of the party who sold the units or who mediated their sale, the buyer can revoke his/her purchase declaration in text form to the EU Management Company within a period of two weeks (right of revocation); this applies even if the party who sold the units or who mediated their sale has no permanent place of business. If the transaction is a distance contract within the meaning of section 312c of the German Civil Code (*Bürgerliches Gesetzbuch – BGB*), revocation is excluded for the purchase of financial services whose price is subject to fluctuation on the financial market, which might occur during the revocation period and which cannot be influenced by the EU Management Company (section 305 (1) 2nd sentence of the German Investment Code (*Kapitalanlagegesetzbuch (KAGB)*) in connection with section 312g (2) 1st sentence no. 8 BGB).

The deadline will be deemed to have been met if the revocation notice was sent in a timely manner. Notice of revocation must be sent in text form, specifying the individual wishing to exercise his/her right of revocation, to the management of the EU Management Company, Assenagon Asset Management S.A., Aerogolf Center, 1B Heienhaff, 1736 Senningerberg. No grounds have to be stated.

The revocation period shall not commence until the buyer has been provided with a copy of the offer to contract, or has received a contract note, providing him/her with information on the right of revocation similar to that contained herein.

In the event of dispute as regards the commencement of the revocation period, the burden of proof shall be on the seller.

The buyer will have no right of revocation if the seller can prove either that the buyer acquired the units within the scope of his trade or business, or that the seller visited the buyer at the buyer's prior request for the purpose of the negotiations which resulted in the sale of the units (section 55 (1) of the German Trade Code [*Gewerbeordnung – GewO*]).

If the sale has been revoked and the buyer has already made payments, the EU management company is obliged to pay to the purchaser, if applicable upon retransfer of the units acquired, the expenses paid plus an amount equivalent to the value of the units for which payment has been made on the day after receipt of the revocation notice.

The right of revocation may not be waived.

The above mentioned provisions apply accordingly to the sale of investment units by the buyer.

Additional information for Austrian investors

The following information is aimed at potential investors in **Assenagon Credit** in the Republic of Austria:

Information Agent pursuant to the provisions of Directive 2009/65/EC Art. 92 para. 1 lit. b, d and e:

www.assenagon.com/anlegerrechte.

Publication of the net asset value/notices to unitholders

Assenagon Credit's net asset value can be requested from the Management Company. The sub-funds' net asset values can be accessed on the Management Company's website at www.assenagon.com. Notices to unitholders are published at www.assenagon.com.

Publication agent

The respective Net Asset Values of the sub-funds, as well as all other notices to investors, will be published at www.assenagon.com.

Control

Assenagon Credit has no information leading to the assumption that individual investors or other individuals/companies could exert control over **Assenagon Credit**, be it directly or indirectly.

Domestic tax representative within the meaning of section 186 (2) no. 2 in conjunction with section 188 InvFG 2011

PwC PricewaterhouseCoopers

Wirtschaftsprüfung und Steuerberatung GmbH

Erdbergstraße 200

1030 Vienna

Austria

has assumed the function of tax representative in Austria for the Management Company within the meaning of section 186 (2) no. 2 in conjunction with section 188 InvFG 2011.

Additional information

The performance of the sub-funds since launch is set out in the corresponding annual reports of **Assenagon Credit** for the financial years in question, which can be inspected on the premises of the domestic representative within the meaning of section 186 (2) no. 2 in conjunction with section 188 InvFG 2011.

The redemption prices for the units in the Assenagon Credit sub-funds are published on the Management Company's website at www.assenagon.com.

The distribution of units in Assenagon Credit has been notified to the Austrian Financial Market Authority (*Finanzmarktaufsicht Österreich*) pursuant to section 140 (1) InvFG 2011.

The German wording of the Prospectus, as well as the other documents and publications, will prevail for distribution within the Republic of Austria.

The Management Company can issue units in new, additional sub-funds at any time. This Prospectus will be supplemented accordingly in each case.

Units can be redeemed at the price described under "Redemption of units".

Units can be converted based on the provisions set out under "Conversion of units".

Subscriptions will only be accepted on the basis of the valid Prospectus in conjunction with (i) the most recent audited annual report of the Company or (ii) the most recent interim report if it was published after the annual report.

This Prospectus does not constitute an offer or a form of advertising in those jurisdictions in which such an offer or such advertising is prohibited, or in which persons who make such an offer or advertisement are not authorised to do so, or in those jurisdictions in which it is illegal to receive such an offer or advertisement.

The information set out in this Prospectus is in line with the current legislation and standard procedures of the Grand Duchy of Luxembourg, and is therefore subject to change.

Potential buyers of units are required to seek information on the foreign currency regulations that apply to them, as well as on the legal and tax provisions that apply in their case.

The following sub-funds are authorised for public distribution in Austria:

- Assenagon Credit Selection ESG
- Assenagon Credit SubDebt and CoCo

Notice pursuant to section 3 of the Consumer Protection Act (Konsumentenschutzgesetz – KSchG)

1. Consumers have made a declaration to enter into an agreement regarding units in this investment fund in a location that was neither the permanent business premises of the company, nor a stand used by the latter for this purposes at a trade fair or market, consumers have a right of revocation.
2. This revocation can be declared to the company in the period until the agreement comes into force, or up to 14 days thereafter. The relevant period will commence when this Prospectus is delivered.
3. Notice of revocation can be made without a specific form. The deadline will be deemed to have been met if the revocation notice was dispatched in a timely manner.
4. Pursuant to section 63 of the Austrian Securities Supervision Act (*Wertpapieraufsichtsgesetz – WAG*), the right of revocation pursuant to section 3 KSchG also applies to the purchase of units in investment funds if the consumer initiated the business contact with the company or its agent him/herself for the purpose of concluding the agreement.

Additional information for investors in Switzerland

Representative in Switzerland

Reyl & Cie S.A.
4, rue du Rhône
1204 Geneva
Switzerland

Paying Agent in Switzerland

Reyl & Cie S.A.
4, rue du Rhône
1204 Geneva
Switzerland

Place where the relevant documents may be obtained

The Prospectus, the Key Information Documents, the General Fund Rules including the Special Fund Rules as well as the annual and semi-annual reports of the Fund may be obtained free of charge from the Representative.

Publications

1. Publications in respect of the Fund shall be made on www.fundinfo.com.
2. The issue and redemption prices or the net asset value together with a footnote stating "excluding commissions" must be published each time Shares are issued or redeemed on www.fundinfo.com. The prices are published daily.

Payment of retrocessions and rebates

1. Retrocessions

The Management Company and its affiliates may pay retrocessions. Retrocessions are deemed to be payments and other soft commissions paid by the Management Company and its affiliates to eligible third parties for distribution activities in respect of fund units in Switzerland. With such payments the Management Company compensates the respective third parties for all activities whose object is, whether directly or indirectly, the purchase of Units by an investor, like, as non-exhaustive examples:

- Sales promotions
- Organization of road shows and/or fund fairs
- Arrangements of meetings with potential investors
- Assistance with subscriptions, redemptions and conversions.

In the event that a recipient of retrocessions forwards such retrocessions to investors (entirely or partly), the retrocessions shall not qualify as rebates.

Information regarding the receipt of retrocessions is governed by the relevant provisions of the Federal Act on Financial Services (FIDLEG). Accordingly, recipients of retrocessions must ensure transparent disclosure. They must inform investors in advance, i.e. before the financial

service is provided or before the contract is concluded, expressly, unsolicitedly and free of charge about the type and amount of compensation they receive for distribution, so that investors can declare that they waive the compensation. If the amount cannot be determined in advance, the recipient of the compensation shall inform the investors of the calculation parameters and the ranges. Upon request, the recipients must disclose the amounts they effectively receive for the distribution of the collective investment schemes held by the investor concerned.

2. Rebates

Rebates are defined as payments by the Management Company and its affiliates directly to investors in Switzerland from a fee or cost charged to the fund with the purpose of reducing the said fee or cost to an agreed amount.

Rebates are permitted provided that (i) the Management Company pays them from the fees due to the Management Company (so that they are not charged additionally to the fund assets), (ii) they are granted on the basis of objective criteria, and (iii) all investors who qualify on the basis of these objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria applied by the Management Company with regard to granting rebates are:

- The category of the investor
- The investment volume
- The duration of an investment
- The product range
- Fees and commissions caused by the investor
- The willingness of the investor to provide support in the launch phase of the Fund

Upon request by the investor the Management Company and its affiliates shall disclose the respective extent of the rebates free of charge.

The Representative considers that the laws at the Fund's domicile regarding retrocessions and rebates (as defined above) in and from Switzerland do not provide for rules stricter than the Swiss rules.

Place of performance and Place of jurisdiction

For units offered in Switzerland, the place of performance is established at the registered office of the Swiss representative. The place of jurisdiction is the registered office of the Swiss representative or the registered office or place of residence of the investor.

(A) Investment policy

Investment objective

The Sub-Fund aims to generate ongoing income by collecting credit risk premiums, bond yields and price gains. Temporary fluctuations in value are tolerated in this respect. In addition, the Sub-Fund aims to achieve a positive environmental impact and thus pursues a sustainable investment objective. Integration of ESG criteria and consideration of sustainability risks aim to meet requirements for a sustainable investment. The Sub-Fund will be actively managed and is not linked to a benchmark.

Investment strategy

In pursuing the investment objective, the Sub-Fund uses a combination of quantitative and qualitative credit quality analyses, explicitly including ESG criteria. The aim is to invest primarily in European, but also in global reference entities in various currencies. Reference entities are companies, countries or other legal entities (e.g. special purpose vehicles), which have entered into loan agreements or issued securities as part of specific transactions. Credit default swaps (CDS) can be used instead of individual bond investments. The Sub-Fund's sustainable investment objective is to seek to reduce greenhouse gas emissions relative to the baseline universe. The objective of lower greenhouse gas emissions is to contribute to the achievement of the long-term global warming objectives of the Paris Agreement. The Sub-Fund aims to reduce its absolute greenhouse gas emissions by at least 50% compared to the baseline universe and is designed to achieve the 7% annual greenhouse gas reduction target.

In addition, the Sub-Fund aims to reduce its greenhouse gas emission intensity by at least 50% compared to the baseline universe.

As part of its due diligence process, the company not only includes all relevant financial risks in its investment decision and continuously evaluates them; rather, the ecological and social contributions of a company, aspects of good corporate management and all other relevant sustainability risks that can have significant effects on the return on an investment are explicitly checked.

The test is based on various quantitative and qualitative criteria. This includes special, ordinally scaled sustainability ratings and scores from recognized external service providers or internally measured, which express a ranking

and therefore enable a direct comparison of the aggregated sustainability of even the most diverse companies. The analysis also includes factors that cannot be numerically assessed, but are significant for assessing the sustainability of a company, such as respect for human rights, appropriate consideration of employee concerns or the fight against corruption and bribery.

In addition, exclusion criteria are applied. These are based on requirements stipulated by international conventions on controversial weapons and on the principles of the UN Global Compact. For example, a zero tolerance limit is applied to issuers with exposure to controversial and/or conventional weapons. Companies involved in the cultivation and production of tobacco are also excluded. Limits also apply to emitter turnover from addictive substances such as alcohol as well as gambling activities. In order to promote the energy transition, the importance of fossil fuels in relation to renewable energies is taken into account in the investment decisions of the companies concerned. Companies that generate 1% or more of their revenues from the exploration, mining, extraction, distribution or refining of hard coal and lignite, companies that generate 5% or more of their revenues from the extraction of unconventional gas and oil, and companies that generate 5% or more of their revenues from energy production from fossil fuels are excluded, with the exception of investments by means of green bonds, for which a revenue tolerance of max. 10% at company level applies, if at the same time the intended use of the proceeds from the green bonds provides for energy production from fossil fuels of max. 5%. Also excluded are companies that generate 10% or more of their revenues from the exploration, extraction, distribution or refining of crude oil and companies that generate 50% or more of their revenues from the exploration, extraction, production or distribution of gaseous fuels.

In addition, companies that generate 50% or more of their revenues from electricity generation with a greenhouse gas emission intensity of more than 100 g CO₂ e/kWh are excluded.

Investments are made according to a minimum industry adjusted ESG rating as well as a minimum controversy score, in order to avoid any negative impacts on environment, social affairs and corporate governance. This includes existing applicable laws as well as generally accepted international standards such as the principles of the UN Global Compact. Issuers that do not meet these requirements or do not hold an ESG rating or controversy score are excluded. Thereby the investment strategy takes into account on the one hand a industry-specific ESG best-in-class approach and on the other hand it ensures the so-called "Do no significant harm" principle for all investments.

The Assenagon Credit Portfolio Management team is in regular dialogue with companies to review and evaluate their sustainability. Not only quantitative aspects count here. Rather, it is about influencing corporate management with regard to a long-term focus on sustainability. Sustainability risks can have a major impact on the performance of the sub-fund.

Detailed Information about sustainable investment is available in the section "Assenagon Credit Selection ESG – Information about Sustainability".

In terms of credit rating, the Sub-Fund is to invest in investment-grade instruments and instruments from the high-yield segment (down to a minimum rating of B- as awarded by Fitch or Standard & Poor's, or a B3 rating from Moody's or a comparable rating awarded by a recognised rating agency, or which the Management Company has assessed and deemed to be sufficiently secure). A broad spread achieves a level of portfolio diversification that reduces the impact of the idiosyncratic risks associated with individual securities within the portfolio for the long term. Furthermore, the Sub-Fund can use suitable derivatives to reduce market price fluctuations.

Currency risks associated with investments denominated in currencies other than the euro can be largely hedged using derivatives. Interest rate risks, e.g. those associated with an investment in fixed-rate bonds, will be actively managed by the fund management.

Investment instruments

The Sub-Fund can invest in instruments denominated in various currencies worldwide. These may include bonds, convertible bonds, and structured and hybrid bonds of reference entities. Convertible bonds are bonds that give the buyer the right to convert the bond into a pre-defined number of shares in the reference entity that issued the bonds within a certain period. This means that convertible bonds have both an interest and an equity component. Investments in asset-backed securities are ruled out.

The Sub-Fund can also invest in derivatives such as credit default swaps (CDS), basket CDS, index CDS and CDS swaptions, for both investment and hedging purposes. A CDS gives the protection seller a premium, for a defined period, to assume the credit risk from the protection buyer. The premium is generally based on the credit rating of the underlying reference entity. The risks transferred with the CDS are specified by pre-defined credit events: Typical credit events include payment default or insolvency on the part of the reference entity. If a credit event occurs, the protection seller pays compensation to the protection buyer. This compensation is based on the reference entity's expected recovery rate and is calculated as part of a standardised procedure (credit auction).

Basket CDSs are CDSs for which the protection seller makes a compensation payment after a certain number of credit events have occurred within a pre-defined basket of

reference entities. In return, the protection buyer pays a set periodic premium.

Index CDSs are CDSs for which the protection seller makes a payment to the protection buyer, the amount of which also depends on the weighting of the reference entity in the index, if a credit event occurs in respect of a reference entity that forms part of a credit index. In return, the protection buyer pays a set periodic premium.

CDS swaptions are options on credit indices or individual securities that allow the buyer to enter into an index on credit derivatives at a certain date (European swaption) in return for the payment of a one-off premium. The term and premium of the swap are set. The Sub-Fund only invests in CDS swaptions on indices.

The following instruments may be acquired in order to implement the investment strategy:

- Bonds with at least a B- rating from Standard & Poor's or Fitch, a B3 rating from Moody's or a comparable rating awarded by a recognised rating agency, or which the Management Company has assessed and deemed to be sufficiently secure:
 - fixed or floating-rate bonds issued by financial institutions and companies (senior and subordinated bonds).
 - convertible bonds of various issuers
 - hybrid bonds; hybrid bonds are subordinated bonds which have characteristics of debt and equity.
 - structured bonds; structured bonds are bonds that have individual additional conditions which may, for example, influence redemption or the payment of interest.
- credit default swaps (CDS) on individual securities, as well as baskets of individual securities
- index-based credit derivatives: credit default swaps and swaptions on recognised financial indices, e.g. iTraxx and CDX. Currency hedging transactions: hedging of currency risks using currency swaps or currency forwards
- interest rate derivatives: hedging of interest rate risk (duration risk) by way of interest rate derivatives (options, futures, swaps)
- equities and equity derivatives (on individual equities and indices)
- total return swaps
- variance swaps and other volatility derivatives (on individual equities and indices)
- repurchase agreements (repos)
- bonds that track the development of loans on a 1:1 basis
- short-dated bonds (commercial paper)
- private placements

– money market investments

The investments made by the Sub-Fund are tracked and monitored in an adequate manner in the Management Company's risk management system.

In order to achieve the investment objective, the sub-fund can make direct investments in the aforementioned instruments, or invest in one or more derivative instruments that reflect the abovementioned investment strategy or individual component instruments via their underlying. The aim of these derivative instruments is to transfer the performance of the above-mentioned investment strategy or individual instruments to the Sub-Fund, as with a direct investment. If derivatives are used for this purpose, the sub-fund will only employ derivatives in accordance with the investment principles and restrictions set out in the General Fund Rules.

Furthermore, the Management Company can reduce the counterparty risks associated with OTC derivatives transactions by subjecting the parties to the OTC agreements to the obligation to furnish liquid collateral. Such collateral includes, in particular, cash, securities or prime government bonds. A market value will be calculated for this collateral on a daily basis. The value of the collateral to be furnished must, at the very least, correspond to the value by which the limits of the investment principles and restrictions set out in the General Fund Rules are exceeded, where appropriate multiplied by a weighting factor. The collateral can be realised by the Management Company.

Within the framework of the investment restrictions set out in the General Fund Rules, the sub-fund can invest in other admissible assets, in particular in liquid assets, money market instruments, money market and quasi-money market funds.

Cash settlement or physical settlement may be used for the derivatives in the Sub-Fund portfolio.

Currency risks associated with instruments that are not denominated in euros may be hedged. Currency swaps or currency forwards are generally used for this purpose.

The Sub-Fund will not engage in securities lending, repurchase or buy-back transactions.

The Sub-Fund is only permitted to purchase shares/units in other UCITS and other UCI up to a total of 10% of the net sub-fund assets.

The maximum leverage from the use of total return swaps corresponds to no more than 4.5 times the fund assets. The expected leverage from use of total return swaps will normally not be more than 2 times the fund assets.

As part of the investment restrictions set out in the General Fund Rules, the Sub-Fund may invest in other eligible assets, particularly in cash, money market securities, money market or money market funds.

Based on the principle of risk diversification, the Management Company can invest up to 100% of the net sub-

fund assets in securities, from various different issues, that are issued or guaranteed by an EU member state or its political sub-divisions, or by a member state of the OECD or by public international bodies of which one or more member states of the European Union are members, or by other states recognised by the CSSF (Brazil, Singapore, Russia, Indonesia and South Africa), provided that these securities were issued as part of at least 6 different issues and no more than 30% of the net sub-fund assets are invested in securities from the same issue.

Specific risk factors

Credit risks

An investment in Sub-Fund units may be associated with credit risk. This relates to the relevant issuer of debt securities or the reference entity/entities in the case of credit derivatives. Credit risk includes default risk (the risk that the reference entity cannot meet its payment obligations in full) and migration risk (the risk that the reference entity's credit rating will deteriorate, making default more likely).

Counterparty risks

Counterparty risk is the risk incurred by the Sub-Fund that the contract counterparty will be unable to meet an obligation arising from this contract either in full or in part. Off-exchange OTC transactions can expose the Sub-Fund to risks as regards the creditworthiness of the counterparties and their ability to fulfil the agreement. Options, futures and swap transactions can expose the Sub-Fund to such risks if the counterparty is unable to fulfil its obligations either at all, or in part.

Use of derivatives

Investors are explicitly reminded that the use of derivatives may change the risk structure of the Sub-Fund for the long term.

Foreign currency risks

Investment instruments within the Sub-Fund can be denominated in euros or other currencies. The fund management team can hedge the resulting exchange rate risks between the currency in which the investment instrument is denominated and the currency of the Sub-Fund. Unhedged foreign currency positions may have a long-term impact on the performance of the Sub-Fund.

Interest-rate risks

Investors should note that the investment strategy pursued by the Sub-Fund does not offer full protection against price losses if interest rates rise. The level of protection depends on the prevailing market conditions and can vary in different market phases.

Operational and custody risks

The Fund may fall victim to fraud or other criminal activity. It may suffer losses as a result of misunderstandings or errors by employees of the Management Company or external third parties and as a result of the insolvency of a depositary or sub-depositary. Furthermore, the Fund may be harmed by external events such as natural disasters or pandemics.

Sustainability risks

Sustainability risks are environmental risks, social risks, and risks associated with governance by a business or government (ESG risks). These are events or factors relating to the environment, social affairs or corporate governance, the actual or potential occurrence of which could have a negative impact on the net assets, financial position and results of operations, as well as the reputation of a company or country.

Sustainability risks can be triggered in particular by violations of international conventions on human rights, labour rights, child labour, and forced labour, of environmental agreements, and by corruption. Sustainability risks may cause other risks such as market risks, counterparty risks and reputational risks, and should be considered in these contexts.

The actual fulfilment of investment objectives cannot be guaranteed.

(B) Risk profile of the Sub-Fund

The Fund follows a growth-oriented investment strategy geared towards an attractive increase in value. It has larger opportunities and larger risks.

(C) Investor risk profile

The sub-fund is particularly well-suited to investors who expect moderate growth/income and are therefore prepared to bear potential losses. Investors should invest for a period of at least one to two years.

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Assenagon Credit Selection ESG
Legal entity identifier: 549300AKS14VPJCMUB54

Sustainable investment objective

Does this financial product have a sustainable investment objective?	
Yes	No
<p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: 63%</p> <p><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> It will make a minimum of sustainable investments with a social objective: 2%</p>	<p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p>

What is the sustainable investment objective of this financial product?

The Sub-Fund's sustainable investment objective is to seek to reduce greenhouse gas emissions relative to the initial universe. The objective of lower greenhouse gas emissions is to contribute to the achievement of the long-term global warming targets of the Paris Agreement. The sub-fund is actively managed and is not linked to any benchmark. However, the sustainable investment objective is aligned with the minimum Paris Agreed EU Reference Levels.

The Sub-Fund aims to reduce its absolute greenhouse gas emissions by at least 50% compared to the initial universe and is designed to achieve the target of a 7% annual greenhouse gas reduction.

In addition, the Sub-Fund aims to reduce its greenhouse gas emission intensity by at least 50% compared to the initial universe.

To this end, a minimum proportion of the portfolio is invested in sustainable investments. This includes investments in companies whose greenhouse gas emissions associated with their business model are in line with the long-term global warming target of the Paris Agreement, in companies whose economic activities are classified as environmentally sustainable according to the EU taxonomy and contribute to the environmental objectives of Article 9 of Regulation (EU) 2020/852,

and investments with a social objective and sustainability-linked Bonds. Among the environmental objectives, the focus is on climate change mitigation and adaptation.

In addition, exclusion criteria are applied. These are based on the requirements arising from international conventions on banned weapons and the principles of the UN Global Compact. Thus, a zero tolerance threshold applies to companies related to banned and/or conventional weapons. Companies involved in the cultivation and production of tobacco are also excluded. Limits also apply to company revenues from addictive substances such as alcohol as well as gambling activities. In order to promote the energy transition, the significance of fossil fuels in relation to renewable energies is taken into account in the investment decisions of the companies concerned. This excludes companies that generate 1% or more of their revenues from the exploration, mining, extraction, distribution or refinement of hard coal and lignite, companies that generate 5% or more of their revenues from the extraction of unconventional gas and oil and companies that generate 5% or more of their revenues from energy production from fossil fuels are excluded, with the exception of investments by means of green bonds, for which a revenue tolerance of max. 10% at company level applies, if at the same time the intended use of the proceeds from the green bonds provides for energy production from fossil fuels of max. 5%. Also excluded are companies that generate 10% or more of their revenues from the exploration, extraction, distribution or refining of crude oil and companies that generate 50% or more of their revenues from the exploration, extraction, production or distribution of gaseous fuels. In addition, companies that derive 50% or more of their revenue from electricity generation with a greenhouse gas emission intensity of more than 100 g CO₂ e/kWh are excluded.

For an investment a company must also have a minimum industry-adjusted ESG rating and a minimum controversy score to ensure that there are no severe negative environmental, social and governance impacts related to the company. This includes existing applicable laws as well as generally accepted international standards such as the principles of the UN Global Compact. Issuers that do not meet these requirements or do not have an ESG rating or controversy score are not eligible for investment. The investment strategy thus takes into account an industry-specific ESG best-in-class approach on the one hand and ensures the so-called "do no significant harm" principle for all investments on the other.

At least 80% of the sub-fund's assets are invested in accordance with the binding sustainable elements of the investment strategy.

Assenagon's Credit Portfolio Management team is in regular dialogue with companies to review and assess their sustainability. It is not only quantitative aspects that count here. Rather, the aim is to influence corporate management with regard to a long-term orientation towards sustainability. Sustainability risks can strongly influence the performance of the sub-fund.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

The measurement of the achievement of the sustainable investment objective of the financial product described above is carried out using the following various indicators: Greenhouse gas emissions and the ESG score are used for the targeted improvements at the portfolio level compared to the initial universe.

To this end, the portfolio pursues a minimum share of sustainable investments of 65 %. Sustainable investments consist of:

1) Investments in companies whose business model-related greenhouse gas emissions are in line with the long-term global warming target of the Paris Agreement, based on the minimum standards for Paris-agreed EU reference values. This means at least a 50% reduction in absolute greenhouse gas emissions and greenhouse gas emission intensity at the company level compared to the baseline universe.

2) Investments in green bonds and social bonds, whose issuers clearly demonstrate that the net proceeds of the bonds will be used entirely for green or social activities following the Green Bond Principles (GBP) or Social Bond Principles (SBP), as well as in sustainability-linked bonds, whose financing conditions are explicitly linked to the achievement of sustainability goals.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3) Shares of business activities that contribute to environmental objectives of Article 9 of Regulation (EU) 2020/852 or to the promotion of broad social issues, such as the treatment of serious diseases, education or affordable housing.

In addition, the following exclusion criteria apply:

- Controversial weapons
- Very severe controversies (incl. violations of global norms)
- Defence
- Tobacco cultivation/production
- Tobacco distribution (revenue tolerance < 5%)
- Coal (revenue tolerance < 1%)
- Unconventional oil and gas production (revenue tolerance < 5%)
- Energy production from fossil fuels max. 5% revenue tolerance at issuer level, with the exception of investments by means of green bonds, for which a revenue tolerance of max. 10% at company level applies, if at the same time the intended use of the proceeds from the green bonds provides for energy production from fossil fuels of max. 5%
- Exploration, extraction, distribution or refining of crude oil (revenue tolerance < 10%)
- Exploration, extraction, production or distribution of gaseous fuels (revenue tolerance < 50%)
- Electricity generation with a greenhouse gas emission intensity of more than 100 g CO₂ e/kWh (revenue tolerance < 50%)
- Nuclear power generation and services (exception only for investments by means of green bonds whose use of funds serves to reduce the nuclear business share)
- Gambling (revenue tolerance < 5%)
- Adult entertainment (revenue tolerance < 5%)
- Alcohol (revenue tolerance < 5%)
- Genetic engineering (revenue tolerance < 5%)
- Embryonic stem cell research
- ESG rating < BB

Specialist ESG data providers serve as the data source for the indicators.

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

Companies with very severe controversies (incl. violations of the principles of the UN Global Compact) as well as with significant shares of revenue in controversial business areas (incl. a zero tolerance threshold for issuers related to banned weapons) are excluded. This exclusion methodology also exists for sustainable investments. Very severe controversies include environmental, social and governance issues as well as global norms. Through these exclusions, we strive for the best possible avoidance of significant damage to the environmental or social sustainable investment objectives.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Regarding the main adverse impacts on sustainability factors, the so-called Principal Adverse Impacts (PAIs), a large part of the indicators related to companies are taken into account directly and indirectly in the investment strategy. Direct consideration of the indicators takes place on the one hand through the improvement of greenhouse gas emissions compared to the initial universe as well as through various exclusion criteria. Indirect consideration takes place through the monitoring and targeted improvement of the ESG score, which includes various PAIs. Thus, all environmental indicators as well as the social indicators violation or lack of monitoring of global norms, gender diversity and controversial weapons are taken into account.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

For the sustainable investments, as for the entire portfolio, exclusions apply for companies with very severe violations of global standards. These standards directly or indirectly take into account

the topics of the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, on the Principal Adverse Impacts (PAIs), a large part of the company-related indicators are directly and indirectly taken into account in the investment strategy, see section "How have the indicators for adverse impacts on sustainability factors been taken into account?" Information on the consideration of Principal Adverse Impacts in the respective financial year is available for the sub-fund in the annual reports.

No

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Sub-Fund aims to generate consistent returns through the collection of credit spreads, bond interest and capital gains, while tolerating interim fluctuations in value. To achieve its investment objective, the Sub-Fund will use a combination of quantitative and qualitative credit quality analysis, explicitly including ESG criteria. The objective is to invest in various currencies, mainly in European but also in other international benchmark debtors. In addition, the sub-fund aims to achieve a positive environmental impact and thus pursues a sustainable investment objective. The integration of ESG criteria and the consideration of sustainability risks aim to meet the requirements for sustainable investment management. The sub-fund is actively managed and is not linked to any benchmark.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

The mandatory elements of the investment strategy include, firstly, the minimum share of 65% in sustainable investments. In addition, the sub-fund aims to reduce its absolute greenhouse gas emissions by at least 50% compared to the initial universe and is designed to achieve the target of an annual greenhouse gas reduction of 7%. In addition, the Sub-Fund aims to reduce its greenhouse gas emission at portfolio level by at least 50% compared to the initial universe. In order to invest, a minimum industry-adjusted ESG rating and a minimum controversy score must be achieved.

In addition, the following exclusion criteria apply:

- Controversial weapons
- Very severe controversies (incl. violations of global norms)
- Defence
- Tobacco cultivation/production
- Tobacco distribution (revenue tolerance < 5%)
- Coal (revenue tolerance < 1%)
- Unconventional oil and gas production (revenue tolerance < 5%)
- Energy production from fossil fuels max. 5% revenue tolerance at issuer level, with the exception of investments by means of green bonds, for which a revenue tolerance of max. 10% at company level applies, if at the same time the intended use of the proceeds from the green bonds provides for energy production from fossil fuels of max. 5%
- Exploration, extraction, distribution or refining of crude oil (revenue tolerance < 10%)
- Exploration, extraction, production or distribution of gaseous fuels (revenue tolerance < 50%)
- Electricity generation with a greenhouse gas emission intensity of more than 100 g CO₂ e/kWh (revenue tolerance < 50%)
- Nuclear power generation and services (exception only for investments by means of green bonds whose use of funds serves to reduce the nuclear business share)
- Gambling (revenue tolerance < 5%)

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- Adult entertainment (revenue tolerance < 5%)
- Alcohol (revenue tolerance < 5%)
- Genetic engineering (revenue tolerance < 5%)
- Embryonic stem cell research
- ESG Rating < BB

● ***What is the policy to assess good governance practices of the investee companies?***

Good corporate governance is a core criterion in the definition of the ESG score, for which a significant improvement compared to the initial universe is targeted. Aspects such as the ownership structure, the composition of the management bodies as well as the remuneration policy, accounting, business ethics and tax transparency can be included. In addition, companies with very severe controversies are excluded, and aspects of good corporate governance are included. This may include, for example, bribery, tax evasion, insider trading, money laundering, sanctions violations and accounting violations.

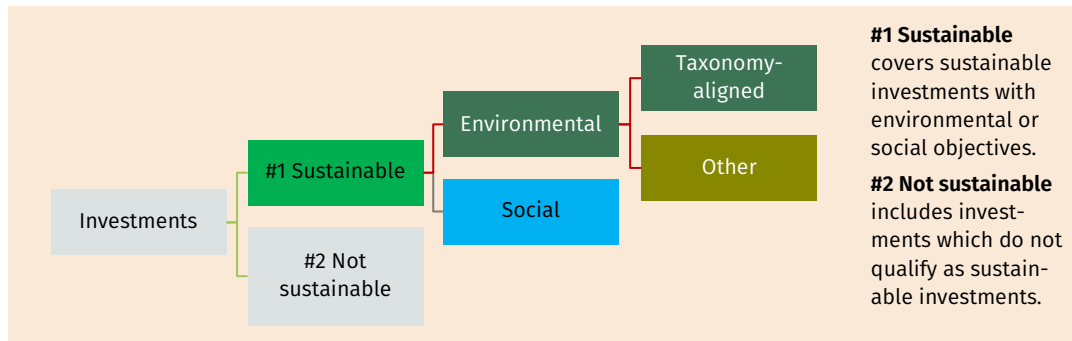

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

What is the asset allocation and the minimum share of sustainable investments?

A minimum share of 65% of the financial product is invested in sustainable investments (#1). This minimum share includes investments with an environmental objective of 63% and investments with a social objective of 2%. The share of investments with an environmental objective includes investments in economic activities that are classified as environmentally sustainable according to the EU taxonomy of 20%. The share of other investments (#2), includes the sub-fund's liquidity management (e.g. liquid assets, money market securities, in money market or near money market funds), and may include derivative instruments, including for interest rate and currency hedging.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

● How does the use of derivatives attain the sustainable investment objective?

Credit default swaps (CDS) may be purchased in the sub-fund. Furthermore, derivative instruments may be used for interest rate and currency hedging. However, these instruments do not serve to achieve the sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum quota of sustainable investments that are in line with an environmental goal of the EU taxonomy is 20%. The focus is on investments in companies whose economic activities contribute in particular to the environmental goals of climate mitigation and climate adaptation. The calculation basis for the scope of Taxonomy-aligned investments is the revenue of the companies.

Data provided directly by issuers or by external specialised ESG data providers are used to calculate the proportion of Taxonomy-aligned investments. Information from specialised ESG data providers is used in particular in cases where no direct information is available from issuers. This can be the case, among others, for companies that do not fall under the reporting obligations of the EU taxonomy due to their country of incorporation/ domicile. Since information on Taxonomy-aligned investments is used directly from companies or from specialised ESG data providers, there is no further verification of the data by auditors or third parties.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

The fund does not seek taxonomy-compliant investments in fossil gas and/or nuclear energy. Nevertheless, it may also invest in companies that are in any case also active in these areas as

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

part of the investment strategy. Further information on such investments is disclosed in the annual report where relevant.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What is the minimum share of investments in transitional and enabling activities?

There is no minimum percentage of investment in transitional and enabling activities.

What is the minimum percentage of sustainable investments with an environmental objective that are not compliant with the EU taxonomy?

The minimum share of sustainable investments with an environmental objective that are not compliant with the EU taxonomy is 43%. This includes investments in companies whose greenhouse gas emissions associated with their business model are in line with the Paris Agreement's long-term global warming target, aligned with the minimum standards for Paris-agreed EU reference levels.

What is the minimum share of sustainable investments with a social objective?

The minimum share of socially sustainable investments is 2%.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

The share of other investments that are not classified as sustainable investments includes the liquidity management of the sub-fund (e.g. liquid assets, money market securities, in money market or near-money market funds). Furthermore, derivative instruments may be used, among other things, for interest rate and currency hedging.

Where can I find more product specific information online?

More product-specific information can be found on the website:

- for the respective sub-fund via the following link:

Overview of Assenagon Credit Selection ESG

Investor profile	Risk tolerance	
Minimum net fund volume	EUR 20,000,000	
(Initial) issue price due	2 banking days after the initial issue date/relevant Valuation Date	
Redemption price due	2 banking days after the Valuation Date	
Orders accepted	Until 2.30 p.m. (CET)	Subscription, redemption and conversion orders that are received by the principal agent by 2.30 p.m. CET on a Valuation Date will be settled at the unit value on the next Valuation Date. Orders received after 2.30 p.m. CET will be settled at the unit value on the Valuation Date after the next Valuation Date. All orders will be settled at the unknown Net Asset Value.

Unit value calculation Every banking day in Luxembourg and Frankfurt am Main, with the exception of 24 and 31 December of each year.

Performance fee (if applicable) 15% of performance that exceeds the 3-month Euribor (or the 3-month SARON for all CHF unit classes) +3.5% p.a. The management company receives a performance fee of 15% (participation rate) of the excess performance over a hurdle index from the net fund assets. The performance fee is calculated on each valuation day and paid out for the first time at the end of the financial year of the first full financial year. When the unit certificate class is launched, the hurdle index corresponds to the initial issue price of the unit certificate class and develops, over the course of the financial year, on the basis of the 3-month Euribor (or the 3-month SARON for all CHF unit classes) plus 3.5% p.a. If the hurdle index is no longer available or no longer exists, the Management Company will replace it with an equivalent other hurdle index. **A performance fee can also be paid out if the fund has outperformed the hurdle index but still shows a negative performance.** Further information on the calculation of the performance fee can be found in Article 24 of the Special Fund Rules for Assenagon Credit Selection ESG.

The performance fee calculation is proportionate to the Sub-Fund's investment strategy. It aligns the interests of the investors with those of the Management Company and allows for the fair and equal treatment of all investors. The parameters are selected in such a way that the Management Company is not tempted to take unreasonable risks.

The chart sketches a theoretical fund price trend.

Year 1: The first performance fee accounting period starts with the launch of the unit class of the fund and ends at the end of the first full financial year. At the end of the first settlement period, the price of the unit class (NAV) is above the hurdle index, which develops in line with the hurdle rate, and the management company is entitled to a performance fee. The outperformance achieved is calculated daily over the year and the Management Company's entitlement is set aside in the Fund, whereby a reduction in the outperformance would also lead to a reduction in this entitlement again. The entitlement is calculated by multiplying the excess performance achieved by the participation rate. At the end of the first settlement period, the Hurdle Index is adjusted to the price of the unit class (NAV), as this has the higher value.

Year 2: In the course of the second settlement period, the price of the unit class (NAV) decreases, whereas the Hurdle Index moves in line with the Hurdle Rate. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the second settlement period, the Hurdle Index will not be adjusted as the Hurdle Index is quoted above the Unit Class Price (NAV).

Year 3: In the course of the third settlement period, the price of the unit class (NAV) rises again and is above the hurdle index at the end of the year, which develops in line with the hurdle rate as in each settlement period. Overperformance is achieved and during the year the Management Company's entitlement to a performance fee is deferred from the point at which the Unit Class (NAV) price exceeds the Hurdle Index. At the end of the third settlement period, a performance fee is paid and the hurdle index is adjusted to the unit class price (NAV), as this unit price corresponds to the maximum value of the rolling 5-year periods.

Year 4: During the fourth settlement period, the unit class price (NAV) continues to rise and is above the hurdle index at the end of the year. Outperformance is achieved and over the course of the year the Management Company's performance fee entitlement is accrued. At the end of the fourth settlement period, a performance fee is paid and the hurdle index is adjusted to the unit class price (NAV), as this unit price corresponds to the maximum value of the rolling 5-year periods.

Year 5: In the course of the fifth settlement period, the price of the unit class (NAV) decreases, whereas the hurdle index moves in line with the hurdle rate. No additional performance is achieved and no entitlement of the management company to a performance fee is accrued over the course of the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the fifth accounting period, the Hurdle Index is adjusted to the NAV of the share class at the end of the fourth accounting period, as this share price is the maximum value of the rolling 5-year periods.

Year 6: Over the course of the sixth settlement period, the unit class price (NAV) increases but remains below the hurdle index. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the sixth settlement period, the Hurdle Index will be adjusted to the Share Class Price at the end of the fourth settlement period as this Share Class Price will continue to be the maximum value of the rolling 5 year periods.

Year 7: Over the course of the seventh settlement period, the unit class price (NAV) continues to rise and is above the hurdle index at the end of the year. Outperformance is achieved and over the course of the year the Management Company's performance fee entitlement is accrued. At the end of the seventh settlement period, a performance fee is paid and the hurdle index is adjusted to the unit class price (NAV), as this unit price corresponds to the maximum value of the rolling 5-year periods.

Year 8: In the course of the eighth settlement period, the price of the unit class (NAV) falls, whereas the Hurdle Index rises. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the eighth accounting period, the Hurdle Index is adjusted to the NAV of the share class at the end of the seventh accounting period, as this share price is the maximum value of the rolling 5-year periods.

Year 9: Over the course of the ninth settlement period, the unit class price (NAV) increases but remains below the hurdle index. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the ninth settlement period, the Hurdle Index will be adjusted to the Share Class Price at the end of the seventh settlement period, as this Share Class Price will continue to be the maximum value of the rolling 5 year periods.

Year 10: Over the course of the tenth settlement period, the price of the unit class (NAV) continues to rise and is above the hurdle index at the end of the year. Outperformance is achieved and during the year the Management Company's entitlement to a performance fee is deferred from the point at which the Unit Class (NAV) price exceeds the Hurdle Index. At the end of the tenth settlement period, a performance fee will be paid and the Hurdle Index will be adjusted to the Share Class Price (NAV) as this Share Class Price equals the maximum value of the rolling 5 year periods.

Depository, principal agent and paying agent fees

Up to a fund volume of EUR 200 mn:
0.103% p.a.
if fund volume exceeds EUR 200 mn:
0.083% p.a.;
but a minimum of EUR 30,000 p.a.

This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average sub-fund assets. The fee does not include VAT.

Additional fixed and transaction-related fees are calculated in line with services provided.

Register and transfer agent	Depends on transaction, but a minimum of EUR 24,000 p.a. Additional fixed and transaction-related fees are calculated in line with services provided.	
Other costs	Other costs within the meaning of Article 13 of the General Fund Rules can be charged to the sub-fund assets as actually incurred.	
Conversion fee	None	
Guarantee	No	
Fund term	Unlimited	
Risk management procedure	Relative VaR approach; reference portfolio: A portfolio made up of the following components: 100 % A broadly diversified index whose aim is to track the EUR performance of a global basket of high-yield corporate bonds. Further information on the current composition of the reference portfolio can be obtained free of charge from the Management Company.	<ul style="list-style-type: none"> – Historical simulation – Daily calculation – 1 month holding period – 99% confidence interval
Expected leverage based on sum of notionals	Due to the Fund's investment strategy, it is expected that the leverage from the use of derivatives based on the sum of notionals approach will not amount to more than 4.5 times the fund assets; the expected leverage can also be higher however, under special circumstances.*	
Units	Bearer units, registered units	Bearer units are represented via the Central Facility for Funds (CFF) procedure at Clearstream Luxembourg; registered units are entered in the unit register. Unitholders do not have any right to the delivery of physical securities.

* For currency-hedged unit classes, the expected leverage effect increases by around 100% based on the sum of the notionals as a result of the use of currency forwards.

Annex 1.2

Assenagon Credit SubDebt and CoCo Sub-Fund

This Annex is only valid in conjunction with the current Prospectus.

(A) Investment policy

Investment objective

The Sub-Fund aims to generate ongoing income by collecting credit risk premiums, bond yields and price gains. Temporary fluctuations in value are tolerated in this respect. The integration of ESG criteria and the consideration of sustainability risks aim to meet the requirements for sustainable investments. The Sub-Fund will be actively managed and is not linked to a benchmark. The Sub-Fund promotes environmental and social characteristics.

Investment strategy

In order to achieve its investment objective, the sub-fund makes use of a combination of quantitative and qualitative analyzes of credit quality, which expressly also include ESG criteria. The aim is to invest in various currencies, primarily in European, but also other international reference entities. Reference entities are companies, countries or other legal entities (e.g. special purpose vehicles) which have entered into loan agreements or issued securities as part of specific transactions. Instead of individual bonds, credit default swaps (CDS) can also be purchased. The fund will primarily invest in instruments whose reference entities are banks, insurance companies and other financial service providers.

As part of its due diligence process, the company not only includes all relevant financial risks in its investment decision and continuously evaluates them; rather, the ecological and social contributions of a company, aspects of good corporate management and all other relevant sustainability risks that can have significant effects on the return on an investment are explicitly checked.

The test is based on various quantitative and qualitative criteria. This includes special, ordinal scaled sustainability ratings and scores from recognized external service providers or internally measured, which express a ranking and therefore enable a direct comparison of the aggregated sustainability of even the most diverse companies. The analysis also includes factors that cannot be numerically assessed, but are significant for assessing the sustainability of a company, such as respect for human rights, appropriate consideration of employee concerns or the fight against corruption and bribery.

In addition, exclusion criteria are used. This is based on the requirements resulting from international conventions on banned weapons and the principles of the UN Global Compact. There is a zero tolerance threshold for issuers with reference to outlawed and/or conventional weapons. Limits also apply to issuer sales from addictive substances such as tobacco (< 5%) and alcohol, as well as gambling

activities. In order to promote the energy transition, the importance of fossil fuels in relation to renewable energies is taken into account for the companies concerned when making investment decisions. Energy suppliers with more than 10% of revenue from energy production from fossil fuels are excluded. In addition, a limit value is set for coal production and sales.

An industry-adjusted minimum ESG rating and a minimum value for the so-called controversy score must be achieved for an investment in order to ensure that the company does not have any serious negative effects on the environment, social affairs and corporate governance. This includes existing applicable laws as well as generally accepted international standards such as the principles of the UN Global Compact. Issuers who do not meet these requirements or who do not have an ESG rating or a controversy score may only be held up to a maximum of 5% of the fund volume. Portfolio management engages actively with these issuers in particular. The investment strategy thus takes into account an industry-specific ESG best-in-class approach on the one hand and ensures the so-called "Do no significant harm" principle for all investments on the other. The Assenagon Credit Portfolio Management team is in regular dialogue with companies to review and evaluate their sustainability. Not only quantitative aspects count here. Rather, it is about influencing corporate management with regard to a long-term focus on sustainability. Sustainability risks can have a major impact on the performance of the sub-fund.

Detailed information about the environmental or social characteristics is available in the section "Assenagon Credit SubDebt and CoCo – Information about Sustainability".

In terms of credit rating, the Sub-Fund is to invest in investment-grade instruments and the high-yield segment down to a minimum rating of B- as awarded by Fitch and Standard & Poor's, or a B3 rating from Moody's. In addition, the Sub-Fund can invest up to 10% of its assets in instruments without a rating.

Currency risks associated with investments denominated in currencies other than the euro can be largely hedged using derivatives. Interest rate risks, e.g. those associated with an investment in fixed-rate bonds, will be actively managed by the fund management.

Investment instruments

The Sub-Fund can invest in instruments denominated in various currencies worldwide. These may include bonds, convertible bonds (including contingent convertible bonds), and structured and hybrid bonds of reference entities. Convertible bonds are bonds that give the buyer the right to convert the bond into a pre-defined number of shares in a reference entity within a certain period. This means that convertible bonds have both an interest and an equity component.

Contingent convertibles (CoCos) are bonds which similarly to subordinated bonds fundamentally serve to absorb the issuer's capital losses before other, higher ranking liabilities. Depending on the arrangement, if a predefined event occurs they will be converted into equity, or partially or completely written off or written off with the option of revaluation under certain circumstances.

Investments in asset-backed securities are ruled out.

The Sub-Fund can also invest in derivatives such as credit default swaps (CDS), index CDS and CDS swaptions, for both investment and hedging purposes. A CDS gives the protection seller a premium, for a defined period, to assume the credit risk from the protection buyer. The premium is generally based on the credit rating of the underlying reference entity. The risks transferred with the CDS are specified by pre-defined credit events: Typical credit events include payment default or insolvency on the part of the reference entity. If a credit event occurs, the protection seller pays compensation to the protection buyer. This compensation is based on the reference entity's expected recovery rate and is calculated as part of a standardised procedure (credit auction).

Index CDS means CDS in which a predefined number of CDS on individual reference entities are pooled. These reference entities are usually equally weighted.

CDS swaptions are options on credit indices or individual securities that allow the buyer to enter into an index on credit derivatives at a certain date (European swaption) in return for the payment of a one-off premium. The term and premium of the swap are set. The Sub-Fund only invests in CDS swaptions on indices.

In addition to credit derivatives, the Sub-Fund may also use other derivatives listed below to manage market price risks.

The following instruments may be acquired in order to implement the investment strategy:

- fixed or floating-rate bonds issued by financial institutions and companies (senior and subordinated bonds)
- convertible bonds and contingent convertible bonds of various issuers
- hybrid bonds: hybrid bonds are subordinated bonds which have characteristics of debt and equity, for example bonds with unlimited terms and securities issued in refinancing transactions by special purpose vehicles.
- structured bonds: structured bonds are bonds that have individual additional conditions which may, for example, influence redemption or the payment of interest
- credit default swaps (CDS) on single stocks
- index-based credit derivatives: credit default swaps and swaptions on recognised financial indices, e.g. iTraxx and CDX

- currency hedging transactions: hedging of currency risks using currency swaps or currency forwards
- interest rate derivatives: managing interest rate risk (duration risk) by way of interest rate derivatives (options, futures, swaps)
- equities and equity derivatives (on individual equities and indices)
- total return swaps
- variance swaps and other volatility derivatives (on individual equities and indices)
- repurchase agreements (repos)
- bonds that track the development of loans on a 1:1 basis
- short-dated bonds (commercial paper)
- private placements
- money market investments

The investments made by the Sub-Fund are tracked and monitored in an adequate manner in the Management Company's risk management system.

In order to achieve the investment objective, the Sub-Fund can make direct investments in the aforementioned instruments, or invest in one or more derivative instruments that reflect the above-mentioned investment strategy or individual component instruments via their underlying. The aim of these derivative instruments is to transfer the performance of the above-mentioned investment strategy or individual instruments to the Sub-Fund, as with a direct investment. Derivative instruments may be used both for hedging and for investment purposes. These derivatives are used only in adherence with the investment principles and restrictions set out in the General Fund Rules. The Management Company can reduce the counterparty risks associated with OTC derivatives transactions by subjecting the parties to the OTC agreements to the obligation to furnish liquid collateral. Such collateral includes in particular cash, securities and prime government bonds. A market value is calculated for this collateral on a daily basis. The value of the collateral to be furnished must, at the very least, correspond to the value by which the investment limits set out under Article 5 of the General Fund Rules are exceeded. The collateral can be realised by the Management Company. Cash settlement or physical settlement may be used for the derivatives in the Sub-Fund portfolio.

Currency risks associated with instruments that are not denominated in euros may be hedged. Currency swaps or currency forwards are generally used for this purpose.

The Sub-Fund will not engage in securities lending, repurchase or buy-back transactions.

The Sub-Fund is only permitted to purchase shares/units in other UCITS and other UCI up to a total of 10% of the Net Sub-Fund Assets.

The maximum leverage from the use of total return swaps corresponds to no more than 4.5 times the fund assets. The expected leverage from use of total return swaps will normally not be more than 2 times the fund assets.

Within the framework of the investment restrictions set out in the General Fund Rules, the Sub-Fund can invest in other admissible assets, in particular in liquid assets, money market instruments, money market and quasi-money market funds.

Based on the principle of risk diversification, the Management Company can invest up to 100% of the Net Sub-Fund Assets in securities, from various different issues, that are issued or guaranteed by an EU member state or its political sub-divisions, or by a member state of the OECD or by public international bodies of which one or more member states of the European Union are members, or by other states recognised by the CSSF (Brazil, Singapore, Russia, Indonesia and South Africa), provided that these securities were issued as part of at least six different issues and no more than 30% of the Net Sub-Fund Assets are invested in securities from the same issue.

Specific risk factors

Credit risks

An investment in Sub-Fund units is associated with credit risk. This relates to the relevant issuer of debt securities or the reference entity/entities in the case of credit derivatives. Credit risk includes default risk (the risk that the reference entity cannot meet its payment obligations in full), migration risk (the risk that the reference entity's credit rating will deteriorate, making default more likely) and the risk of a change to the rules of the debt instrument in which an investment has been made which is disadvantageous for the investor.

Counterparty risks

Counterparty risk is the risk incurred by the Sub-Fund that the contract counterparty will be unable to meet an obligation arising from this contract either in full or in part. Off-exchange OTC transactions can expose the Sub-Fund to risks as regards the creditworthiness of the counterparties and their ability to fulfil the agreement. Options, futures and swap transactions can expose the Sub-Fund to such risks if the counterparty is unable to fulfil its obligations either at all, or in part.

Use of derivatives

Investors are explicitly reminded that the use of derivatives may change the risk structure of the Sub-Fund for the long term.

Foreign currency risks

Investment instruments within the Sub-Fund can be denominated in euros or other currencies. The fund management team can hedge the resulting exchange rate risks between the currency in which the investment instrument is denominated and the currency of the Sub-Fund. Unhedged foreign currency positions may have a long-term impact on the performance of the Sub-Fund.

Interest rate risks

Investors should note that the investment strategy pursued by the Sub-Fund does not offer full protection against price losses if interest rates rise. The level of protection depends on the prevailing market conditions and can vary in different market phases.

Operational and custody risks

The Fund may fall victim to fraud or other criminal activity. It may suffer losses as a result of misunderstandings or errors by employees of the Management Company or external third parties and as a result of the insolvency of a depository or sub-depository. Furthermore, the Fund may be harmed by external events such as natural disasters or pandemics.

Specific risks

The investment focus of the Fund is on subordinated bonds (including contingent convertibles) from the financial sector, which can give rise to an industry-specific risk. Contingent convertibles are compulsorily converted into equity or written off if, for example, the issuer falls short of a certain capital ratio. With these instruments, it is also possible that the relevant bond may be converted or written off at the request of the competent financial supervisory authority or another authorised party.

Particular risks associated with investment in contingent convertibles include:

- Trigger level risk
 - The relevant trigger levels are specified in the issue terms for contingent convertibles. Triggers may be activated, for example, through material loss of capital or an increase in risk-weighted assets.
- Coupon cancellation risk
 - Coupon payments are entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. Cancelled payments are not paid later but written off. This significantly increases uncertainty in the valuation of the instruments and may lead to mispricing of risk.
- Capital structure inversion risk
 - Investors in contingent convertibles may suffer capital loss in certain scenarios (e.g. at a high trigger level), whereas equity investors suffer no loss. This goes

against the normal order of capital structure hierarchy where equity holders are expected to suffer the first loss.

- Call extension risk

With subordinated bonds, issuers frequently have the opportunity to suspend interest and other payments for an indefinite period. Subordinated bonds, in particular contingent convertibles, are often perpetual, although the issuer has the right but not the obligation to redeem the outstanding amount at certain times. For this reason, investors cannot assume that they will receive their invested capital back at all at any time or at certain times.

- Unknown risk

As contingent convertibles are very innovative, they have not yet been fully tested. In a stressed environment, when the underlying features of these instruments will be put to the test, it is uncertain how they will perform.

- Yield/valuation risk

In addition to yield, risks should also be considered, such as those relating to interest rate, currency, volatility, correlation and/or coupon cancellation.

The actual fulfilment of investment objectives cannot be guaranteed.

(B) Risk profile of the Sub-Fund

The Fund follows an opportunity-oriented investment strategy geared towards a high increase in value. It has large opportunities and large risks.

(C) Investor risk profile

The Fund is particularly suited to investors who expect large growth or returns and who have sufficient knowledge and experience in the underlying asset classes of the fund to be able to assess the risks of an investment in the fund and are therefore prepared to accept large losses. Investment duration should be at least three to five years.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Assenagon Credit SubDebt and CoCo
Legal entity identifier: 529900SNY0Z5B9VPQF54

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes		<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No	
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of <u>2%</u> of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective 		
<input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%	<input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments		

What environmental and/or social characteristics are promoted by this financial product?

The main aspect of the sustainable orientation results from improvements at the level of the portfolio compared to the initial universe. A significant improvement in the ESG score is targeted.

Furthermore, a minimum share of the portfolio is invested in sustainable investments. This includes investments with a social objective.

In addition, exclusion criteria are applied. The basis for this are the requirements arising from international conventions on banned weapons and the principles of the UN Global Compact. Thus, a zero tolerance threshold applies to issuers related to banned and/or conventional weapons. Limits also apply to company revenues from addictive substances such as tobacco (< 5 %) and alcohol as well as gambling activities. In order to promote the energy transition, the significance of fossil fuels in relation to renewable energies is taken into account in the investment decisions of the companies concerned. Utility suppliers with more than 10 % share of revenue energy production from fossil fuels are excluded. In addition, a limit value is set for coal production and sales.

A minimum industry-adjusted ESG rating and a minimum controversy score must be achieved for a facility to ensure that there are no severe negative environmental, social and governance impacts with respect to the company. This includes existing applicable laws as well as generally accepted

international standards such as the principles of the UN Global Compact. Issuers that do not meet these requirements or do not have an ESG rating or controversy score may only be held up to a maximum of 5% of the fund volume.

Active engagement is carried out by the portfolio management with these issuers in particular. The investment strategy thus takes into account an industry-specific ESG best-in-class approach on the one hand and ensures the so-called "do no significant harm" principle for all investments on the other. Assenagon's Credit Portfolio Management team is in regular dialogue with companies to review and assess their sustainability. It is not only quantitative aspects that count here. Rather, the aim is to influence corporate management with regard to a long-term orientation towards sustainability. Sustainability risks can strongly influence the performance of the sub-fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The measurement of the achievement of the previously described environmental and social characteristics of the financial product is carried out using the following different indicators: The ESG score is used for the targeted improvement at the level of the portfolio compared to the initial universe.

In addition, the sub-fund pursues a minimum share of sustainable investments of 2%. In addition, the following exclusion criteria apply:

- Controversial weapons
- Defence (revenue tolerance < 0%)
- Very severe controversies (incl. violations of global norms)
- Tobacco (revenue tolerance < 5%)
- Alcohol (revenue tolerance < 5%)
- Coal mining and distribution (revenue tolerance < 30%)
- Energy suppliers with more than 10 % of their revenue from energy production from fossil fuels
- Gambling (revenue tolerance < 5%)
- ESG rating < B

Specialist ESG data providers serve as the data source for the indicators.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

Investments are made in reference borrowers that have a share of revenue in social activities and thus contribute significantly to sustainability goals. The social activities are in particular SME financings.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Companies with very severe controversies (incl. violations of the principles of the UN Global Compact) as well as with significant shares of revenue in controversial business areas (incl. a zero tolerance threshold for issuers related to banned weapons) are excluded. This exclusion methodology also exists for sustainable investments. Serious controversies include environmental, social and governance issues as well as global norms. Through these exclusions, we aim to avoid significant damage to environmental or social sustainable investment objectives as much as possible.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Regarding the main adverse impacts on sustainability factors, the so-called Principal Adverse Impacts (PAIs), a large part of the indicators related to companies are taken into account directly and indirectly in the investment strategy. Direct consideration of the indicators takes place via different exclusion criteria. Indirect consideration takes place through the monitoring and targeted improvement of the ESG score, which includes various PAIs. Thus, all environmental indicators as well as the social indicators violation or lack of monitoring of global norms, gender diversity and controversial weapons are taken into account.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For the sustainable investments, as for the entire portfolio, exclusions apply for companies with very severe violations of global standards. These standards directly or indirectly take into account the topics of the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes, on the Principal Adverse Impacts (PAIs), a large part of the company-related indicators are directly and indirectly taken into account in the investment strategy, see section "How have the indicators for adverse impacts on sustainability factors been taken into account?" Information on the consideration of Principal Adverse Impacts in the respective financial year is available for the sub-fund in the annual reports.

No

What investment strategy does this financial product follow?

The sub-fund aims to generate continuous income through the collection of credit spreads, bond interest and price gains, while tolerating interim fluctuations in value. The integration of ESG criteria and the consideration of sustainability risks aim to meet sustainable investment requirements. The sub-fund is actively managed and is not linked to any benchmark. The sub-fund promotes environmental and social characteristics.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy include, on the one hand, the minimum share of 2% in sustainable investments. In addition, the following exclusion criteria apply:

- Controversial weapons
- Defence (revenue tolerance < 0%)
- Very severe controversies (incl. violations of global norms)
- Tobacco (revenue tolerance < 5%)
- Alcohol (revenue tolerance < 5%)
- Coal mining and distribution (revenue tolerance < 30%)
- Energy suppliers with more than 10 % share of revenue from energy production from fossil fuels
- Gambling (revenue tolerance < 5%)
- ESG Rating < B

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

In addition a significant improvement in the ESG score is targeted.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no minimum rate by which the investments considered will be reduced. The exclusion criteria apply to all direct investments.

● ***What is the policy to assess good governance practices of the investee companies?***

Good corporate governance is a core criterion in the definition of the ESG score, for which a significant improvement compared to the initial universe is targeted. Aspects such as the ownership structure, the composition of the management bodies as well as the remuneration policy, accounting, business ethics and tax transparency can be included. In addition, companies with very severe controversies are excluded, and aspects of good corporate governance are included. This may include, for example, bribery, tax evasion, insider trading, money laundering, sanctions violations and accounting violations.

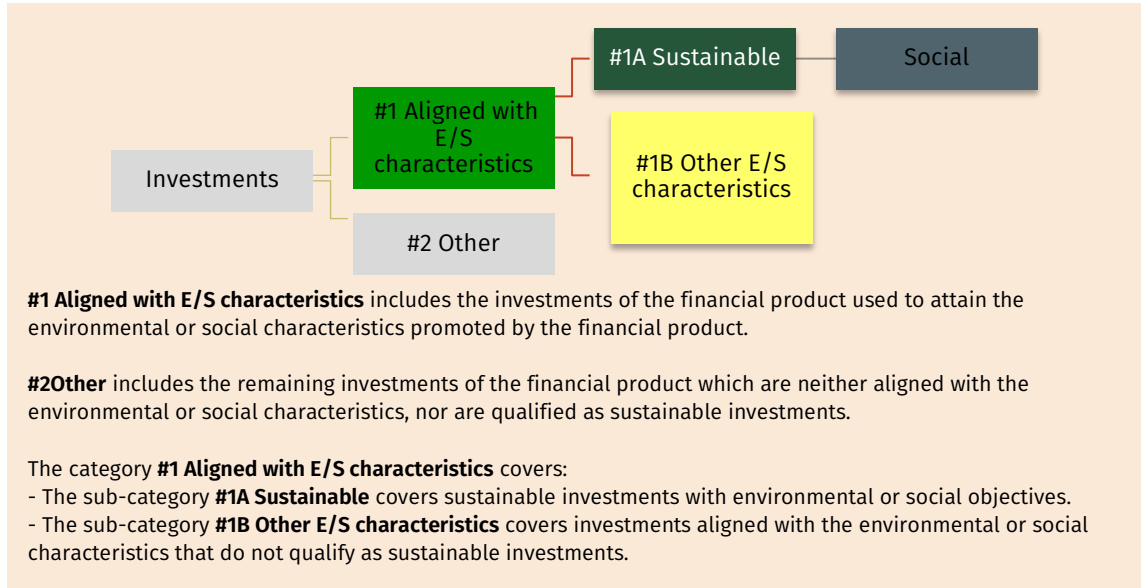

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

A large proportion of the sub-fund's investments are geared towards environmental or social characteristics. The minimum proportion of the portfolio with which the environmental or social characteristics are promoted is 85% (#1). The actual share achieved is typically significantly higher. The proportion of other investments (#2), which are neither geared to environmental or social characteristics nor classified as sustainable investments, comprises the sub-fund's liquidity management (e.g. liquid assets, money market securities, in money market or near-money market funds) and may include derivative instruments for among other things, interest rate and currency hedging. A minimum share of 2% of the financial product is invested in sustainable investments (#1A). This minimum share includes a minimum quota of sustainable investments with a social target of 2%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Credit default swaps (CDS) may also be purchased in the subfund. Furthermore, derivative instruments may be used for interest rate and currency hedging. However, these instruments do not serve to achieve the promoted environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not make sustainable investments with an environmental objective.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?**

- Yes:
 - In fossil gas In nuclear energy
- No

The fund does not seek taxonomy-compliant investments in fossil gas and/or nuclear energy. Nevertheless, it may also invest in companies that are in any case also active in these areas as part of the investment strategy. Further information on such investments is disclosed in the annual report where relevant.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

There is no minimum percentage of investment in transitional and enabling activities.

What is the minimum share of socially sustainable investments?

The minimum share of socially sustainable investment is 2%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The share of other investments that are neither geared to environmental or social characteristics nor classified as sustainable investments comprises the sub-fund's liquidity management (e.g. liquid assets, money market securities, in money market or near-money market funds). Furthermore, derivative instruments may be used for among other things, interest rate and currency hedging. The above exclusion criteria apply to all direct investments in companies.

Where can I find more product specific information online?

More product-specific information can be found on the website:

- for the respective sub-fund via the following link: <https://www.assenagon.com/fonds>

Overview of Assenagon Credit SubDebt and CoCo

Investor risk profile	High risk propensity	
Minimum net fund volume	EUR 20,000,000	
(Initial) issue price due	2 banking days after the initial issue date/relevant Valuation Date	
Redemption price due	2 banking days after the Valuation Date	
Orders accepted	Until 2.30 p.m. CET	Subscription, redemption and conversion orders that are received by the principal agent by 2.30 p.m. CET on a Valuation Date will be settled at the unit value on the next Valuation Date. Orders received after 2.30 p.m. CET will be settled at the unit value on the Valuation Date after the next Valuation Date. All orders are carried out at the un-known Net Asset Value.

Unit value calculation Every banking day in Luxembourg and Frankfurt am Main, with the exception of 24 and 31 December of each year.

Performance fee (if applicable) 20% of performance that exceeds the hurdle rate of 4.5% p.a. The management company receives a performance fee of 20% (participation rate) of the excess performance over a hurdle index from the net fund assets. The performance fee is calculated on each valuation day and paid out for the first time at the end of the fiscal year of the first full financial year. When the unit certificate class is launched, the hurdle index corresponds to the initial issue price of the unit certificate class and develops, over the course of the financial year, on the basis of an imputed basic interest rate of 4.5% p.a. Further information on the calculation of the performance fee can be found in Article 30 of the Special Fund Rules for Assenagon Credit SubDebt and CoCo.

The performance fee calculation is proportionate to the Sub-Fund’s investment strategy. It aligns the interests of the investors with those of the Management Company and allows for the fair and equal treatment of all investors. The parameters are selected in such a way that the Management Company is not tempted to take unreasonable risks.

The chart sketches a theoretical fund price trend.

Year 1: The first performance fee accounting period starts with the launch of the unit class of the fund and ends at the end of the first full financial year. At the end of the first settlement period, the price of the unit class (NAV) is above the hurdle index, which develops in line with the hurdle rate, and the management company is entitled to a performance fee. The outperformance achieved is calculated daily over the year and the Management Company’s entitlement is set aside in the Fund, whereby a reduction in the outperformance would also lead to a reduction in this entitlement again. The entitlement is calculated by multiplying the outperformance achieved by the participation rate. At the end of the first settlement period, the Hurdle Index is adjusted to the price of the unit class (NAV), as this has the higher value.

Year 2: In the course of the second settlement period, the price of the unit class (NAV) decreases, whereas the Hurdle Index moves in line with the Hurdle Rate. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the second settlement period, the Hurdle Index will not be adjusted as the Hurdle Index is quoted above the Unit Class Price (NAV).

Year 3: In the course of the third settlement period, the price of the unit class (NAV) rises again and is above the hurdle index at the end of the year, which develops in line with the hurdle rate as in each settlement period. Overperformance is achieved and during the year the Management Company's entitlement to a performance fee is deferred from the point at which the Unit Class (NAV) price exceeds the Hurdle Index. At the end of the third settlement period, a performance fee is paid and the hurdle index is adjusted to the price of the unit class (NAV), as this has the higher value.

Year 4: During the fourth settlement period, the unit class price (NAV) continues to rise and is above the hurdle index at the end of the year. Outperformance is achieved and over the course of the year the Management Company's performance fee entitlement is accrued. At the end of the fourth settlement period, a performance fee is paid and the hurdle index is adjusted to the unit class price (NAV), as this has the higher value.

Year 5: In the course of the fifth settlement period, the price of the unit class (NAV) decreases, whereas the hurdle index moves in line with the hurdle rate. No additional performance is achieved and no entitlement of the management company to a performance fee is accrued over the course of the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the fifth settlement period, the Hurdle Index will not be adjusted as the Hurdle Index is quoted above the Unit Class Price (NAV).

Year 6: Over the course of the sixth settlement period, the unit class price (NAV) increases but remains below the hurdle index. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the sixth settlement period, the Hurdle Index will not be adjusted as the Hurdle Index is quoted above the Unit Class Price (NAV).

Year 7: During the seventh settlement period, the share class price (NAV) rises to a new all-time high but remains below the hurdle index. No outperformance is achieved and no performance fee entitlement is accrued by the management company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid out at the end of the year. At the end of the seventh settlement period, the Hurdle Index will not be adjusted as the Hurdle Index is quoted above the Unit Class Price (NAV).

Year 8: In the course of the eighth settlement period, the price of the unit class (NAV) falls, whereas the Hurdle Index rises. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the eighth settlement period, the Hurdle Index will not be adjusted as the Hurdle Index is quoted above the Unit Class Price (NAV).

Year 9: Over the course of the ninth settlement period, the unit class price (NAV) increases but remains below the hurdle index. No outperformance is achieved and no performance fee entitlement is accrued by the Management Company during the year. At the end of the year, the unit class price (NAV) is below the Hurdle Index and no performance fee is paid at the end of the year. At the end of the ninth accounting period, the Hurdle Index will not be adjusted as the Hurdle Index is above the NAV of the Share Class.

Year 10: Over the course of the tenth settlement period, the price of the unit class (NAV) continues to rise and is above the hurdle index at the end of the year. Outperformance is achieved and during the year the Management Company's entitlement to a performance fee is deferred from the point at which the Unit Class (NAV) price exceeds the Hurdle Index. At the end of the tenth settlement period, a performance fee is paid and the Hurdle Index is adjusted to the Share Class Price (NAV), which is the higher value.

Depository, principal agent and paying agent fees

Up to a fund volume of EUR 200 million:
0.103% p.a.
if fund volume exceeds EUR 200 million:
0.083% p.a.;
but no less than EUR 30,000 p.a.

This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average Sub-Fund Assets. The fee does not include VAT.

Additional fixed and transaction-related fees are calculated in line with services provided.

Register and transfer agent

Depends on transaction, but a minimum of EUR 24,000 p.a.

Additional fixed and transaction-related fees are calculated in line with services provided.

Other costs	Other costs within the meaning of Article 13 of the General Fund Rules can be charged to the Sub-Fund Assets as actually incurred.	
Conversion fee	None	
Guarantee	No	
Fund term	Unlimited	
Risk management procedures	<p>Relative VaR approach; reference portfolio: A portfolio made up of the following components: 100 % A broadly diversified index whose aim is to track the EUR performance of a global basket of Contingent Convertibles.</p> <p>Further information on the current composition of the reference portfolio can be obtained free of charge from the Management Company.</p>	<ul style="list-style-type: none"> – Historical simulation – Daily calculation – 1 month holding period – 99% confidence interval
Expected leverage based on sum of notionals	Due to the Fund's investment strategy, it is expected that the leverage from the use of derivatives based on the sum of notionals approach will not amount to more than 4.5 times the fund assets; the expected leverage can also be higher however, under special circumstances.*	
Units	Bearer units, registered units	Bearer units are represented via the Central Facility for Funds (CFF) procedure at Clearstream Luxembourg; registered units are entered in the unit register. Unitholders do not have any right to the delivery of physical securities.

* For currency-hedged unit classes, the expected leverage effect increases by around 100% based on the sum of the notionals as a result of the use of currency forwards.

Annex 2

(A) General Fund Rules

Preamble

These General Fund Rules dated 9 December 2024 replace the General Fund Rules dated 4 November 2024 and have been filed with the Luxembourg commercial register. Notice of such filing was published in the Recueil Electronique des Sociétés et Associations on 9 December 2024.

These General Fund Rules set out the general principles for the investment fund with various sub-funds ("*fonds commun de placement à compartiments multiples*") bearing the name **Assenagon Credit** (the "Fund") launched by Assenagon Asset Management S.A. (the "Management Company") pursuant to Part I of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment as amended ("Law of 17 December 2010"), which is subject to the aforementioned Law and is managed by Assenagon Asset Management S.A. The Fund has been set up for an unlimited term.

The specific characteristics of the sub-funds are described in the Special Fund Rules that apply to the sub-fund in question, which may contain regulations that supplement, and deviate from, individual provisions set out in the General Fund Rules.

Collectively, the General Fund Rules and the respective Special Fund Rules, as interrelated components, form the General Fund Rules that apply to the sub-fund in question.

The Management Company also prepares a prospectus and the key investor information for each fund.

Article 1 – The sub-funds

Each sub-fund of the fund Assenagon Credit is a legally dependent investment fund comprising securities and other assets ("Sub-Fund Assets"), which is managed in accordance with the principle of risk diversification. The Fund consists of the totality of the sub-funds. The fund assets (comprising the assets of all sub-funds), less all the liabilities attributable to all the sub-funds ("Net Fund Assets") must reach a value of EUR 1.25 million within six months after the Fund has been authorised by the Luxembourg Financial Supervisory Authority (Commission de Surveillance du Secteur Financier – "CSSF"). Each sub-fund is managed by the Management Company. The assets that make up the respective Sub-Fund Assets will be held in custody by the depositary.

These General Fund Rules and the Special Fund Rules for the respective sub-fund set out the contractual rights and obligations of the investors, the Management Company and the depositary.

By purchasing units, investors acknowledge the General Fund Rules, the Special Fund Rules and any amendments to these.

Article 2 – The Management Company

The Management Company is a public limited company under the law of the Grand Duchy of Luxembourg and has its registered office in Luxembourg.

Subject to the investment restrictions set out in Article 5 of the General Fund Rules, each of the Sub-Fund Assets shall be managed by the Management Company in the latter's own name but solely in the interest and for the joint account of the investors.

The Management Company is responsible for determining and implementing the sub-fund investment policy, as well as for the activities set out in Appendix II to the Law of 17 December 2010. It is entitled to take all management and administrative measures, and to exercise all rights associated either directly or indirectly with the Sub-Fund Assets, for the account of the sub-fund.

The management authority extends in particular, but not exclusively, to the purchase, sale, subscription, conversion and transfer of securities and other legally permissible assets, as well as to the exercise of all rights associated, either directly or indirectly, with the assets of the respective sub-fund. The Management Company's Board of Directors is entitled to entrust the day-to-day management of the Management Company to one or more of its members and/or other individuals.

The Management Company is entitled to call upon external service providers in order to perform its activities.

Furthermore, the Management Company can entrust an investment manager with the management of the assets, or an investment advisor with responsibility for providing investment advice to the Fund/sub-fund. Any investment managers appointed by the Management Company are specified in the Prospectus and Annex.

The Management Company is entitled to charge the fee specified in the corresponding Special Fund Rules to the Sub-Fund Assets.

The Board of Directors comprises the Remuneration Committee of Assenagon Asset Management S.A. This body decides the principles and implementation of the remuneration system.

The remuneration system used at Asset Management S.A. is based on the corporate strategy and contributes to achieving business objectives, rewarding correct behaviour, creating added value for shareholders and investors, and meeting the applicable supervisory recommendations. Taking excessive risks is not rewarded, but rather strongly discouraged. The remuneration system is compatible with and conducive to solid and effective risk management and does not encourage taking risks that are not compatible with the risk profile or the General Fund Rules. The remuneration system is in line with the business strategy, aims, values and interests of the Management Company, the Fund and its investors and includes measures to avoid conflicts of interest.

- The objectives of the remuneration structure are based on the following principles:
- emphasising the long-term and strategic corporate objectives
- maximising the performance of staff and the company
- gaining and maintaining the best employee potential
- a simple and transparent remuneration structure
- remuneration based on the individual performance of staff members, the contributions of the business areas to earnings and the performance of the company as a whole
- different areas of activity and responsibility taken into account
- possibility of using variable components of remuneration in the event of a company profit

The principles of the remuneration system ensure that:

- where bonus payments are made, the employee's total remuneration maintains a balanced ratio of variable and fixed payments, with the components and their amounts varying in accordance with the employee and their position.
- only in exceptional cases may guaranteed bonuses be paid for the appointment of new staff with existing employment contracts.
- variable remuneration for employees is an effective incentive to conduct business in the interests of the company without creating a significant dependence on variable remuneration.

The principles of the remuneration system are reviewed at least once a year. Details of the current remuneration policy, including an explanation of how remuneration and the other inducements are calculated, are available via the website www.assenagon.com/Investor information. A hard copy of this remuneration policy will be provided to the investor free of charge upon request.

Article 3 – The depositary

Brown Brothers Harriman (Luxembourg) S.C.A. has been appointed as the depositary of the assets of the Fund pursuant to the terms of a depositary agreement, as amended from time to time (the "Depositary Agreement"). Brown Brothers Harriman (Luxembourg) S.C.A. is registered with the Luxembourg Company Register (RCS) under number B 29923 and has been incorporated under the laws of Luxembourg on 9 February 1989. It is licensed to carry out banking activities under the terms of the Luxembourg law of 5 April 1993 on the financial services sector. Brown Brothers Harriman (Luxembourg) S.C.A. is a bank organised as a société en commandite par actions in and under the laws of the Grand Duchy of Luxembourg and maintains its registered office at 80 Route d'Esch, 1470 Luxembourg.

The depositary shall assume its functions and responsibilities as a fund depositary in accordance with the

provisions of the Depositary Agreement and the law of 17 December 2010 concerning undertakings for collective investment, as amended by Directive 2014/91/EU, the Commission delegated regulation and applicable Luxembourg law, rules and regulations (the "Law") regarding (i) the safekeeping of financial instruments of the Fund to be held in custody and the supervision of other assets of the Fund that are not held or capable of being held in custody, (ii) the monitoring of the Fund's cash flow and the following oversight duties:

- ensuring that the sale, issue, repurchase, redemption and cancellation of the units of the Fund (the "Units") are carried out in accordance with the General Fund Rules and applicable Luxembourg law, rules and regulations;
- ensuring that the value of the Units is calculated in accordance with the General Fund Rules and the Law;
- ensuring that in transactions involving the Fund's assets any consideration is remitted to the Fund within the usual time limits;
- ensuring that the Fund's income is applied in accordance with the General Fund Rules and the Law; and
- ensuring that instructions from the Management Company did not conflict with the General Fund Rules and the Law.

In accordance with the provisions of the Depositary Agreement and the Law, the depositary may, subject to certain conditions and in order to effectively conduct its duties, delegate part or all of its safe-keeping duties with regard to financial instruments to one or more correspondents appointed by the depositary from time to time. A list of such correspondents (and, if applicable their sub-delegates) shall be available via the website www.assenagon.com/Investor information and will be provided to unitholders upon request. Regarding potential conflicts that may arise as a result of the appointment of sub-custodians, Brown Brothers Harriman (Luxembourg) S.C.A. is acting solely in capacity as depositary of the fund. Brown Brothers Harriman (Luxembourg) S.C.A. is not performing any market activities with any of the sub-custodians that may conflict with its depositary functions (e.g. prime-brokerage) and has not identified any potential conflicts to this particular respect. Regarding conflicts of interest generally, Brown Brothers Harriman (Luxembourg) S.C.A. is also acting as the Principal Agent of the fund and shall do so in this regard in compliance with Article 25 (2) of the UCITS V Directive 2014/91/EU: Brown Brothers Harriman (Luxembourg) S.C.A. does not carry out any tasks in respect of the Fund or the Management Company acting for the Fund that could create conflicts of interest between the Fund, the Fund's investors, the Management Company and it itself, unless there is a functional and hierarchical separation of the performance of its tasks as depositary from its tasks potentially in conflict with these

and the potential conflicts of interest are duly calculated, managed, monitored and disclosed to the Fund's investors. Brown Brothers Harriman (Luxembourg) S.C.A. endeavours to avoid conflicts of interest through, for example, Chinese walls. If conflicts of interest nevertheless arise, procedural measures such as the dual control principle or suitable escalation mechanisms help to manage these conflicts lawfully and fairly. When selecting and appointing a correspondent, the depositary shall exercise all due skill, care and diligence as required by the Law to ensure that it entrusts the Fund's assets only to a correspondent who may provide an adequate standard of protection. The depositary's liability shall not be affected by any such delegation. The depositary is liable to the Fund or its unitholders pursuant the provisions of the Law.

The Law provide for a strict liability of the depositary in case of loss of financial instruments held in custody. In case of loss of these financial instruments, the depositary shall return financial instruments of identical type of the corresponding amount to the Fund unless it can prove that the loss is the result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. Unitholders are informed that in certain circumstances financial instruments held by the depositary with respect to the Fund will not qualify as financial instruments to be held in custody (i.e. financial instruments that can be registered in a financial instrument account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary). The depositary will be liable to the Fund or the unitholders for the loss suffered by them as a result of the depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the Law.

The depositary or the Management Company may, at any time, and subject to a written prior notice of at least three (3) months from either party to the other, terminate the appointment of the depositary, provided however that the termination of the depositary's appointment by the Management Company is subject to the condition that another depositary bank assumes the functions and responsibilities of a depositary bank. Upon termination of the Depositary Agreement, the Management Company shall be obliged to appoint a new depositary bank which shall assume the functions and responsibilities of a depositary bank in accordance with the General Fund Rules and the Law, provided that, as from the expiry date of the notice until the date of the appointment of a new depositary bank by the Management Company, the depositary's only duties shall be to take such steps as are necessary to protect the interests of unitholders.

Article 4 – Principal agent

The Management Company has appointed Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH") as the Fund's registrar, transfer agent and administrator (collectively referred to as the principal agent).

In this connection, BBH shall, in particular, assume responsibility for accounting, including the calculation of the Net Asset Value, and for preparing the annual and interim reports for the Fund, for keeping any unit registers and for transferring units in connection with unit issue and redemption.

Article 5 – General investment principles and investment restrictions

The investment objectives and the specific investment policy pursued by a sub-fund are set out in the Special Fund Rules for the respective sub-fund/in the relevant prospectus on the basis of the following general guidelines.

The following definitions apply:

"Non-member state":

A non-member state, within the meaning of these General Fund Rules, is any European country that is not a member of the European Union, as well as any country in America, Africa, Asia, Australia or Oceania.

"Money market instruments":

Instruments that are usually traded on the money market, are liquid, and the value of which can be precisely determined at all times.

"Regulated market":

A market as defined in Article 4, item 21 of Directive 2014/65/EU on markets in financial instruments.

"Law of 17 December 2010":

Law of 17 December 2010 on Undertakings for Collective Investment (including any subsequent amendments and supplements).

"UCI":

Undertaking for collective investment.

"UCITS":

Undertaking for collective investment in transferable securities which is subject to Directive 2009/65/EC.

"Directive 2009/65/EC":

Council Directive 2009/65/EC of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) (including any subsequent amendments).

"Directive 2014/65/EU":

Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments (including any subsequent amendments).

"Securities":

- Shares and other securities equivalent to shares ("shares").
- Bonds and other forms of securitised debt ("debt securities").
- Any other negotiable securities which carry the right to acquire any such securities by subscription or exchange, with the exception of the techniques and instruments set out under item 5.5.

The investment policy of each sub-fund is subject to the following regulations and investment restrictions:

5.1 The investments made by a sub-fund can consist of the following assets

The fact that the individual sub-funds pursue specific investment policies means that it is possible for several of the investment options set out below not to be used for certain sub-funds. Where appropriate, this is mentioned in the Special Fund Rules for the respective sub-fund.

- a) Securities and money market instruments that are listed or traded on a regulated market;
- b) Securities and money market instruments that are traded on another regulated, recognised market that is open to the public and operates regularly in a member state of the European Union;
- c) Securities and money market instruments that are admitted to official listing on a stock exchange in a non-member state, or which are traded on another regulated market in that country which is recognised, open to the public and operates regularly;
- d) Recently issued securities and money market instruments, provided that the terms of issue include an undertaking that application will be made for official listing on a stock exchange or to trading on a regulated market within the meaning of the provisions set out above under 5.1 a) to c), and that such admission is secured within one year of the issue at the latest;
- e) Shares or units in UCITS authorised pursuant to Directive 2009/65/EC and/or other UCI within the meaning of Article 1 (2) lit. (a) and (b) of Directive 2009/65/EC which have their registered office in a member state of the European Union or a non-member state, provided that
 - these other UCI were authorised in accordance with legal provisions that subject them to official supervision which the Luxembourg supervisory authority that is responsible for the financial sector (the "CSSF") deems to be equivalent to supervision under EU law, and that there is a sufficient guarantee that the authorities will cooperate;
 - the level of protection offered to investors in the other UCI is equivalent to the level of protection offered to investors in a UCITS and, in particular, the provisions governing the segregation of assets,

borrowing, the granting of loans and the short selling of securities and money market instruments are equivalent to the requirements set out under Directive 2009/65/EC;

- the business activities of the other UCI are subject to interim and annual reporting that allows investors to assess the assets and liabilities, income and transactions during the period under review;
 - the organisational documents of the UCITS or this other UCI in which shares/units are to be acquired stipulate that it may not invest more than 10% of its assets in shares/units in other UCITS or other UCI;
- f) Deposits repayable on demand or deposits with the right to be withdrawn, with a term of 12 months at the most, made with credit institutions, provided that the credit institution in question has its registered office in a member state of the European Union, or, in the event that it has its registered office in a non-member state, provided that it is subject to supervisory regulations which the CSSF deems equivalent to those under EU law;
 - g) Derivative financial instruments ("derivatives"), i.e. in particular, options and futures, as well as swap transactions, including equivalent instruments that are settled in cash, which are traded on one of the regulated markets referred to under a), b) and c), and/or derivative financial instruments that are not traded on a stock exchange ("OTC derivatives"), provided that
 - The underlyings are either instruments within the meaning of this item 5.1 a) to h), or financial indices, interest rates, exchange rates or currencies;
 - the counterparties in transactions involving OTC derivatives are institutions subject to official supervision belonging to the categories authorised by the CSSF and
 - the OTC derivatives are subject to a reliable and verifiable valuation on a day-to-day basis, and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value on the sub-fund's initiative.
 - h) Money market instruments that are not traded on a regulated market and do not fall under the definition set out above, if the issuer or issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that they are
 - issued or guaranteed by a central, regional or local authority or central bank of a member state, the European Central Bank, the European Union or the European Investment Bank, a non-member state or, in the case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more member states belong, or

- issued by a company whose securities are traded on the regulated markets referred to under (a), (b) and (c) above, or
- issued or guaranteed by an establishment subject to official supervision, in accordance with criteria defined by EU law, or by an institution which is subject to and complies with supervisory regulations which the CSSF deems to be at least as stringent as those laid down by EU law; or
- issued by other bodies belonging to the categories authorised by the CSSF provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent and provided that the issuer is a company whose equity amounts to at least EUR 10 million (EUR 10,000,000) and which presents and publishes its annual accounts in accordance with Directive 78/660/EEC, or is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.

5.2 In addition, each sub-fund can

- a) invest up to 10% of its net assets in securities and money market instruments other than those set out under 5.1;
- b) hold cash and cash equivalents.
- c) take out loans for a short period of time in an amount corresponding to 10% of its net assets. Cover transactions in connection with the sale of options or with the purchase or sale of forward or futures contracts shall not be deemed to constitute borrowing within the meaning of this investment restriction;
- d) purchase currencies as part of a "back-to-back" loan;
- e) invest in other sub-funds of the Fund (if the Fund consists of more than one sub-fund) in accordance with the conditions set out in Article 181 (8) of the Law of 17 December 2010. Please note that the target sub-fund in turn is not allowed to invest in the sub-fund which acquired units in the target fund (ban on circular investments) and that, according to its organisational documents, the target sub-fund whose units are to be acquired may invest a maximum total of 10% of its assets in units in the Fund's other target sub-funds.

5.3 Furthermore, the sub-funds will adhere to the following investment limits when investing their assets

- a) Individual sub-funds may invest no more than 10% of their net assets in securities or money market instruments issued by the same issuer. Sub-funds may invest no more than 20% of their net assets in deposits with

the same institution. The counterparty default risk in transactions involving OTC derivatives executed by a sub-fund may not exceed 10% of that sub-fund's net assets if the counterparty is a credit institution within the meaning of 5.1 f). In all other cases, the limit is 5% of the sub-fund's net assets.

- b) The total value of the securities and money market instruments issued by issuers with which the sub-fund invests more than 5% of its net assets in each case, may not exceed 40% of the value of that sub-fund's net assets. This restriction shall not apply to deposits and transactions involving OTC derivatives executed with financial institutions that are subject to official supervision.

Notwithstanding the individual limits specified in 5.3 a), a sub-fund may invest no more than 20% of its net assets, with the same institution, in a combination of

- securities or money market instruments issued by this institution and/or
- deposits with this institution and/or
- transactions involving OTC derivatives executed with this institution.

- c) The limit specified in 5.3 a) sentence 1 amounts to a maximum of 35% if the securities or money market instruments are issued or guaranteed by a member state of the European Union or its political sub-divisions, by a non-member state or by a public international body to which at least one member state of the European Union belongs.

- d) The limit specified in 5.3 a) sentence 1 amounts to a maximum of 25% for certain bonds, if these are issued by a credit institution with its registered office in a member state of the European Union which is subject to special official supervision due to statutory provisions on the protection of the holders of these bonds. In particular, the proceeds from the issue of these bonds must, in line with the statutory provisions, be invested in assets that sufficiently cover the resulting liabilities for the entire term of the bonds, and which, in the event of default by the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.

If a sub-fund invests more than 5% of its net assets in bonds, within the meaning of the sub-paragraph above, that are issued by the same issuer, the total value of these investments may not exceed 80% of the value of the net assets of the UCITS.

- e) The securities and money market instruments referred to under 5.3 c) and d) shall not be counted towards the 40% investment limit provided for in 5.3 b).

The limits set out in 5.3 a), b), c) and d) may not be combined, and thus investments made in securities or money market instruments issued by the same issuer or in deposits with this issuer or in derivatives issued

by the latter pursuant to 5.3 a), b), c) and d) may not exceed a total of 35% of the net assets of the sub-fund.

Companies belonging to a group of companies with respect to the preparation of consolidated accounts within the meaning of Directive [2013/34/EU](#) or in accordance with recognised international accounting standards, shall be considered as a single issuer when the investment limits provided for under items a) to e) are calculated.

A sub-fund may cumulatively invest up to 20% of its net assets in securities and money market instruments within one group.

- f) Without prejudice to the limits stipulated under 5.3 k), l) and m) below, the limits stipulated in 5.3 a) to e) are raised to a maximum of 20% for investments in shares and/or debt securities issued by the same issuer if the objective of the sub-fund's investment strategy is to replicate a particular equity or debt securities index that is recognised by the CSSF.

This is subject to the proviso that

- the composition of the index is sufficiently diversified;
- the index is an adequate benchmark for the market to which it refers;
- the index is published in an appropriate manner.

The Management Company confirms that the relevant Sub-Fund will maintain at all times an independent investment policy, even in the context of a replication within the said meaning, and that the Management Company or, where applicable, the Investment Manager appointed for the relevant Sub-Fund will as part of this investment policy be at all times able to differ from a too close replication of the relevant index or benchmark in the interest of the investors, in order to avoid "*closet tracking*" or "*index hugging*" as described in the ESMA statement dated 2 February 2016 on "*Supervisory work on potential closet index tracking*" (see as well the communiqué of the CSSF dated 28 July 2017).

- g) The limit stipulated under 5.3 f) is raised to 35% where this is justified in light of extraordinary market conditions, in particular on regulated markets where certain securities or money market instruments are highly dominant. Investments may be made up to this limit with a single issuer only.

- h) Notwithstanding the provisions set out under 5.3 a) to e), an individual sub-fund may, in line with the principle of risk diversification, invest up to 100% of its net assets in securities and money market instruments from different issues that are issued or guaranteed by a member state of the European Union or its political sub-divisions, or by a member state of the OECD or by public international bodies of which one or more member states of the European Union are members, or by other states recognised by the CSSF (Brazil,**

Singapore, Russia, Indonesia and South Africa), provided that (i) the investors in the relevant sub-fund enjoy the same protection as investors in sub-funds that adhere to the investment limits set out in 5.3 a) to g), (ii) such securities were issued in at least six different issues and (iii) no more than 30% of the net assets of the sub-fund are invested in securities from the same issue.

- i) A sub-fund may acquire shares/units in other UCITS and/or other UCI within the meaning of 5.1 e) provided that no more than 20% of its net assets are invested in the same UCITS or another UCI.

For the purpose of the application of this investment limit, each sub-fund of this umbrella fund within the meaning of Article 181 of the Law of 17 December 2010 is to be considered as a separate issuer, provided that the principle of segregation of the obligations of the various sub-funds vis-à-vis third parties is ensured.

Notwithstanding the first paragraph under (i) and in accordance with the conditions set out in chapter 9 of the Law of 17 December 2010, a sub-fund ("Feeder") may, with the prior permission of the CSSF, invest at least 85% of its net assets in units of another UCITS (or a sub-fund thereof) ("Master"), which is itself not a Feeder.

- j) Investments made in shares/units of UCI other than UCITS may not in aggregate exceed 30% of the net assets of a sub-fund.

If a sub-fund has acquired shares/units of UCITS and/or other UCI, the assets of the respective UCITS or other UCI do not have to be combined for the purposes of the limits specified in 5.3 a) to e).

If a sub-fund purchases shares/units in other UCITS and/or other UCI which are managed, be it directly or indirectly, by the same management company, or by another company with which the management company is linked by common management or control, or by a substantial direct or indirect holding, that management company or other company may not charge subscription or redemption fees on account of the sub-fund's investment in the units of such other UCITS and/or other UCI.

Furthermore, in the event that a sub-fund invests a substantial proportion of its net assets in shares/units in other UCITS and/or other UCI, the maximum amount of the share of management fees that may be charged both to the Sub-Fund Assets and to the UCITS and/or other UCI in which the sub-fund invests, shall be set out in the annual report of the sub-fund.

- k) For all of the UCITS managed by it, the Management Company may not acquire shares carrying voting rights to an extent that would allow it, on the whole, to exercise significant influence on the management of the issuer.

- l) Furthermore, a sub-fund may not, all in all, acquire more than:
- 10% of the non-voting shares of the same issuer;
 - 10% of the bonds issued by the same issuer;
 - 25% of the shares/units in the same UCITS and/or other UCI;
 - 10% of the money market instruments issued by the same issuer.
- The limits set out in the second, third and fourth indent may be disregarded at the time of acquisition if the gross amount of the bonds or the money market instruments, or the net amount of the shares/units issued, cannot be calculated.
- m) The provisions set out above under 5.3 k) and l) are not applicable with respect to:
- (i) securities and money market instruments that are issued or guaranteed by a member state of the European Union or its political sub-divisions;
 - (ii) securities and money market instruments that are issued or guaranteed by a non-member state;
 - (iii) securities and money market instruments that are issued by public international bodies of which one or more member states of the European Union are members;
 - (iv) shares held in the capital of a company incorporated in a non-member state of the European Union, (i) which invests its assets mainly in securities issued by issuers having their registered office in that state, (ii) where under the legislation of that state, such a holding represents the only way in which securities from issuers in that state can be acquired, and (iii) insofar as the company adheres to limits set out above under 5.3 a) to e) and 5.3 i) to l) when investing.
- n) No sub-fund is permitted to acquire precious metals or certificates representing them.
- o) A sub-fund may not invest in real estate, although investments in asset-backed securities, or interest accrued thereon, or investments in securities issued by companies that invest in real estate and interest accrued thereon are permitted.
- p) Neither the Management Company nor the depositary may grant loans or guarantees to third parties at the expense of a sub-fund's assets, although this investment restriction shall not prevent the sub-fund from investing its net assets in securities, money market instruments or other financial instruments within the meaning of 5.1 e), g) and h) above that have not been fully paid up.
- q) Neither the Management Company nor the depositary may engage in short sales of securities, money market instruments or other financial instruments referred to

in 5.1 e), g) and h) above for the account of the sub-fund.

5.4 Notwithstanding any provisions to the contrary contained herein

- a) sub-funds do not have to adhere to the limits set out above under 5.1 to 5.3 when exercising subscription rights attaching to the securities or money market instruments which form part of their assets;
- b) and, notwithstanding their obligation to ensure compliance with the principle of risk diversification, newly authorised sub-funds can derogate from the provisions set out above under 5.3 a) to j) during a period of six months after their authorisation by the CSSF;
- c) if it exceeds these provisions for reasons beyond its control or as a result of the exercise of subscription rights, the sub-fund must then adopt as a priority objective for its sales transactions, to rectify the situation, taking due account of the interests of the investors.
- d) in the case that an issuer forms a single legal entity together with several sub-funds where the assets of a sub-fund are exclusively reserved for the investors in this sub-fund and for the creditors whose claim has arisen in connection with the creation, operation or liquidation of the sub-fund, each sub-fund is to be considered as a separate issuer for the purpose of applying the provisions on risk diversification set out in 5.3 a) to g), as well as in 5.3 i) and j);
- e) the Management Company is entitled to set out additional investment restrictions for the individual sub-funds insofar as this is necessary in order to comply with the laws and regulations in countries in which the units in a sub-fund are offered or sold.

5.5 Other techniques and instruments

a) General provisions

To ensure the efficient management of the Sub-Fund Assets, or the maturity or risk management of the Sub-Fund Assets, the sub-fund may use derivatives and other techniques and instruments.

If these transactions relate to the use of derivatives, the terms and conditions and the limits must be in line with the provisions set out in 5.1 to 5.4 above. The Management Company only trades OTC derivatives and securities lending, repurchase and buy-back transactions with credit institutions and investment firms which comply with the requirements set out in 5.1 g) above and which the Management Company considers suitable in accordance with its risk management procedure. In particular, such counterparties must be based in an EU or OECD country and must have an investment grade rating of a recognised rating agency. Trading with counterparties without rating is possible,

provided the Management Company considers the credit rating as equivalent. Information about the counterparties used can be requested from the Management Company at any time. Furthermore, the provisions on risk management procedures for derivatives set out in 5.6 below must be taken into account. Derivatives can be used for hedging and/or investment purposes, as described in further detail in the applicable Annex.

A sub-fund may not, under any circumstances, deviate from the investment objectives set out in the Special Fund Rules as regards transactions involving derivatives or other techniques and instruments.

- b) In accordance with Luxembourg law, and in particular CSSF Circular 08/356, the Fund can employ other techniques and instruments based on securities and money market instruments. The Fund is entitled to conclude securities lending, repurchase and buy-back transactions for the purpose of efficient portfolio management, increasing returns and/or hedging. The Fund will not conclude any margin lending transactions. All securities, money market instruments and investment units held in the Fund may be transferred to third parties as part of securities lending, repurchase and buy-back transactions. By the same token, securities, money market instruments and investment units may be accepted into the Fund portfolio within the relevant investment limits through securities lending, repurchase and buy-back transactions. The expected portion of the portfolio which becomes the object of securities lending, repurchase and buy-back transactions will be mentioned in the Annex for the relevant sub-fund. The Fund may incur direct and indirect costs through securities lending, repurchase and buy-back transactions, which will always be concluded considering the best execution policy of the Fund, e.g. trading costs or costs for outsourcing management of the collateral pool. These costs will be borne by the Fund and paid to the respective counterparty or service provider, which are independent from the Fund and Assenagon. All remaining income will flow into the Fund.

c) Collateral management

The Fund accepts collateral in connection with securities lending, repurchase and buy-back transactions and OTC derivatives according to Article 4 of Delegated Regulation (EU) 2016/2251 and the associated maximum attributable amounts as per Annex II of Delegated Regulation (EU) 2016/2251.

Currently the Fund uses the below mentioned types of collateral with the associated maximum attributable amounts; the Management Company reserves the right to use other types of collateral and attributable amounts provided it is compliant with Delegated Regulation (EU) 2016/2251:

Collateral Type	Allowed Currency	Attributable amount (maximum of)
Monetary amounts	EUR, USD, GBP	100%
Government bonds issued by members of the Eurozone, as well as Sweden, Australia, Canada, the USA, the UK. Long-Term Rating (S&P) at least AA- or equivalent, Clearstream-able, residual maturity of less than 1 year	EUR, USD, GBP, CAD, AUD	99.5%
Government bonds issued by members of the Eurozone, as well as Sweden, Australia, Canada, the USA, the UK. Long-Term Rating (S&P) at least AA- or equivalent, Clearstream-able, residual maturity of between 1 and 5 years	EUR, USD, GBP, CAD, AUD	98%
Government bonds issued by members of the Eurozone, as well as Sweden, Australia, Canada, the USA, the UK. Long-Term Rating (S&P) at least AA- or equivalent, Clearstream-able, residual maturity of more than 5 years	EUR, USD, GBP, CAD, AUD	96%

The Management Company has implemented a collateral policy for the Fund. The collateral policy is adapted to all the types of asset accepted as collateral and meets the criteria below:

- Liquidity:** All non-cash collateral accepted should be highly liquid and be traded at a transparent price on a regulated market or within a multilateral trading facility, so that it can be sold quickly at a price close to the valuation ascertained prior to the sale. The collateral accepted should also meet the requirements of Article 56 of the UCITS Directive.
- Valuation:** Collateral accepted should be valued at least once each trading day based on market prices in accordance with the principles set out in the "Calculation of the net asset value" section. Assets which display high price volatility should only be accepted as collateral if suitable conservative haircuts are applied.
- Credit rating of the issuer:** The issuer of the collateral accepted should have a high credit rating.
- Correlation:** The collateral accepted by the Fund should have been issued by an entity which is independent of the counterparty and is not highly correlated with the performance of the counterparty.
- Diversification of collateral (asset concentration):** Appropriate diversification with regard to countries, markets and issuers is to be observed for the collateral. The criterion for appropriate diversification of issuer concentration is deemed to have been met if, in the case of efficient portfolio management or in the case of transactions with OTC derivatives, the Fund receives a collateral basket from a counterparty where the maximum exposure to a particular issuer is 20% of the Net Asset Value.

If a UCITS has differing counterparties, the different collateral baskets should be aggregated in order to calculate the 20% limit for exposure to a single issuer. Notwithstanding this sub-item, the Fund can be fully hedged by various securities and money market instruments that are issued or guaranteed by a member state specified above in the table or one or more of its political sub-divisions, by a member state of the OECD or by a public international body to which at least one member state belongs. In this case, the Fund is to hold securities that have been issued through at least six different issues, with no more than 30% of the Fund's net asset value being invested in securities from a single issue.

- f) Risks in connection with collateral management, e.g. operational and legal risks, are to be determined, managed and reduced by risk management.
- g) If rights are transferred, collateral accepted should be held in safe custody by the depositary of the Fund. For other types of collateral agreements, the collateral can be held in safe custody by a third-party which is subject to supervision and does not have any sort of connection with the collateral provider.
- h) If assets are transferred to third parties in connection with derivatives and securities lending, repurchase and buy-back transactions, the type of safe custody for the assets lies within the discretion of the third party.
- i) The Fund should have the opportunity to realise the collateral accepted at any time without reference to authorisation from the counterparty.
- j) Non-cash collateral accepted should not be sold, re-invested or pledged.
- k) Cash collateral accepted should only
 - be held as deposits repayable on demand with entities in compliance with Article 50 letter f of the UCITS Directive;
 - be invested in high-quality government bonds;
 - be used for reverse repo transactions provided these are transactions with credit institutions which are subject to supervision and the Fund can call in the full amount of money accumulated at any time;
 - be invested in money market funds with a short maturity structure in accordance with the definition in CESR's guidelines on a common definition of European money market funds.

Any collateral received and newly invested cash collateral must be appropriately diversified. The general risk information relating to market, credit, counterparty and liquidity risk also applies to re-invested cash collateral.

d) Total return swaps

Total return swaps can track the performance of single securities or single indices or baskets of securities or indices 1:1. All types of Fund assets may be the object of total return swaps. The maximum leverage from the use of total return swaps and the expected actual leverage from use of total return swaps will be mentioned in the Annex for the relevant sub-fund. The composition of the basket underlying the total return swaps is determined solely by the Management Company and can be requested from the Management Company at any time. The Fund may incur direct and indirect costs through total return swap transactions, which will always be concluded considering the best execution policy of the Fund, e.g. trading costs. These costs will be borne by the Fund and paid to the respective counterparty, which is independent from the Fund and Assenagon. All remaining income will flow into the Fund.

e) Financial indices

Information about the financial indices currently used, their constituents, calculation and weighting adjustment frequency and any costs arising from adjusting the weighting within the indices can be requested from the Management Company at any time.

Sub-Funds of the Fund may, to the extent this is set out in their respective Appendix, (i) benefit from exposure to the performance of an index as benchmark, or (ii) use such an index in order to measure the performance of the relevant Sub-Fund.

In this context, the Management Company will ensure at all times that it only uses indices or benchmarks within the framework of the respective Appendix specific to the relevant Sub-Fund that are:

- (i) indices or benchmarks within the meaning of article 3 of the Benchmark Regulation (EU/2016/1011, the "**Benchmark Regulation**"); and
- (ii) offered by an administrator within the meaning of the Benchmark Regulation, listed in the public register of administrators and benchmarks established and maintained by ESMA in accordance with article 36 of the Benchmark Regulation: <https://www.esma.europa.eu/benchmarks-register>; or
- (iii) indices or benchmarks that
 - a) do not fall within the scope of the Benchmark Regulation and, for example, are only used for internal purposes, such as in the context of the risk management of a fund for the calculation of the relative value-at-risk; or
 - b) are excluded under the Benchmark Regulation.

The Management Company has prepared a written plan detailing the measures to be taken when a benchmark

changes or is no longer provided. This plan is available to investors free of charge upon request.

5.6. Risk management procedure

A risk management procedure will be applied for the sub-funds, allowing the Management Company to monitor and measure the risk associated with the investment positions of the individual sub-funds, as well as their respective proportion of the overall risk exposure of the investment portfolio, at all times. As far as OTC derivatives are concerned, a procedure that enables the precise and independent measurement of the value of the OTC derivative will be applied in this respect.

The Management Company shall ensure, for each sub-fund, that the overall risk exposure related to derivatives does not exceed the total Net Asset Value of the individual sub-fund portfolio. This risk will be calculated taking into account the market value of the respective underlyings, the counterparty default risk, future market fluctuations and the liquidation period for the positions. A sub-fund is entitled, as part of its investment strategy, to invest in derivatives within the limits specified in 5.3 e) above, provided that the total underlying exposure does not exceed the investment limits set out in 5.3 a) to e) above. If a sub-fund invests in index-based derivatives, these investments do not have to be counted towards the investment limits set out in 5.3 a) to e) above.

A derivative embedded in a security or a money market instrument must be taken into account as regards compliance with the provisions set out in this item 5.6.

The Management Company determines the total risk of the respective sub-fund in accordance with CSSF Circular 11/512 of 30 May 2011 and the ESMA Guidelines 10-788 of 28 July 2010. The Management Company can determine the total risk on the basis of the commitment approach, the relative Value at Risk (VaR) approach or the absolute VaR approach. The method used for the sub-fund is set out in the Annex.

When the total risk for the sub-fund is determined in accordance with the relative or absolute VaR approach, the maximum extent of leverage and the potential of increased leverage is specified in the Annex. The maximum extent of leverage is determined in accordance with the requirements of CSSF Circular 11/512 and the method used to determine the leverage is set out in the Annex.

If the sub-fund uses the relative VaR approach, information about the reference portfolio is also explained in the Annex.

Article 6 – Units, sub-funds, unit classes

All units in a sub-fund carry the same rights.

The Management Company is entitled, provided that this is set out in the relevant Special Fund Rules, to set up one or several sub-funds for a sub-fund within the meaning of

Article 181 of the Law of 17 December 2010, each of which shall form a separate part of the Sub-Fund Assets. The individual sub-funds can differ in terms of their investment objectives, investment policy, reference currency or other characteristics. The rights of investors and creditors concerning a sub-fund or which have arisen in connection with the creation, operation or liquidation of a sub-fund shall be limited to the assets of that sub-fund.

The units can be issued as bearer and/or registered units. Bearer units are issued via the Central Facility for Funds (CFF) procedure at Clearstream Luxembourg. If registered units are issued, these will be entered in the unit register by the register and transfer agent after approval by the Management Company. In this context, confirmations of entry into the unit register will be sent to the unitholders at the address specified in the unit register. Unitholders are not entitled to the delivery of physical securities, irrespective of whether issued bearer units or registered units. The types of units are specified in the relevant prospectus annex for the sub-fund.

In the internal relationship between the investors, each sub-fund shall be treated as an independent entity. The Net Asset Value per unit is calculated individually for each sub-fund where applicable.

The respective Special Fund Rules that apply to a sub-fund can also provide for two or more unit classes for that sub-fund. If a sub-fund provides for two or more unit classes, the unit classes may differ in terms fee structure, the minimum investment amounts, the distribution policy, investor eligibility, the reference currency or other special characteristics to be determined by the Management Company in each case. The Net Asset Value per unit is calculated individually for each unit class issued.

All units carry the same entitlements as regards income, price gains and liquidation proceeds of the respective sub-fund or their respective unit class from the date on which they are issued.

Unitholders may directly or indirectly subscribe to units in the Fund via a nominee within the scope of the relevant statutory provisions. Unitholders who make use of a nominee may at any time apply to be entered as the unitholder in the unit register themselves instead of the nominee.

To the extent legally permissible, the nominee will subscribe to and hold the units in their own name, but for the account of the beneficial unitholder. The nominee will send the unitholder confirmation of subscription.

The Management Company advises investors that they may only assert the entirety of their investors' rights directly against the Fund if the investors are entered in the unitholders' register themselves and in their own name. In cases where an investor has invested in the Fund via an intermediary which has made the investment in its own name but on the investor's behalf, the investor cannot necessarily assert all investors' rights against the Fund

directly or in full. Investors are advised to inform themselves of their rights.

Article 7 – Issue of units

The Management Company is entitled to issue sub-fund units at any time and without restrictions. The Management Company is entitled to issue one or several unit classes within the respective sub-fund.

The initial issue date and, where appropriate, the initial issue period for a newly set up sub-fund/newly set up unit class is determined by the Management Company and specified in the prospectus for the sub-fund in question. The Management Company may decide, at its own discretion, to withdraw the offer of a sub-fund, a sub-fund or a new unit class before a launch date. In addition, the Management Company reserves the right to stop issuing and selling units at any time, or to refuse to accept excessive unit subscriptions insofar as the latter could have a negative impact on adherence to the investment strategy, meaning that a detrimental effect on existing investors could not be ruled out. In both cases, investors who have already submitted a subscription order shall be duly informed, and any subscription amounts already transferred shall be paid back. These amounts shall not bear interest in the period leading up to the repayment. The Management Company can also decide that, following the initial subscription, it will no longer be issuing units in a fund, a sub-fund or a certain unit class.

Units will be issued on each Valuation Date (as defined in Article 9 of the General Fund Rules) at the issue price stipulated in the Special Fund Rules for the relevant sub-fund and in line with the terms and conditions set out therein. The issue price may increase by a front load referred to in the relevant Annex.

The front load is charged in favour of the distribution agents. The front load may be increased by fees or other charges levied in the respective countries of distribution. If the legislation of a particular country stipulates lower front loads, the distribution agents commissioned in that country can sell the units subject to the maximum front load permitted in that country.

To the extent that distribution amounts and/or redemption proceeds are used directly to purchase units in a sub-fund or another fund managed by the Management Company, a reinvestment discount set by the Management Company may be granted.

The minimum investment amounts for initial and subsequent subscriptions may vary depending on the fund, sub-fund and unit class. The Management Company reserves the right not to apply minimum initial and subsequent subscription amounts at its own discretion and taking into account the principle of equal treatment of investors.

The issue price is payable to the depositary within a period specified in the Special Fund Rules.

The units are issued in the form and denomination determined by the Management Company and described in the Special Fund Rules without delay following the receipt of the issue price by the depositary.

Payment for subscription orders must be made in accordance with the provisions of the Special Fund Rules.

Article 8 – Restrictions on the issue of units

The Management Company can restrict or prevent unit ownership by certain individuals if it takes the view that such ownership could have a detrimental impact on the relevant fund or sub-fund, or could violate Luxembourg or foreign laws or other rules and regulations, or if this could result in the fund or sub-fund becoming subject to the laws (for example the tax laws) of a country other than Luxembourg. In particular, the units are not intended for distribution in the United States of America or to US citizens. By way of example, natural persons subject to tax in the US include individuals who

- a) were born in the US or one of its territories/areas subject to its jurisdiction,
- b) are naturalised citizens (e.g. green card holders)
- c) were born abroad as the children of a US citizen,
- d) are primarily resident in the US without being a US citizen or
- e) are married to a US citizen.

By way of example, legal entities subject to tax in the US include

- a) Companies and corporations organised under the laws of one of the 50 US federal states or the District of Columbia,
- b) a company or partnership organised under an "Act of Congress", or
- c) a pension fund formed as a US trust.

In addition, the units are not intended for distribution to the following investors ("non-permitted investors"):

- a) specified US persons,
- b) non-participating foreign financial institutions ("non-participating FFIs") and
- c) passive non-financial foreign entities with one or more substantial US owners ("non-financial foreign entities" or "NFFEs" with one or more substantial US owners),

in each case in accordance with the IGA between Luxembourg and the USA or in accordance with the provisions of FATCA.

Distribution agents that act as a nominee must be FATCA-compliant, e.g. as a "reporting FFI", a "non-reporting FFI" pursuant to a Model 1 IGA, a "participating FFI", a "registered deemed compliant FFI", a "non-registering local bank" or a "restricted distributor" pursuant to the IGA or

pursuant to the FATCA rules. If the status of the distribution agent changes, it must inform the Management Company of this in writing within 90 days.

As a result, the Management company can reject a subscription order at any time at its own discretion. Furthermore, the Management Company can buy back units held by investors who are excluded from purchasing or holding units, in return for payment of the redemption price, at any time.

Article 9 – Calculation of the net asset value

The value of a unit (the "Net Asset Value") shall be expressed in the currency stipulated in the Special Fund Rules for the sub-fund in question (the "Sub-Fund Currency"). Unless a provision to the contrary is set out in the Special Fund Rules of a sub-fund, the Net Asset Value shall be calculated by the Management Company or an agent of the latter, under the supervision of the depositary, on every banking day in Luxembourg and Frankfurt am Main, with the exception of 24 and 31 December of each year ("Valuation Date"). "Banking day" means any day on which the banks in Luxembourg and Frankfurt am Main are open for business. The Management Company can decide to calculate the unit value on 24 and 31 December of a given year, although the values calculated shall not be considered unit value calculations on a Valuation Date within the meaning of the sentence above.

This means that investors cannot demand the issue and/or redemption of units on the basis of a Net Asset Value that was calculated on 24 and 31 December of a given year.

In order to determine the unit value, the value of the assets belonging to a sub-fund, minus the sub-fund liabilities, is calculated on each Valuation Date ("Net Sub-Fund Assets"). This amount is divided by the number of units in the sub-fund outstanding on the Valuation Date and then rounded to two decimal places ("Net Asset Value").

The Net Sub-Fund Assets are calculated based on the following principles:

- a) Assets officially listed on a stock exchange are valued at the last available price. If an asset is listed on several stock exchanges, the last available price on the stock exchange that is the principal market for the asset in question is used.
- b) Assets that are not listed on the stock exchange, but are traded on another regulated, recognised market that is open to the public and operates regularly, are valued at a price which must be no lower than the bid price and no higher than the offer price at the time of valuation and which the Management Company deems to be the best possible price at which the assets can be sold.
- c) Unlisted derivatives are valued on a day-to-day basis using a verifiable procedure to be determined by the Management Company. Pricing of these derivatives is based on standard criteria verifiable by the auditor.
- d) If the prices referred to under a) and b) above are not in line with the market rates, or if an asset is not listed or traded on a stock exchange or another regulated market, or if, in the case of assets that are listed or traded on a stock exchange or another regulated market, the prices calculated pursuant to the provisions set out under a) or b) do not appropriately reflect the fair value of the respective assets, these assets, as well as all other assets, shall be valued at their market value as determined by the Management Company in good faith and based on valuation rules that are generally accepted and can be verified by auditors.
- e) The pro rata interest accrued on assets shall be included to the extent that it is not expressed in the quoted price.
- f) The liquidation value of forwards or options that are not traded on stock exchanges or other organised markets shall be calculated in line with the principles set out by the Board of Directors on a basis that is applied consistently for all different types of contracts. The liquidation value of futures or options that are traded on stock exchanges or other organised markets shall be calculated based on the last available settlement prices for such contracts on the stock exchanges or other organised markets on which these futures or options are traded by the sub-fund; if a future, forward or an option contract cannot be liquidated on a day for which the Net Asset Value is calculated, the calculation shall be based on such value as the management may consider fair and reasonable.
- g) Swaps are valued at their present value.
- h) Cash and cash equivalents shall be valued at their nominal value plus accrued interest. Time deposits can be valued at the nominal value plus accrued interest, provided that a corresponding contract between the financial institution responsible for the safe-keeping of the time deposits and the Management Company states that these time deposits can be terminated at any time and that, in the event of termination, the realisation value is equal to this nominal value plus accrued interest.
- i) The target fund units that form part of sub-fund are valued at the Net Asset Value most recently determined and available. If the redemption of investment units has been suspended, or if no redemption prices are determined, the units, as well as all other assets, shall be valued at the respective realisable value as determined by the Management Company in good faith and based on the realisable value that would most likely be calculated.
- j) All assets not denominated in the Sub-Fund Currency shall be converted into the relevant Sub-Fund Currency at the last available exchange rate. Any gains or

losses from foreign exchange transactions shall be added or subtracted.

- k) All other securities or other assets shall be valued at the fair realisable value as determined by the Management Company in good faith and based on a procedure stipulated by the latter.

The Management Company can choose to allow other valuation methods at its own discretion if it deems this appropriate in the interest of a more adequate valuation of a sub-fund asset.

If the Management Company takes the view that the Net Asset Value calculated on a certain Valuation Date does not reflect the fair value of the sub-fund units, or if there have been considerable fluctuations on the relevant stock exchanges and/or markets since the Net Asset Value was calculated, the Management Company can opt to update the Net Asset Value on the very same day. In such cases, all subscription and redemption orders received for this Valuation Date shall be executed based on the Net Asset Value that has been updated taking into account the principles of good faith.

The respective Net Sub-Fund Assets may be reduced by distributions paid to the investors of the sub-fund.

In the case of unit classes, the resulting unit value shall be calculated separately for each unit class based on the criteria set out below. The composition and allocation of the assets shall always be performed for the sub-fund as a whole.

Income equalisation arrangements can be applied in respect of income and capital gains.

Article 10 – Suspension of the issue, conversion and redemption of units, and suspension of the calculation of the net asset value

The Management Company is authorised to suspend the calculation of the Net Asset Value, as well as the issue, redemption and conversion of units, for a limited period if, and for as long as, circumstances prevail which make such suspension necessary, in particular

- a) during a period in which a stock exchange or another regulated, recognised market that is open to the public and operates regularly, on which a considerable part of the sub-fund assets are listed or traded, is closed (except on customary weekends or public holidays) or trading on this stock exchange or market has been suspended or restricted;
- b) in emergency situations in which the Management Company cannot dispose of sub-fund assets or in which the Management Company cannot freely transfer the consideration for investment purchases or sales, or cannot calculate the Net Asset Value properly; and/or;
- c) during a period of disruption affecting the means of communication usually employed, or aids used to calculate the sub-fund's Net Asset Value or prices on

the stock markets or on the markets on which a considerable portion of the sub-fund's assets are listed/traded

- d) during a period of temporary suspension of the calculation of the net asset value of a UCITS or UCI (or a sub-fund of one of these), in which the Fund is invested; and/or
- e) during a period in which the Board of Directors considers it impossible to value or sell assets due to particular circumstances.

The Management Company shall ensure that the investors are duly informed of the suspension. Investors who have submitted an order for the subscription, conversion or redemption of units in the sub-funds for which the calculation of the Net Asset Value has been suspended shall be informed without delay of the start and the end of the suspension period. If the issue of units in the Fund is suspended, the Management Company may decide, at the investors' request, that units from redemptions by existing or new investors may be bought and sold via a secondary market. The price of units traded on the secondary market depends, inter alia, on market supply and demand, other factors such as the prevailing conditions for the financial markets and companies, and economic and political conditions. In addition, such unit orders may result in costs over which the Management Company has no influence.

Article 11 – Redemption of units

The investors are entitled, on each Valuation Date (as defined in Article 9 of the General Fund Rules), to demand the redemption of their units at the redemption price stipulated in the Special Fund Rules for the relevant sub-fund and in line with the terms and conditions set out therein. The redemption price may be reduced by a redemption fee which is identical for all redemption orders settled on a certain Valuation Date, the maximum amount of which is stipulated in the Special Fund Rules for the relevant sub-fund.

The redemption orders shall be considered legally binding and irrevocable, without exception. All of the required documents for redemption, as well as any certificates that may have been issued, must be enclosed with the order.

The redemption price shall be paid within the period specified in the relevant Special Fund Rules following the later of the applicable Valuation Date and the date on which all of the required documents have been received by the agent specified in the Prospectus. The depositary is only obligated to make payment to the extent that no statutory provisions, e.g. foreign exchange law provisions or other circumstances that are beyond the depositary's control, prohibit or restrict the transfer of the redemption proceeds to the country of the investor submitting the order.

The redemption price shall be paid in the reference currency of the respective sub-fund/relevant unit class. The redemption price can fall short of, or exceed, the price paid at the time of subscription or purchase.

The Management Company is entitled to buy back units at any time at its own discretion and, in particular, in line with the requirements of the provisions set out in item 8. In such cases, the investors are obligated to return the units.

In the event that the number or the total net asset value of units held by an investor in the relevant sub-fund or in a given unit class falls below the minimum net sub-fund assets stipulated by the Management Company in the relevant Annex as a result of a redemption application, the Management Company can decide that this application is to be considered an application for the redemption of the investor's entire unitholdings in the respective sub-fund/in this unit class or that the sub-fund is to be closed.

If, on a given Valuation Date, redemption orders are received accounting for more than 10% of a sub fund's Net Asset Value, either individually or taken together with other applications received, the Management Company reserves the right, at its sole discretion and taking into account the interests of the remaining unitholders, to reduce the number of units for the individual redemption orders on a pro rata basis. If an order is not executed in full on this Valuation Date because the Management Company makes use of its right to make a pro rata reduction, it must be treated, as regards the part that has not been executed, as if the unitholder had submitted a further order for the next Valuation Date and, if necessary, also for the seven subsequent Valuation Dates at the most. These orders shall be given priority over orders received for the subsequent Valuation Dates submitted at a later date.

Soft Closing

The Management Company is authorised to restrict the issue, redemption and conversion of units of a sub-fund in terms of transaction volume if and for as long as circumstances prevail that make such restriction necessary, in particular if there is a lack of liquidity on the financial markets. The Management Company shall duly inform the investors of the soft closing. If the issue of units in the Fund is restricted, the Management Company may decide, at the investors' request, that units from redemptions by existing or new investors may be bought and sold via a secondary market. The price of units traded on the secondary market depends, inter alia, on market supply and demand, other factors such as the prevailing conditions for the financial markets and companies, and economic and political conditions. In addition, such unit orders may result in costs over which the Management Company has no influence

Article 12 – Conversion of units

Unless the Special Fund Rules that apply to the sub-fund in question contain provisions to the contrary, and subject to the satisfaction of the relevant eligibility criteria, the investors in a sub-fund are entitled, on each Valuation Date (as defined in Article 9 of the General Fund Rules) to convert their units at the conversion price stipulated in the Special Fund Rules that apply to the sub-fund in question and in line with the conditions set out therein, for units in a different unit class, if available, or in a different sub-fund managed by the Management Company. The conversion price can increase by a conversion fee, the maximum amount of which is stipulated in the Special Fund Rules for the relevant sub-fund.

Article 13 – Costs of the respective sub-fund

In addition to the costs set out in the Special Fund Rules for the relevant sub-fund, the Management Company can charge the following costs to the individual sub-fund:

- a) all taxes levied on assets, income and expenses of the sub-fund;
- b) the fee for the Management Company and any performance fee;
- c) the fee charged by the depositary, any centralising agent, any market maker, the principal agent and paying agents, as well as their processing fees and standard bank charges;
- d) standard commission and bank fees, in particular commission incurred in connection with transactions involving securities and other assets of a sub-fund, as well as with currency and securities hedging transactions;
- e) the costs involved in accounting, bookkeeping and calculating the Net Asset Value, as well as its publication;
- f) advisory costs incurred by the Management Company or the depositary when they act in the interest of the investors in a sub-fund;
- g) the costs and expenses in connection with the formation of a sub-fund, set-up costs, fees to be paid to index licensors or index calculation agents, the costs of any listing or registration in Germany and abroad, as well as insurance premiums, interest and brokerage fees;
- h) all printing costs for unit certificates (*certificate and coupon sheet*);
- i) the fees to be paid to the auditor, as well as the costs of the tax audit and the tax reporting of a sub-fund;
- j) the costs involved in preparing, filing and publishing the General and Special Fund Rules, as well as other documents relating to a sub-fund, including registration applications, prospectuses or written information submitted to all registration authorities and stock ex-

changes (including local securities dealers' associations) which have to be prepared, filed and published in connection with a sub-fund or the offer of units;

- k) the costs incurred to print and distribute the annual and interim reports, as well as the costs of any IFRS reporting, for the investors in all necessary languages, as well as the costs incurred to print and distribute all other reports and documents required pursuant to the applicable laws or regulations issued by the authorities specified;
- l) the Management Company may charge the Fund any standard market fees/costs associated with the initiation, preparation and execution of securities lending transactions, repurchase agreements and similar permissible transactions for the account of the Fund;
- m) the costs of collateral management incurred within the framework of OTC derivatives trading, for securities lending transactions and for repurchase agreements, as well as other costs incurred within the framework of OTC derivatives trading;
- n) the costs relating to publications intended for the investors;
- o) the fees charged by the sub-fund representatives abroad;
- p) an appropriate proportion of the costs incurred for advertising purposes, or of those costs directly associated with the offer and sale of units, as well as distribution agent fees;
- q) the costs of third parties providing analytical material or services concerning one or more financial instruments or other assets, or concerning the issuers or potential issuers of financial instruments, or closely related to a particular industry or market;
- r) the costs and expenses associated with regulatory expenses, such as, FATCA, EMIR, Solvency II, VAG Reporting, CRD, MiFID II (e.g. commissioning third parties to provide sales-relevant data), money laundering and tax regulations;
- s) the costs and service fees for the listing on fund platforms;
- t) as well as all other management fees and costs and expenses incurred by the sub-fund.

All costs and fees are initially offset against current income, then against net capital gains, and then finally against the respective Net Sub-Fund Assets.

Nevertheless, the Management Company retains the right not to charge the sub-fund for certain of these costs, but rather to bear these costs directly using the assets of the Management Company. More detailed provisions in this respect can be found in the Annex to the Prospectus for the relevant sub-fund.

Article 14 – Audit

The accounts of the Management Company, the Fund and all Sub-Fund Assets will be audited by an independent auditor authorised in Luxembourg who is appointed by the Management Company.

Article 15 – Distributions

Notwithstanding any provision to the contrary in the Special Fund Rules of a relevant sub-fund, the Management Company shall decide, for each sub-fund, whether, as a general rule, to make distributions to the investors using the respective Sub-Fund Assets or whether to reinvest these assets.

In the case of distributing units, the Management Company intends to actually make distributions. Interest and/or dividend income, less costs ("net income"), as well as net realised price gains, can be distributed. Interest or dividend income, less costs ("net income"), as well as net realised price gains, can be distributed. Furthermore, unrealised price gains and other assets can be distributed as long as the Net Fund Assets do not fall below the minimum EUR 1.25 million threshold stipulated by the Law of 17 December 2010 as a result of the distribution.

The Management Company is authorised to make interim distributions.

In the event that a distribution is made in the form of bonus units, any remaining fractional amounts can be paid out in cash or credited. Distribution amounts that remain unclaimed five years after the publication of a distribution notice shall be forfeited and revert to the sub-fund.

It shall, however, be at the discretion of the Management Company to decide whether or not to payout distribution amounts, from the respective sub-fund assets, even after the five-year period has lapsed.

Article 16 – Coming into force, amendments to the General and Special Fund Rules

These General Fund Rules, as well as the Special Fund Rules for each sub-fund and any amendments to these shall come into force on the day they are signed, unless there are provisions that stipulate otherwise.

The Management Company is entitled to amend the General Fund Rules of the Fund and any Special Fund Rules that apply to a specific sub-fund, at any time, either in full or in part.

The first valid version of the General Fund Rules, each set of Special Fund Rules and any amendments to these shall be filed with the Luxembourg commercial register. A notice stating that they were filed with the Luxembourg commercial register will be published in the Recueil Electronique des Sociétés et Associations.

Article 17 – Publications

The issue price and the redemption price of the sub-fund units, the General and Special Fund Rules, as well as the Prospectus and the key investor information for each fund/sub-fund are available, in each case, from the Management Company, the depositary, all paying agents and the distribution and sub-distribution agents, and can be accessed at www.assenagon.com. To the extent that is required by law or if stipulated by the Management Company, the issue price and the redemption price for each sub-fund will be published in a daily newspaper, determined by the Management Company, in those countries in which the units are offered to the public.

Four months after the end of each financial year of each sub-fund at the latest, the Management Company will make an audited annual report available, providing information on the relevant Sub-Fund Assets, their management and the results achieved.

At least two months after the end of the first half of each financial year of each sub-fund, the Management Company will make an unaudited interim report available, providing information on the respective Net Sub-Fund Assets and their management during the half-year under review.

The annual report and all interim reports on each sub-fund are available to investors free of charge from the Management Company, the depositary and all paying agents, and can be accessed at www.assenagon.com.

Notices to the investors shall be published in at least one supra-regional daily newspaper or electronic communication media (as specified in the Prospectus) in those countries in which the units are offered to the public.

Article 18 – Liquidation and merger of the Fund and the sub-funds

Liquidation

Neither investors nor their heirs/successors may require the liquidation and/or split of a sub-fund.

Each sub-funds can be liquidated by the Management Company at any time. The Management Company will act as the liquidator as a general rule. The Fund must be liquidated in statutorily defined cases or if the Management Company is liquidated for any reason.

Any such liquidation shall be published by the Management Company in the *Recueil Electronique des Sociétés et Associations* and in at least two daily newspapers in accordance with the statutory provisions. One of these daily newspapers must be published in Luxembourg. If circumstances arise resulting in the liquidation of a sub-fund, the issue of units will be suspended. Units in this sub-fund can still be redeemed provided that equal treatment of the investors is guaranteed.

The depositary will distribute the liquidation proceeds, less the liquidation costs and fees, among the investors pro rata to their respective units, upon instruction by the Management Company or, where appropriate, the liquidators appointed by the latter or by the depositary with the consent of the supervisory authority. Liquidation proceeds that have not been claimed by investors by the end of the liquidation proceedings will, to the extent that is required by law in such cases, be converted into euros and, following the conclusion of the liquidation proceedings, deposited by the depositary with the *Caisse des Consignations* in Luxembourg, in accordance with Article 146 of the Law of 17 December 2010, for the account of the eligible investors. These amounts shall be forfeited if they are not claimed within the statutory period.

If a sub-fund is a Feeder of another UCITS (or a sub-fund thereof), the liquidation or merger of the other UCITS (or its sub-fund) will lead to the liquidation of the Feeder, unless, with the CSSF's permission, the Feeder changes its investment policy within the limits of the Law of 17 December 2010.

Merger

The Management Company can, by way of a resolution passed by the Board of Directors, decide to merge or consolidate a sub-fund with another sub-fund of the Fund or merge or consolidate it with another fund (or a sub-fund of that fund), taking into account the provisions of the Law of 17 December 2010, particularly if

- if the Net Sub-Fund Assets have, on a given Valuation Date, fallen below an amount that is deemed the minimum amount for financially viable management of the Fund;
- if a material change in the economic or political environment, or profitability reasons mean that it no longer makes commercial sense to continue managing the Fund.

Article 19 – Limitation of actions

Any claims that investors have vis-à-vis the Management Company or the depositary are subject to a limitation period of five years after the claim arises. This shall not affect the provision set out in Article 18 (3). The submission deadline for coupons is five years from the date of the published distribution notice.

It shall, however, be at the discretion of the Management Company to decide whether or not to process coupons submitted even after the submission deadline has passed.

Article 20 – Governing law, place of jurisdiction, language and other provisions

These General Fund Rules and the Special Fund Rules that apply to the respective sub-funds are subject to Luxembourg law. The district of Luxembourg City has

subject-matter jurisdiction over all legal disputes between investors, the Management Company and the depositary.

The Management Company and the depositary are entitled to subject themselves and each sub-fund to the jurisdiction and laws of any country in which the units in this sub-fund are distributed to the public, provided that the claims are filed by investors resident in the country in question and relate to unit subscription and redemption.

The German version of the General and Special Fund Rules shall prevail.

With respect to units sold to investors in the respective country, the Management Company and the depositary are entitled to declare translations into the languages of the countries in which such units are distributed to the public as binding, both for themselves and for these sub-funds.

In the event of a conflict between the General Fund Rules and the Prospectus, the former shall take precedence.

Article 21 – FATCA

The Management Company has decided that the Fund is to qualify as a so-called "restricted fund" and thus as a "non-reporting financial institution" within the meaning of the IGA.

(B) Special Fund Rules: Assenagon Credit Selection ESG Sub-Fund

Supplementary to/in derogation of the General Fund Rules set out above (Articles 1 – 21), the provisions of the Special Fund Rules dated 9 December 2024, which are set out below, shall apply to Assenagon Credit Selection ESG (the "Sub-Fund"). Notice of their filing with the Luxembourg commercial register was published in the Recueil Electronique des Sociétés et Associations on 9 December 2024.

Article 22 – Investment policy

The sub-fund aims to generate a return and is invested based on the principle of risk diversification.

A detailed description of the sub-fund investment policy can be found in the Annex to the Prospectus.

Article 23 – Units, issue, conversion and redemption of units

Units shall be issued in every denomination to be stipulated by the Management Company. If they are via the Central Facility for Funds (CFF) procedure at Clearstream Luxembourg, the investors shall have no right to the delivery of physical units. This is set out in the Prospectus.

Units in the Sub-Fund are freely transferable.

All units carry the same entitlements as regards income, price gains and liquidation proceeds from the date on which they are issued.

The issue price is the Net Asset Value of the sub-fund/the relevant unit class pursuant to Article 7 in conjunction with Article 9 of the General Fund Rules on the respective Valuation Date. An additional front load may be charged. This is mentioned in the Annex to the Prospectus. The subscription price is payable within two banking days of the relevant Valuation Date. The applicable payment deadline in each case is set out in Annex 1 to the Prospectus.

The redemption price is the Net Asset Value of the Sub-Fund/the relevant unit class pursuant to Article 9 in conjunction with Article 11 of the General Fund Rules. No redemption fee is charged. The redemption price shall be paid within two banking days, at the most, of the later of the applicable Valuation Date and the date on which all of the required documents have been received by the principal agent specified in the Prospectus. The payment deadline that applies in each case is set out in Annex 1 to the Prospectus.

Subscription, conversion and redemption orders shall be accepted by the principal agent and by the distribution agents and sub-distribution agents, and shall be settled based on an unknown Net Asset Value.

Subscription, conversion and redemption applications that have been filled out in full shall be settled in line with the order acceptance regulations set out in Annex 1 to the Prospectus. If subscription, conversion or redemption orders are processed via the distribution agents and sub-distribution agents, or by paying agents, different procedures and deadlines may apply; nevertheless, the aforementioned deadlines that apply in respect of the principal agent shall remain unchanged. The full terms and conditions for subscription, conversion and redemption of fund units are available via the principal agent, or via the respective distribution agents or sub-distribution agents, or via the relevant paying agent.

Article 24 – Costs

For unit class I, I2, I CHF, I2 CHF, I2S CHF, R, RM, R CHF, R2 CHF:

The Management Company withdraws a fee of up to 0.7% p.a. from the Sub-Fund. This fee will be calculated and accrued on a daily basis and will be paid out on the last day of the month based on the average monthly sub-fund assets. The fee does not include VAT.

Furthermore, the Management Company receives a performance-based fee that is calculated daily and paid annually. The Management Company will receive a performance fee based on the net fund assets corresponding to 15% of the outperformance over and above a hurdle index. If the hurdle index is no longer available or no longer exists, the Management Company will replace it with an equivalent other hurdle index. **A performance fee can also be paid out if the fund has outperformed the hurdle index but still shows a negative performance.** The performance

fee will be accrued on every Valuation Date and will be paid out at the end of the financial year.

When the unit certificate class is launched, the hurdle index corresponds to the initial issue price of the unit certificate class and develops, over the course of the financial year, on the basis of the 3-month Euribor (or the 3-month SARON for all CHF unit classes) plus 3.5% p.a. The 3-month Euribor (Euro Interbank Offered Rate) is the rate at which euro interbank term deposits are being offered by one prime bank to another. At the close of a financial year, the hurdle index will be adjusted to the highest unit value reached for the previous five ends of the financial year (high water mark), with the unit value adjusted for distributions. If there are less than five previous fiscal year ends, all previous fiscal year ends are taken into account for the adjustment of the hurdle index. At the end of each of the first two financial years, the hurdle rate will be adjusted to correspond to the higher of a) the hurdle index value calculated for the end of the financial year or b) the unit value of the respective unit certificate class at the end of the financial year after adjustment for distributions.

The performance fee is equal to the difference between the unit value (before the accrual of the performance fee and after adjustment for distributions) and the hurdle index, multiplied by the number of units currently outstanding, multiplied by the 15% fee, less the correction items for inflows, whereby the performance fee is always in proportion to the actual investment performance of the fund.

In order to prevent dilution effects in the case of unit redemptions, the performance fee for the redeemed units, if positive, will be taken from the fund volume. In the case of subscriptions, the accrued performance fee per unit will be multiplied by the number of units added and credited to the Fund as a correction item.

At the end of the financial year, and following payment of the performance fee calculated as set out above, the hurdle index will be adjusted as described above, and all provisions will be reset to zero, irrespective of whether a performance fee was paid out.

The depositary, the principal agent and the paying agent in Luxembourg are entitled to receive a fee of up to 0.103% p.a., but at least EUR 30,000 p.a., from the sub-fund assets. This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average sub-fund assets. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

The fees paid to the register and transfer agent depend on the transactions, but total a minimum of EUR 24,000 p.a. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

Furthermore, the Sub-Fund can be charged for other costs pursuant to Article 13 of the General Fund Rules.

For unit class I2R:

The Management Company withdraws a fee of up to 0.9% p.a. from the Sub-Fund. This fee will be calculated and accrued on a daily basis and will be paid out on the last day of the month based on the average monthly sub-fund assets. The fee does not include VAT.

The depositary, the principal agent and the paying agent in Luxembourg are entitled to receive a fee of up to 0.103% p.a., but at least EUR 30,000 p.a., from the sub-fund assets. This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average sub-fund assets. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

The fees paid to the register and transfer agent depend on the transactions, but total a minimum of EUR 24,000 p.a. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

Furthermore, the Sub-Fund can be charged for other costs pursuant to Article 13 of the General Fund Rules.

For unit class P, P2:

The Management Company withdraws a fee of up to 1.4% p.a. from the Sub-Fund. This fee will be calculated and accrued on a daily basis and will be paid out on the last day of the month based on the average monthly sub-fund assets. The fee does not include VAT.

Furthermore, the Management Company receives a performance-based fee that is calculated daily and paid annually. The Management Company will receive a performance fee based on the net fund assets corresponding to 15% of the outperformance over and above a hurdle index. If the hurdle index is no longer available or no longer exists, the Management Company will replace it with an equivalent other hurdle index. **A performance fee can also be paid out if the fund has outperformed the hurdle index but still shows a negative performance.** The performance fee will be accrued on every Valuation Date and will be paid out at the end of the financial year.

When the unit certificate class is launched, the hurdle index corresponds to the initial issue price of the unit certificate class and develops, over the course of the financial year, on the basis of the 3-month Euribor plus 3.5% p.a. The 3-month Euribor (Euro Interbank Offered Rate) is the rate at which euro interbank term deposits are being offered by one prime bank to another. At the close of a financial year, the hurdle index will be adjusted to the highest unit value reached for the previous five ends of the financial year (high water mark), with the unit value adjusted for distributions. If there are less than five previous fiscal year ends, all previous fiscal year ends are

taken into account for the adjustment of the hurdle index. At the end of each of the first two financial years, the hurdle rate will be adjusted to correspond to the higher of a) the hurdle index value calculated for the end of the financial year or b) the unit value of the respective unit certificate class at the end of the financial year after adjustment for distributions.

The performance fee is equal to the difference between the unit value (before the accrual of the performance fee and after adjustment for distributions) and the hurdle index, multiplied by the number of units currently outstanding, multiplied by the 15% fee, less the correction items for inflows, whereby the performance fee is always in proportion to the actual investment performance of the fund.

In order to prevent dilution effects in the case of unit redemptions, the performance fee for the redeemed units, if positive, will be taken from the fund volume. In the case of subscriptions, the accrued performance fee per unit will be multiplied by the number of units added and credited to the Fund as a correction item.

At the end of the financial year, and following payment of the performance fee calculated as set out above, the hurdle index will be adjusted as described above, and all provisions will be reset to zero, irrespective of whether a performance fee was paid out.

The depositary, the principal agent and the paying agent in Luxembourg are entitled to receive a fee of up to 0.103% p.a., but at least EUR 30,000 p.a., from the sub-fund assets. This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average sub-fund assets. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

The fees paid to the register and transfer agent depend on the transactions, but total a minimum of EUR 24,000 p.a. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

Furthermore, the Sub-Fund can be charged for other costs pursuant to Article 13 of the General Fund Rules.

Article 25 – Distribution policy

The specific distribution policy of the Sub-Fund or share class will be mentioned in the Annex.

Article 26 – Financial year

The financial year of the Sub-Fund will end on 31 December of each year; for the first time on 31 December 2013. The first financial year is an abridged financial year running from the initial issue date until 31 December 2013.

Article 27 – Term of the Sub-Fund

The Sub-Fund has been launched for an unlimited period of time.

(C) Special Fund Rules: Assenagon Credit SubDebt and CoCo Sub-Fund

Supplementary to/in derogation of the General Fund Rules set out above (Articles 1 – 21), the provisions of the Special Fund Rules dated 9 December 2024, which are set out below, shall apply to Assenagon Credit SubDebt and CoCo (the "Sub-Fund"). Notice of their filing with the Luxembourg commercial register was published in the Recueil Electronique des Sociétés et Associations on 9 December 2024.

Article 28 – Investment policy

The Sub-Fund aims to generate a return and is invested based on the principle of risk diversification.

A detailed description of the Sub-Fund investment policy can be found in the Annex to the Prospectus.

Article 29 – Units, issue, conversion and redemption of units

Units will be issued in every denomination to be stipulated by the Management Company. If they are represented via the Central Facility for Funds (CFF) procedure at Clearstream Luxembourg, the investors shall have no right to the delivery of physical units. This is set out in the Prospectus.

Units in the Sub-Fund are freely transferable.

All units carry the same entitlements as regards income, price gains and liquidation proceeds, from the date on which they are issued.

The issue price is the Net Asset Value of the Sub-Fund/the relevant unit class pursuant to Article 7 in conjunction with Article 9 of the General Fund Rules on the respective Valuation Date. An additional front load may be charged. This is mentioned in the Annex to the Prospectus. The subscription price is payable within 2 banking days of the relevant Valuation Date. The applicable payment deadline in each case is set out in Annex 1 to the Prospectus.

The redemption price is the Net Asset Value of the Sub-Fund/the relevant unit class pursuant to Article 9 in conjunction with Article 11 of the General Fund Rules. No redemption fee is charged. The redemption price shall be paid within no more than 2 banking days or the later of the applicable Valuation Date and the date on which all of the required documents have been received by the principal agent specified in the Prospectus. The applicable payment deadline in each case is set out in Annex 1 to the Prospectus.

Subscription, conversion and redemption applications shall be accepted by the principal agent and by the distribution agents and sub-distribution agents, and shall be settled based on an unknown Net Asset Value.

Subscription, conversion and redemption orders that have been filled out in full shall be settled in line with the order acceptance regulations set out in Annex 1 to the Prospectus. If subscription, conversion or redemption orders are processed via the distribution agents and sub-distribution agents, or by paying agents, different procedures and deadlines may apply; nevertheless, the aforementioned deadlines that apply in respect of the principal agent shall remain unchanged. The full terms and conditions for subscription, conversion and redemption of fund units are available via the principal agent, or via the respective distribution agents or sub-distribution agents, or via the relevant paying agent.

Article 30 – Costs

For unit class I, I2, I CHF, I2 CHF, R, R2, R CHF, R2 CHF:

The Management Company withdraws a fee of up to 0.8% p.a. from the Sub-Fund. This fee will be calculated and accrued on a daily basis and will be paid out on the last day of the month based on the average monthly Sub-Fund Assets. The fee does not include VAT.

Furthermore, the Management Company receives a performance-based fee that is calculated daily and paid annually. The Management Company will receive a performance fee based on the Net Fund Assets corresponding to 20% of the outperformance over and above a hurdle index. The performance fee will be accrued every Valuation Date and will be paid out at the end of the financial year.

When the unit certificate class is launched, the hurdle index corresponds to the initial issue price of the unit certificate class and develops, over the course of the financial year, on the basis of an imputed basic interest rate of 4.5% p.a., before distributions or withholding tax paid by the Fund per unit. Following the close of a financial year, the hurdle index as at the end of the financial year will be adjusted to correspond to the higher value of a) the hurdle index value calculated for the end of the financial year or b) the unit value of the respective unit certificate class following the payment of the performance fee for the previous financial year (high water mark) with the unit value adjusted for distributions.

The performance fee is equal to the difference between the unit value (before the accrual of the performance fee and after adjustment for distributions) and the hurdle index, multiplied by the number of units currently outstanding, multiplied by the 20% fee, less the correction items for inflows, whereby the performance fee is always in proportion to the actual investment performance of the fund.

In order to prevent dilution effects in the case of unit redemptions, the performance fee for the redeemed units, if

positive, will be taken from the fund volume. In the case of subscriptions, the accrued performance fee per unit will be multiplied by the number of units added and credited to the Fund as a correction item.

At the end of the financial year, and following payment of the performance fee calculated as set out above, the hurdle index will be adjusted as described above, and all provisions will be reset to zero, irrespective of whether a performance fee was paid out.

The depositary, the principal agent and the paying agent in Luxembourg are entitled to receive a fee from the Sub-Fund Assets of up to 0.103% p.a., but no less than EUR 30,000 p.a. This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average Sub-Fund Assets. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

The fees paid to the register and transfer agent depend on the transactions, but total a minimum of EUR 24,000 p.a. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

Furthermore, the Sub-Fund can be charged for other costs pursuant to Article 13 of the General Fund Rules.

For unit class I2R:

The Management Company withdraws a fee of up to 1.0% p.a. from the Sub-Fund. This fee will be calculated and accrued on a daily basis and will be paid out on the last day of the month based on the average monthly Sub-Fund Assets. The fee does not include VAT.

The depositary, the principal agent and the paying agent in Luxembourg are entitled to receive a fee from the Sub-Fund Assets of up to 0.103% p.a., but no less than EUR 30,000 p.a. This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average Sub-Fund Assets. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

The fees paid to the register and transfer agent depend on the transactions, but total a minimum of EUR 24,000 p.a. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

Furthermore, the Sub-Fund can be charged for other costs pursuant to Article 13 of the General Fund Rules.

For unit class P, P2:

The Management Company withdraws a fee of up to 1.3% p.a. from the Sub-Fund. This fee will be calculated and accrued on a daily basis and will be paid out on the last day of the month based on the average monthly Sub-Fund Assets. The fee does not include VAT.

Furthermore, the Management Company will receive a performance fee that is calculated on a daily basis and paid on an annual basis.

The Management Company will receive a performance fee from the Net Fund Assets corresponding to 20% of the outperformance over and above a hurdle index. The performance fee will be accrued every Valuation Date and will be paid out at the end of the financial year.

When the unit class is launched, the hurdle index corresponds to the initial issue price of the unit class and develops, over the course of the financial year, on the basis of an imputed basic interest rate of 4.5% p.a. At the close of a financial year, the hurdle index will be adjusted, as at the end of the financial year, to correspond to the higher value of a) the hurdle index value calculated for the end of the financial year or b) the unit value of the unit certificate class following the payment of the performance fee for the previous financial year (high water mark) with the unit value adjusted for distributions.

The performance fee is equal to the difference between the unit value (before the accrual of the performance fee and after adjustment for distributions) and the hurdle index, multiplied by the number of units currently outstanding, multiplied by the 20% fee, less the correction items for inflows, whereby the performance fee is always in proportion to the actual investment performance of the fund.

In order to prevent dilution effects in the case of unit redemptions, the performance fee for the redeemed units, if positive, will be taken from the fund volume. In the case of subscriptions, the accrued performance fee per unit will be multiplied by the number of units added and credited to the Fund as a correction item.

At the end of the financial year, and following payment of the performance fee calculated as set out above, the hurdle index will be adjusted as described above, and all provisions will be reset to zero, irrespective of whether a performance fee was paid out.

The depositary, the principal agent and the paying agent in Luxembourg are entitled to receive a fee from the Sub-Fund Assets of up to 0.103% p.a., but no less than EUR 30,000 p.a. This fee will be accrued on a daily basis and will be calculated and paid out on the last day of the month based on the average Sub-Fund Assets. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

The fees paid to the register and transfer agent depend on the transactions, but total a minimum of EUR 24,000 p.a. Additional fixed and transaction-related fees are calculated in line with services provided. The fee does not include VAT.

Furthermore, the Sub-Fund can be charged for other costs pursuant to Article 13 of the General Fund Rules.

Article 31 – Distribution Policy

The specific distribution policy of the Sub-Fund or share class will be mentioned in the Annex.

Article 32 – Financial Year

The financial year of the Sub-Fund will end on 31 December of each year, and for the first time on 31 December 2014. The first financial year is an abridged financial year, running from the initial issue date until 31 December 2014.

Article 33 – Term of the Sub-Fund

Sub-Fund has been launched for an unlimited period of time.
