

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Aviva Investors - Climate Transition Global Credit Fund, Class Zh, Accumulation shares, EUR, a sub-fund of Aviva Investors (ISIN: LU2304375640). The Fund is managed by Aviva Investors Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Objective: The objective of the Fund is to earn income and increase the value of the Shareholder's investment, while outperforming the Benchmark over the long term (5 years or more).

Investment Policy: The Sub-Fund invests at least 70% of total net assets (excluding cash and cash equivalents) in bonds of companies from anywhere in the world responding to climate change which meet the Investment Manager's eligibility criteria as described below (the "core investment"). In this core investment the Sub-Fund excludes fossil fuel companies and has two investment sleeves:

- Solutions sleeve, which will invest in corporate bond issuers whose goods and services provide solutions for climate change mitigation and adaptation;
- Transition sleeve, which allocates to companies positively aligning to and orientating their business models to be resilient in a warmer climate and a low-carbon economy.

The Sub-Fund may invest up to 20% of the total net assets in government bonds. Bond investments may include asset-backed securities (ABS) and mortgage-backed securities (MBS) which are typically invested in European and North American markets.

Derivatives and Techniques: The Sub-Fund may use derivatives for investment purposes by creating both long and synthetic covered short positions, for hedging and for efficient portfolio management.

Derivative usage will either form part of the core Investment, and therefore apply look through to the eligibility criteria, or form part of the Sub-Fund's other holdings which are not subject to the eligibility criteria.

Securities lending

Expected level: 10% of total net assets; maximum: 20%.

Underlying securities in scope: bonds.

Total Return Swaps

Expected level: 0% of total net assets; maximum 30%

Underlying securities in scope: individual credit securities and credit indices.

Strategy: Companies will be identified as eligible for core investment if they satisfy the "Solutions" or "Transitions" criteria and are not excluded on the basis of their fossil fuel activities using the following criteria:

- > 0% revenues from thermal coal, unconventional fossil fuels, Arctic gas & oil production or thermal coal electricity generation;
- >=10% revenues from oil & gas extraction and production and liquid fuels electricity generation;
- >=15% revenues from natural gas electricity generation.

The Investment Manager will also exclude direct investments in companies which manufacture products that seek to do harm when used as intended. Further details can be found in the section "Responsible Investment" in the Prospectus.

Sustainability Disclosures: Environmental, Social & Governance factors (ESG) and Sustainability Risk indicators are integrated into the investment process and are a key determinant based on which companies are selected. This Sub-

Fund does promote environmental or social characteristics, however it does not have a sustainable investment objective. The Investment Manager will consider the adverse impacts of an investment to the extent they are financially material.

Further information is available on the website www.avivainvestors.com.

Benchmark (performance comparison): The Sub-Fund's performance is compared and the Sub-Fund's global exposure is monitored against the Bloomberg Global Aggregate Corporate Index (the "Benchmark" or the "Index"), however the reference benchmark is not aligned with all of the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund is actively managed and does not base its investment process upon the Index, which is only a representation of the investment universe.

The Sub-Fund is expected to operate with volatility equivalent to that of the Benchmark over the long term.

To allow assessment of the Sub-Fund's climate credentials, the Investment Manager will report on key indicators relevant to the Sub-Fund's strategy. Key indicators shall include fossil fuel exposure, the proportion of companies in the Sub-Fund displaying strong climate governance and companies who meet revenue thresholds set out in the Sub-Fund strategy. Such indicators will be published in the Sub-Fund fact sheet and refreshed on an annual basis.

The Investment Manager actively makes the investment selection decisions for the Fund.

You can buy and sell shares on demand on any full bank business day in Luxembourg.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This is an accumulation share class and any income from the Fund will remain in the Fund and is reflected in the share price.

This is a hedged share class, and due to interest rate differential and costs associated with performing the hedging activity, it may have different performance to the equivalent share class in the base currency.

For full investment objectives and policy details please refer to the Prospectus.

RISK AND REWARD PROFILE

Lower risk

Typically lower rewards

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean that the investment is 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.

Higher risk

Typically higher rewards

Currency risk: Changes in currency exchange rates could reduce investment gains or increase investment losses. Exchange rates can change rapidly, significantly and unpredictably.

Emerging markets risk: Compared to developed markets, emerging markets can have greater political instability and limited investor rights and freedoms, and their securities can carry higher equity, market, liquidity, credit and currency risk.

Market risk: Prices of many securities (including bonds, equities and derivatives) change continuously, and can at times fall rapidly and unpredictably.

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.

Derivatives risk: Derivatives are instruments that can be complex and highly volatile, have some degree of unpredictability (especially in unusual market conditions), and can create losses significantly greater than the cost of the derivative itself.

Illiquid securities risk: Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very

volatile.

Operational risk: Human error or process/system failures, internally or at our service providers, could create losses for the Fund.

Credit risk: A bond or money market security could lose value if the issuer's financial health weakens. Below investment grade bonds (also known as high yield securities) typically have greater credit risk than investment grade securities.

Interest rate risk — bonds: When interest rates rise, bond values generally fall. This risk is generally greater for longer-term bonds and for bonds with higher credit quality.

Leverage risk: A small price decline on a "leveraged" underlying investment will create a correspondingly larger loss for the Fund. A high overall level of leverage and/or unusual market conditions could create significant losses for the Fund.

Sustainability risk: This risk is any environmental social or governance event or condition that could impact the value of investments. The Investment Manager primarily relies on its in-house ESG analysis and climate risk indicators to categorise the potential level of Sustainability risks in each sub-fund.

Full information on the risks applicable to the Fund is detailed in the Prospectus.

CHARGES

One-off charges taken before or after you invest*

Entry charge	None
Exit charge	None

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds or share classes in Aviva Investors) you might pay less – you can find the actual entry and exit charges from your financial adviser/distributor.

Charges taken from the Fund over a year

Ongoing charges	0.08%
-----------------	-------

The ongoing charges figure is based on last year's expenses for the year ending December 2021. The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

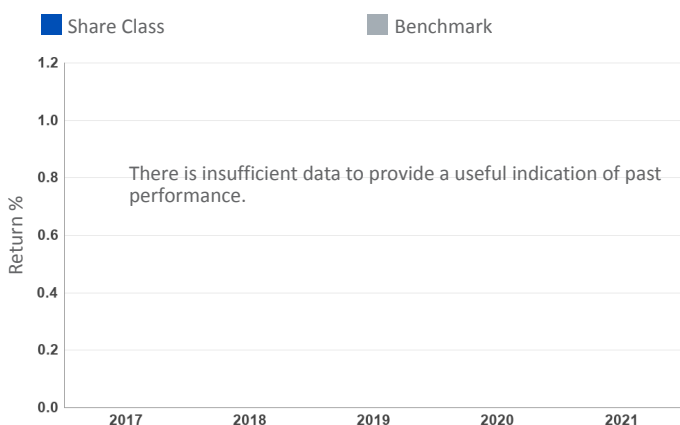

A switching charge of up to 1% may be applied when switching to other funds or share classes in Aviva Investors.

*This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

For more information about charges, including a full explanation of any performance fee (if applicable) please see the charges sections of the Fund's Prospectus.

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

PAST PERFORMANCE

The Share Class was launched on 05 May 2021.
