## CONDUCTING OFFICERS AND BOARD OF DIRECTORS' REPORT

Dear Shareholders,

The Directors of Aviva Investors SICAV (the "Fund" or the "Company") have the pleasure of presenting the annual report and audited financial statements to the shareholders for the year ended 31 December 2023.

### Activities during the year:

At year end, the total net assets of the Sub-Funds (the "Sub-Funds") of the Company were EUR 29,522,666,093 compared to EUR 27,450,585,537 on 31 December 2022, representing an increase of 7.55%.

During the year ended 31 December 2023, no Sub-Funds have been launched.

During the year ended 31 December 2023, the following Share Classes have been launched:

Sub-Fund Name	Share Class	Class Currency	Base Currency	Investment Management Fees	Distribution Fees	Date Launched
Aviva Investors - Emerging Markets Bond Fund	Imh Share Class Dividend Hedged GBP	GBP	USD	0.00%	0.00%	22 June 2023
Aviva Investors - Emerging Markets Bond Fund	K Share Class Accumulation	USD	USD	0.00%	0.00%	8 September 2023
Aviva Investors - Global Emerging Markets Index Fund	V Share Class Accumulation	USD	USD	0.00%	0.00%	14 December 2023
Aviva Investors - Global Equity Endurance Fund	R Share Class Accumulation EUR	EUR	USD	0.00%	0.00%	5 January 2023
Aviva Investors - Global Equity Endurance Fund	V Share Class Accumulation	USD	USD	0.00%	0.00%	14 December 2023
Aviva Investors - Global High Yield Bond Fund	Imh Share Class Dividend Hedged GBP	GBP	USD	0.00%	0.00%	22 June 2023
Aviva Investors - Global High Yield Bond Fund	lyh Share Class Accumulation Hedged CHF	CHF	USD	0.00%	0.00%	6 April 2023
Aviva Investors - Global High Yield Bond Fund	V Share Class Accumulation	USD	USD	0.00%	0.00%	14 December 2023
Aviva Investors - Global Investment Grade Corporate Bond Fund	Imh Share Class Dividend Hedged GBP	GBP	USD	0.00%	0.00%	22 June 2023
Aviva Investors - Global Investment Grade Corporate Bond Fund	V Share Class Accumulation	USD	USD	0.00%	0.00%	14 December 2023
Aviva Investors - Global Sovereign Bond Fund	Imh Share Class Dividend Hedged GBP	GBP	EUR	0.00%	0.00%	22 June 2023
Aviva Investors - Global Sovereign Bond Fund	ly Share Class Accumulation USD	USD	EUR	0.00%	0.00%	31 March 2023
Aviva Investors - Global Sovereign Bond Fund	ly Share Class Accumulation Hedged EUR	EUR	EUR	0.00%	0.00%	14 December 2023
Aviva Investors - Global Sovereign Bond Fund	ly Share Class Accumulation Hedged USD	USD	EUR	0.00%	0.00%	14 December 2023

The following Sub-Funds, including their associated Share Classes, were closed during the year:

Sub-Fund Name	Date Closed
Aviva Investors - Climate Transition European Equity Fund	16 March 2023

During the year ended 31 December 2023, no Share Classes were closed.

### Changes in the Board of Directors:

Changes to the composition of the Board of Directors (the "Board") are shown on page 6.

### Management Company role and responsibilities:

Aviva Investors Luxembourg S.A. as the Management Company is responsible for the investment management, administration and distribution functions of the Company. Aviva Investors Luxembourg S.A. may delegate part or all of such functions to third parties, subject to overall control and supervision. Please refer to the "Management and administration" section to get more details on delegations in place.

### Conducting officers:

The Management Company has appointed Conducting officers, in charge of the day to day management which are:

- Victoria Kernan
- Martin Bell
- Grégory Nicolas (from 4 April 2023)
- Sophie Vilain
- Cindy Joller
- Justine Losic (from 15 September 2023)

The Directors are required to take decisions in the interests of the Company and its Shareholders and to refrain from taking part in any deliberation or decision which creates conflict between their personal interests and those of the Company and its Shareholders.

The Board meets at least four times a year. The Board requests and receives reports from Aviva Investors Luxembourg S.A. on the various activities including compliance controls and risk management undertaken by the Management Company. Senior Aviva Investors Luxembourg S.A. representatives attend all of the quarterly Board meetings, thus enabling the Board to question the reports presented to it.

## CONDUCTING OFFICERS AND BOARD OF DIRECTORS' REPORT (CONTINUED)

### Conducting officers: (continued)

The Board reviews the Annual Report, the external audit process, corporate governance issues, agreements with various key service providers and the relationship with the external Auditor, including the recommendation to Shareholders of its appointment and level of fees.

A new director can be co-opted by existing directors of the Company following the resignation of one director. Such co-optation is required to be ratified by the shareholders at the Annual General Meeting ("AGM"). If there is no resignation, the existing directors cannot proceed by way of co-optation, and the approval of the shareholders at an AGM or Extraordinary General Meeting ("EGM") will be required to appoint a new director. Commission de Surveillance du Secteur Financier ("CSSF") approval is required in both circumstances. Directors who are affiliated with Aviva investors and its affiliates and subsidiaries have waived their fees for the year ended 31 December 2023.

The Company is subject to corporate governance based on:

Its obligations as defined by the UCITS Directive 2009/65/EC dated 13 July 2009, as implemented in Luxembourg law which is available for inspection at the registered office of the Company.

Its Articles of Incorporation which are available for inspection at the registered office of the Company and at the Luxembourg corporate and trade register, Registre de Commerce et des Sociétés.

Its rules of conduct which have been adopted pursuant to applicable requirements under CSSF Regulation 10-4 and CSSF Circular 18-698 for which the Company relies on:

- the Association of the Luxembourg Fund Industry ("ALFI") code of conduct for Luxembourg investment funds. The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

The Board of Directors consider that the Fund has been in compliance with this code in all material aspects throughout the year ended 31 December 2023.

### Environmental, Social & Governance (ESG) Sub-Funds:

On EU Sustainable Finance Disclosure Regulation (SFDR), information about the environmental or social characteristics and sustainable investment objectives, as applicable, are available in the ENVIRONMENTAL, SOCIAL & GOVERNANCE (ESG) SUB-FUNDS (Unaudited) section of the annual report.

Further information regarding how the Investment Manager integrates ESG into its investment approach, its proprietary ESG model and how it engages with companies for each Sub-Funds is available on the website <http://www.avivainvestors.com>.

### Annual General Meeting:

The annual general meeting shall be held in the Grand Duchy of Luxembourg at the registered office of the Company, or at such other place in Luxembourg as may be specified in the notice of the meeting, at any date and time decided by the Board but no later than within 6 months from the end of the Company's previous financial year.

### Significant Events:

Effective 16 March 2023, Aviva Investors - Climate Transition European Equity Fund has been liquidated.

On 19 March 2023, it was announced that Credit Suisse and UBS have entered into a merger agreement following the intervention of the Swiss Federal Department of Finance, the Swiss National Bank and the Swiss Financial Market Supervisory Authority ("FINMA"). UBS will be the surviving entity upon closing of the merger transaction. It was announced that FINMA had determined that Credit Suisse's Tier 1 Capital Notes would be written down to zero.

None of the Sub-Funds hold Tier 1 capital holding notes.

None of the Sub-Funds are or were exposed to Silicon Valley Bank Financial Group or Signature Bank of New York, the two banks that fell under the control of the Federal Deposit Insurance Corporation (FDIC) in March 2023.

Effective 6 November 2023, The Bank of New York Mellon SA/NV Luxembourg Branch replaced J.P. Morgan SE as Administrator and Depositary to the Fund.

Effective 6 November 2023, The Bank of New York Mellon SA/NV Luxembourg Branch replaced RBC Investor Services Bank S.A. as Registrar and Transfer Agent to the Fund.

The Board of Directors

Luxembourg, 30 April, 2024

The information stated in the report is historical and is not representative of future results.

## MANAGER'S MARKET REVIEW

### 2023 MARKET REVIEW

The global economy avoided recession in 2023, despite the ongoing effects of tighter monetary policy and elevated energy prices. Much of that was down to the resilience of the US, which is now expected to have grown more quickly in 2023 than in 2022. Japan and China also picked up pace in 2023 (though the latter's recovery was well below expectations) as they emerged later than others from COVID restrictions. It was in the Eurozone and UK that growth stalled, with both only narrowly avoiding recession.

It was a buoyant year for equity markets, though not without bouts of heightened volatility. The major event of the first quarter was the collapse of two medium-sized US regional Banks, Silicon Valley Bank and Signature Bank, following a run on their assets. However, fears of contagion across the financial sector were eased as the US monetary authorities moved rapidly to guarantee savers' deposits.

The rebound from the dismal returns seen in 2022 continued in the second quarter as the emergence of artificial intelligence technology created huge enthusiasm among investors given the significant cost and efficiency benefits it promised. However, the rally reversed in the third quarter as worries grew that the main central banks – notably the US Federal Reserve (Fed) – would keep interest rates at elevated levels amid signs that underlying inflationary pressures were still high. There were also worries that the lagged effect of high interest rates would start to weigh heavily on rates of economic growth.

In the fourth quarter, markets rebounded impressively as the Fed, perhaps eyeing a likely slowdown in 2024, reversed its narrative of 'higher-for-longer' interest rates by indicating cuts were in the pipeline for the coming year. With the Fed, followed by the Bank of England and eventually the European Central Bank, appearing to halt their rate hiking cycle, equity markets set aside weak economic data to end the year on a very positive note.

In terms of euro-denominated performance, the best returns were posted by the US S&P 500 (+21%), Europe ex-UK (+18%) and the Japan Topix (+16%). Emerging markets lagged (+6%) given the disappointing performance of China (-14%).

Fixed income markets, while making gains in aggregate, nevertheless struggled in an environment of still-high inflation and ongoing hikes in interest rates. Developed market sovereign bond yields were on a rising trend for much of the year, with the ten-year US Treasury issue hitting 5% in mid-October. Thereafter, however, yields fell back sharply on hopes that looser monetary policy was around the corner. The main outlier was Japan, which saw flat returns amid continuing market intervention by the central bank. Corporate bonds outperformed sovereign bonds as credits spreads tightened amid broad optimism about resilient company fundamentals. Technical factors drove notably strong returns by high-yield bonds.

## **Audit report**

To the Shareholders of  
**Aviva Investors**

---

### **Our opinion**

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Aviva Investors (the “Fund”) and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund’s financial statements comprise:

- the combined statement of net assets as at 31 December 2023;
- the portfolio of investments and other net assets as at 31 December 2023;
- the combined statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

---

### **Basis for opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### **Other information**

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

---

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg  
T : +352 494848 1, F : +352 494848 2900, [www.pwc.lu](http://www.pwc.lu)*

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)  
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

#### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

#### **Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Aviva Investors - European Corporate Bond Fund where a decision to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

PricewaterhouseCoopers, Société coopérative

## NOTES ON THE PORTFOLIO OF INVESTMENTS DISCLOSURE:

Please note that the Portfolio of Investments and Other Net Assets has been prepared based on the country of incorporation of each position. To ensure consistency within this report, the same approach has been applied to all categories of investments. A disclosure based on country of risk could lead to a different geographical classification. Investments in China are shown with the suffix 'A' or 'H' which signifies:

China A-Shares

Companies incorporated in mainland China and which are traded in the mainland A-Share markets.

China H-Shares

Companies incorporated in mainland China and listed in Hong Kong and other foreign stock exchanges.

Please also note that the geographical allocation of the portfolios excludes derivatives exposure.

## NOTES TO THE FINANCIAL STATEMENTS

As at 31 December 2023

### 1. GENERAL

#### 1.1 THE COMPANY

Aviva Investors (the "Fund") is a Variable Capital Investment Company (Société d'Investissement à Capital Variable) established in the Grand Duchy of Luxembourg under Part I of the law of 17 December 2010, as amended (UCITS V). The Fund was incorporated in Luxembourg on 16 January 1990 for an unlimited period. The Fund operates as an open ended investment Fund.

The Company is structured to provide both institutional and individual investors with a choice of investment portfolios, each offering different investment objectives designed to meet specific risk expectations and diversification requirements.

As at 31 December 2023, the Fund comprises 21 active Sub-Funds.

Distributions are disclosed in the caption "Dividend distributions" in the Combined Statement of Operations and Changes in Net Assets.

#### 1.2 THE SHARE CLASSES

The Board may issue A, B, F, I, J, K, L, M, R, S, V, Z and AFER Share Classes in any currency, as accumulation or distribution share classes, and which may be hedged or unhedged. Accumulation share classes with UK reporting status are designated with "y", distribution share classes are designated with "a", "q" or "m" depending on the dividend distribution frequency, and hedged share classes are designated with "h". The AFER Share Class is designed for individual investors subscribing an AFER insurance policy through Aviva affiliated companies, and is only available to the French market, this class is not currently being issued as at the year end.

##### 1.2.1 CURRENCY

Share Classes may be available in various currencies (each a "Class Currency") other than the reference currency of the Sub-Fund. Where offered in a currency other than the reference currency of the relevant Sub-Fund, a Share Class is designated as such.

##### 1.2.2 DIVIDEND POLICY

It is intended that all Share Classes with an "a", "q" or "m" in the designation will distribute on an annual (a), quarterly (q) or monthly (m) basis if determined by the Board.

Payment is made in the currency in which the relevant Share Class is denominated.

##### 1.2.3 HEDGED SHARE CLASSES

In accordance with the provisions of the current prospectus, the Fund may offer Share Classes in a Sub-Fund in a currency other than the Sub-Fund's reference currency or in relation to the currencies in which the underlying assets of the Sub-Fund are denominated. The respective Sub-Fund has the ability to hedge such Share Classes in relation to the Sub-Fund's reference currency. Where hedging of this kind is undertaken the latter is designated as such by a reference to "hedged" or ("h"). A Sub-Fund can also choose to manage currency exposure with a reference to a benchmark. Because such a benchmark is only used as a point of reference, a Sub-Fund's exposure to any given currency may be different than that of its benchmark. The Sub-Fund will engage for the exclusive account of such Share Classes, in forward foreign exchange contracts, currency futures, currency options or currency swaps, in order to preserve the value of the Share Class in its reference currency against its value in the Sub-Fund's currency or against the currencies in which the underlying assets of the Sub-Funds are denominated.

Where undertaken, the effects of this hedging is reflected in the Net Asset Value and, therefore, in the performance of the currency Classes. As a result, currency hedging may impact the Net Asset Value of one Class as compared to the Net Asset Value of a Class denominated in another currency. Any profit or loss resulting directly from the forward foreign exchange contracts, currency futures, currency options or currency swaps used to create the hedge is borne by the relevant currency Class in relation to which they have been incurred.

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared and presented in accordance with generally accepted accounting principles in Luxembourg for investment funds on a going concern basis. Sub-Funds that have been liquidated during the year or are intended to be liquidated after the year end are prepared on a non-going concern basis. The preparation of financial statements requires management to make estimates and assumptions that may affect the amounts reported in the financial statements and the accompanying notes. Actual results may differ from those estimates.

#### 2.1 FOREIGN CURRENCIES

The financial statements of each Sub-Fund of the Fund are expressed in the currency of the Sub-Fund and its accounting records are maintained in that currency. Assets and liabilities in other currencies are translated into the currency of the Sub-Fund using the exchange rate in effect at the year end date. Income and expenses in other currencies are translated into the currency of the Sub-Fund at the exchange rate in effect on the date of the transaction.

The resulting exchange differences are recorded in the Combined Statement of Operations and Changes in Net Assets within the caption "Foreign currency translation difference".

The combined financial statements of the Fund represent the sum of the financial statements of each Sub-Fund. The combined financial statements are presented for information purposes only in EUR, each Sub-Fund using the exchange rates prevailing at the Balance Sheet date.

The exchange difference resulting from the translation of net assets at the beginning of the year using the year end rates is recognised in the Combined Statement of Operation and Changes in Net Assets within the caption "Foreign currency translation difference".

#### 2.2 SWING PRICING

A Sub-Fund may suffer dilution of the Net Asset Value per Share due to investors buying or selling Shares at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

In order to counter this impact and protect the interests of shareholders, the NAV may be adjusted upward when there is strong demand to buy Sub-Fund Shares and downward when there is strong demand to redeem Sub-Fund Shares.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2023

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### 2.2 SWING PRICING (CONTINUED)

The adjustment may vary from Sub-Fund to Sub-Fund and will normally not exceed 2% of the original NAV per Share unless exceptional market conditions occur.

The thresholds where swing pricing is triggered are set by the Management Company, and may vary over time and from one Sub-Fund to another.

The swing pricing mechanism may be applied across all Sub-Funds and Share Classes.

The NAV per Share as disclosed in the statistical information is the published NAV per Share whereas the total net assets disclosed in the Combined Statement of Net Assets is the total net asset value excluding any year end swing adjustment.

As at the year end, no swing pricing was applied on the NAV per Share of the Sub-Funds.

#### 2.3 VALUATION OF ASSETS

The value of the assets of the Fund is determined as follows:

(1) The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors may consider appropriate in such case to reflect the true value thereof;

(2) The value of securities, Money Market Instruments and/or financial derivative instruments which are quoted or dealt in on any stock exchange is based on the last available price provided that where securities, Money Market Instruments and/or financial derivative instruments are quoted on any stock exchange operating on the basis of separate bid and offer prices mid-market valuations may, as the Board may decide, be applied;

(3) In the event that any of the securities held in the Fund's portfolio on the relevant dealing day are not quoted or dealt in on any stock exchange or regulated market or if, with respect to securities quoted or dealt in on any stock exchange or regulated market, the price as determined pursuant to sub-paragraphs (2) or (3) is not representative of the fair market value of the relevant securities, the value of such securities is determined based on the reasonably foreseeable sales price determined prudently and in good faith by or under the Board of Directors' supervision.

(4) Shares in open-ended UCIs and/or UCITS are valued on the basis of their last Net Asset Value, as reported by such undertakings.

(5) The financial derivative instruments which are not listed on any official stock exchange or traded on any other regulated market are valued in a reliable and verifiable manner on a daily basis and in accordance with market practice, as further detailed below.

(6) Futures

The Fund on behalf of a Sub-Fund may enter into financial futures contracts as part of its investment strategy. Upon entering into a futures contract, the Fund is required to deposit with a broker an amount ("initial margin") equal to a certain percentage of the purchase price indicated in the futures contract. Initial margin is included as part of "Cash at bank and at brokers" in the Combined Statement of Net Assets. Subsequent payments ("variation margin") are made or received by the Sub-Fund each day, depending on the daily fluctuations in the value of the underlying futures contracts. These subsequent payments are recorded for financial reporting purposes as unrealised result by the Sub-Fund. When entering into a closing transaction, the Sub-Fund will realise, for book purposes, a gain or loss equal to the difference between the values of the futures contract to sell and the futures contract to buy. Futures contracts are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and asked quotation or if no bid or asked prices are available, at the last bid price. Certain risks may arise upon entering into futures contracts from the contingency of imperfect market conditions. Please refer to the Portfolio of Investments and Other Net Assets for the details of the contracts outstanding as at 31 December 2023. When a contract is closed, the Sub-Fund records a realised gain or loss equal to the difference between the proceeds from, or cost of, the closing transaction and the initial cost of the contract within the caption "Net realised gain/(loss) on financial futures contracts" in the Combined Statement of Operations and Changes in Net Assets.

(7) Forward currency exchange contracts

All Sub-Funds in connection with the portfolio purchases and sales of securities denominated in a foreign currency or Share Class hedging, may enter into forward currency exchange contracts for the purposes of hedging foreign currency exchange risks. Contracts are recorded at market value based on the forward exchange rate of the underlying currency on the valuation day. Certain risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts. Please refer to the Portfolio of Investments and Other Net Assets for the details of the contracts outstanding as at 31 December 2023. When a contract is closed, the realised gain/(loss) is recorded within the caption "Net realised gain/(loss) on forward currency exchange contracts" in the Combined Statement of Operations and Changes in Net Assets. Unrealised gains or losses are recorded within the caption "Unrealised gain/(loss) on forward currency exchange contracts" in the Combined Statement of Net Assets.

(8) Swaps contracts

A swap is an agreement that obliges two parties to exchange a series of cashflows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other at the brokers' level, with the difference being paid by one party to the other, if authorised by the dedicated International Swaps and Derivatives Associations agreements ("ISDA agreements"). Risks may arise as a result of the failure of counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities or indices. Financing leg proceeds received or paid on swap contracts are, respectively, included as part of "Income - Interest on swap contracts" and "Expenses - Interest on swap contracts" in the Combined Statement of Operations and Changes in Net Assets. Unrealised gains or losses on the remaining leg are recorded within the caption "Swap contracts at fair value" in the Combined Statement of Net Assets. The changes in unrealised gains or losses are included in the Combined Statement of Operations and Changes in Net Assets within the caption "Net changes in unrealised appreciation/ (depreciation) on swap contracts". When a contract is closed, the realised gains or losses are recorded within the caption "Net realised gain/(loss) on swap contracts" in the Combined Statement of Operations and Changes in Net Assets.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2023

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

## 2.3 VALUATION OF ASSETS (CONTINUED)

The cashflows received and paid by the Sub-Fund in connection with swap contracts are converted to present value on the valuation date corresponding to the maturity of these cashflows. The value of the swap contracts is the difference between these two present value conversions. Please refer to the Portfolio of Investments and Other Net Assets for the details of the contracts outstanding as at 31 December 2023.

## (9) Options

Premiums paid by the Sub-Funds for purchased options are included in the Combined Statement of Net Assets as option purchased. If the option is allowed to expire, the Sub-Fund will lose the entire premium it paid and record a realised loss for the premium amount. Premiums paid for purchased options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realised gain/loss to be booked.

Premiums received by the Sub-Funds for written options are included in the Combined Statement of Net Assets as option written. The Sub-Fund records a realised gain or loss on a written option based on whether the cost of the closing transaction exceeds the premium received.

The realised gain/losses and change in unrealised appreciation/(depreciation) on options are disclosed in the Combined Statement of Operations and Changes in Net Assets, respectively within the captions "Net realised gain/(loss) on options contracts" and "Net changes in unrealised appreciation/(depreciation) on options contracts".

Options that are not traded on a regulated market or any other regulated market are valued at their liquidation value determined in accordance with the rules set in good faith by the Board of Directors according to standard criteria for each type of contract. Please refer to the Portfolio of Investments and Other Net Assets for the details of the options contracts outstanding and margin deposits as at 31 December 2023. The Sub-Fund can also use options on swaps (swaptions). The market value of these swaptions is shown in the caption "Options purchased contracts at fair value" or "Option written contracts at fair values". For swaptions, the gross premiums to be paid on purchased options (to be received on written options) are included in the caption "Payable on investments purchased" ("Receivable on investments sold") in the Combined Statement of Net Assets.

## (10) Fair value

Fair Market valuation: Aviva Investors Luxembourg has implemented a fair valuation process for Asia Pacific equities in order to protect the funds against market timing practices. In the case a market in which the funds invest is closed at the time the funds' assets are valued, the latest available price may not reflect the fair value of the fund portfolio. In such circumstances, some investors could exploit this gap, which is considered as market timing and deemed "not acceptable" as per CSSF circular 04/146. To limit this, the fund should adjust the local closing price of the securities held to reflect the information available at valuation point. The adjustment amount is so included in the market value of securities in scope. At the time of this report, Sub-Funds included in this Fair market valuation process are Asian Equity Income Fund, Global Emerging Markets Core Fund, Global Emerging Markets Index Fund and Global Emerging Markets Equity Unconstrained Fund.

Fair valuation of individual positions: In face of difficult market conditions (e.g. no liquidity, lack of information on trades, etc.), prices obtained for certain investments source may not be representative of fair value. As a result, the Board of Directors of the Fund has implemented fair value techniques to estimate the fair value of these investments. Because of the inherent uncertainties in the fair valuation process, these estimated values may significantly differ from the values that may be ultimately recovered. At the time of this report, Sub-Funds included in this Fair market valuation process are listed below:

Sub-Fund Name	Currency	Number of Securities	Market value of fair valued securities	% of Net Assets
Aviva Investors – Emerging Markets Corporate Bond Fund	USD	1	-	-
Aviva Investors – European Corporate Bond Fund	EUR	1	-	-
Aviva Investors – Global Convertibles Absolute Return Fund	USD	3	-	-
Aviva Investors – Global Convertibles Fund	USD	3	-	-
Aviva Investors – Global Emerging Markets Core Fund	USD	4	-	-
Aviva Investors – Global Emerging Markets Equity Unconstrained Fund	USD	2	-	-
Aviva Investors – Global Emerging Markets Index Fund	USD	37	-	-
Aviva Investors – Multi-Strategy Target Return Fund	EUR	1	-	-

## 2.4 TREATMENT OF INTEREST INCOME AND DIVIDENDS

Interest income is accrued on a daily basis. Dividend income is recorded on the ex-dividend date. Both are recorded net of withholding tax.

## 3. COLLATERAL

Several Sub-Funds received collateral to cover the unrealised results on OTC derivative instruments. Collateral is calculated and settled on a daily basis per counterparty. Cash collaterals cannot be sold, re-invested or pledged.

Sub-Fund Name	Currency	Counterparty	Type of collateral	Collateral received	Collateral pledged
Aviva Investors – Emerging Markets Bond Fund	USD	Barclays	Cash	7,180,000	-

## 4. RELATED PARTIES

## 4.1 INVESTMENT MANAGERS AND MANAGEMENT COMPANY FEES

## 4.1.1 MANAGEMENT FEES

The Management Company receives from the Fund a management fee payable in arrears at the end of each month. Investment Managers are paid out of this fee by the Management Company. Please refer to the prospectus for details of the applicable rates per share class.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2023

**4. RELATED PARTIES (CONTINUED)****4.1 INVESTMENT MANAGERS AND MANAGEMENT COMPANY FEES (CONTINUED)****4.1.2 PERFORMANCE FEES**

For the Sub-Fund Aviva Investors - Global Convertibles Absolute Return Fund and in accordance with the Fund's prospectus, Investment Managers may receive some performance fees in addition to their investment management fees. The performance fee is charged when the Sub-Fund exceeded its previous high water mark (the NAV on the day the most recent performance fee was paid or, if no performance fee has ever been paid, then the NAV at inception).

The performance fee shown in the table applies only to the portion of the Sub-Fund's performance that is above the performance of its benchmark. For Sub-Fund that has an annual performance fee, the performance period begins 1 January (or any later date at which it first becomes effective) and ends 31 December (or any earlier date on which it ceases to become effective). The Sub-Fund has a quarterly performance fee and each performance period begins on the first business day of the quarter (or any later date at which it first becomes effective) and ends on the last business day of the quarter (or any earlier date on which it ceases to become effective).

A Sub-Fund's performance fee accrues each business day.

The performance fee is crystallised at the end of each performance period and any amount due for the period is paid to the Investment Manager. Neither the Management Company nor any Investment Manager is permitted to pay money into the Sub-Fund or to any Shareholder for any underperformance.

For Shares redeemed during a financial year, the performance fee is calculated as of the date the transaction is processed, and any performance fee due is crystallised at the time of redemption.

Any applicable performance fee is calculated for each Class of the Sub-Fund (except Z Shares, which pay no performance fee). Because different Share Classes may have different NAVs, the actual performance fees paid may vary by Share Class. For Distribution Shares, any distributions paid out are counted as part of performance for purposes of performance fee calculation.

The performance fee rate used for performance fee calculation purposes on the Sub-Fund are as follows:

Sub-Fund Name	Benchmark	Performance fee rate %
Aviva Investors - Global Convertibles Absolute Return Fund	Net positive return over the previous 3 months	10%

Performance fees are shown in the Statement of Operations and Changes in Net Assets within the caption "Performance fees". However, no performance fees were paid during the year.

**4.1.3 MANAGEMENT COMPANY FEES****DOMICILIARY FEES:**

As remuneration for services rendered as domiciliary agent, the Management Company receives a fixed annual fee from Sub-Funds as per the Management Company service agreement. This fee is included in the Combined Statement of Operations and Changes in Net Assets within the caption "Other Operating expenses" and represents an amount of EUR 3,000 per year and per Sub-Fund, payable monthly in arrears. From 1 August 2023 the Domiciliary fees are included as part of the Fixed Fee.

**SUPERVISORY DUTIES:**

The Fund and its respective Sub-Funds pay a fee and reasonable out-of-pocket expenses of the Management Company for its supervisory role with regards to the delegated activities, overall responsibility for key decisions, compliance and risk management, up to 0.125% per annum of the aggregated average daily Net Asset Value per Share Class (except the class F, J, K, L, M, V and Z which are not subject to this fee). This fee is included in the Combined Statement of Operations and Changes in Net Assets within the caption "Other Operating expenses".

**4.1.4 FIXED FEE**

From 1 August 2023, in order to pay its ordinary operating expenses and to seek to protect the investors from fluctuations in these ordinary operating expenses, the Fund will pay a Fixed Fee to the Management Company out of the assets of the Sub-Funds. Please refer to the prospectus for details of the applicable rates per share class per Sub-Fund. The Fixed Fee will be charged at a maximum overall yearly rate, accrued at each valuation day and paid monthly in arrears. The Management Fee and the Fixed Fee do not cover any cost or expense incurred by a share class or Sub-Fund in respect of Distribution fees and other expenses.

**4.2 DISTRIBUTION FEES**

The Distributor receives from the Fund a distribution fee, payable in arrears at the end of each month, calculated at the annual rate per annum of the aggregate average daily Net Asset Value per applicable Share Class, as detailed in the current prospectus.

**5. DEPOSITARY FEES**

The Fund and its respective Sub-Funds paid depositary fees to J.P. Morgan SE (until 5 November 2023) and pays depositary fees to The Bank of New York Mellon SA/NV, Luxembourg Branch (from 6 November 2023) in respect of its activities as Depositary (including safekeeping, supervision and transaction activities). The fees vary in respect of each Sub-Fund depending on the value of the assets held by the Depositary and the volume of trading in that Sub-Fund and should not exceed a maximum of 0.20% per annum, payable monthly in arrears. This fee is included in the Combined Statement of Operations and Changes in Net Assets within the caption "Depositary fees". From 1 August 2023, the Depositary fees are included as part of the Fixed Fee.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2023

**6. REGISTRAR AND TRANSFER AGENCY FEES**

The Fund paid fees to RBC Investor Services Bank S.A. (until 5 November 2023) and pays fees to The Bank of New York Mellon, Luxembourg Branch (from 6 November 2023) in respect of its activities as Registrar and Transfer Agent (including maintenance of register, Shareholders services, transaction, dividend processing and commission handling activities). These fees are payable monthly in arrears.

The Fund pays the Registrar and Transfer Agent a fee and reasonable out-of-pocket expenses, not exceeding a maximum of 0.07% per annum of the aggregate average daily Net Asset Value per applicable Share Class. This fee is included in the Combined Statement of Operations and Changes in Net Assets within the caption "Other Operating expenses". From 1 August 2023, the Registrar and Transfer Agency fees are included as part of the Fixed Fee.

**7. ADMINISTRATION FEES**

The Fund pays the administrator fees for its services estimated to 0.05% per annum of the average NAV in period. Such fees are payable monthly. Actual rate charged is calculated based on several factors including number of share classes, and complexity of the Sub-Fund. From 1 August 2023, the Administration fees are included as part of the Fixed Fee.

**8. DIRECTOR FEES**

All internal directors have decided to waive their remuneration. The total remuneration paid to the external directors amounts to EUR 45,000 and is included within the caption "Professional fees".

**9. WAIVER FEES**

In order to preserve investors from fluctuations in their operating and administrative expenses, the Management Company may decide to waive all or a part of their fees or to subsidise operating and administrative expenses of some Sub-Funds. Amounts waived are shown in the Combined Statement of Operations and Changes in Net Assets within the caption "Fee waiver".

**10. TAXATION*****Luxembourg taxe d'abonnement***

The Fund is not liable to any Luxembourg income tax, but is liable in Luxembourg to a tax of 0.05% per annum of its net assets for the A, B, J and R Share Classes of all Sub-Funds that invest in non-money market related securities and 0.01% per annum of its net assets for the F, I, K, L, M, S, V and Z Share Classes of all Sub-Funds. Such tax is payable quarterly on the basis of the net assets of the respective Share Class at the end of the relevant quarter. For the Sub-Funds which are investing in Funds already subject to this tax, there will be no double taxation.

Dividends, interest and capital gains on investments held by the Fund may be subject to non-recoverable tax and withholding and capital gains taxes in the country of origin.

***Withholding tax reclaims***

The withholding tax reclaims receivable are disclosed in the Combined Statement of Net Assets. The Board of Directors continuously monitors the recoverability of the reclaims in conjunction with the different tax authorities.

**11. DIVIDEND DISTRIBUTION**

Distributions are disclosed in the caption "Dividend distributions" in the Combined Statement of Operations and Changes in Net Assets.

**12. CASH HELD IN CLOSED SUB-FUND**

The Sub-Fund Aviva Investors - Climate Transition European Equity Fund was closed on 16 March 2023. As at 31 December 2023 cash balances amounting to EUR 262,144 were held at the custodian bank.

**13. SECURITIES LENDING**

The Sub-Funds may lend portions of investments to third parties. In return the Sub-Funds receive a fee that is negotiated for each transaction. Such lending may only be effected in accordance with the terms of the Prospectus which reflects requirements of CSSF regulations. Securities are lent within the framework of a standardised lending system organised by a recognised securities clearing body or by a highly rated financial institution specialised in such activities.

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

As at 31 December 2023

**13. SECURITIES LENDING (CONTINUED)**

During the year, 80% of any incremental income earned from securities lending is accrued to the applicable Sub-Fund, with the remaining 20% payable to the securities lending agent The Bank of New York Mellon SA/NV (BNYM). The income earned from the securities lending program is shown in the respective Sub-Funds' Combined Statement of Operations and Changes in Net Assets. The securities lending agent, BNYM and none of the counterparties are related parties.

The Sub-Funds with lending activity during the year are:

Fund	Agent	Market value of securities on loan in Fund currency	Cash collateral in Fund currency	Non cash collateral in Fund currency	Total collateral in Fund currency	Fund currency	Lending income (gross) in Fund currency	Lending agent fee in Fund currency	Lending income (net) in Fund currency

**14. TRANSACTION COSTS**

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial asset or liability. Transaction costs include transaction costs paid to custodians and sub-custodians, and identifiable brokerage charges, commissions, transaction related taxes and other market charges. For the year ended 31 December 2023, the Sub-Funds incurred transactions costs (included in the Depository Fees caption) as detailed below:

Sub-Fund Name	Base Currency	Total
Aviva Investors – Asian Equity Income Fund	USD	536,830
Aviva Investors – Climate Transition Global Equity Fund	USD	141,154
Aviva Investors – Global Convertibles Absolute Return Fund	USD	97
Aviva Investors – Global Convertibles Fund	USD	47
Aviva Investors – Global Emerging Markets Core Fund	USD	1,002,787
Aviva Investors – Global Emerging Markets Equity Unconstrained Fund	USD	118,117
Aviva Investors – Global Emerging Markets Index Fund	USD	764,048
Aviva Investors – Global Equity Endurance Fund	USD	419,414
Aviva Investors – Global High Yield Bond Fund	USD	348,007
Aviva Investors – Multi-Strategy Target Return Fund	EUR	210,998
Aviva Investors – Natural Capital Transition Global Equity Fund	USD	14,019
Aviva Investors – Short Duration Global High Yield Bond Fund	USD	2,161
Aviva Investors – Social Transition Global Equity Fund	USD	17,950
Aviva Investors – UK Equity Unconstrained Fund	GBP	139,740

Transaction costs for fixed income securities and financial derivatives are not separately identifiable. For those, transaction costs are included in the purchase and sale prices.

**15. CROSS-INVESTMENT BETWEEN SUB-FUNDS**

As at 31 December 2023, there were no cross-investments between Sub-Funds.

**16. EXCHANGE RATES**

The exchange rates used to convert the Sub-Fund as at 31 December 2023 were:

Currency	Rate
EUR = 1	
GBP	0.8693
USD	1.1070

**17. SUBSEQUENT EVENTS**

Effective 15 February 2024, Aviva Investors - European Corporate Bond fund has been Liquidated. This has been prepared on a non-going concern basis.

## OTHER INFORMATION - UNAUDITED

As at 31 December 2023

## 1. THE VAR &amp; LEVERAGE

## 1.1. THE VAR

As at 31 December 2023, it has been determined to use the Value-at-Risk (VaR) approach for the following Sub-Funds to calculate global exposure. Please see details in the table below. All other Sub-Funds calculate global exposure using the commitment approach.

UCITS	Sub-Fund	Method	Profile Approach	Expected Level of Leverage (as per Prospectus)	Leverage Actual Average 2023	High VaR	Low VaR	Av. VaR	VaR Benchmark High	VaR Benchmark Low	Av. VaR Benchmark
Aviva Investors	Climate Transition Global Credit Fund	Parametric	Relative VaR	500%	182%	5.15%	3.95%	4.44%	6.07%	3.83%	4.40%
Aviva Investors	Emerging Markets Local Currency Bond Fund	Parametric	Relative VaR	400%	355%	5.05%	3.71%	4.26%	4.21%	3.61%	3.84%
Aviva Investors	European Corporate Bond Fund	Parametric	Relative VaR	0%-150%	16%	4.58%	3.03%	3.66%	4.24%	3.01%	3.61%
Aviva Investors	Global Convertibles Absolute Return Fund	Monte Carlo	Absolute VaR	300%	175%	5.15%	2.00%	2.83%	-	-	-
Aviva Investors	Global High Yield Bond Fund	Parametric	Relative VaR	150%	166%	4.98%	3.05%	3.86%	5.03%	3.04%	3.93%
Aviva Investors	Global Investment Grade Corporate Bond Fund	Parametric	Relative VaR	200%	145%	5.10%	3.81%	4.39%	6.07%	3.83%	4.41%
Aviva Investors	Global Sovereign Bond Fund	Parametric	Relative VaR	400%	459%	4.21%	3.18%	3.80%	26.94%	3.12%	3.59%
Aviva Investors	Multi-Strategy Target Return Fund	Monte Carlo	Absolute VaR	1200%	617%	5.33%	2.14%	3.48%	-	-	-
Aviva Investors	Short Duration Global High Yield Bond Fund	Parametric	Relative VaR	150%	89%	3.51%	1.96%	2.54%	3.76%	2.17%	2.84%

The VaR risk model is based on the:

- Monte Carlo (CMC) simulation methodology. This method for calculating VaR contains no standard distribution assumptions and attempts to accurately capture extreme risk events. The approach models every security individually and their derivatives.

- Parametric Method: The Parametric VaR method calculates the standard deviation of the portfolio's returns and assumes a normal distribution of portfolio returns to show the maximum expected loss within a specified (99%) confidence interval.

There is a pricing function which supports full re-pricing of bonds and derivatives, covers multiple risk factors and uses 250 days of factor returns.

The calculation of the absolute and relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%
- holding period equivalent to 1 month (20 business days)
- effective observation period (history) of risk factors of at least 1 year (250 business days) unless a shorter observation period is justified by a significant increase in price volatility (for instance extreme market conditions) – in practice AIGSL uses an effective observation period of 250 business days.
- quarterly data set updates, or more frequent when market prices are subject to material changes
- at least daily calculation

## REFERENCE PORTFOLIO FOR RELATIVE VAR

A benchmark index is used for the calculation of the relative VaR on the 2 Sub-Funds below:

Aviva Investors - Emerging Markets Local Currency Bond Fund

J.P. Morgan GBI-EM Global Diversified Index

Aviva Investors – Global Sovereign Bond Fund

Barclays Capital Global Aggregate Index EUR hedged

## Leverage Calculation

Leverage is the total amount of financial derivatives instruments (“FDI”) commitments out of a Sub Fund’s Total Net Assets.

It is calculated under the sum of notional’s approach to leverage calculation without any netting arrangements.

## 2. SECURITIES FINANCING TRANSACTIONS

As defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions and/or total return swaps. In accordance with Article 13 of the Regulation, the Fund’s only involvement in and exposures related to Securities Lending transactions and Total Return Swaps for the reporting date 31 December 2023 and are detailed in the following tables.

## GLOBAL DATA

## Amount of securities on loan

The total value of securities on loan as a proportion of the Sub-Funds' total lendable assets, as at the reporting date is detailed below. Total lendable assets represents the aggregate value of asset types forming part of the Sub-Funds' securities lending programme.

Sub-Fund	% of Total Lendable Assets
Aviva Investors – Emerging Markets Bond Fund	0.68
Aviva Investors – Emerging Markets Corporate Bond Fund	4.33
Aviva Investors – Emerging Markets Local Currency Bond Fund	10.04
Aviva Investors – European Corporate Bond Fund	4.61
Aviva Investors – Global Convertibles Absolute Return Fund	0.17
Aviva Investors – Global Emerging Markets Core Fund	0.56
Aviva Investors – Global Emerging Markets Index Fund	1.08
Aviva Investors – Global High Yield Bond Fund	3.57
Aviva Investors – Global Investment Grade Corporate Bond Fund	3.00
Aviva Investors – Global Sovereign Bond Fund	15.02

## Amount of assets engaged in securities lending transactions

The following table represents the fair value of assets engaged in each type of SFTs (including Total Return Swaps) in the Sub-Fund currency.

Sub-Fund	Sub-Fund Currency	Market Value of Securities on Loans (in Sub-Fund Currency)	% of AUM
Aviva Investors – Emerging Markets Bond Fund	USD	22,862,539	0.54
Aviva Investors – Emerging Markets Corporate Bond Fund	USD	24,915,388	3.66
Aviva Investors – Emerging Markets Local Currency Bond Fund	EUR	103,076,358	5.81
Aviva Investors – European Corporate Bond Fund	EUR	653,628	4.45
Aviva Investors – Global Convertibles Absolute Return Fund	USD	1,030,453	0.16
Aviva Investors – Global Emerging Markets Core Fund	USD	5,334,881	0.38
Aviva Investors – Global Emerging Markets Index Fund	USD	23,061,646	0.63
Aviva Investors – Global High Yield Bond Fund	USD	139,574,499	3.56
Aviva Investors – Global Investment Grade Corporate Bond Fund	USD	140,122,937	2.90
Aviva Investors – Global Sovereign Bond Fund	EUR	569,431,229	8.42

None of the counterparties are related parties to the Sub-Funds and the Management Company.

## Amount of assets engaged in total return swap contracts

The following table represents the total value of assets engaged in total return swaps as at the reporting date.

Sub-Fund	Sub Fund Currency	Market Value of Total Return Swaps (in Sub-Fund Currency)	% of AUM
Aviva Investors – Global Convertibles Absolute Return Fund	USD	3,006,679	0.46
Aviva Investors – Multi-Strategy Target Return Fund	EUR	338,532	0.05

None of the counterparties are related parties to the Sub-Funds and the Management Company.

## CONCENTRATION DATA

## Ten largest collateral issuers

The following table lists the ten largest issuers by value of non-cash collaterals received by the Sub-Funds across securities lending transactions as at the reporting date. Collateral received in relation to other SFT's and OTC derivative transactions (including total return swaps) are in the form of cash.

Issuer	Collateral Value (in Sub-Fund Currency)
<b>Aviva Investors – Emerging Markets Bond Fund</b>	<b>USD</b>
Japan Government	10,379,719

## 2. SECURITIES FINANCING TRANSACTIONS (CONTINUED)

## AGGREGATE TRANSACTION DATA (CONTINUED)

## Maturity tenor of securities lending agreement and total return swap contracts

## Securities Lending Transactions

The Fund's securities lending transactions have open maturity.

## Maturity tenor of Total Return Swap Contracts

The following table provides an analysis of the maturity tenor of total return swaps contracts outstanding as at the reporting date.

Maturity	Market Value	Market Value
	Aviva Investors – Global Convertibles Absolute Return Fund USD	Aviva Investors – Multi-Strategy Target Return Fund EUR
1-4 Weeks	-	48,270
1-3 Months	-	-
3-12 Months	-	(11,832)
More than 12 Months	3,006,679	302,094

The above maturity tenor analysis has been based on the contractual maturity date of the relevant Total Return Swaps.

## Settlement and clearing

All Sub-Funds engaged in securities lending agreements utilise bi-lateral settlement and clearing with their respective counterparty.

OTC derivative transactions are entered into by the Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund/s and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties. All OTC derivative transactions entered under an ISDA Master agreement are netted together for collateral purposes, therefore any collateral disclosures provided in this report are in respect of all OTC derivative transactions entered into by the Fund with the applicable TRS counterparties under the ISDA Master agreement, not just total return swaps.

## Reuse of Collateral

## Share of collateral received that is reused and reinvestment return

Collateral received in relation to security lending transactions and total return swap contracts cannot be sold, re-invested or pledged.

## Safekeeping of Collateral

## Collateral received

All collateral received by the Fund in respect of securities lending & total return swaps transactions as at the reporting date are held by The Bank of New York Mellon SA/NV.

## Collateral granted

## Collateral granted

Sub-Fund	Sub-Fund Currency	Collateral Value (in Sub-Fund Currency)
Aviva Investors – Emerging Markets Local Currency Bond Fund	EUR	4,899,509
Aviva Investors – Global Sovereign Bond Fund	EUR	1,341,000
Aviva Investors – Multi-Strategy Target Return Fund	EUR	1,724,000

All collateral granted in respect of total return swaps as at the reporting date are held in segregated accounts.

## Return and cost

The total income earned from securities lending transactions is split between the relevant Sub-Funds and the securities lending agent. Detail of this split is disclosed in note 13 to the financial statements.

All returns from total return swap contracts will accrue to the Sub-Funds and are not subject to any returns sharing arrangements with the Investment Manager or any other third parties.

## 3. REMUNERATION DISCLOSURE – UCITS

In line with the requirements of the Undertakings for Collective Investments in Transferable Securities Directive V ("UCITS V"), Aviva Investors Luxembourg ("AI LUX") is subject to a remuneration policy which is consistent with the principles outlined in the European Securities and Markets Authority guidelines on sound remuneration policies under the UCITS directive.

## REMUNERATION GOVERNANCE

## AVIVA INVESTORS LUXEMBOURG REMUNERATION COMMITTEE

The Aviva Investors Luxembourg Remuneration Committee is responsible for reviewing the Remuneration Policy of Aviva Investors Luxembourg, which is an addendum to the Aviva Investors Global Remuneration Policy. This Committee reviews individual remuneration packages for all employees to which the Remuneration Code applies and considers the remuneration policy and structures for all Aviva Investors Luxembourg employees.

## OTHER INFORMATION - UNAUDITED (CONTINUED)

As at 31 December 2023

### 3. REMUNERATION DISCLOSURE – UCITS (CONTINUED)

#### AVIVA INVESTORS LUXEMBOURG REMUNERATION COMMITTEE (CONTINUED)

The Aviva Investors Luxembourg Remuneration Committee is comprised of Barry Fowler (Chair), Kate McLellan and Sally Winstanley. The Aviva Investors Luxembourg Remuneration Committee met twice in 2023.

#### AVIVA INVESTORS REMUNERATION COMMITTEE

The Aviva Investors Remuneration Committee is responsible for reviewing and making recommendations to the Aviva Group Remuneration Committee and Aviva Investors Holdings Limited Board regarding the Remuneration Policy of Aviva Investors. This Committee reviews individual remuneration packages for all employees to which the UK Remuneration Codes apply and considers the remuneration policy and structures for all Aviva Investors employees.

The Aviva Investors Remuneration Committee is comprised of Non-Executive Director Mike Craston and Independent Non-Executive Directors Jeffrey Weingarten (Chair), Sue Amies-King, Alexa Coates, Andrew Kirton and Mark White. The majority of the members were also members of the Aviva Investors Risk Committee during 2023. The Aviva Investors Remuneration Committee met on five occasions in 2023.

#### AVIVA GROUP REMUNERATION COMMITTEE

The Aviva Group Remuneration Committee oversees Aviva's remuneration policies and practices. The Committee considers alignment between Group strategy and the remuneration of Directors and Material Risk Takers (MRTs) within Aviva Investors. The Committee also works with the Board Risk Committee to ensure that risk and risk appetite are properly considered in setting the remuneration policy. The full roles and responsibilities of the Aviva Group Remuneration Committee are available on the Investor Relations website, found here:

<http://www.aviva.com/investor-relations/corporate-governance/board-of-directors/board-committees/remuneration-committee/>

The Aviva Group Remuneration Committee is comprised of Independent Non-Executive Directors Pippa Lambert (Chair), Andrea Blance, Patrick Flynn and Jim McConville. Andrea Blance and Patrick Flynn were also members of the Board Risk Committee during 2022. The Aviva Group Remuneration Committee met on seven occasions in 2023.

When setting remuneration policy, the relevant Remuneration Committees take account of the company's strategic objectives and take into account the long-term interests of shareholders and other stakeholders.

During 2023 the Aviva Investors Remuneration Committee and Aviva Group Remuneration Committee received independent advice on executive remuneration matters from Deloitte LLP which is a member of the Remuneration Consultants Group and adheres to its Code of Conduct.

#### REMUNERATION POLICY

The Aviva Investors remuneration policy is consistent with Aviva's remuneration principles which support the execution of Aviva Investor's strategy, rewarding sustained performance and growth aligned with our values:

- Performance aligned: We differentiate reward based on performance. Outcomes are aligned with Aviva, business-line and individual performance, both financial and non-financial.
- Competitive: We focus on the total reward package, ensuring that reward programme design and outcomes are market aligned and competitive, enabling the attraction, motivation and retention of high-quality colleagues.
- Simple, transparent and consistent: We operate a 'one Aviva' approach to reward. Our reward programmes are only as complex as necessary. They are easily understood.
- Fair: Our reward programmes and decision-making support Aviva's commitment to create a diverse and inclusive organisation, ensuring that all colleagues are rewarded fairly in view of the results achieved and individual contributions. Our reward approach is designed to attract, motivate and retain high quality colleagues, regardless of gender, ethnicity, age, disability or any other factor unrelated to performance, contribution or experience.
- Doing the right thing: We do the right thing through reward programmes that support Aviva's values, behaviours and sustainability objectives. Outcomes consider expectations of Customers, Colleagues and Shareholders.
- Risk aligned: Reward is designed to promote sound and effective risk management, within a robust internal governance framework.
- The remuneration policy is consistent with the principles outlined in the European Securities and Markets Authority guidelines on sound remuneration policies under the UCITS Directive.
- The remuneration policy is reviewed and approved annually by the Aviva Investors Luxembourg Remuneration Committee and is subject to annual internal independent review by Compliance. For 2023, no significant findings were observed and there were no material changes to the remuneration policy.

#### LINK BETWEEN PAY AND PERFORMANCE

Performance is measured against a combination of:

- Aviva Investors and Group performance: A rounded assessment of performance against key financial and non-financial performance indicators as part of a balanced scorecard. Financial indicators include, but not limited to, operating profit, investment performance and net flows). The assessment of financial performance includes reference to actual results versus prior period results, agreed plans, relativity to competitors and progress towards our long-term target ambition.
- Non-financial considerations: Including management of risk (including the integration of sustainability risks in the investment process, where applicable), diversity and inclusion and employee engagement metrics.
- Business Unit Performance: Contribution of each business area to the overall success of the Aviva Investors, year on year growth and execution of its strategy.

## OTHER INFORMATION - UNAUDITED (CONTINUED)

As at 31 December 2023

**3. REMUNERATION DISCLOSURE – UCITS (CONTINUED)****LINK BETWEEN PAY AND PERFORMANCE (CONTINUED)**

• Individual Performance: Delivery against individual goals and relative performance in comparison to peers, as well as the extent to which individuals have demonstrated the Aviva values and alignment with conduct and behaviour expectations.

The Performance assessment does not encourage risk taking outside the Aviva Investors stated risk appetite and includes mechanisms by which performance against risk and conduct related measures has a significant impact on the availability and size of business and individual variable awards.

The Risk function provide an independent assessment of risk and control effectiveness to the Aviva Group Remuneration Committee for consideration in setting the bonus pool. The assessment is based on a balanced scorecard with metrics designed to drive and reward good risk management behaviours and outcomes, and measures to ensure appropriate independent challenge and review. The assessment includes consideration of both current and likely future risks facing the business.

The Risk function also input on any risk and conduct breaches occurring during the year that could impact variable remuneration outcomes on an individual basis. Future risks identified that have a likelihood of materialising may result in withholding or reduction in variable remuneration.

Through Aviva Investors' Global Reward Framework, all investment employees should support responsible investment and integrate ESG considerations into their investment processes, including the consideration of Sustainability Risk (as defined by the EU Sustainable Finance Disclosure Regulation). ESG research is integrated into the investment process and forms part of the investment scorecard and annual risk attestation. The Chief Investment Officers and investment desk heads consider how investment employees demonstrate their commitment to ESG processes as part of the determination of annual performance and pay outcomes.

The remuneration of employees in Control Functions (defined as Risk, Compliance and Audit) is determined independently of the financial results of Aviva Investors in order to reinforce the independence of these functions. To avoid conflicts of interest, no individual is involved in decisions relating to his or her own remuneration.

**STRUCTURE OF REMUNERATION****FIXED REMUNERATION**

Basic Salary – set within an appropriate market range and reflecting a colleague's professional experience and organisational responsibilities. Fixed pay is set at a level which is sufficient to allow the possibility, where performance warrants, that an employee may receive no variable pay.

Benefits – standard benefits are provided that are appropriate to the market, compliant with all legal requirements and intended to provide choice and flexibility to meet individual needs.

**VARIABLE REMUNERATION**

Annual Bonus – a discretionary short-term incentive plan where individuals may receive a bonus based on business and individual performance against targets. All Aviva Investors colleagues who are permanent employees or Fixed Term Contractors are eligible to be considered for an annual bonus.

Annual bonuses are typically received in cash but awards above certain thresholds are deferred to align the interests of employees with those of the company, its customers, and shareholders and to aid retention. A three-year deferral with pro-rata vesting in Aviva funds and/or Aviva Group Plc shares applies. MRTs are subject to additional deferral requirements, further detail is included below in the section 'MRT Deferrals and Retention Periods'.

Long Term Incentive Awards (LTIA) – discretionary long-term incentive plan to align reward with long-term investment performance, Aviva Group and Shareholders, and with the additional intention to help retain key talent. All Aviva Investors colleagues who are permanent employees are eligible to receive an LTIA, although LTIA's are typically awarded to a select number of senior colleagues.

LTIA's vest after three years; part in Aviva Investors and part in Aviva Restricted Share Units (RSUs). For colleagues in the Real Assets business, Aviva funds are subject to a two-year holding period post vesting to align with the longer-term nature of investments in the Real Assets business. For the Aviva Investors CEO, due to his role as a member of the Aviva Executive Committee the award of RSUs is subject to additional Aviva Group performance conditions. For MRTs, vesting is subject to a pre-vesting assessment of individual performance, behaviours, and alignment with the company values of Aviva Investors throughout the three-year performance period.

Variable remuneration is discretionary and fully flexible, including the possibility of zero if performance thresholds are not met.

**MRT DEFERRALS AND RETENTION PERIODS:**

For MRTs who have been identified under the Alternative Investment Fund Managers Directive (AIFMD) and Undertakings for Collective Investment in Transferable Securities V (UCITS) Directive are subject to the AIFMD/UCITS V remuneration requirements. The requirements are applied on an apportioned basis, based on activity performed for the regulated entity. Any MRT who has apportioned remuneration over EUR100,000 is subject to the following requirements: 40% of variable remuneration under is deferred over three years and a minimum of 50% of total variable remuneration is delivered in Aviva funds, this applies to both the deferred element and the upfront element (the element that is not subject to deferral).

When setting deferral schedules and retention periods for MRTs, Aviva Investors take into account:

- The firm's business cycle (including length), the nature of its business and its risk profile;
- The activities and responsibilities of MRTs and how these may impact the risk profile of the firm or the assets the firm manages;
- Whether the deferred variable remuneration is paid out in instruments or cash;
- The amount of the variable remuneration and the ratio of variable to fixed remuneration; and
- How long it could take for the risks underlying the staff member's performance to crystallise.

Aviva Investors considers, based on market practice and in consideration that all variable awards are subject to clawback post vesting, that: the proportion of variable remuneration that is deferred is appropriate to align the interest of colleagues with the risk profile of the regulated entities; the retention period is of suitable length post release of the deferred awards (or in the case of an upfront component the award); and, the deferral period and vesting schedule is of an appropriate length.

## OTHER INFORMATION - UNAUDITED (CONTINUED)

As at 31 December 2023

### 3. REMUNERATION DISCLOSURE – UCITS (CONTINUED)

#### MRT DEFERRALS AND RETENTION PERIODS: (CONTINUED)

For all MRTs, malus provisions and leaver conditions will apply during the vesting period. However, these will not apply during the six-month holding period. Clawback provisions continue to apply after the vesting period, including during the holding period.

Colleagues are not permitted to undertake personal hedging strategies in respect of any variable remuneration.

#### MALUS AND CLAWBACK:

All variable pay granted or paid to any Aviva Investors employee is subject to the Aviva's Malus and Clawback Policy. This includes the cash and deferred elements of the annual bonus plan and any LTIA. The circumstances when Malus and Clawback may apply are documented in the Directors Remuneration Policy section of the Annual Report and Accounts, found here:

<https://www.aviva.com/investors/annual-report/>

#### GUARANTEES

Guaranteed awards are only offered for the year of hire in exceptional circumstances and provided the legal entity has a sound and strong capital base. In line with Aviva's policy, guarantees must:

- Not be more generous than necessary and only offered if alternate approaches, such as full year bonus opportunity, are not considered appropriate.
- Not be offered to Executive Directors.
- Be subject to a minimum standard of personal performance, behaviour and conduct.

Guarantees are subject to appropriate governance and approvals and are subject to Aviva's Malus and Clawback Policy.

#### SEVERANCE

Any severance payment above and beyond statutory or existing contractual entitlements is at the company's absolute discretion. There is no automatic right to a pro-rata bonus payment in the event of termination of employment by the company or individual. Any bonus payments related to early termination of contracts are at the company's discretion and will reflect performance achieved over time and designed in a way which does not reward poor conduct or failure. Treatment of any unvested share, fund or bonus awards are governed by the relevant plan rules. There is no automatic entitlement to any payment under these plans other than where expressly stated in the plan rules.

The maximum severance pay is based on Aviva applicable policies; in the event of redundancy the maximum severance pay is calculated based on year of service, with each year of service representing a proportion of salary as per Aviva Discretionary Redundancy policies, plus a discretionary pro-rata lost bonus opportunity.

In non-redundancy exits the maximum severance pay is determined based on a number of factors linked to the reason for the exit and the employees' length of service.

#### MATERIAL RISK TAKER (MRTS) IDENTIFICATION

Aviva Investors identified MRTs in accordance with Remuneration rules and guidance.

The MRT population is reviewed at least annually by the AI Luxembourg Remuneration Committee and individuals are notified of their status.

#### QUANTITATIVE REMUNERATION DISCLOSURES

There were 16 Material Risk Takers Remunerated from AI Lux as at the end of the 2023 performance year. Aggregate remuneration expenditure in respect of these staff for the 2023 performance year was €2.98 million.

Fixed remuneration represents 80% of this total, with 20% variable remuneration.

AI Lux outsources fund management to Aviva Investors Global Services (AIGSL) Limited and other companies. AIGSL is covered under the UK implementation of Investment Firms Prudential Regime (IFPR) and its fund managers provide services to other Group Companies and Clients.

There were 49 individuals identified as Material Risk Takers for AIGSL, the aggregate remuneration expenditure in respect of these staff for the 2023 performance year was €27.63m. This amount relates to total remuneration and not remuneration specifically apportioned to activities completed on behalf of AI Lux.

Fixed remuneration represents 45% of this total, with 55% variable remuneration.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Asian Equity Income Fund

**Legal entity identifier:** 5493008BD7S5RZVUUC62

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b></p> <p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%</p>	<p><span style="color: red;">●</span> <span style="color: white;">●</span> <input checked="" type="checkbox"/> <b>No</b></p> <p><input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

- A. The Investment Manager’s ESG Baseline Exclusions Policy which includes the following exclusions:

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme (the “Programme”) which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	38,558.69
	Scope 2 GHG emissions	15,144.56
	Scope 3 GHG emissions	193,453.12
	Total GHG emissions	246,380.30
Carbon Footprint	Carbon footprint	633.27
GHG Intensity of investee companies	GHG intensity of investee companies	1242.65
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	14.14%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	86.24%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.96
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	22.67

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	40,329.72	38,558.69
	Scope 2 GHG emissions	15,709.54	15,144.56
	Scope 3 GHG emissions	218,908.59	193,453.12
	Total GHG emissions	273,748.24	246,380.30

GHG Intensity of investee companies	GHG intensity of investee companies	1,570.37	1242.65
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.38%	14.14%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	91.24%	86.24%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.97	0.96
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	20.45	22.67

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	7.34%	Taiwan (Republic of China)
SAMSUNG ELECTRONICS LTD	Information Technology	5.95%	Korea (South), Republic of
TENCENT HOLDINGS LTD	Communication	4.13%	China
ALIBABA GROUP HOLDING ADR REPRESENTEN	Consumer Discretionary	2.84%	China
RELIANCE INDUSTRIES LTD	Energy	2.70%	India
AIA GROUP LTD	Financials	2.29%	Hong Kong
ICICI BANK LTD	Financials	2.03%	India
RIO TINTO PLC	Materials	1.85%	United Kingdom

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

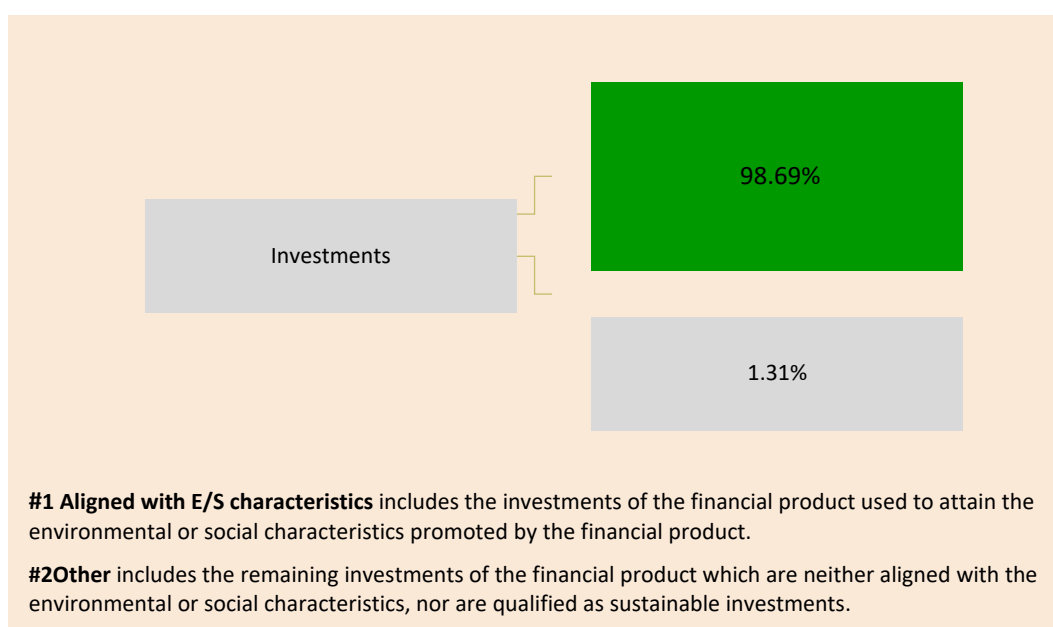

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

INFOSYS ADR REPRESENTING ONE LTD	Information Technology	1.76%	India
CHINA CONSTRUCTION BANK CORP H	Financials	1.73%	China
HDFC BANK LTD	Financials	1.63%	India
CK HUTCHISON HOLDINGS LTD	Industrials	1.50%	Hong Kong
HON HAI PRECISION INDUSTRY LTD	Information Technology	1.41%	Taiwan (Republic of China)
MEDIATEK INC	Information Technology	1.29%	Taiwan (Republic of China)
SONIC HEALTHCARE LTD	Health Care	1.29%	Australia

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	% Proportion
Communication	9.94%
Consumer Discretionary	9.70%
Consumer Staples	6.96%
Energy	5.48%
Financials	21.47%
Health Care	2.88%
Industrials	5.69%
Information Technology	22.10%
Materials	7.95%
Real Estate	4.63%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Utilities	1.89%
Cash Securities	1.31%

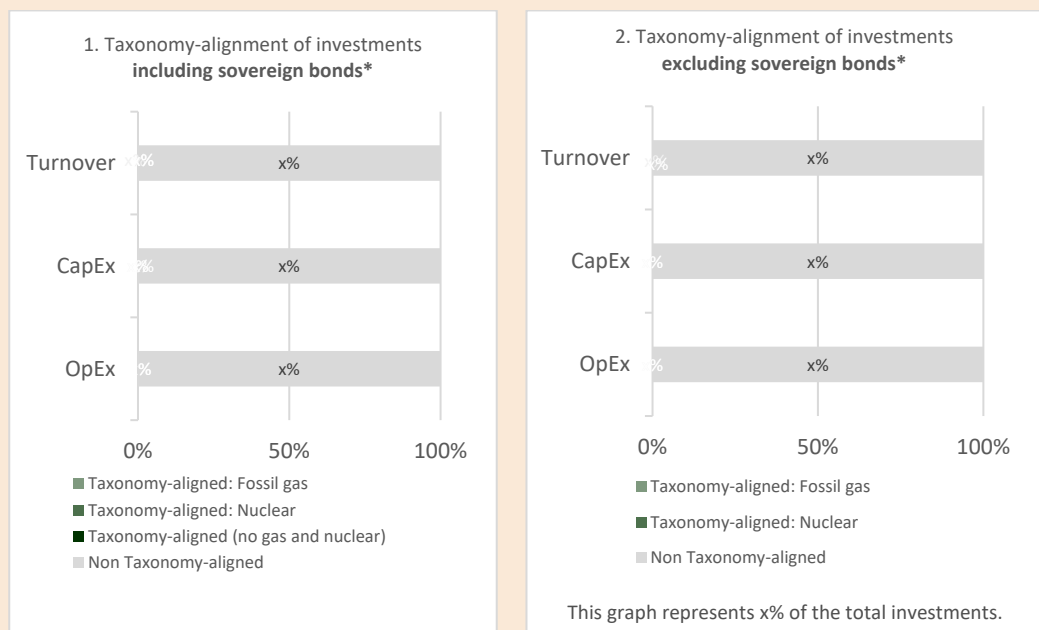

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### ● What was the share of investments made in transitional and enabling activities?

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures

are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***  
Not Applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not Applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not Applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Climate Transition Global Credit Fund  
**Legal entity identifier:** 5493007VNELBIOF7EH34

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund invests at least 70% of total net assets (excluding derivatives for efficient portfolio management) in bonds of companies from anywhere in the world (including emerging markets) responding to climate change which meet the Investment Manager’s eligibility criteria as described below (the “core” investment).;

In this core investment the Sub-Fund excludes fossil fuel companies and has two investment sleeves:

- A Solutions sleeve, which will invest in corporate bond issuers whose goods and services provide solutions for climate change mitigation and adaptation;

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- A Transition sleeve, which allocates to companies positively aligning to a warmer climate and a low-carbon economy and orientating their business models to be resilient in a warmer climate and a low-carbon economy.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics.

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. The Sub-Fund-specific fossil fuel exclusions which are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities; the maximum acceptable percentage of revenue thresholds are:

- Thermal coal at 0%;
- Arctic oil and gas production at 0%;
- Natural gas power generation at 15%;
- Liquid fuel power generation at 10%;
- Unconventional oil and gas production at 0%;
- Conventional oil and gas production at 10%;
- Oil and gas extraction and production at 10%;
- Oil and gas distribution and retail, equipment and services, petrochemicals, pipelines and transportation, refining and trading at 75%.

The Investment Manager will also exclude direct investments in companies which manufacture products that seek to do harm when used as intended. This would include companies manufacturing tobacco products.

b. A maximum acceptable amount of reserves, the maximum reserve thresholds are:

- Thermal coal reserves 0 metric tonnes;
- Shale oil and gas reserves at 0 mmbob;
- Oil shale and tar sands reserves at 0 mmbob;
- Unconventional oil and gas reserves at 0 mmbob;
- Oil and gas reserves and 1000 mmbob

The Sub-Fund may invest up to 10% of total net assets (excluding derivatives for efficient portfolio management) in companies that do not form part of the core investment.

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as 'systemically important carbon emitters' to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world's carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm's equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager's ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager's ESG scoring tools and ESG research.

### ● ***How did the sustainability indicators perform?***

It is anticipated that the sustainability indicators reported on for this Sub-Fund will include, but not be limited to:

1. Portfolio metric of any revenue derived from excluded activity (e.g., thermal coal)
2. UNGC 'severe' and 'very severe' incidents avoided and commentary on any exceptions.
3. Additionally, the Sub-Fund will measure exposure to the Principle Adverse Impacts indicators that the Investment Manager has committed to prioritising in its Principle Adverse Impact Statement. For reference these include:

1. Indicators relating to Greenhouse Gas (GHG) Emissions
2. Indicators pertaining to activities negatively affecting biodiversity-sensitive areas
3. Indicators relating to Board Gender Diversity.

As noted above, ESG characteristics of the Sub-Fund include its two investment sleeves, being the “Solutions” and “Transition” sleeves. The Investment Manager uses the following sustainability indicators to report on these characteristics:

- For the “Solutions” sleeve, the Investment Manager assesses that companies have more than 20% revenue generated from solutions product and services and then reports on the proportion of solution providers in the portfolio;
- For the « Transition » Sleeve, the Investment Manager will assess the proportion of companies in the Sub-Fund displaying strong climate governance. This may include but not limited to, the percentage of companies attaining a certain Climate Risk Management Score\*, and the percentage of companies setting or committing to emission reduction goals which align to science-based targets.

\*The climate risk management score seeks to measure the quality of climate governance in place at individual companies. The score is provided by external industry recognised bodies and is currently provided by CDP (previously known as the Carbon Disclosure Project).

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	11,127.56
	Scope 2 GHG emissions	3,378.52
	Scope 3 GHG emissions	88,773.65
	Total GHG emissions	102,928.23
Carbon Footprint	Carbon footprint	237.86
GHG Intensity of investee companies	GHG intensity of investee companies	671.18
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	6.21%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	63.01%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.62
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
%Board Gender Diversity	Average ratio of female to male board members in investee companies	36.74%
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	31.72%
SBTi Targets Committed	Share of investments in companies that have committed to SBTi Targets	15.84%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	41.53%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	33.19%

Climate Risk Management	Share of investments in companies within the portfolio that have strong climate governance (climate risk management score >B-)	65.46%
-------------------------	--	--------

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

#### ● ...and compared to previous periods?

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	12,419.65	11,127.56
	Scope 2 GHG emissions	4,790.98	3,378.52
	Scope 3 GHG emissions	83,671.88	88,773.65
	Total GHG emissions	100,217.60	102,928.23

Climate Risk Management	Share of investments in companies within the portfolio that have strong climate governance (climate risk management score >B-)	72.56%	65.46%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

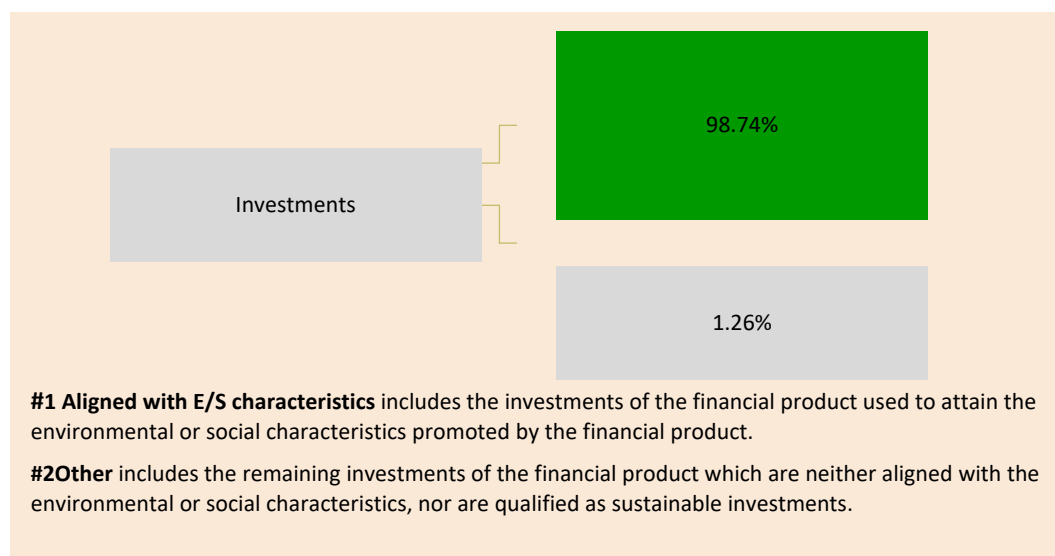

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

Security Description	Sector	% Assets	Country
TREASURY NOTE	FI Securities	2.22%	United States

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### **What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

**Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Climate Transition Global Equity Fund  
**Legal entity identifier:** 549300KFQIVCVG4XKR35

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 90%</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective: ___%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent was the sustainable investment objective of this financial product met?

The Climate Transition Global Equity Fund (the “Sub-Fund”) is part of Aviva Investors’ Sustainable Transition range which aims to support three key sustainable outcomes – relating to People, Climate and Earth (or Natural Capital) – closely aligned to the principles of the UN Sustainable Development Goals (“SDGs”). Each fund in the range follows a common investment philosophy to avoid significant harm, invest in solutions and back transition aligned to its particular theme.

This Sub-Fund focusses on “Climate” (primary SDGs: 7 Affordable and Clean Energy and 13 Climate Action).

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Alongside aiming to generate long-term capital growth the Sub-Fund's sustainable investment objective is that it aims to support the transition towards a net zero economy and/or one that is also more resilient to higher temperatures, by investing in equities of companies that are either providing solutions that help tackle the impacts of climate change or transitioning their business models towards a net zero and/or warmer economy, and by engaging with portfolio companies.

A net zero economy is one where the level of GHG emissions is reduced to as close to zero as possible, with any residual amounts emitted matched by removal. An economy that is more resilient to higher temperatures is one that has adjusted to actual and expected climate change and its impacts.

Companies can support the transition by reducing their emissions, adapting their business models to a lower carbon, warmer world or by providing adaptation and mitigation solutions to tackle climate change.

Whilst the Sub-Fund has the climate-related objective set out above, it does not aim to align with the requirements of the EU Taxonomy as the Investment Manager is, as at the date of this document, not in a position to accurately determine to what extent the Sub-Fund's investments are in taxonomy-aligned environmentally sustainable activities. However, given the nature of its objective, it is expected that at times, some of its investments will contribute to the following environmental objectives from within the EU Taxonomy: Climate Change Mitigation and Climate Change Adaptation.

The Sub-Fund invests in "sustainable investments" that contribute to the Sub-Fund's objective, either through the company's products or services ("solutions" companies) or via the company's operations ("transition" companies).

#### **Invest in solutions**

The Sub-Fund invests in "solutions" companies providing goods and services that provide solutions for climate change mitigation and adaptation. Mitigation themes seek to mitigate the risk of climate change and includes, for example, sustainable transport, energy efficiency or renewable energy. Adaptation themes seek to help communities to adapt to the adverse physical impacts of climate change and includes, for example, water, health, forestry and agriculture.

By investing in "solutions" companies in line with these themes, these Sustainable Investments directly contribute towards the Sub-Fund's sustainable investment objective. Companies will be eligible for investment if they derive at least 20% of their revenue from the themes set out above.

The Investment Manager has therefore chosen 20% threshold of revenues based on the sustainable products and services used to select "Solutions" companies in order:

- To reflect that absolute contribution to sustainable activities requires scalable solutions and therefore to not penalise large companies with diverse product/revenue streams but who do provide genuine solutions to sustainable activities
- It is a threshold the Investment Manager believes to demonstrate significant part of any companies revenues (i.e. it is "material" to those companies business strategy)

#### **Back transition**

Aviva Investors believes that the three greatest sustainability challenges of our time are climate change, biodiversity loss and social inequality and that all companies, regardless of sector and geography, have an impact on and are impacted by these immensely complicated and challenging issues. As such, all companies need to change the way they operate if we are going to achieve a sustainable future for both people and planet aligned with our sustainable investment objectives (together, a more socially equitable, nature positive and net zero economy that is also more resilient to higher temperatures). This "transition" of all companies is one of the most important sustainability objectives that must be achieved.

The market needs to allocate capital to those companies leading the transition to a sustainable future in terms of how they operate, not just those providing solutions to the challenges mentioned above through their products and services. In doing so, we are rewarding and backing those companies that are leading their sectors which can have a powerful knock-on effect by raising industry standards and encouraging others to improve.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

The Sub-Fund invests in “transition” companies that are demonstrating leadership in the transition towards a net zero economy and/or one that is more resilient to higher temperatures by reducing their impact on climate change through their operations or that are positively aligning to and orientating their business models to be resilient in a warmer climate and a low-carbon economy.

Transition companies are identified using a proprietary Transition Risk (“T-Risk”) framework. The framework provides a measure of the risk exposure of sub-industries to decarbonisation and adaptation issues, providing a quantitative risk metric which is converted into an alphanumeric risk ranking (e.g. high, medium or low). The framework then seeks to measure the quality of climate risk management in place at individual companies. Companies that are in higher T-risk sub-industries are required to demonstrate stronger management of climate issues to be considered for investment by the Sub-Fund. Our T-Risk model thus ensures that firms have taken steps to manage their impact on, and exposure to, climate change; supporting the transition and contributing towards the sustainable investment objective.

The Sub-Fund has a bespoke engagement programme linked to the sustainable investment objective. All companies held in the Sub-Fund are asked to develop and formally validate science-based emission reduction targets (“SBT”) in line with the Science Based Targets Initiative (“SBTi”) criteria and to provide annual public disclosure to the CDP’s Climate Change questionnaire and strive for continually improving performance. If achieved, these asks will result in companies reducing their negative impact on, and effectively managing the risks associated with, climate change, thus supporting the transition towards a net zero economy.

The Investment Manager will conduct an annual assessment of each company’s progress on the engagement programme, scoring them in one of five categories. Where there is insufficient progress, escalating action will be taken which may ultimately lead to divestment from those companies that fail to meet our minimum expectations.

No reference benchmark has been designated for the purposes of meeting the sustainable investment objective.

● **How did the sustainability indicators perform?**

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	6,256.66
	Scope 2 GHG emissions	3,167.17
	Scope 3 GHG emissions	43,013.58
	Total GHG emissions	48,491.63
Carbon Footprint	Carbon footprint	135.36
GHG Intensity of investee companies	GHG intensity of investee companies	524.73
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.80%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	63.45
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.46
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	45.43%
SBTi Targets Committed	Share of investments in companies that have committed SBTi Targets	27.11%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	38.75%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	55.38%

Implied Temperature Rise	Implied Temperature Rise from MSCI ESG Research is an intuitive, forward-looking metric, expressed in degrees Celsius, designed to show the temperature alignment of companies, portfolios and funds with global temperature goals.	1.82
Fossil Fuel Reserves	This field identifies companies with evidence of owning fossil fuel reserves regardless of their industries, including companies that own less than 50% of a reserves field.	0.00%
Climate Risk Management	Share of investments in companies within the portfolio that have strong climate governance (climate risk management score >B-)	71.74%

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

The Investment Manager systematically monitors progress against the asks within the Fund's engagement programme by conducting an annual assessment of companies ranking in categories 1 to 5, with 1 being the leaders. Below is a breakdown of the portfolio into these 5 categories:

1. 19%
2. 43%
3. 19%
4. 15%
5. 4%

The Investment Manager has an escalation pathway that may lead to divestment if the engagement asks of the Fund's programme are not met. Aviva Investors does however acknowledge the challenges of implementing these asks and evaluates companies on their ability to demonstrate progress over time. 2022 was the first year of the programme and therefore there was no action taken by way of escalation against companies. Progress will be considered within 2023 AGM voting action now that companies have had some time to react to the requests, such as voting on special and ordinary resolutions. Aviva Investor's Global Voting Policy provides more details on its approach and perspectives on governance and sustainability best practice, and the Annual ESG Review provides more details on the Investment Manager's approach to escalation. These documents are available on the Aviva Investors website here: <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers

● **...and compared to previous periods?**

Please note that there are no previous reference periods where the fund can report on performance against the relevant sustainability indicators, the fund transitioned to Article 9 in August 2023.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that sustainable investments in the sub-fund do not cause significant harm to any environmental or social objective, there are two levels of screening applied:

1. Aviva Investors' ESG Baseline Exclusions Policy, which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

b. MSCI's controversy screening data to identify recent controversies to the principles set out under the UN Global Compact. An AI ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If we consider failings to be redeemable we will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy is available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-anddocuments/>

2. Fund-level screening based on the indicators for principal adverse impacts ("PAI") on sustainability factors. Aviva Investors assesses an issuer's performance against each of the relevant indicators and the sub-fund will not invest where it is considered that an issuer is causing significant harm to an environmental or social objective. Relevant indicators include all the mandatory PAIs as well as those voluntary indicators selected at a firm-level that are relevant to the theme of the Sub-Fund. Please refer to the PAI Statement on Aviva Investors website for further detail here <https://www.avivainvestors.com/en-gb/capabilities/sustainable-finance-disclosure-regulation/>

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager has a proprietary framework for taking the PAI indicators into account, which differs depending on the type of indicator. Where applicable, the Investment Manager has assigned red flag to issuers which are considered to cause significant harm to an environmental or social objective. These issuers will be excluded from the investment universe for this Sub-Fund. Furthermore, due diligence will be carried out on every company by portfolio managers and ESG analysts. Where PAI data does not exist, the team will seek to qualitatively assess Do No Significant Harm on a best-efforts basis. This may include engaging directly with companies to ask them for the missing data.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager uses the MSCI overall controversy flag (where a "red" flag is considered a fail) to ensure that sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights ("UNGPBHR"), including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation ("ILO") on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The MSCI methodology covers violations of the OECD Guidelines, United Nations Global Compact Principles ("UNGC"), the ILO conventions and the UNGPBHR (which references the International Bill of Human Rights), amongst many other global norms and conventions. All issuers with a red flag will be excluded from the investment universe for this Sub-Fund.

## **How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Environmental PAI 2 relating to carbon footprint
- Environmental PAI 3 relating to carbon intensity

- Environmental PAI 5 relating to share of non-renewable energy consumption and production
- Environmental PAI 6 relating to energy consumption intensity

## What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	6.90%	United States
LINDE PLC	Materials	4.23%	United Kingdom
VISA INC CLASS A	Financials	4.08%	United States
PTC INC	Information Technology	3.56%	United States
UNITEDHEALTH GROUP INC	Health Care	3.56%	United States
MUENCHENER RUECKVERSICHERUNGS-GESE	Financials	3.30%	Germany
AXA SA	Financials	3.12%	France
RENTOKIL INITIAL PLC	Industrials	2.88%	United Kingdom
AUTODESK INC	Information Technology	2.85%	United States
RELX PLC	Industrials	2.82%	United Kingdom
ASM INTERNATIONAL NV	Information Technology	2.79%	Netherlands
WASTE MANAGEMENT INC	Industrials	2.66%	United States
WASTE CONNECTIONS INC	Industrials	2.54%	United States
MOODYS CORP	Financials	2.51%	United States
SIKA AG	Materials	2.44%	Switzerland

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
--------	----------------

Industrials	28.95%
Information Technology	24.08%
Financials	13.00%
Health Care	10.01%
Materials	6.67%
Consumer Staples	4.11%
Communication	3.69%
Cash Securities	3.59%
Consumer Discretionary	2.58%
Utilities	2.20%
Real Estate	0.79%
Energy	0.34%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund's Sustainable Investments are not actively aligned with the EU Taxonomy. This means that the Sub-Fund's percentage of Taxonomy alignment is currently 0%.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas  In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

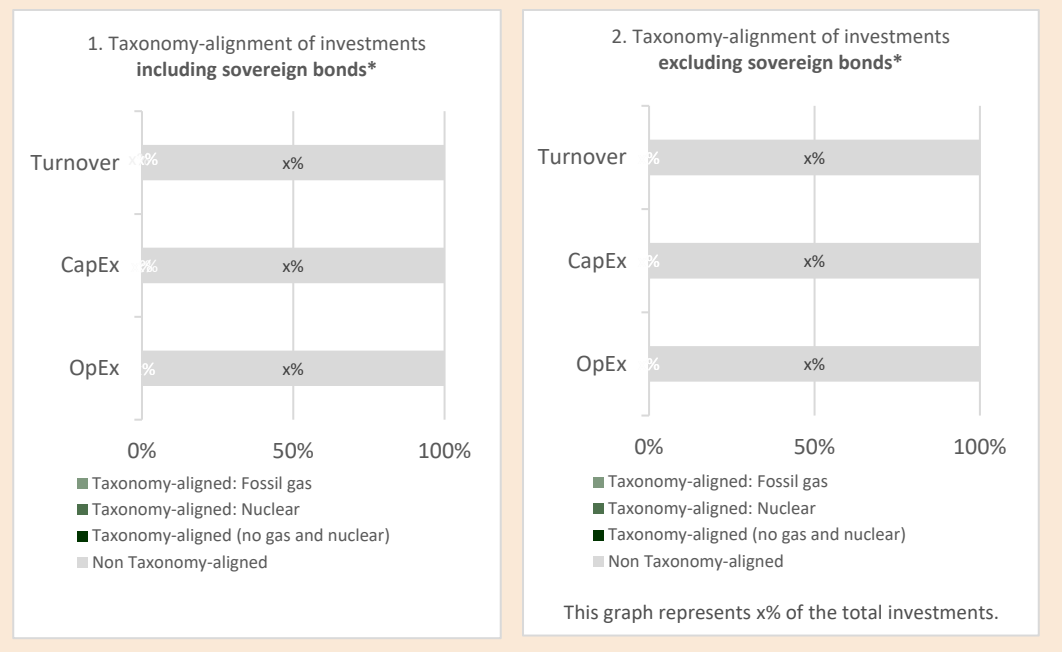

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A - Sustainable Investments are not actively aligned with the EU Taxonomy, thus the share of investments in transitional and enabling activities amounts to 0% of the Sub-Funds' portfolio.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Sub-Fund invests at least 90% of total net assets in equities and equity-related securities of companies from anywhere in the world (including emerging markets), except in limited circumstances as explained above. At the point the Sub-Fund makes an investment into such an asset, that asset will qualify as a

Sustainable Investment. These investments have an environmental objective but are not actively targeting alignment with the EU Taxonomy.

At the date of this document, it is not yet possible to commit to the Sub-Funds' minimum alignment with the Taxonomy Regulation, as the Investment Manager is currently not in a position to accurately determine to what extent the Sub-Funds' investments are in taxonomy-aligned environmentally sustainable activities.

### **What was the share of socially sustainable investments?**

The Sub-Fund does not actively invest in sustainable investments with a social objective.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The Sub-Fund can invest 10% of total net assets in ancillary liquid assets, eligible deposits, money market instruments, money market funds and derivatives used for exposure to equity indices for managing cash flows, or in derivatives used for hedging. Exposure to equity indices would be for a limited amount of time and in limited circumstances to manage cash flows. Such assets would not be deemed as Sustainable Investments. Some but not all of the underlying constituents of the equity indices may nevertheless qualify as sustainable investments. The Sub-Fund may hold more than 10% of total net assets in such investments in limited circumstances, such as if there is a sudden and material subscription during a time of exceptional market conditions that does not allow immediate allocation to Sustainable Investments.

Given the nature of these investments and short-term use, it may not always be possible to apply minimum safeguards due to look through or liquidity. These assets do not affect the delivery of the sustainable investment objective on a continuous basis as they constitute a small proportion of the Sub-Fund's total net assets.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world's 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate

sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

### **Macro Stewardship Case Study**

Net zero

#### **Issue**

As part of our drive to support the UK’s successful transition to net zero, Aviva was one of the first major financial institutions to set itself an ambitious target to become net zero across our operations, supply chains, and investment portfolios by 2040. We already invest significantly in the transition to net zero, including a £400 million investment in the world’s largest offshore wind farm at Hornsea One in 2018. We also surpassed our target to invest £1 billion in climate-transition focused real estate loans three years early in 2022. But we know private investment in the transition to net zero needs to significantly grow in order to hit our own and the wider UK’s net-zero targets. The UK government estimates that an extra £50-60 billion of capital investment will be required each year from the late 2020s, which cannot be met by public finance alone.

#### **Action**

In 2023, we created a new Head of Climate Policy role in the Sustainable Finance Centre for Excellence to develop our public policy positions across key sectors of the economy to accelerate the transition to net zero emissions and build capacity across our investment, ESG, and distribution teams through policy insights.

Our external work in 2023 aimed to drive public policy change that will unlock low carbon investment across all sectors of the economy, thereby facilitating Aviva Investors’ gathering of green assets as well as supporting the UK’s and other countries’ transitions to net zero emissions. We attended the Conservative, Labour, and Liberal Democrat Party conferences to emphasise the need for public policy interventions and targeted public funding to de-risk and attract private investment into low carbon projects, infrastructure, and businesses at scale across the UK economy.

Simultaneously, we have worked to ensure that our thinking informs investment decision-making by sharing regular net zero-related insights in investment forums and that our public policy positions are informed by investment colleagues through our upcoming report, *Boosting UK Low Carbon Investment: A Policy Roadmap*.

#### **Outcome**

Our upcoming publication, the *Boosting UK Low Carbon Investment: A Policy Roadmap*, which sets out our perspective on key solutions to unlock private investment in low-carbon infrastructure and businesses across eight major sectors of the UK economy, was developed throughout 2023 with investment colleagues and sector experts from across the business and will be published in 2024. This work has resulted in deeper integration between investment teams and the Sustainable Finance Centre for Excellence, and the contribution of public policy insights into investment forums will continue to strengthen the quality of information taken into account when investment decisions are made.

### **Micro Stewardship Case Study**

Waste

#### **Issue**

Acknowledging the Climate Transition Franchise’s public aspiration of achieving 90 per cent coverage of holdings having committed to/validated a SBT by 2030, a high engagement priority throughout 2023 was to

engage with holdings to assess the extent to which and the pace at which they can align with our asks. Broadly speaking, European companies demonstrate closer alignment to our asks over their North American counterparts so it is insightful for us to engage with our American holdings to determine potential barriers to alignment of climate action.

#### Action

As part of CTEP, Waste Connection was initially targeted in August 2022, when it was categorised as demonstrating level 5 alignment due to not disclosing to CDP's Climate Change disclosure and not having committed to an SBT.

#### Outcome

Since its inception in the fund, and throughout 2023, we engaged with Waste Connections on four occasions outlining the asks of the CTEP, specifically highlighting the importance of externally validated SBTs. During our initial engagements, Waste Connection explicitly outlined that committing to a target with the SBTi was not something the organisation would pursue in the near-term due to the fact the company is a growth-orientated business and ambiguity around the SBTi's baselining frameworks.

Despite this, peers in the US waste management industry such as Republic Services and Waste Management have both attained validated near-term targets from the SBTi, therefore we remained persistent with our requests. In Q4 2023 we welcomed progress against our ask as Waste Connections committed to a near-term target with the SBTi. Our engagements with the company will continue into 2024 to monitor continued progress and begin to explore other topical themes such as carbon accounting in the waste management sector.

#### Priorities ahead

We will continue to increase pressure on CTEP companies, particularly those that are currently making slow progress against our asks and those that are deemed to be in high impacting sectors based on our internal analysis of sectoral emissions, both in operations and throughout the value chain.

As 2024 will mark the third and final year of most holdings' inclusion in CTEP, we intend to ramp up our voting and other escalation activity during the upcoming AGM season and beyond to demand greater progress from slow movers and to remind them of the risk of divestment if they fail to act

### How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

- **How did the reference benchmark differ from a broad market index?**

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- **How did this financial product perform compared with the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform compared with the broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Emerging Markets Bond Fund  
**Legal entity identifier:** 549300BBDXSD8IK6QS04

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	86,715.36
	Scope 2 GHG emissions	15,067.62
	Scope 3 GHG emissions	213,877.13
	Total GHG emissions	314,474.10
Carbon Footprint	Carbon footprint	90.43
GHG Intensity of investee companies	GHG intensity of investee companies	4,276.64
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	8.59%

Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	93.03%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.96
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	19.30%
GHG intensity	GHG intensity of investee countries	868.67
ESG Sovereign Monitor	Scores below 4	5.99%
	Score between 4 and 6	46.32%
	Scores above 6	12.76%

Countries	ESG Sovereign Monitor Good Governance Review (Scores below 4)
BENIN ( REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.
EGYPT (ARAB REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Egypt is weaker than its peers (particularly the judiciary's lack of effectiveness, human rights abuses, and corruption) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken in anti-corruption efforts, fiscal government improvements, and a new penal code.
EGYPT GOVERNMENT INTERNATIONAL BOND	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Egypt is weaker than its peers (particularly the judiciary's lack of effectiveness, human rights abuses, and corruption) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken in anti-corruption efforts, fiscal government improvements, and a new penal code.
PAKISTAN (ISLAMIC REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Pakistan is weaker than its peers (particularly the judiciary's lack of effectiveness, human rights abuses, and corruption) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken in anti-corruption efforts, fiscal government improvements, and a new penal code.
KENYA (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.

ANGOLA (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Although Angola is weaker than its peers (particularly the judiciary's lack of effectiveness, human rights abuses, and corruption) these issues do not present an immediate sustainability or investment risk. Positive steps have been taken in anti-corruption efforts, fiscal government improvements, and a new penal code.
COTE D IVOIRE (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.
IVORY COAST GOVERNMENT AIDBOND	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.
NIGERIA (FEDERAL REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap negative. Good governance assessment as Amber - governance weaker than peers but showing mitigating actions. Nigeria's governance is weaker than peers due to the government's failure to efficiently capitalise on its natural resources, use oil revenue to provide quality public services and translate the natural resource and demographic wealth into sustained and inclusive economic growth. President Buhari's government can be characterised as one of inaction. While we note weak governance trends and the feedthrough to weak social metrics/trends, we do not see evidence that the government has taken 'negative' policy action such that these longer-term trends pose a significant investment or sustainability risk.
ZAMBIA (REPUBLIC OF)	AI ESG score below 4, sustainable GDP gap is positive. The latter represents an override to Article 8 exclusion criteria we implement. The sustainable GDP gap is a theoretical measure we adopted from Beyond Ratings which shows whether a country's ESG scores are in line, higher or lower than estimated by the level of its economic development. If higher, i.e. sustainable GDP gap is positive, the country's ESG performance is better than the level expected based on its level of economic development.

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3

is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	4,063.18	86,715.36
	Scope 2 GHG emissions	247.99	15,067.62
	Scope 3 GHG emissions	80,924.43	213,877.13
	Total GHG emissions	85,085.52	314,474.10
Carbon Footprint	Carbon footprint	28.92	90.43
GHG Intensity of investee companies	GHG intensity of investee companies	7,114.53	4,276.64
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	12.42%	8.59%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	95.16%	93.03%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	2.31	1.96
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	16.62%	19.30%
GHG intensity	GHG intensity of investee countries	996.27	868.67
ESG Sovereign Monitor	Scores below 4	9.46%	5.99%
	Score between 4 and 6	44.85%	46.32%
	Scores above 6	12.81%	12.76%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

## What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
MEXICO (UNITED MEXICAN STATES) (GO TREASURY NOTE (OTR)	FI Securities	5.12%	Mexico
PANAMA REPUBLIC OF (GOVERNMENT)	FI Securities	4.76%	United States
SOUTH AFRICA (REPUBLIC OF)	FI Securities	2.90%	Panama
MEXICO (UNITED MEXICAN STATES) PETROLEOS MEXICANOS	Financials	2.79%	South Africa
CHILE (REPUBLIC OF)	FI Securities	2.79%	Mexico
GACI FIRST INVESTMENT CO MTN RegS	Energy	2.16%	Mexico
OMAN SULTANATE OF (GOVERNMENT) RegS	FI Securities	1.85%	Chile
DOMINICAN REPUBLIC (GOVERNMENT) RegS	Financials	1.85%	Cayman Islands
PERU (REPUBLIC OF)	FI Securities	1.78%	Oman
TREASURY BOND (2OLD)	FI Securities	1.77%	Dominican Republic
ARGENTINA REPUBLIC OF GOVERNMENT	FI Securities	1.62%	Peru
SAUDI INTERNATIONAL BOND MTN RegS	FI Securities	1.62%	United States
COLOMBIA REPUBLIC OF (GOVERNMENT)	FI Securities	1.57%	Argentina
	FI Securities	1.56%	Saudi Arabia
	FI Securities	1.44%	Colombia

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

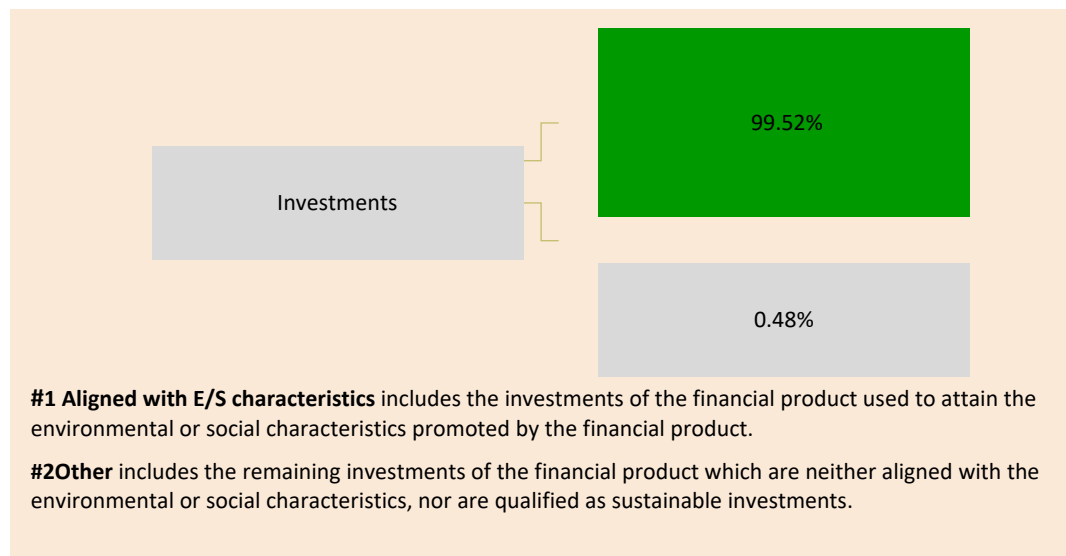

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### ● What was the asset allocation?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
FI Securities	61.01%
Financials	12.82%
Energy	12.76%
Cash Securities	8.02%
Materials	2.02%
Communication	1.24%
Utilities	1.15%
Industrials	0.58%
Other	0.41%
Non-Spendable Cash	0.08%
FX	-0.08%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

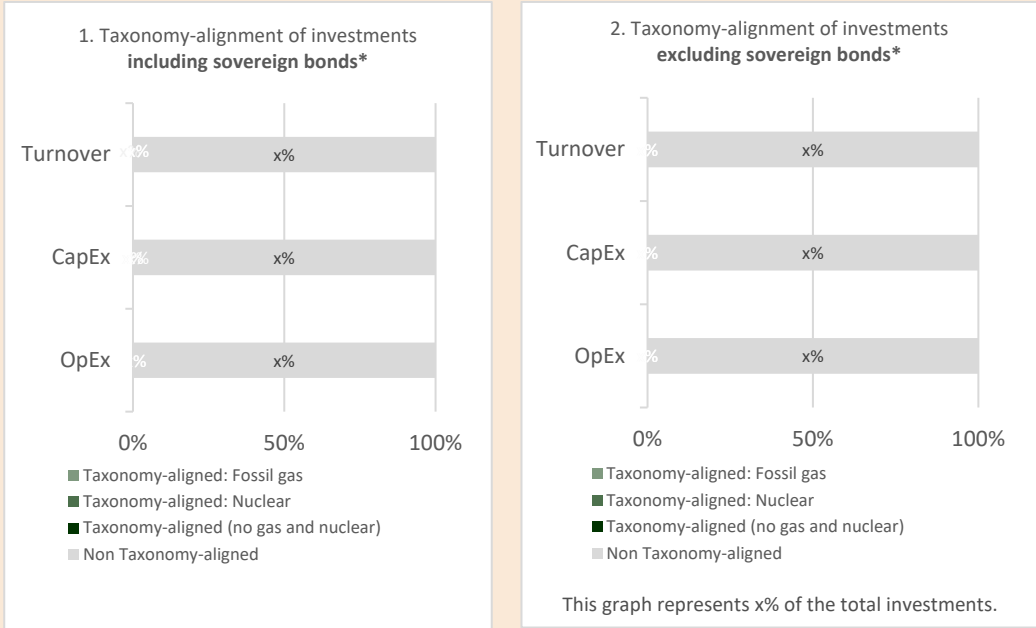

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Emerging Markets Corporate Bond Fund  
**Legal entity identifier:** 549300UFGNR1QI15DZ68

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	62,967.52
	Scope 2 GHG emissions	15,139.70
	Scope 3 GHG emissions	458,696.37
	Total GHG emissions	535,012.20
Carbon Footprint	Carbon footprint	820.74
GHG Intensity of investee companies	GHG intensity of investee companies	2,019.53
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	17.58%

Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	86.99%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.70
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	1.42%
Board Gender Diversity	Average ratio of female to male board members in investee companies	21.30%
GHG intensity	GHG intensity of investee countries	1,117.13
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.00%
	Scores above 6	2.80%

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

#### ● ...and compared to previous periods?

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	60,400.49	62,967.52
	Scope 2 GHG emissions	14,982.51	15,139.70
	Scope 3 GHG emissions	429,899.00	458,696.37
	Total GHG emissions	477,568.60	535,012.20

	Score between 4 and 6	0.47%	0.00%
	Scores above 6	0.24%	2.80%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### Asset allocation

describes the share of investments in specific assets.

## What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
AUSTRALIA AND NEW ZEALAND BANKING MTN RegS	Financials	2.15%	Australia
STANDARD CHARTERED PLC 144A	Financials	2.04%	United Kingdom
ENERGEAN ISRAEL FINANCE LTD 144A	Energy	1.85%	Israel
KOSMOS ENERGY LTD RegS	Energy	1.74%	United States
BANK OF EAST ASIA LTD MTN RegS	Financials	1.73%	Hong Kong
OCP SA RegS	Industrials	1.67%	Morocco
TSMC ARIZONA CORP	Industrials	1.67%	United States
VIVO ENERGY INVESTMENTS BV RegS	Energy	1.59%	Netherlands
ISRAEL DISCOUNT BANK 144A	Financials	1.51%	Israel
GALAXY PIPELINE ASSETS BIDCO LTD RegS	Energy	1.50%	Jersey, Channel Islands
WESTPAC BANKING CORP	Financials	1.50%	Australia
KAZMUNAYGAS NATIONAL CO RegS	Energy	1.49%	Kazakhstan
SASOL FINANCING USA LLC	Materials	1.48%	United States
MELCO RESORTS FINANCE LTD RegS	Consumer Discretionary	1.47%	Cayman Islands
IHS NETHERLANDS HOLDCO BV RegS	Communication	1.43%	Netherlands

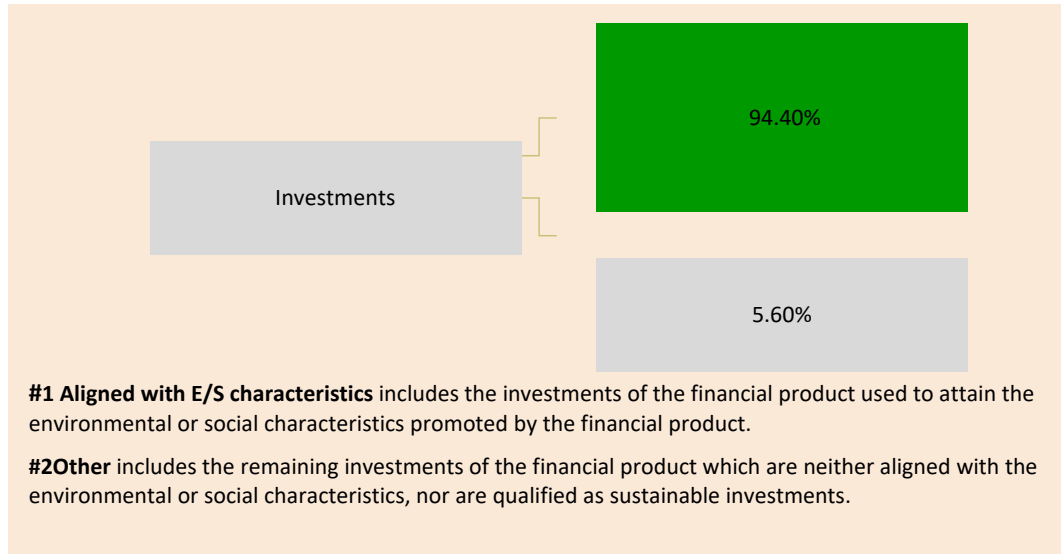

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
Communication	7.92%
Consumer Discretionary	6.19%
Consumer Staples	1.04%
Energy	18.94%
Financials	36.03%
Industrials	8.16%
Information Technology	0.74%
Materials	6.76%
Real Estate	1.71%
Utilities	5.88%
FI Securities	1.03%
Cash Securities	5.60%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

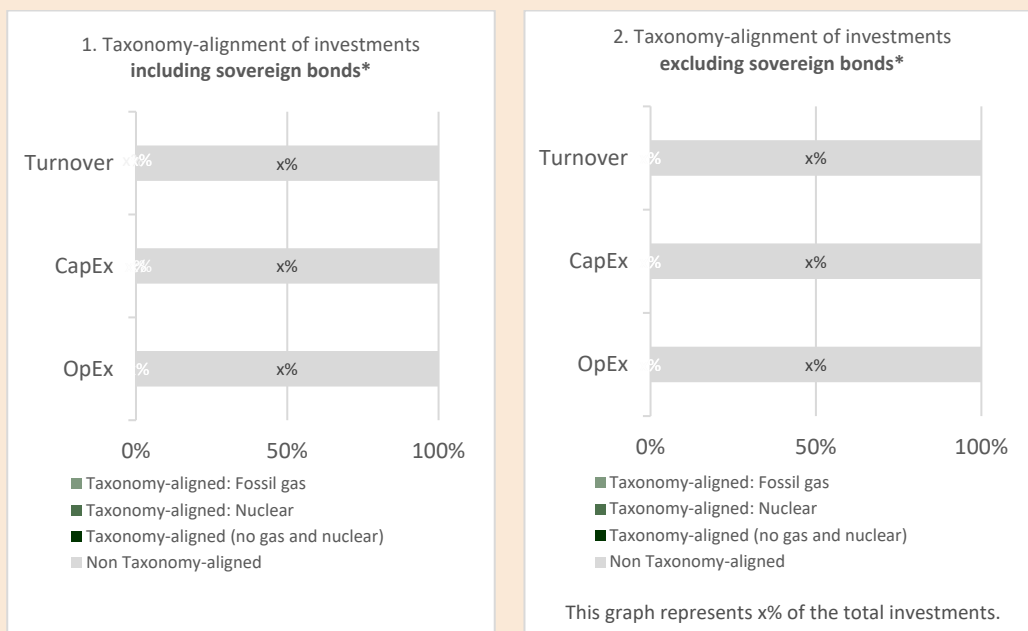

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### **What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Emerging Markets Local Currency Bond Fund  
**Legal entity identifier:** 549300Q33WLRUTDX084

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	0.44
	Scope 2 GHG emissions	2.30
	Scope 3 GHG emissions	524.80
	Total GHG emissions	512.11
Carbon Footprint	Carbon footprint	0.30
GHG Intensity of investee companies	GHG intensity of investee companies	371.04
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%

Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	51.06%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.02
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	17.65%
GHG intensity	GHG intensity of investee countries	883.20
ESG Sovereign Monitor	Scores below 4	1.29%
	Score between 4 and 6	62.73%
	Scores above 6	27.08%

Countries	ESG Sovereign Monitor Good Governance Review (Scores below 4)
EGYPT (ARAB REPUBLIC OF)	We initiated a position when its AI ESG score was above 4. The score dipped below 4 later on and its sustainable GDP gap was negative hence we proceeded to the next step in assessing eligibility for our funds - assigning a good governance rating. We assess Egypt's governance as amber, meaning its governance is weaker than its peers, but we believe that the government is taking steps to improve governance in key areas, as stated in the three-year OECD program it embarked on at the end of 2021, as well as in its National Structural Reform Programme (NSRP) 2021-24, partnering with the UN on working towards the sustainable development goals. Mitigating factors can also be found in the government's willingness to work under an IMF program, and in general with western institutions, address climate change issues and improve public service provision – all reinforcing our investment rationale. In September 2022, its score reached 4, hence the country is no longer excluded.

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and

reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	0.35	0.44
	Scope 2 GHG emissions	2.61	2.30
	Scope 3 GHG emissions	526.81	524.80
	Total GHG emissions	531.57	512.11
Carbon Footprint	Carbon footprint	0.36	0.30
GHG Intensity of investee companies	GHG intensity of investee companies	3107.85	371.04
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%	0.00%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	100%	51.06%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.02	0.02
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	17.07%	17.65%
GHG intensity	GHG intensity of investee countries	1,084.32	883.20
ESG Sovereign Monitor	Scores below 4	0.70%	1.29%
	Score between 4 and 6	68.35%	62.73%
	Scores above 6	20.63%	27.08%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

**Asset allocation** describes the share of investments in specific assets.

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
SOUTH AFRICA (REPUBLIC OF)	Financials	8.11%	South Africa
MEXICO (UNITED MEXICAN STATES)	FI Securities	7.66%	Mexico
INDONESIA (REPUBLIC OF)	FI Securities	7.32%	Indonesia

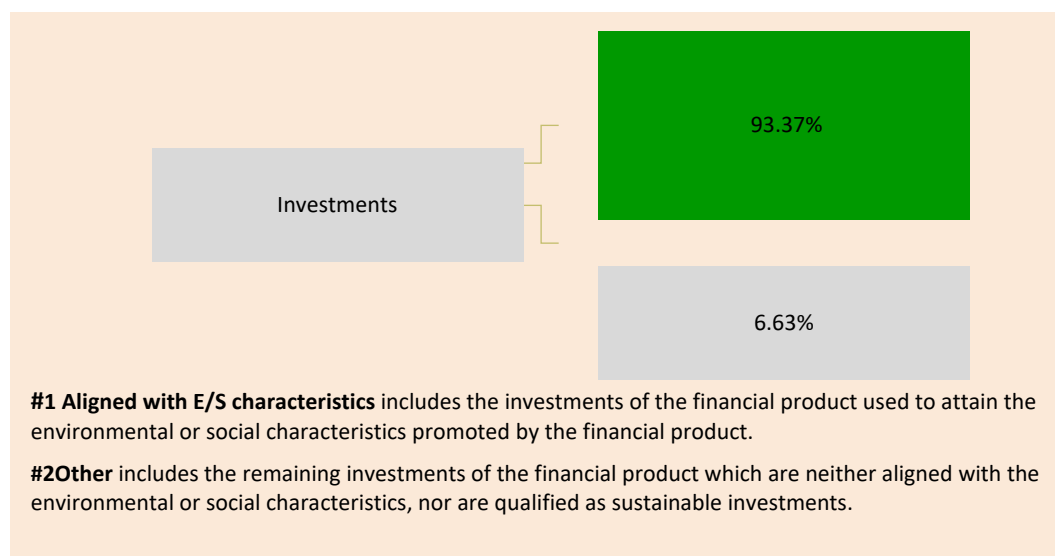

BRAZIL FEDERATIVE REPUBLIC OF (GOV)	FI Securities	6.79%	Brazil
MALAYSIA (GOVERNMENT)	Real Estate	5.96%	Malaysia
POLAND (REPUBLIC OF)	FI Securities	4.82%	Poland
CHINA GOVERNMENT BOND	Real Estate	4.13%	China
HUNGARY (REPUBLIC OF)	Financials	3.13%	Hungary
COLOMBIA (REPUBLIC OF)	FI Securities	3.12%	Colombia
ROMANIA (REPUBLIC OF)	Financials	2.85%	Romania

THAILAND KINGDOM OF (GOVERNMENT)	FI Securities	2.63%	Thailand
MALAYSIA (FEDERATION OF)	Real Estate	2.54%	Malaysia
CHINA PEOPLES REPUBLIC OF (GOVERNMENT)	Real Estate	2.48%	China

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
FI Securities	59.71%
Financials	17.79%
Real Estate	15.11%
Cash Securities	5.33%
Non-Spendable Cash	0.70%
Other	0.38%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Communication	0.34%
FX	0.22%
Industrials	0.22%
Energy	0.19%

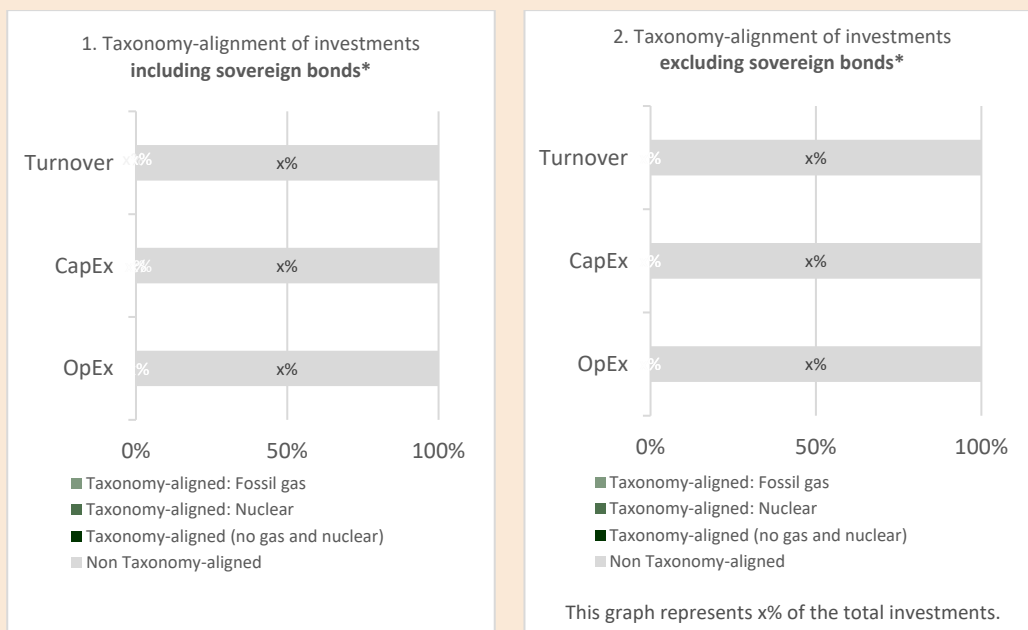

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world's 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic "value chain" approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

### **How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Convertibles Absolute Return Fund  
**Legal entity identifier:** WF12PPY6L5PG3ALG1243

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	13277.63
	Scope 2 GHG emissions	6827.63
	Scope 3 GHG emissions	155481.59
	Total GHG emissions	175101.80
Carbon Footprint	Carbon footprint	172.75
GHG Intensity of investee companies	GHG intensity of investee companies	457.89
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	1.08%

Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	75.95%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.16
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	27.88%
GHG intensity	GHG intensity of investee countries	302.59
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.00%
	Scores above 6	15.1%

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

#### ● ...and compared to previous periods?

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	8753.61	13277.63

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

## What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
TREASURY BILL	Cash Securities	15.08%	United States
MONGODB INC	Information Technology	4.21%	United States

FX	0.01%
Non-Spendable Cash	-0.77%
Cash Securities	-11.83%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

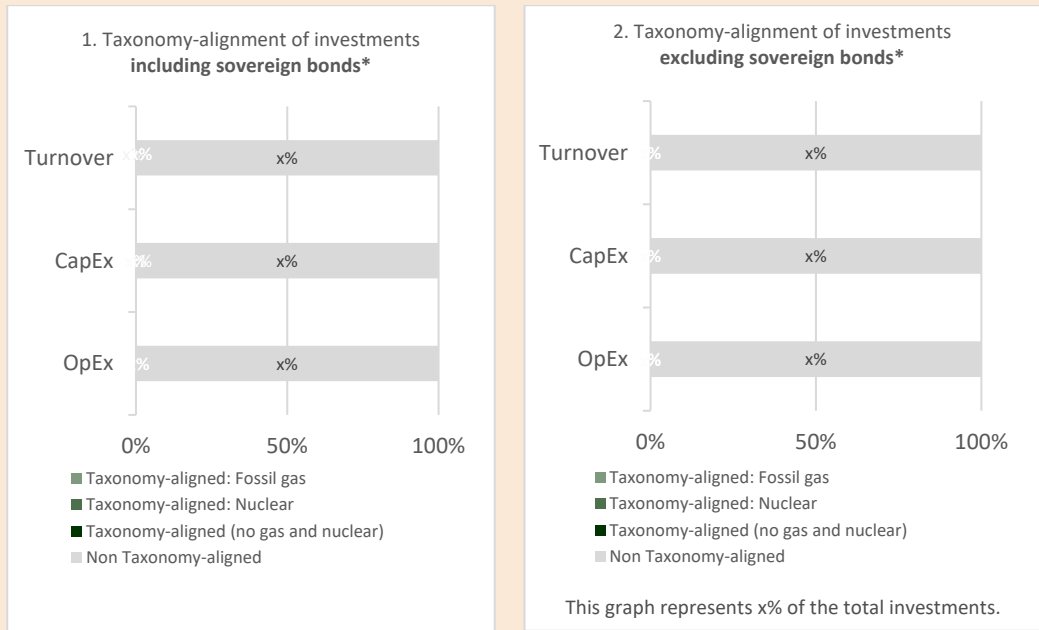

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### What was the share of socially sustainable investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Convertibles Fund  
**Legal entity identifier:** 549300NYEIC5SS63DO03

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	15,975.15
	Scope 2 GHG emissions	3,084.85
	Scope 3 GHG emissions	43,757.25
	Total GHG emissions	62,634.16
Carbon Footprint	Carbon footprint	333.99
GHG Intensity of investee companies	GHG intensity of investee companies	669.00
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	4.91%

Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	74.27%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.29
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	69.03%
Board Gender Diversity	Average ratio of female to male board members in investee companies	30.45%
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.00%
	Scores above 6	0.00%

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

#### ● ...and compared to previous periods?

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	8,042.90	15,975.15
	Scope 2 GHG emissions	3,387.55	3,084.85
	Scope 3 GHG emissions	43,728.85	43,757.25
	Total GHG emissions	54,440.77	62,634.16
Carbon Footprint	Carbon footprint	217.37	333.99
GHG Intensity of investee companies	GHG intensity of investee companies	721.71	669.00

Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	4.75%	4.91%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	74.05%	74.27%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.74	1.29
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	74.93%	69.03%
Board Gender Diversity	Average ratio of female to male board members in investee companies	28.87%	30.45%
ESG Sovereign Monitor	Scores below 4	0.00%	0.00%
	Score between 4 and 6	0.00%	0.00%
	Scores above 6	0.00%	0.00%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

<b>Largest Investment</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
JPMORGAN CHASE BANK NA RegS	Financials	2.04%	United States
ON SEMICONDUCTOR CORPORATION 144A	Information Technology	1.89%	United States
ZSCALER INC	Information Technology	1.88%	United States
FORD MOTOR COMPANY	Consumer Discretionary	1.83%	United States
WYNN MACAU LTD 144A	Consumer Discretionary	1.73%	Cayman Islands
NIPPON STEEL CORPORATION RegS	Materials	1.66%	Japan
WELLTOWER OP LLC 144A	Real Estate	1.62%	United States
ASCENDIS PHARMA A/S	Health Care	1.55%	Denmark

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Asset allocation** describes the share of investments in specific assets.

STMICROELECTRONICS NV RegS	Information Technology	1.55%	Netherlands
SK HYNIX INC RegS	Information Technology	1.53%	Korea (South), Republic of
JPMORGAN CHASE FINANCIAL COMPANY L RegS	Financials	1.49%	United States
INTERNATIONAL CONSOLIDATED AIRLINE RegS	Industrials	1.37%	Spain
SPIE SA RegS	Industrials	1.37%	France
LIVE NATION ENTERTAINMENT INC 144A	Communication	1.36%	United States
ANA HOLDINGS INC RegS	Industrials	1.34%	Japan

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

#### ● What was the asset allocation?

#### ● In which economic sectors were the investments made?

Sector	Proportion (%)
Information Technology	20.62%
Health Care	15.27%
Industrials	14.03%
Financials	13.10%
Consumer Discretionary	10.68%
Communication	7.77%
Materials	5.40%
Utilities	4.27%
Consumer Staples	2.59%
Cash Securities	2.42%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Real Estate	2.26%
Energy	1.49%
FX	0.10%

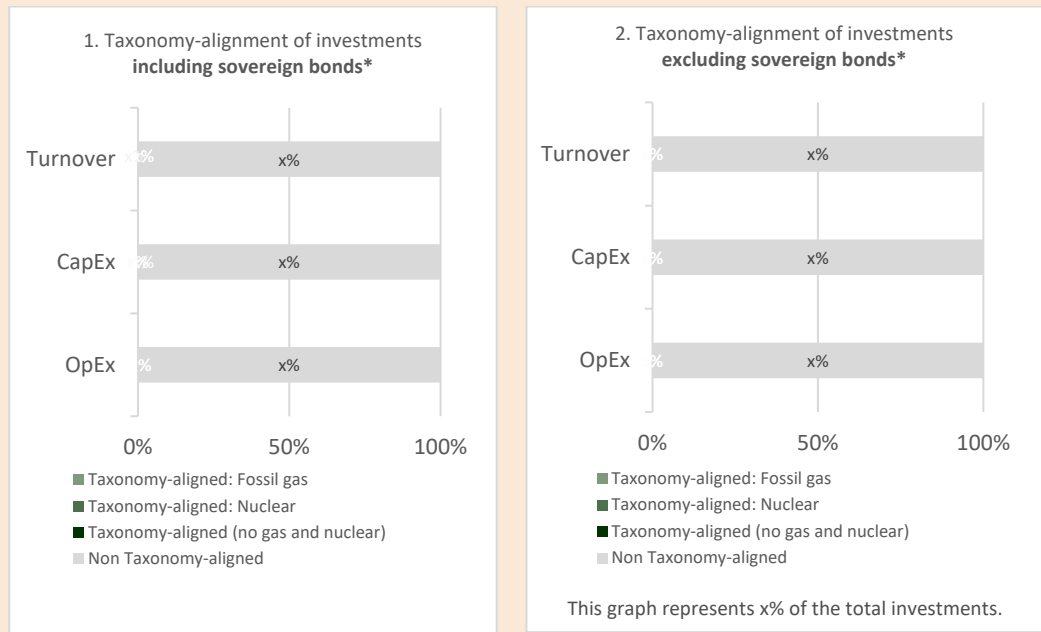

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

#### ● What was the share of investments made in transitional and enabling activities?

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity –

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. ## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The exclusions detailed below will be applied to this universe.

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme (the "Programme") which will require 30 companies regarded as 'systemically important carbon emitters' to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world's carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm's equity and debt exposures.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	114,939.99
	Scope 2 GHG emissions	49,764.07
	Scope 3 GHG emissions	609,594.86
	Total GHG emissions	768,622.00
Carbon Footprint	Carbon footprint	604.71
GHG Intensity of investee companies	GHG intensity of investee companies	1,002.52
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.05%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	84.57%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.10
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	18.46%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	138,690.25	114,939.99
	Scope 2 GHG emissions	54,162.54	49,764.07
	Scope 3 GHG emissions	607,374.74	609,594.86
	Total GHG emissions	800,294.78	768,622.00
Carbon Footprint	Carbon footprint	638.21	604.71
GHG Intensity of investee companies	GHG intensity of investee companies	1,277.20	1,002.52
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.30%	11.05%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	90.41%	84.57%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.61	1.10
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	1.31%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	16.23%	18.46%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Security Description	Sector	% Asset	Country
TAIWAN SEMICONDUCTOR MANUFACTURING	Information Technology	7.74%	Taiwan (Republic of China)
SAMSUNG ELECTRONICS LTD	Information Technology	5.46%	Korea (South), Republic of
TENCENT HOLDINGS LTD	Communication	4.06%	China
ISHARES MSCI SAUDI ARABIA CAPPED U	ETFs	3.43%	Ireland
RELIANCE INDUSTRIES LTD	Energy	2.51%	India
ALIBABA GROUP HOLDING ADR REPRESENTEN	Consumer Discretionary	2.48%	China
ICICI BANK LTD	Financials	2.45%	India
INFOSYS LTD	Information Technology	1.79%	India

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

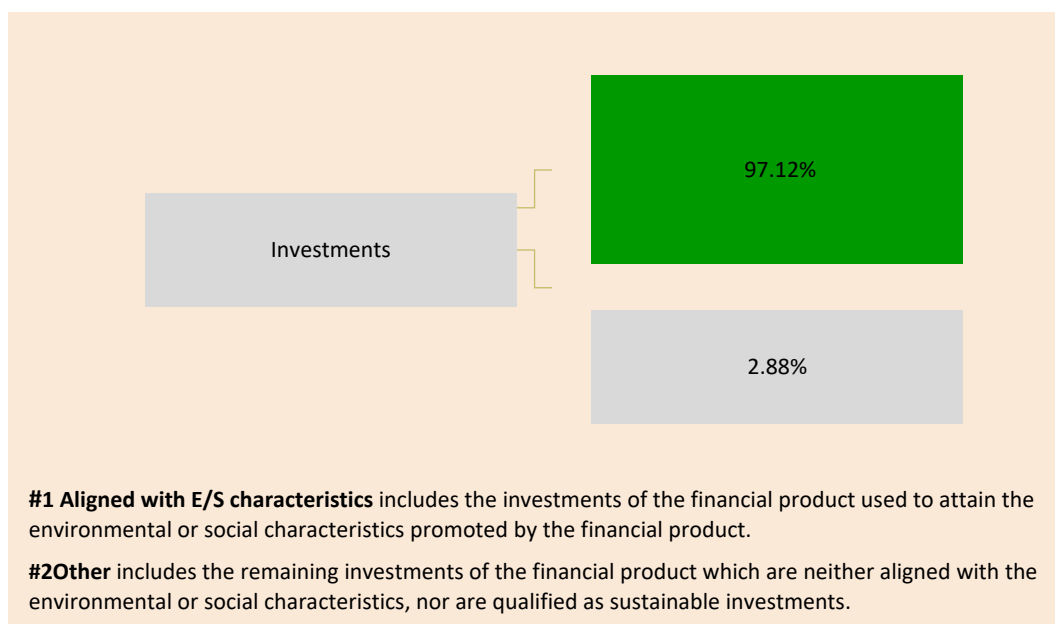

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

CHINA CONSTRUCTION BANK CORP H	Financials	1.72%	China
HYUNDAI MOTOR	Consumer Discretionary	1.62%	Korea (South), Republic of
ITAU UNIBANCO HOLDING PREF SA	Financials	1.51%	Brazil
MEDIATEK INC	Information Technology	1.44%	Taiwan (Republic of China)
HDFC BANK LTD	Financials	1.37%	India
BANK RAKYAT INDONESIA (PERSERO)	Financials	1.35%	Indonesia
HON HAI PRECISION INDUSTRY LTD	Information Technology	1.19%	Taiwan (Republic of China)

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	% Proportion
Information Technology	22.28%
Financials	21.22%
Consumer Discretionary	12.55%
Communication	9.93%
Materials	7.21%
Energy	5.74%
Industrials	5.15%
ETFs	3.43%
Consumer Staples	3.33%
Cash Securities	2.88%
Real Estate	2.39%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Utilities	2.19%
Health Care	1.70%

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

#### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

**How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- **How does the reference benchmark differ from a broad market index?**  
Not Applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
Not Applicable.
- **How did this financial product perform compared with the reference benchmark?**  
Not Applicable.
- **How did this financial product perform compared with the broad market index?**  
Not Applicable.

ANNEX IV

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Emerging Markets Equity Unconstrained Fund  
**Legal entity identifier:** 549300WP5K20FSXRG005

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: grey;">●●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ____% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ____%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme (the "Programme") which will require 30 companies regarded as 'systemically important carbon emitters' to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world's carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm's equity and debt exposures.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	17,745.81
	Scope 2 GHG emissions	5,628.90
	Scope 3 GHG emissions	59,088.68
	Total GHG emissions	81,971.31
Carbon Footprint	Carbon footprint	507.74
GHG Intensity of investee companies	GHG intensity of investee companies	959.18
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.67%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	86.04%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.99
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.61%
Board Gender Diversity	Average ratio of female to male board members in investee companies	18.60%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and

reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023

	Scope 2 GHG emissions	6,434.64	5,628.90
	Scope 3 GHG emissions	61,079.80	59,088.68
	Total GHG emissions	89,692.66	81,971.31
Carbon Footprint	Carbon footprint	615.75	507.74
GHG Intensity of investee companies	GHG intensity of investee companies	1,365.15	959.18
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	13.20%	11.67%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	89.77%	86.04%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.71	0.99
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	1.70%	0.61%
Board Gender Diversity	Average ratio of female to male board members in investee companies	17.01%	18.60%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

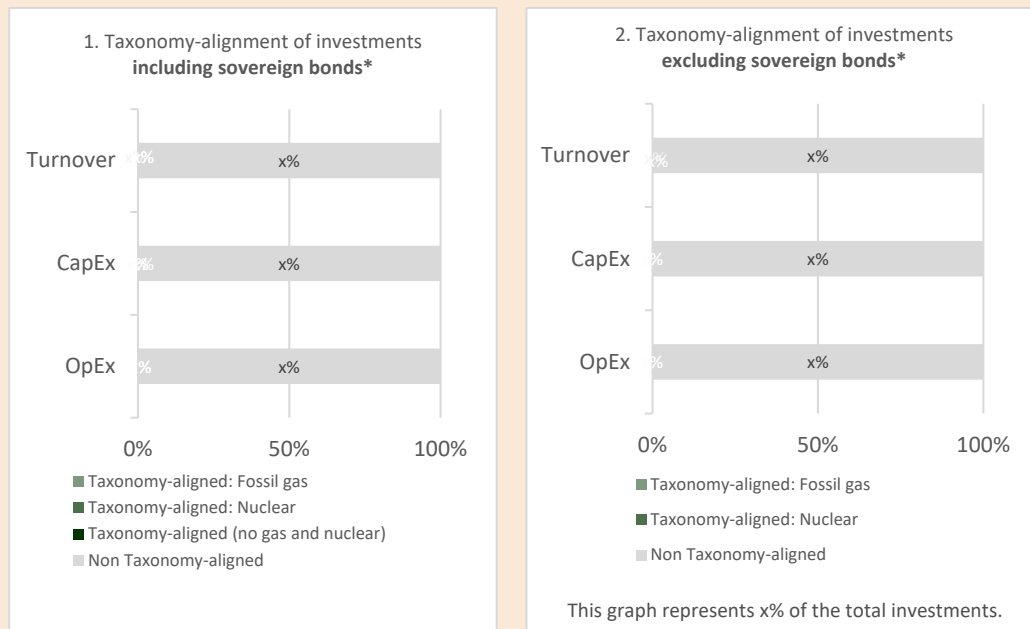

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

..... companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aviva Investors – Global Equity Endurance Fund Legal entity identifier: 549300UY3TDNW0Y6U652

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul> <input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

- A. The Investment Manager’s ESG Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme (the “Programme”) which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	834.45
	Scope 2 GHG emissions	952.57
	Scope 3 GHG emissions	41,858.46
	Total GHG emissions	42,917.57
Carbon Footprint	Carbon footprint	51.25
GHG Intensity of investee companies	GHG intensity of investee companies	194.57
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	2.44%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	59.14%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.06
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	35.94%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	512.78	834.45
	Scope 2 GHG emissions	766.25	952.57
	Scope 3 GHG emissions	30,771.61	41,858.46
	Total GHG emissions	31,994.75	42,917.57
Carbon Footprint	Carbon footprint	50.12	51.25
GHG Intensity of investee companies	GHG intensity of investee companies	219.2	194.57
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	2.51%	2.44%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	61.40%	59.14%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.07	0.06
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	35.63%	35.94%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

How were the indicators for adverse impacts on sustainability factors taken into account?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
ALPHABET INC CLASS C	Communication	6.13%	United States
UNITEDHEALTH GROUP INC	Health Care	5.83%	United States
VISA INC CLASS A	Financials	5.40%	United States
MASTERCARD INC CLASS A	Financials	4.63%	United States
ELEVANCE HEALTH INC	Health Care	4.56%	United States

**Asset allocation** describes the share of investments in specific assets.

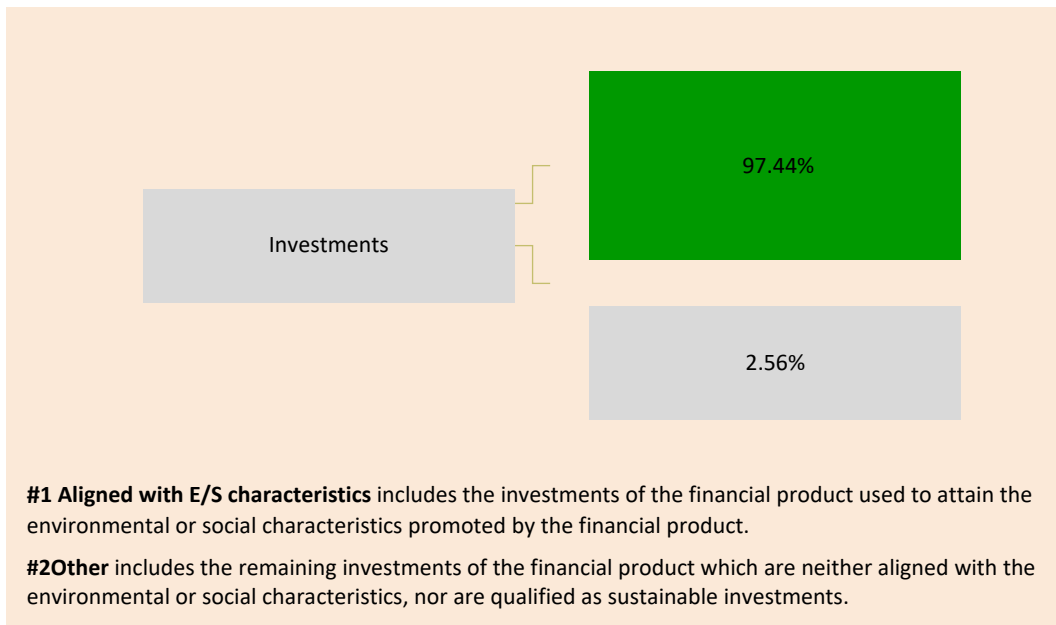

LONDON STOCK EXCHANGE GROUP PLC	Financials	4.39%	United Kingdom
MICROSOFT CORP	Information Technology	4.17%	United States
RENTOKIL INITIAL PLC	Industrials	3.77%	United Kingdom
MARSH & MCLENNAN INC	Financials	3.69%	United States
THERMO FISHER SCIENTIFIC INC	Health Care	3.64%	United States
FAIR ISAAC CORP	Information Technology	3.63%	United States
EQUIFAX INC	Industrials	3.38%	United States
S&P GLOBAL INC	Financials	3.17%	United States
ADOBE INC	Information Technology	3.08%	United States
AMERICAN TOWER REIT CORP	Real Estate	2.96%	United States

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

#### ● What was the asset allocation?

#### ● In which economic sectors were the investments made?

Sector	% Proportion
Financials	32.44%
Industrials	18.69%
Health Care	16.66%
Information Technology	13.08%
Communication	6.38%
Consumer Discretionary	4.80%
Real Estate	2.96%
Cash Securities	2.56%

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

### How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***  
Not Applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not Applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not Applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not Applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aviva Investors – Global High Yield Bond Fund

Legal entity identifier: 6YIQK8L8Y5ACSM7N4R36

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.:

A. The Investment Manager’s ESG Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme (the “Programme”) which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good

governance indicators form a substantial component of the Investment Manager's ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	227,933.44
	Scope 2 GHG emissions	42,242.46
	Scope 3 GHG emissions	1,680,037.75
	Total GHG emissions	1,911,386.44
Carbon Footprint	Carbon footprint	544.03
GHG Intensity of investee companies	GHG intensity of investee companies	1,306.58
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.47%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	74.67%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.99
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.07%
Board Gender Diversity	Average ratio of female to male board members in investee companies	29.32%

#### **AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	237,459.72	227,933.44
	Scope 2 GHG emissions	51,560.14	42,242.46
	Scope 3 GHG emissions	1,882,286.74	1,680,037.75
	Total GHG emissions	2,160,928.27	1,911,386.44
Carbon Footprint	Carbon footprint	667.54	544.03
GHG Intensity of investee companies	GHG intensity of investee companies	1,667.48	1,306.58
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.63%	9.47%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	80.45%	74.67%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	2.73	1.99
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.07%
Board Gender Diversity	Average ratio of female to male board members in investee companies	26.75%	29.32%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
Communication	16.50%
Consumer Discretionary	16.10%
Financials	15.04%
Industrials	14.45%
Materials	9.27%
Energy	7.85%
Health Care	5.69%
Consumer Staples	3.58%
Utilities	3.33%
Cash Securities	3.02%
Information Technology	2.71%
Real Estate	2.23%
FI Securities	0.63%
FX	-0.39%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

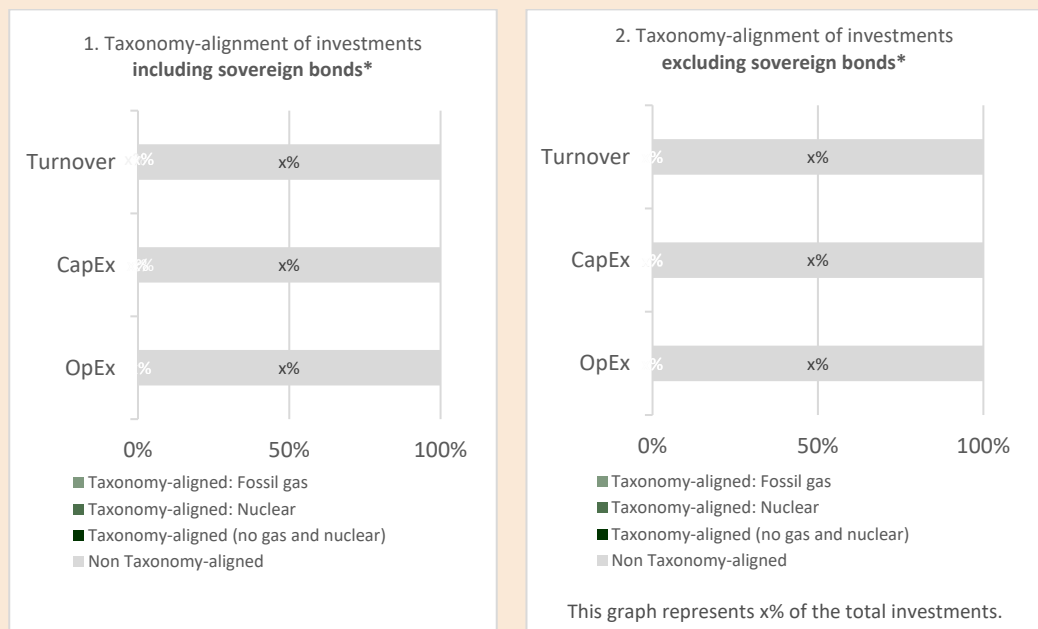

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### **What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Investment Grade Corporate Bond Fund  
**Legal entity identifier:** 549300XKOU4KF9BTSA87

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund’s benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	186,968.80
	Scope 2 GHG emissions	33,897.60
	Scope 3 GHG emissions	1,816,696.10
	Total GHG emissions	2,039,150.14
Carbon Footprint	Carbon footprint	477.27
GHG Intensity of investee companies	GHG intensity of investee companies	970.81
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	14.12%

Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	60.54%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.73
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	34.60%
GHG intensity	GHG intensity of investee countries	412.33
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	0.40%
	Scores above 6	8.79%

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

#### ● ...and compared to previous periods?

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

## What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

FX	-0.39%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

**Asset allocation** describes the share of investments in specific assets.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### **What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Global Sovereign Bond Fund  
**Legal entity identifier:** ZYBR0GI2DCOB4RV8NO37

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund's benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund's investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager's proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager's in-house ESG specialists. The ESG Sovereign Monitor's quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund's investment universe in order to mitigate the Investment Manager's judgement of sustainability risks and falling below the Investment Manager's minimum standard.

More information on the Investment Manager's proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as 'systemically important carbon emitters' to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world's carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm's equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager's ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager's ESG scoring tools and ESG research.

### ● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
GHG intensity	GHG intensity of investee countries	353.45
ESG Sovereign Monitor	Scores below 4	0.00%
	Score between 4 and 6	9.97%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.00%	0.00%
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
GHG intensity	GHG intensity of investee countries	373.15	353.45
ESG Sovereign Monitor	Scores below 4	0.00%	0.00%
	Score between 4 and 6	10.06%	9.97%
	Scores above 6	80.37%	81.59%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

## What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
TREASURY NOTE	FI Securities	18.94%	United States
CHINA PEOPLES REPUBLIC OF (GOVERNMENT BOND)	Real Estate	7.32%	China
TREASURY BOND	FI Securities	6.92%	United States
UK CONV GILT RegS	FI Securities	3.60%	United Kingdom
SPAIN (KINGDOM OF) 144A	Financials	3.13%	Spain
ITALY (REPUBLIC OF) RegS	Financials	2.94%	Italy
FRANCE (REPUBLIC OF) RegS	FI Securities	2.82%	France
GERMANY (FEDERAL REPUBLIC OF) RegS	FI Securities	2.70%	Germany
JAPAN (2 YEAR ISSUE)	FI Securities	2.42%	Japan
CANADA (GOVERNMENT OF)	FI Securities	2.24%	Canada
TREASURY (CPI) NOTE	FI Securities	1.79%	United States
UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND RegS	FI Securities	1.75%	United Kingdom
US TREASURY N/B	FI Securities	1.64%	United States
SPAIN (KINGDOM OF) RegS	Financials	1.58%	Spain
AUSTRALIA (COMMONWEALTH OF) RegS	FI Securities	1.18%	Australia

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

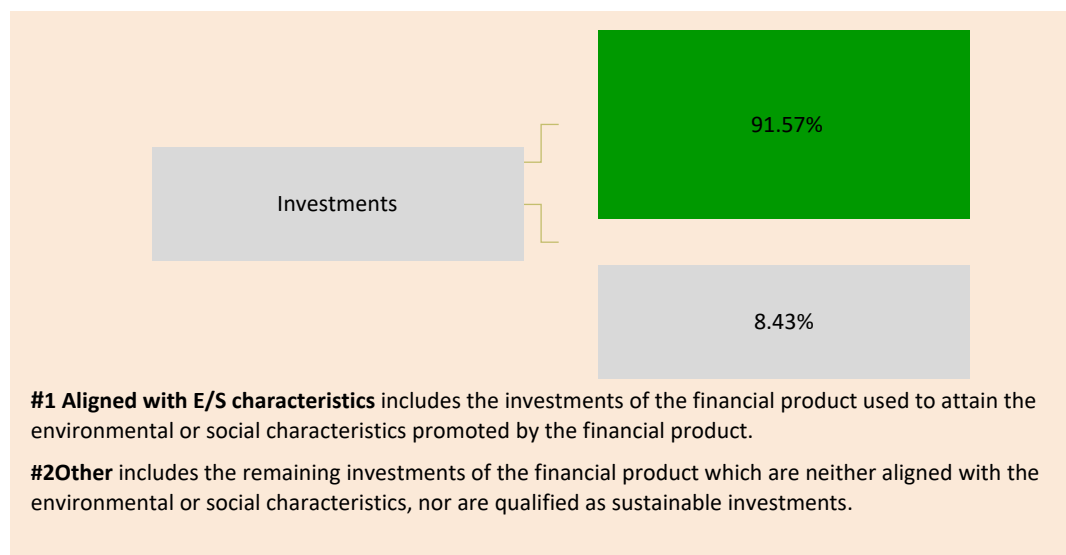

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **In which economic sectors were the investments made?**

Sector	Proportion (%)
FI Securities	71.92%
Financials	11.72%
Real Estate	7.94%
Cash Securities	7.11%
Non-Spendable Cash	0.72%
FX	0.64%
Futures	0.00%
Other	-0.05%

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

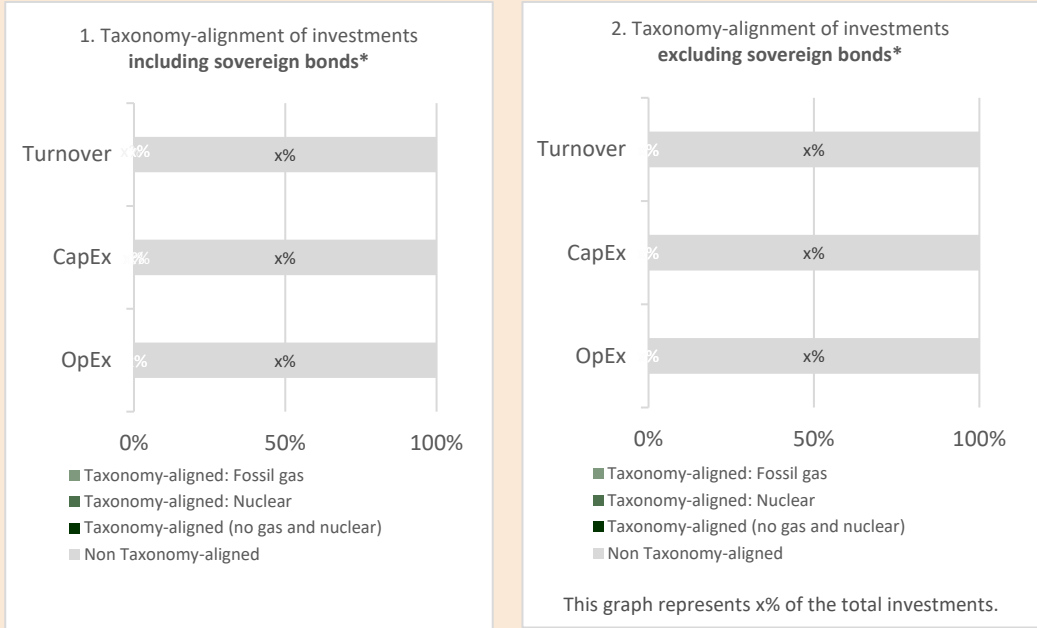

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### What was the share of socially sustainable investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

### How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

#### ● **How does the reference benchmark differ from a broad market index?**

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Multi-Strategy Target Return Fund  
**Legal entity identifier:** 549300LVG2Y9VF6GWX06

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

<span style="color: green;">●●</span> <input type="checkbox"/> <b>Yes</b>	<span style="color: grey;">●</span> <input checked="" type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> ___% <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It promoted <b>Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The ESG analysis and considerations described below are incorporated into the investment process but may not always have a material impact on investments in the Sub-Fund. For detailed information on the impact of the ESG analysis on the Sub-Fund’s benchmark at a point in time, please see refer to the Fund impact assessment matrix available on the website [EU Sustainable Finance Disclosure Regulation \(SFDR\) - Aviva Investors](#).

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The below criteria are binding elements on the investment process to ensure underlying investments are inclusive of securities promoting environmental or social characteristics.

The exclusions detailed below will be applied to this universe:

A. The Investment Manager's ESG Baseline Exclusions Policy which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI's controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. ESG Sovereign Assessment on the sustainability characteristics of sovereign issuers and minimum thresholds applied across sovereign issuers based on the Investment Manager's proprietary ESG scores.

A minimum threshold ESG score for sovereigns at 2.5 is applied to the investment universe, with the aim of screening out those with the worst ESG characteristics.

The scores are derived from the Investment Manager's proprietary ESG Sovereign Monitor. For issuers scoring between 2.5 and 4 an enhanced due diligence process will operate whereby such issuers will need to pass a

further qualitative assessment to be included in the sub-fund. The considerations for these lower scoring issuers, include but are not limited to, having a positive sustainable GDP gap, or where the ESG analyst considers the data is outdated, inaccurate or incomplete.

The Investment Manager believes providing debt financing to sovereigns supports the pivotal role they play in the transition to a more sustainable future. The Investment Manager also recognises associated sustainability risks. Effective state governance reduces those risks but, where appropriate, sovereigns are excluded from the Sub-Fund’s investment universe, subject to exceptions that mitigate unintended consequences and data limitations.

Assessments are made using: the Investment Manager’s proprietary sovereign ESG model (which assigns ratings on a scale of 0 to 10 where sufficient information is available) as a starting point, external data, and qualitative judgements from the Investment Manager’s in-house ESG specialists. The ESG Sovereign Monitor’s quantitative scoring approach assigns a composite ESG score to over 170 countries. These scores are derived from over 400 individual data points, which form 11 composite indicators.

Following a considered review of these ESG research insights, a decision may be taken to exclude a sovereign issuer from the Sub-Fund’s investment universe in order to mitigate the Investment Manager’s judgement of sustainability risks and falling below the Investment Manager’s minimum standard.

More information on the Investment Manager’s proprietary sovereign ESG model and the rating methodology can be found on the website: <http://www.avivainvestors.com/en-lu/about/responsible-investment/>

C. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

D. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. For sovereigns, good governance will be covered through the ESG assessment and minimum Sovereign monitor scores. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

<b>Adverse sustainability indicator</b>	<b>Metric</b>	<b>Annual Average</b>
GHG Emissions	Scope 1 GHG emissions	20,295.68
	Scope 2 GHG emissions	3,209.99
	Scope 3 GHG emissions	151,693.30
	Total GHG emissions	172,833.25
Carbon Footprint	Carbon footprint	229.11

GHG Intensity of investee companies	GHG intensity of investee companies	822.32
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	2.61%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	72.61%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.19
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	24.95%
GHG intensity	GHG intensity of investee countries	933.14

	Score between 4 and 6	0.00%
	Scores above 6	0.00%

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

#### ● ...and compared to previous periods?

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	9,364.69	20,295.68
	Scope 2 GHG emissions	1,647.14	3,209.99
	Scope 3 GHG emissions	138,727.41	151,693.30
	Total GHG emissions	150,328.68	172,833.25
Carbon Footprint	Carbon footprint	168.47	229.11

GHG Intensity of investee companies	GHG intensity of investee companies	1,094.81	822.32
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	4.02%	2.61%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	87.24%	72.61%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.24	0.19

	Scores above 6	0.00%	0.00%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Assets	Country
QATAR NATIONAL BANK QPSC EURO	Cash Securities	12.28%	Qatar
SMBC BANK INTERNATIONAL PLC EURO	Cash Securities	11.05%	United Kingdom
LANDESBANK BADEN-WUERTTEMBERG EURO	Cash Securities	8.20%	Germany
MANAGED AND ENHANCED TAP MAGENTA F	Cash Securities	4.81%	France
MITSUBISHI UFJ TRUST AND BANKING C	Cash Securities	3.30%	Japan
LMA SA	Cash Securities	3.04%	France
SUMITOMO MITSUI BANKING CORP (BRUS)	Cash Securities	3.04%	Japan
DERIV USD BALANCE WITH R73222 ICEE	Cash Securities	2.96%	United States

WT COPPER	Financials	2.06%	Jersey, Channel Islands
COLLATERALIZED CP III CO LLC	Cash Securities	2.00%	United States
FUTURES EUR MARGIN BALANCE	Cash Securities	1.70%	European Union
GOLDMAN SACHS INTERNATIONAL BANK	Cash Securities	1.51%	United States
HONEYWELL INTERNATIONAL INC	Cash Securities	1.51%	United States
JYSKE BANK A/S	Cash Securities	1.45%	Denmark

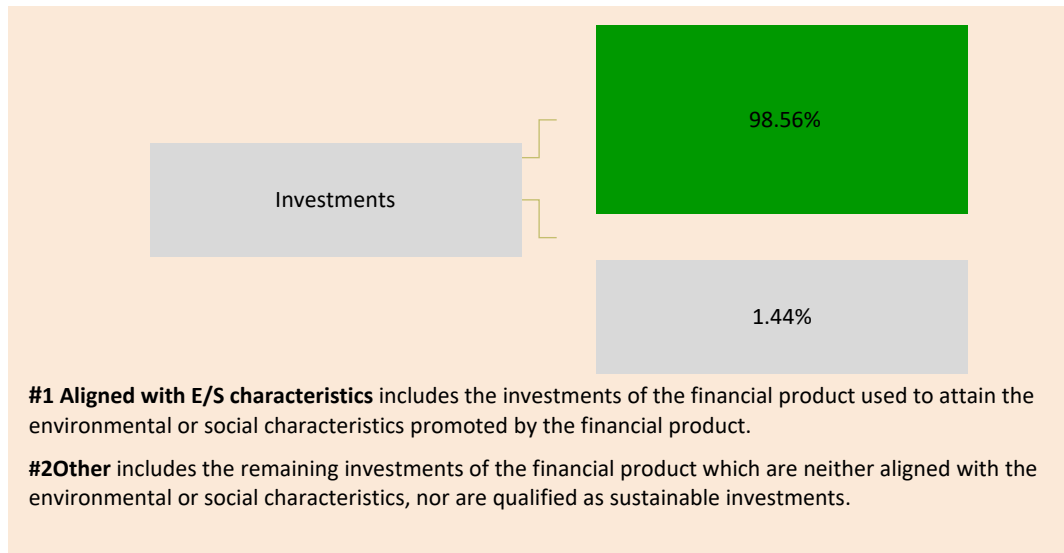

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

## What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

## What was the asset allocation?

## In which economic sectors were the investments made?

Sector	Proportion (%)
Cash Securities	73.25%
Mutual Funds / Unit Investment Trust	13.22%
Non-Spendable Cash	3.94%
Financials	3.37%
Industrials	2.98%
Other	0.94%
Materials	0.82%
Equity Options / Warrants	0.54%
Consumer Discretionary	0.39%
Energy	0.25%

**Asset allocation** describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Utilities	0.11%
Consumer Staples	0.07%
FX	0.05%
Health Care	0.03%
Communication	0.01%

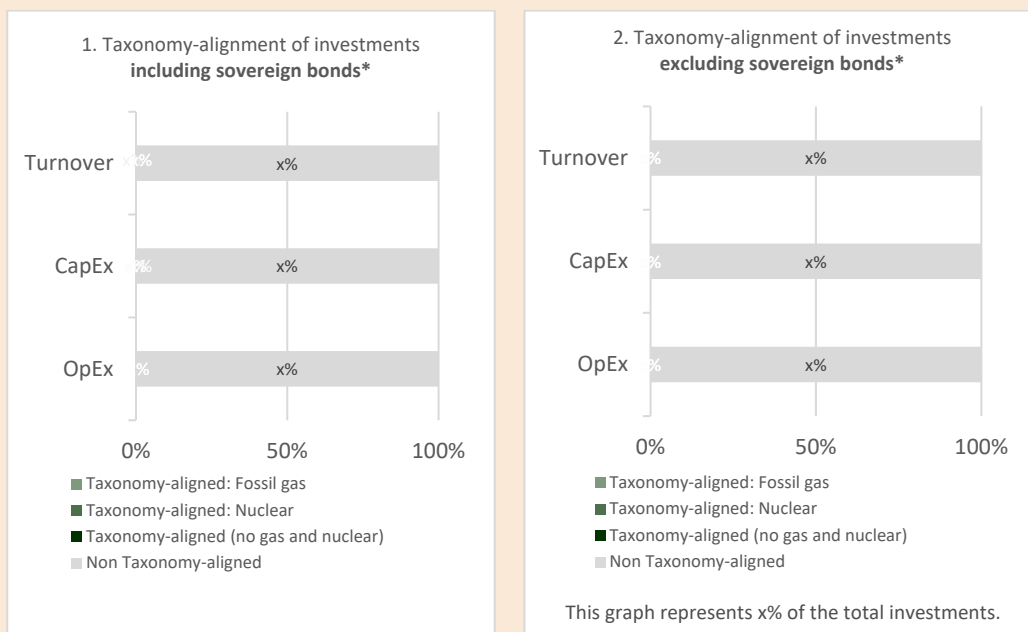

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world's 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic "value chain" approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

### **How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Aviva Investors – Natural Capital Transition Global Equity Fund

Legal entity identifier: 549300JGN73VMRYW3O92

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: 90%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Natural Capital Transition Global Equity Fund (the “Sub-Fund”) is part of Aviva Investors Sustainable Transition range which aims to support three key sustainable outcomes – relating to People, Climate and Earth (or Natural Capital) – closely aligned to the UN Sustainable Development Goals (“SDGs”). Each fund in the range follows a common investment philosophy to avoid significant harm, invest in solutions and back transition aligned to its particular theme.

This Sub-Fund focusses on “Natural Capital” which is a term used to describe the world’s stocks of natural assets, including all living things, soil, air, water and geology (primarily aligned to the principles of SDGs: 12 Responsible Consumption and Production, 13 Climate Action, 14 Life Below Water and 15 Life on Land).

Alongside aiming to generate long-term capital growth the Sub-Fund's sustainable investment objective is that it aims to support the transition towards a nature positive economy, by investing in equities of companies that are providing solutions to reduce human impact on nature or transitioning their business models towards a more nature positive economy, and by engaging with portfolio companies.

A nature positive economy is one where the loss of nature and biodiversity is reversed so that the health, abundance, diversity and resilience of species and ecosystems recover and improve.

Companies can support the transition by reducing the water, waste, emissions, resource and energy use, and wider biodiversity impacts, of their operations, their products and their supply chain; by providing solutions to reduce human impact on nature; and by contributing to the restoration of key ecosystems.

The Sub-Fund invests in "sustainable investments" that contribute to the Sub-Fund's objective, either through the company's products or services ("solutions" companies) or via the company's operations ("transition" companies).

### **Invest in solutions**

The Sub-Fund invests in "solutions" companies providing goods and services that reduce human impact on nature. It invests across four principal themes aligned with the principle of the UN Sustainable Development Goals:

- i. Sustainable land
- ii. Sustainable ocean
- iii. Circular economy
- iv. The fight against climate change

By investing in "solutions" companies in line with these four themes, these sustainable investments directly contribute towards the sub-fund's sustainable investment objective. Companies will be eligible for investment if they derive at least 20% of their revenue aligned with the themes set out above. The Sub-Fund is also permitted to invest up to 10% of the portfolio in solutions companies with less than 20% revenue. This is in recognition of the fact that nature-based solutions are in their relative infancy, and there is a need to allocate capital to those companies producing new, important and innovative solutions to tackle the environmental crisis. For clarity, these companies will still be subject to the same Do No Significant Harm, Good Governance and Minimum Safeguards tests.

The Investment Manager has therefore chosen 20% threshold of revenues based on the sustainable products and services used to select "Solutions" companies in order:

- To reflect that absolute contribution to sustainable activities requires scalable solutions and therefore to not penalise large companies with diverse product/revenue streams but who do provide genuine solutions to sustainable activities
- It is a threshold the Investment Manager believes to demonstrate significant part of any companies revenues (i.e. it is "material" to those companies business strategy)

### **Back transition**

Aviva Investors believes that the three greatest sustainability challenges of our time are climate change, biodiversity loss and social inequality and that all companies, regardless of sector and geography, have an impact on and are impacted by these immensely complicated and challenging issues. As such, all companies need to change the way they operate if we are going to achieve a sustainable future for both people and planet aligned with our sustainable investment objectives (together, a more socially equitable, nature positive and net zero economy that is also more resilient to higher temperatures). This "transition" of all companies is one of the most important sustainability objectives that must be achieved.

The market needs to allocate capital to those companies leading the transition to a sustainable future in terms of how they operate, not just those providing solutions to the challenges mentioned above through their

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

products and services. In doing so, we are rewarding and backing those companies that are leading their sectors which can have a powerful knock-on effect by raising industry standards and encouraging others to improve.

The Sub-Fund invests in “transition” companies that are demonstrating leadership in the transition towards a nature positive economy by reducing their negative impacts on natural capital through their operations.

Transition companies are identified using a proprietary Transition Risk (“T-Risk”) framework. For each sector, there is a tailored range of natural capital-related indicators, which differ by sector depending on the nature of that sector’s impacts. A wide range of data sources are used, supplementing data from key research providers with an extensive range of NGO rankings on specific issues, for example deforestation, plastics and sustainable protein. This is supplemented by qualitative research to determine the most appropriate transition candidates that are contributing to the sustainable investment objective.

The Sub-Fund has a bespoke engagement programme linked to the sustainable investment objective. All companies held in the Sub-Fund are asked to carry out a biodiversity impact assessment, set quantified biodiversity targets within a specific timeframe and improve performance in a particular area of weakness related to biodiversity as identified by the team. If achieved, these asks will result in companies reducing their negative impacts on natural capital, thus supporting the transition towards a nature positive economy.

The Investment Manager will conduct an annual assessment of each company’s progress on the engagement programme, scoring them in one of five categories. Where there is insufficient progress, escalating action will be taken, which may ultimately lead to divestment from those companies that fail to meet minimum expectations.

No reference benchmark has been designated for the purposes of meeting the sustainable investment objective.

### ● **How did the sustainability indicators perform?**

The Investment Manager will measure and report a suite of metrics across the following three areas:

#### 1. Capital allocation

The Investment Manager will measure and report on various indicators aligning to its philosophy to avoid significant harm, invest in solutions and back transition. The Investment Manager’s annual sustainability report will include, where possible:

- Solutions revenue
- Relevant PAI indicators:

#### 7. Activities negatively affecting biodiversity

#### 8. Emissions to water

#### 9. Hazardous waste ratio

- Other indicators:
  - o Environmental management scores
  - o Science Based Targets
  - o Biodiversity Policies
  - o CDP Climate Scores

#### 2. Active ownership

The Investment Manager systematically monitors progress against the asks within the Fund’s engagement programme by conducting an annual assessment of companies ranking in categories 1 to 5, with 1 being the leaders. Below is a breakdown of the portfolio into these 5 categories:

1. 2%
2. 17%
3. 15%
4. 39%
5. 27%

The Investment Manager has an escalation pathway that may lead to divestment if the engagement asks of the Fund's programme are not met. Aviva Investors does however acknowledge the challenges of implementing these asks and evaluates companies on their ability to demonstrate progress over time. 2022 was the first year of the programme and therefore there was no action taken by way of escalation against companies. Progress will be considered within 2023 AGM voting action now that companies have had some time to react to the requests, such as voting on special and ordinary resolutions. Aviva Investor's Global Voting Policy provides more details on its approach and perspectives on governance and sustainability best practice, and the Annual ESG Review provides more details on the Investment Manager's approach to escalation. These documents are available on the Aviva Investors website here: <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

### 3. Market reform

Aviva Investors' Sustainable Finance Centre for Excellence ("SFC4Ex") works in partnership with clients, policymakers and regulators, sharing knowledge and collaborating to build a sustainable future. The SFC4Ex supports attainment of the Sub-Fund's environmental characteristics by planning campaigns linked to the Sub-Fund's objective. The annual sustainability report will report on the SFC4Ex's activity.

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	570.51
	Scope 2 GHG emissions	262.14
	Scope 3 GHG emissions	4,609.17
	Total GHG emissions	5,242.26
Carbon Footprint	Carbon footprint	196.19
GHG Intensity of investee companies	GHG intensity of investee companies	589.85
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	3.67%
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	0.00
Hazardous waste ratio	Tonnes of hazardous waste generated by investee companies per million EUR invested, expressed as a weighted average	0.18
SBTi Targets Approved	Share of investments in companies that have approved SBTi Targets	57.99%
CDP Climate Score	Share of investments in companies that have a CDP climate score of A- or above	49.79%
Solutions Revenue	Share of investments in companies within the portfolio that have >20% revenue generated from solutions products	28.76%

Positive Contribution to natural capital	Capital Overall Contribution (Positive / Highly Positive)	67.35%
Biodiversity Policies	*Share of investments in companies that have biodiversity policies in place	22.54%
Environmental Management Score	1	51.59%
	2	28.57%
	3	15.50%
	4	4.34%

\* The biodiversity policy% is based on MSCI's Biodiversity Protection Policy and Deforestation Policy data.

#### AI Disclaimer:

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers

#### ● **...and compared to previous periods?**

Please note that there are no previous reference periods where the fund can report on performance against the relevant sustainability indicators, the fund transitioned to Article 9 in August 2023.

#### ● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that sustainable investments in the sub-fund do not cause significant harm to any environmental or social objective, there are two levels of screening applied:

1. Aviva Investors' ESG Baseline Exclusions Policy, which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b. MSCI's controversy screening data to identify recent controversies to the principles set out under the UN Global Compact. An AI ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If we consider failings to be redeemable we will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy is available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-anddocuments/>

2. Fund-level screening based on the indicators for principal adverse impacts ("PAI") on sustainability factors. Aviva Investors assesses an issuer's performance against each of the relevant indicators and the sub-fund will not invest where it is considered that an issuer is causing significant harm to an environmental or social objective. Relevant indicators include all the mandatory PAIs as well as those voluntary indicators selected at a firm-level that are relevant to the theme of the Sub-Fund. Please refer to the PAI Statement on Aviva Investors website for further detail here <https://www.avivainvestors.com/en-gb/capabilities/sustainable-finance-disclosure-regulation/>

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager has a proprietary framework for taking the PAI indicators into account, which differs depending on the type of indicator. Where applicable, the Investment Manager has assigned red flag to issuers which are considered to cause significant harm to an environmental or social objective. These issuers will be excluded from the investment universe for this Sub-Fund. Furthermore, due diligence will be carried out on every company by portfolio managers and ESG analysts. Where PAI data does not exist, the team will seek to qualitatively assess Do No Significant Harm on a best-efforts basis. This may include engaging directly with companies to ask them for the missing data.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager uses the MSCI overall controversy flag (where a “red” flag is considered a fail) to ensure that sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (“UNGPBHR”), including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation (“ILO”) on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The MSCI methodology covers violations of the OECD Guidelines, United Nations Global Compact Principles (“UNGC”), the ILO conventions and the UNGPBHR (which references the International Bill of Human Rights), amongst many other global norms and conventions. All issuers with a red flag will be excluded from the investment universe for this Sub-Fund.

## How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Biodiversity PAI 7 relating to activities negatively affecting biodiversity sensitive areas (exclusions relating to thermal coal and unconventional fossil fuels limit the share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas. Although this doesn’t place a limit on the fund potential exposure to investments negatively affecting biodiversity sensitive areas it does prevent a significant part of the mining sector impact being investible, the artic oil based exclusions being particularly relevant to the protection of the delicate arctic ecosystem
- Environmental PAI 8 relating to emissions to water
- Environmental PAI 9 relating to hazardous waste ratio

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

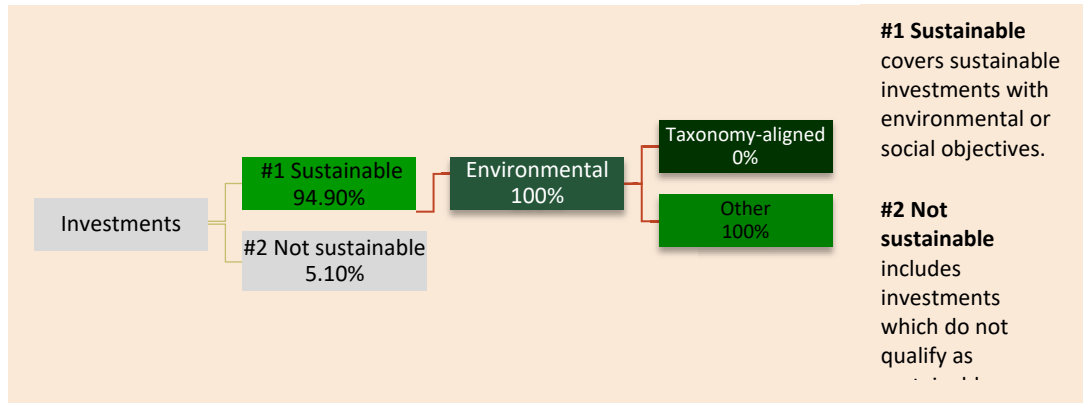

## What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	5.74%	United States

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
Industrials	18.36%
Information Technology	15.98%
Financials	15.27%
Health Care	14.56%
Materials	9.69%
Consumer Staples	6.97%
Consumer Discretionary	5.74%
Utilities	5.24%
Cash Securities	5.10%
Communication	3.09%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund's Sustainable Investments are not actively aligned with the EU Taxonomy. This means that the Sub-Fund's percentage of Taxonomy alignment is currently 0%.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

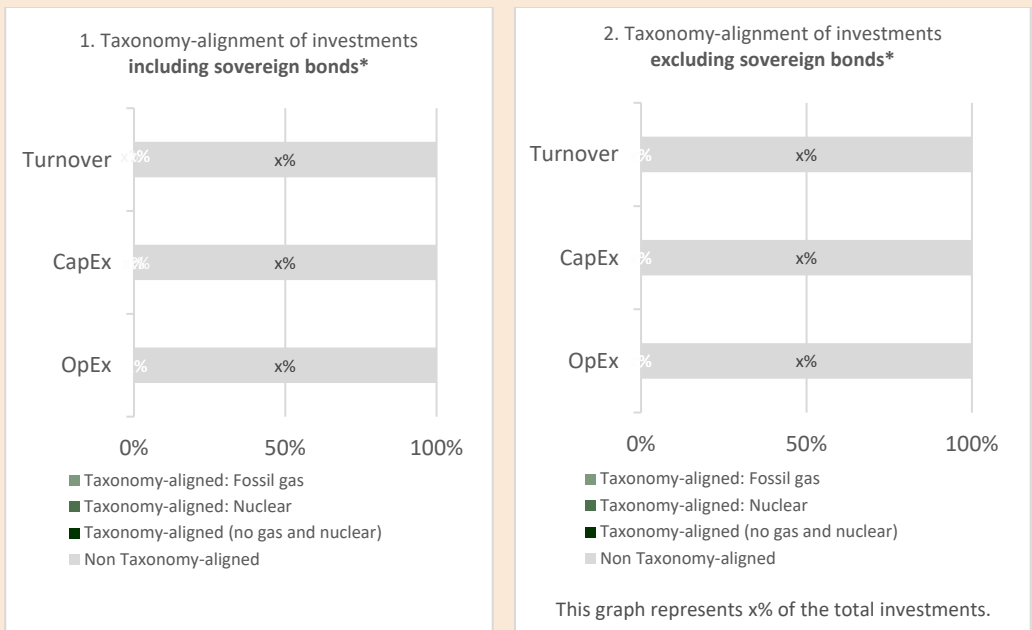

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A - Sustainable Investments are not actively aligned with the EU Taxonomy, thus the share of investments in transitional and enabling activities amounts to 0% of the Sub-Funds' portfolio.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Sub-Fund invests at least 90% of total net assets in equities and equity-related securities of companies from anywhere in the world (including emerging markets), except in limited circumstances as explained above. At the point the Sub-Fund makes an investment into such an asset, that asset will qualify as a

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Sustainable Investment. These investments have an environmental objective but are not actively targeting alignment with the EU Taxonomy.

At the date of this document, it is not yet possible to commit to the Sub-Funds' minimum alignment with the Taxonomy Regulation, as the Investment Manager is currently not in a position to accurately determine to what extent the Sub-Funds' investments are in taxonomy-aligned environmentally sustainable activities.

### **What was the share of socially sustainable investments?**

The Sub-Fund does not actively invest in sustainable investments with a social objective.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The Sub-Fund can invest 10% of total net assets in ancillary liquid assets, eligible deposits, money market instruments, money market funds and derivatives used for exposure to equity indices for managing cash flows, or in derivatives used for hedging. Exposure to equity indices would be for a limited amount of time and in limited circumstances to manage cash flows. Such assets would not be deemed as Sustainable Investments. Some but not all of the underlying constituents of the equity indices may nevertheless qualify as sustainable investments. The Sub-Fund may hold more than 10% of total net assets in such investments in limited circumstances, such as if there is a sudden and material subscription during a time of exceptional market conditions that does not allow immediate allocation to Sustainable Investments.

Given the nature of these investments and short-term use, it may not always be possible to apply minimum safeguards due to look through or liquidity. These assets do not affect the delivery of the sustainable investment objective on a continuous basis as they constitute a small proportion of the Sub-Fund's total net assets.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world's 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate

sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

## **Macro Stewardship Case Study**

Earth

### **Issue**

Biodiversity supports all life systems and economies; over half of global GDP is moderately or highly dependent on nature. However, biodiversity is declining faster than at any time in human history, as global wildlife populations have plummeted 69 per cent on average since 1970. Urgent intervention is required from governments, as further delays to action will double the cost from around eight per cent to 17 per cent of global GDP. The Kunming-Montreal Global Biodiversity Framework, agreed in December 2022, went a long way to kickstart the action needed. It included targets to end the loss of areas of high biodiversity importance and conserve, to restore 30 per cent of land and marine areas by 2030, and to align financial flows with the goals and targets of the framework. With such commitments comes the opportunity and responsibility to engage with policymakers and regulators to ensure the implementation of the targets into national policy frameworks, which will create the enabling environment needed to align finance with the protection and restoration of nature.

### **Action**

Throughout 2023, we engaged with international and domestic policymakers to strengthen the implementation of the Kunming-Montreal targets and goals and enhance corporate disclosures on biodiversity to improve the accessibility and quality of data available to investors, thereby helping to unlock finance for the achievement of global nature goals. Mark Versey, Aviva Investors CEO, wrote to the finance ministers and central banks of 49 countries to highlight our sustainability priorities in February, including the importance we put on actions to reverse nature loss. Of the three years we have sent the sovereign letters, 2023 saw the most responses and all responses committed to our priorities. We also fed into specific policy processes, including the Environmental Audit Committee’s call for evidence on the current and future role of natural capital in the green economy and on methods to attract private investment in nature recovery. In our response, we emphasised the importance of stopping existing financial flows from harming nature and exploring the role of sector-specific policy to reduce nature-harming finance, as well as the role of public funding and bodies to make natural capital projects easier to invest in, such as through the pooling of projects by the UK Infrastructure Bank.

### **Outcome**

Our macro stewardship work and engagement on biodiversity, nature loss, water and natural capital during 2023 strengthened the investor voice on these important topics in international and national forums. We look forward to continuing our Earth-related advocacy in 2024, with a particular focus on the continued implementation of the Global Biodiversity Framework ahead of COP16 later in the year.

## **Micro Stewardship Case Study**

Biodiversity

### **Issue**

The protection of wildlife and ecosystems is crucial to protecting our planet. Biodiverse ecosystems act as carbon sinks, with the world’s forests absorbing 16 billion metric tonnes of CO<sub>2</sub> per year. Around 25 per cent of our prescription medicine comes from rainforest plants. Most companies have their largest impact on

biodiversity via their supply chains, but cannot trace the origin of their raw materials or guarantee they are sustainably sourced.

#### **Action**

We engaged with Bureau Veritas on its work helping companies improve traceability and verification in their supply chains as one of our holdings in the NCTF. We met with the Vice President, the Head of Investor Relations and Financial Communications, and the Chief Sustainability Officer.

#### **Outcome**

The company disclosed intentions to conduct a biodiversity assessment and set related targets, as well as plans to increase its biodiversity-related offerings to clients. It is currently working with Lucie, a French company dedicated to biodiversity, to deliver a service called Biodiversity Progress to clients. We believe that sustainability certification should provide another leg of growth to the company's top-line acceleration story, considering rapidly growing demand from corporates to evidence traceability throughout their supply chain operations. Additionally, Bureau Veritas' submission of SBTs demonstrates its commitment to environmental sustainability, setting an example for other companies. We added to our position in Bureau Veritas on several occasions over the second half of 2023 as it has given us confidence in its determination to stay ahead of peers on the natural capital theme.

#### **Priorities**

As 2024 progresses, we aim to enhance disclosure standards for constituents of our fund. With the TNFD and SBTN guidance now in place, we expect them to provide more comprehensive information on their biodiversity impacts and dependencies. We will also be addressing underperforming companies in line with our robust sustainability standards, particularly those that have been held in the fund for over a year. We will continue to engage with the companies to ensure wider recognition of the critical role nature plays. Central to our efforts is the strategic integration of nature considerations within the corporate frameworks of the companies we hold.

As 2024 will mark the third and final year of most holdings' inclusion in NCEP, we intend to ramp up our voting and other escalation activity during the upcoming AGM season and beyond to demand greater progress from slow movers and to remind them of the risk of divestment if they fail to act.

### **How did this financial product perform compared to the reference sustainable benchmark?**

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

- ***How did the reference benchmark differ from a broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- ***How did this financial product perform compared with the reference benchmark?***

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

● ***How did this financial product perform compared with the broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Aviva Investors – Short Duration Global High Yield Bond Fund  
**Legal entity identifier:** 54930045V17H84B2VW88

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective:** \_\_\_%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.:

- A. The Investment Manager’s ESG Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviors since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme (the “Programme”) which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy noted above) and a qualitative assessment as part of the investment analyst research process. Good

governance indicators form a substantial component of the Investment Manager's ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	16,962.23
	Scope 2 GHG emissions	3,956.09
	Scope 3 GHG emissions	121,431.55
	Total GHG emissions	139,611.63
Carbon Footprint	Carbon footprint	460.14
GHG Intensity of investee companies	GHG intensity of investee companies	1,123.62
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.19%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	75.30%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	2.19
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	30.10%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company's value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	23,384.58	16,962.23
	Scope 2 GHG emissions	5,039.56	3,956.09
	Scope 3 GHG emissions	150,600.49	121,431.55
	Total GHG emissions	179,586.60	139,611.63
Carbon Footprint	Carbon footprint	506.19	460.14
GHG Intensity of investee companies	GHG intensity of investee companies	1,264.79	1,123.62
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.24%	9.19%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	83.63%	75.30%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	1.82	2.19
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	27.77%	30.10%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

**What were the top investments of this financial product?**

<b>Largest Investment</b>	<b>Sector</b>	<b>% Assets</b>	<b>Country</b>
BANCO BPM SPA MTN RegS	Financials	1.58%	Italy

The list includes the To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

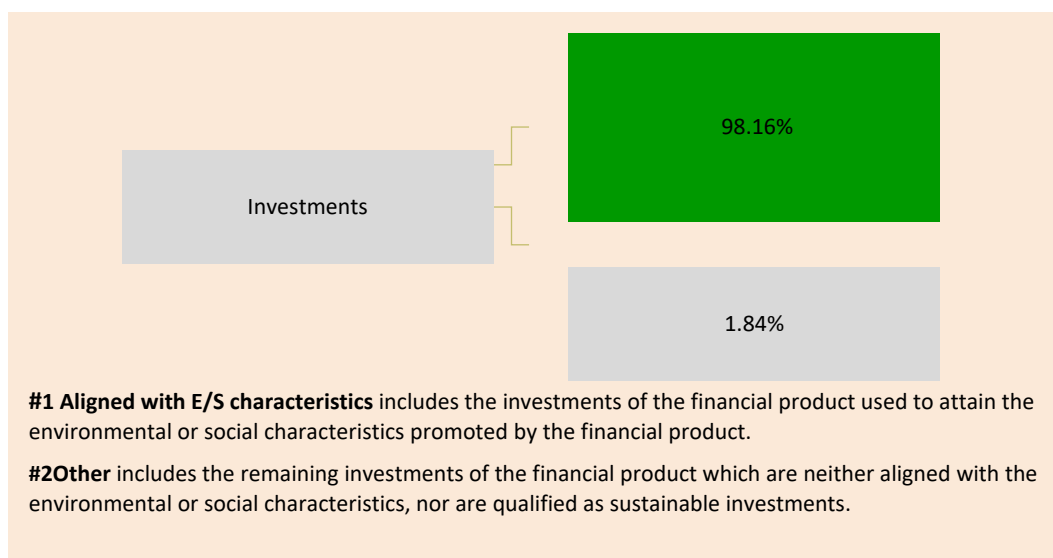

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation?

### ● In which economic sectors were the investments made?

Sector	Proportion (%)
Consumer Discretionary	18.27%
Financials	16.03%
Communication	14.49%
Industrials	13.84%
Materials	11.51%
Energy	5.96%
Health Care	4.36%
Information Technology	4.12%
Real Estate	3.64%
Consumer Staples	3.10%
Utilities	2.80%
Cash Securities	2.37%
FX	-0.53%
FI Securities	0.05%

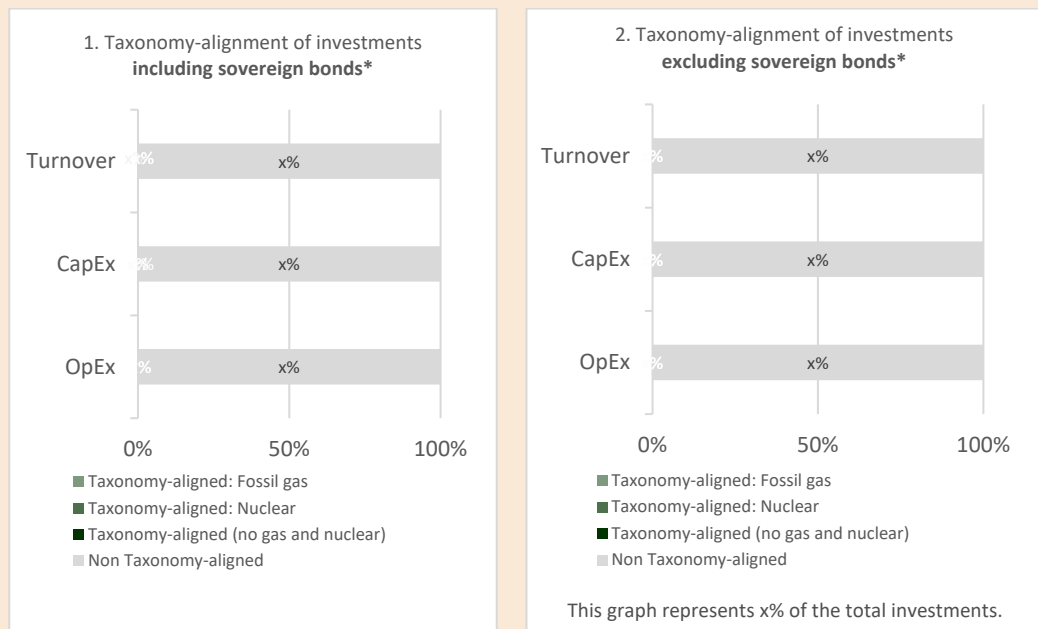

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments defined under SFDR and does not commit to making investments aligned to the EU taxonomy. As a result, this is not applicable.

### **What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world’s 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic “value chain” approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** Aviva Investors – Social Transition Global Equity Fund

**Legal entity identifier:** 549300QBFBTBNCT2J16

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> <b>Yes</b>	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: %</b> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> with a social objective</li> </ul>
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 90%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Social Transition Global Equity Fund (the “Sub-Fund”) is part of Aviva Investors Sustainable Transition range which aims to support three key sustainable outcomes – relating to People, Climate and Earth (or Natural Capital) – closely aligned to the UN Sustainable Development Goals (“SDGs”). Each fund in the range follows a common investment philosophy to avoid significant harm, invest in solutions and back transition aligned to its particular theme.

This Sub-Fund focusses on “People” (primarily aligned to the principles of SDGs: 1 No Poverty, 3 Good Health and Well-Being, 4 Quality Education, 5 Gender Equality, 6 Clean Water and Sanitation, 8 Decent Work and Economic Growth and 10 Reduced Inequalities).

Alongside aiming to generate long-term capital growth the Sub-Fund's sustainable investment objective is that it aims to support the transition towards a more socially equitable economy, by investing in global equities of companies that are either providing solutions to tackle social inequality or transitioning their business models towards a more socially equitable economy, and by engaging with portfolio companies.

A more socially equitable economy is one where there is universal respect for human rights and access to essential resources and services, so that people can live dignified and healthy lives.

Companies can support the transition by respecting human rights, providing decent work, acting as responsible corporate citizens and by providing access to education, health and finance to underserved stakeholder groups.

The Sub-Fund invests in "sustainable investments" that contribute to the Sub-Fund's objective, either through the company's products or services ("solutions" companies) or via the company's operations ("transition" companies).

### **Invest in solutions**

The Sub-Fund invests in "solutions" companies providing goods and services that tackle social inequality. It invests across three principal themes which are social needs relating to rights as set out in the International Bill of Rights, which are linked to the UN Sustainable Development Goals:

- i. Access to education
- ii. Access to health
- iii. Access to finance

By investing in "solutions" companies that meet one of these three social needs, these sustainable investments directly contribute towards the sub-fund's sustainable investment objective. Companies will be eligible for investment if they derive at least 20% of their revenue aligned with the themes set out above. The Sub-Fund is also permitted to invest up to 10% of the portfolio in solutions companies with less than 20% revenue from such themes where the Investment Manager believes those companies are developing or producing important and innovative solutions, or emerging technologies aligned to the themes above.

The Investment Manager has therefore chosen 20% threshold of revenues based on the sustainable products and services used to select "Solutions" companies in order:

- To reflect that absolute contribution to sustainable activities requires scalable solutions and therefore to not penalise large companies with diverse product/revenue streams but who do provide genuine solutions to sustainable activities
- It is a threshold the Investment Manager believes to demonstrate significant part of any companies revenues (i.e. it is "material" to those companies business strategy)

### **Back transition**

Aviva Investors believes the three greatest sustainability challenges of our time are climate change, biodiversity loss and social inequality and that all companies, regardless of sector and geography, have an impact on and are impacted by these immensely complicated and challenging issues. As such, all companies need to change the way they operate if we are going to achieve a sustainable future for both people and planet aligned with Aviva Investors sustainable investment objectives (together, a more socially equitable, nature positive and net zero economy that is also more resilient to higher temperatures). This "transition" of all companies is one of the most important sustainability objectives that must be achieved.

Aviva Investors therefore believe that the market needs to allocate capital to those companies leading the transition to a sustainable future in terms of how they operate, not just those providing solutions to the challenges mentioned above through their products and services. In doing so, we are rewarding and backing those companies that are leading their sectors which can have a powerful knock-on effect by raising industry standards and encouraging others to improve.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

The Sub-Fund invests in “transition” companies that are demonstrating leadership in the transition towards a more socially equitable economy through their operations.

Transition companies are identified using the proprietary Transition Risk (“T-Risk”) framework. This involves analysing potential candidates using a range of social-related indicators from a wide range of data sources, including data providers and NGOs benchmarks and assessments, across three areas: respect human rights, provide decent work and act as responsible corporate citizens. This is supplemented by qualitative research to determine the most appropriate transition candidates that are contributing to the sustainable investment objective.

The Sub-Fund has a bespoke engagement programme linked to the sustainable investment objective. All companies held in the Sub-Fund are asked to carry out human rights due diligence and to pay a living wage. If achieved, these asks will result in companies reducing their negative impact and increasing their positive impact on people, thus supporting the transition towards a more socially equitable economy.

The Investment Manager will conduct an annual assessment of each company’s progress on the engagement programme, scoring them in one of five categories. Where there is insufficient progress, escalating action will be taken, which may ultimately lead to divestment from those companies that fail to meet minimum expectations.

No reference benchmark has been designated for the purposes of meeting the sustainable investment objective.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	644.83
	Scope 2 GHG emissions	242.85
	Scope 3 GHG emissions	3,667.19
	Total GHG emissions	4,324.39
Carbon Footprint	Carbon footprint	149.57
GHG Intensity of investee companies	GHG intensity of investee companies	452.08
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	6.86%
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	32.33%
Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	4.30
Board Gender Diversity	Average ratio of female to male board members in investee companies	37.51%
Due Dilligence	Share of investments in companies that perform due dilligence	71.14%
	Share of investments in companies that do not perform due dilligence	28.86%
Living Wage	Share of investments in companies that have committed to paying a living wage that takes living costs into consideration	26.00%

Solutions Revenue	Share of investments in companies within the portfolio that have >25% revenue generated from solutions products	20.50%
Human Rights Due Diligence	Company has defined processes, set targets or reports achievements for monitoring the effectiveness of its human rights policy.	71.14%

The Investment Manager systematically monitors progress against the asks within the Fund’s engagement programme by conducting an annual assessment of companies ranking in categories 1 to 5, with 1 being the leaders. Below is a breakdown of the portfolio into these 5 categories:

- 1. 9%
- 2. 17%
- 3. 34%
- 4. 17%
- 5. 23%

The Investment Manager has an escalation pathway that may lead to divestment if the engagement asks of the Fund’s programme are not met. Aviva Investors does however acknowledge the challenges of implementing these asks and evaluates companies on their ability to demonstrate progress over time. 2022 was the first year of the programme and therefore there was no action taken by way of escalation against companies. Progress will be considered within 2023 AGM voting action now that companies have had some time to react to the requests, such as voting on special and ordinary resolutions. Aviva Investor’s Global Voting Policy provides more details on its approach and perspectives on governance and sustainability best practice, and the Annual ESG Review provides more details on the Investment Manager’s approach to escalation. These documents are available on the Aviva Investors website here: <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Please note that there are no previous reference periods where the fund can report on performance against the relevant sustainability indicators, the fund transitioned to Article 9 in August 2023.

## **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that sustainable investments in the sub-fund do not cause significant harm to any environmental or social objective, there are two levels of screening applied:

1. Aviva Investors' ESG Baseline Exclusions Policy, which includes the following exclusions:

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact ("UNGC"); and
- Tobacco.

The exclusions are based on:

a. A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b. MSCI's controversy screening data to identify recent controversies to the principles set out under the UN Global Compact. An AI ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If we consider failings to be redeemable we will place the company into a structured and time bound engagement program.

Further details on the Investment Manager's ESG Baseline Exclusions Policy is available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-anddocuments/>

2. Fund-level screening based on the indicators for principal adverse impacts ("PAI") on sustainability factors. Aviva Investors assesses an issuer's performance against each of the relevant indicators and the sub-fund will not invest where it is considered that an issuer is causing significant harm to an environmental or social objective. Relevant indicators include all the mandatory PAIs as well as those voluntary indicators selected at a firm-level that are relevant to the theme of the Sub-Fund. Please refer to the PAI Statement on Aviva Investors

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

website for further detail here

<https://www.avivainvestors.com/en-gb/capabilities/sustainable-finance-disclosure-regulation/>

--- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager has a proprietary framework for taking the PAI indicators into account, which differs depending on the type of indicator. Where applicable, the Investment Manager has assigned red flag to issuers which are considered to cause significant harm to an environmental or social objective. These issuers will be excluded from the investment universe for this Sub-Fund. Furthermore, due diligence will be carried out on every company by portfolio managers and ESG analysts. Where PAI data does not exist, the team will seek to qualitatively assess Do No Significant Harm on a best-efforts basis. This may include engaging directly with companies to ask them for the missing data.

--- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager uses the MSCI overall controversy flag (where a “red” flag is considered a fail) to ensure that sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (“UNGPBHR”), including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation (“ILO”) on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The MSCI methodology covers violations of the OECD Guidelines, United Nations Global Compact Principles (“UNGC”), the ILO conventions and the UNGPBHR (which references the International Bill of Human Rights), amongst many other global norms and conventions. All issuers with a red flag will be excluded from the investment universe for this Sub-Fund.

**How did this financial product consider principal adverse impacts on sustainability factors?**

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Social PAI 11 relating to lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Social PAI 12 relating to unadjusted gender pay gap
- Social PAI 13 relating to board gender diversity

**What were the top investments of this financial product?**

Largest Investment	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	7.00%	United States
QIAGEN NV	Health Care	4.16%	Netherlands
WOLTERS KLUWER NV	Industrials	3.63%	Netherlands

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

SSE PLC	Utilities	3.61%	United Kingdom
RELX PLC	Industrials	3.61%	United Kingdom
ROCHE HOLDING PAR AG	Health Care	3.55%	Switzerland
NXP SEMICONDUCTORS NV	Information Technology	3.54%	Netherlands
LINDE PLC	Materials	3.37%	United Kingdom
VISA INC CLASS A	Financials	3.36%	United States
SCHNEIDER ELECTRIC	Industrials	3.28%	France
TRANE TECHNOLOGIES PLC	Industrials	3.18%	Ireland
DANONE SA	Consumer Staples	3.10%	France
DANAHER CORP	Health Care	3.09%	United States
ENEL	Utilities	2.99%	Italy
SAP	Information Technology	2.94%	Germany

### What was the proportion of sustainability-related investments?

#### ● What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

#### ● In which economic sectors were the investments made?

Sector	Proportion (%)
Health Care	21.19%
Industrials	20.33%
Information Technology	17.87%
Financials	10.66%
Consumer Staples	8.70%
Utilities	8.19%
Cash Securities	5.03%
Consumer Discretionary	4.67%
Materials	3.37%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund's Sustainable Investments are not actively aligned with the EU Taxonomy. This means that the Sub-Fund's percentage of Taxonomy alignment is currently 0%.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

N/A - Sustainable Investments are not actively aligned with the EU Taxonomy, thus the share of investments in transitional and enabling activities amounts to 0% of the Sub-Funds' portfolio.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Sub-Fund does not actively invest in sustainable investments with a environmental objective.

**What was the share of socially sustainable investments?**

The Sub-Fund invests at least 90% of total net assets in equities and equity-related securities of companies from anywhere in the world (including emerging markets), except in limited circumstances as explained above. At the point the Sub-Fund makes an investment into such an asset, that asset will qualify as a Sustainable Investment. These investments have a social objective but are not actively targeting alignment with the EU Taxonomy.

At the date of this document, it is not yet possible to commit to the Sub-Funds' minimum alignment with the Taxonomy Regulation, as there is no Taxonomy for socially sustainable activities.

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

The Sub-Fund can invest 10% of total net assets in ancillary liquid assets, eligible deposits, money market instruments, money market funds and derivatives used for exposure to equity indices for managing cash flows, or in derivatives used for hedging. Exposure to equity indices would be for a limited amount of time and in limited circumstances to manage cash flows. Such assets would not be deemed as Sustainable Investments. Some but not all of the underlying constituents of the equity indices may nevertheless qualify as sustainable investments. The Sub-Fund may hold more than 10% of total net assets in such investments in limited circumstances, such as if there is a sudden and material subscription during a time of exceptional market conditions that does not allow immediate allocation to Sustainable Investments.

Given the nature of these investments and short-term use, it may not always be possible to apply minimum safeguards due to look through or liquidity. These assets do not affect the delivery of the sustainable investment objective on a continuous basis as they constitute a small proportion of the Sub-Fund's total net assets.

## What actions have been taken to attain the sustainable investment objective during the reference period?

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world's 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic "value chain" approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

### Macro Stewardship Case Study

People

#### Issue

Antibiotics and other antimicrobials have been a global success story, underpinning industrial agriculture and revolutionising modern medicine for people and animals alike. However, the irresponsible overuse of these important compounds poses profound health, financial, and environmental risks. Left unchecked, the levels of drug resistant infections are predicted to cost the world \$100 trillion in lost output between now and 2050, by which time the world could face 10 million deaths every year as a result of antimicrobial resistance (AMR).

#### Action

As part of our macro stewardship work, we are advocating for an Intergovernmental Panel for AMR (like the IPCC on climate change) that considers intergenerational equity, a ban on antimicrobials in agricultural supply chains for prophylactic treatment and growth stimulation, and multilateral interventions to ensure better stewardship and drive commercial pull incentives for novel treatments, tighter standard setting for watercourses and public bathing areas, and a collaborative, whole-of-society approach to embed antimicrobial stewardship in regulatory and legislative architecture.

Throughout 2023, we engaged with international policymakers and investor peers to highlight the importance of the issue and our proposals. In February, we presented to the Global Leaders Group on AMR, chaired by the Prime Minister of Barbados, and made up of global health and finance ministers, and advocated for AMR bonds and collaboration on AMR finance. We were the only private financial services actor to address the Group. We also co-hosted an event with the Access to Medicine Foundation, the FAIRR Initiative and the UK Government's Investor Action on AMR (IAAMR) in November, with Professor Dame Sally Davies, formerly the

Chief Medical Officer for England and Chief Medical Advisor to the UK Government and the current Special Envoy on Antimicrobial Resistance for the United Kingdom. At the event, policymakers, civil society representatives, and investors explored how investors can collaborate to take meaningful action on tackling the systemic risk of AMR.

### **Result**

We are looking forward to building on our macro stewardship engagement on AMR in 2023 into this year, by strengthening our policy positions and targeting key decision-makers, including at the second High-Level Meeting on AMR, which will be convened by the UN General Assembly in September 2024

## **Micro Stewardship Case Study**

Human Rights

### **Issue**

Human rights due diligence (HRDD) is a core expectation of the UNGPs and requires businesses to identify, respond, mitigate and prevent adverse human rights impacts in their own operations and supply chains. Failure to do this can lead to human rights abuses, and financially material consequences for companies including negative media attention and even litigation. Completing a human rights impact assessment enables better visibility for investors on how a company is managing and mitigating its salient human risks.

### **Action**

As part of our STEP,<sup>[1]</sup> we requested a range of companies from different sectors and geographies conduct a human rights impact assessment, evaluating and prioritising human rights risks and impacts.

### **Outcome**

While progress has varied across the holdings, we have seen some companies respond to our requests. Bank Rakyat has increased reference to human rights in its public sustainability report, mentioning the UN Guiding Principles. It has also signed up to the UN Global Compact.

Progress with an Asian semiconductor manufacturing company has been limited. The company was not responsive to engagement from our ESG and STF portfolio managers, removing a valuable method to gain insight into the culture of the firm. Whilst it does provide disclosure on some salient issues, questions remain about the lack of disclosure on working times, increases in adverse health and safety incidents and employee complaints, and greater use of contractors. As we were unable to engage directly with the company or to gain further assurance on its workforce practices, STF divested from the position as managers no longer felt comfortable holding the position.

### **Priorities ahead**

We will continue to increase pressure on STEP companies, particularly those that are currently making slow progress against our asks and those that are deemed to potentially have a high human rights impact. It is our ambition to transcend from discussions about human rights due diligence processes and human rights impact assessments to discussions about individual salient issues and the effectiveness of companies' actions, although this may not be possible in all markets. We also expect companies to be more transparent about their practices regarding living wages and dialogue with stakeholders, such as unions and communities.

As 2024 will mark the third and final year of most holdings' inclusion in STEP, we intend to ramp up our voting and other escalation activity during the upcoming AGM season and beyond to demand greater progress from slow movers and to remind them of the risk of divestment if they fail to act

---

## How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

- ***How did the reference benchmark differ from a broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- ***How did this financial product perform compared with the reference benchmark?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

- ***How did this financial product perform compared with the broad market index?***

N/A - No reference benchmark has been designated for the purposes of attaining the sustainable investment objective.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aviva Investors – UK Equity Unconstrained Fund Legal entity identifier: 549300QB7Z4Z1ZETEC07

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Whilst the Sub-Fund may invest in underlying investments that contribute to climate change mitigation and/or climate change adaptation, the Sub-Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The below criteria are binding on the investment process to ensure underlying investments are inclusive of those securities promoting environmental or social characteristics:

The exclusions detailed below will be applied to this universe.

A. The Investment Manager’s ESG Baseline Exclusions Policy which includes the following exclusions:

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Controversial weapons including nuclear weapons
- Civilian firearms
- Thermal Coal
- Non-conventional fossil fuels (arctic oil and tar sands)
- Breaches of principles of the UN Global Compact (“UNGC”); and
- Tobacco.

The exclusions are based on:

a) A maximum acceptable percentage of estimated revenue derived from the specific activities, the maximum acceptable percentage of revenue thresholds are:

- Controversial weapons 0%, including nuclear weapons\*
- Civilian firearms 5%
- Thermal Coal 5%\*\*
- Non-conventional fossil fuels (arctic oil and tar sands) at 10%\*\*
- Tobacco producers at 0% and tobacco distribution or sale at 25%

\*The percentage of revenue threshold for nuclear weapons will be 0% for companies involved in, among others, development, production, use, maintenance, offering for sale, distribution, import or export, storage or transportation of nuclear weapons, where this supplies nuclear states outside of the UN Treaty on Non-Proliferation of Nuclear Weapons (1970).

In August 2023 we enhanced the exclusion policy on Nuclear Weapons given the current global climate, lowering the revenue threshold from 5% to 0% and allowing companies in compliance with the Non-Proliferation Treaty to be excluded from the revenue test. Please note, we retain discretion to additionally exclude companies supplying nuclear weapons state programmes within the NPT, if Aviva Investors considers the state to have undermined non-proliferation arms control treaties, conventions and norms.

\*\*Companies that have an approved SBTi (Science Based Target) which has a classification of 1.5°C or Well Below 2°C are an exception to these thresholds.

b) MSCI’s controversy screening data to identify recent controversies to the Principles set out under the UN Global Compact. An Aviva Investors ESG Analyst qualitative assessment is additive to this process to confirm if the failings are irredeemable based on company behaviours since the controversy. If failings are considered to be redeemable, the Investment Manager will place the company into a structured and time bound engagement program.

Further details on the Investment Manager’s ESG Baseline Exclusions Policy are available at <https://www.avivainvestors.com/en-gb/about/responsible-investment/policies-and-documents/>.

B. In February 2021, Aviva Investors announced its Climate Engagement Escalation Programme (the “Programme”) which will require 30 companies regarded as ‘systemically important carbon emitters’ to deliver net zero scope 3 emissions by 2050 and establish robust transition roadmaps to demonstrate their commitment to immediate action on climate change as the world’s carbon budget diminishes.

The Programme will run for between one and three years, depending on individual company circumstances, and incorporate clear escalation measures for non-responsive businesses or those that do not act quickly enough. Aviva Investors is committed to full divestment of targeted companies that fail to meet its climate expectations. Divestments will apply across the firm’s equity and debt exposures.

C. The Corporate Good Governance Qualitative Assessment criteria as outlined in the SFDR, is considered through the lenses outlined above. For corporates, the good governance principle introduced by SFDR will be met through a combination of the UNGC (as part of the Investment Manager’s ESG Baseline Exclusions Policy

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

noted above) and a qualitative assessment as part of the investment analyst research process. Good governance indicators form a substantial component of the Investment Manager’s ESG scoring tools and ESG research.

● **How did the sustainability indicators perform?**

The fund applied the baseline exclusions policy described above since 1 July 2022 - any holdings in breach of the policy were sold from this date in line with the divestment period outlined in the policy. The fund will continue to be managed in line with the policy and any revisions made to it over time, there have been no breaches of the policy on the fund since implementation.

Adverse sustainability indicator	Metric	Annual Average
GHG Emissions	Scope 1 GHG emissions	2,026.45
	Scope 2 GHG emissions	980.37
	Scope 3 GHG emissions	40,199.08
	Total GHG emissions	43,296.14
Carbon Footprint	Carbon footprint	549.48
GHG Intensity of investee companies	GHG intensity of investee companies	986.06
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	11.68%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	72.88%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.34
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	39.84%

**AI Disclaimer:**

Please note: The accuracy of the data obtained during the course of the reference period is reliant on: (i) data provided by third party data providers and investee companies; and (ii) AI and third party proprietary models. Data from third party data providers may be incomplete, inaccurate or unavailable. Where we seek to rely on proprietary models these may similarly rely on information which is incomplete, inaccurate or unavailable. As a result, there is a risk that AI may, from time to time, incorrectly represent a security, issuer, fund or index climate metrics. There is also a risk that AI, or the third-party data providers on which we may depend, may not interpret or apply the relevant ESG characteristics or climate metrics correctly. AI does not warrant the fairness, accuracy or completeness of any data used, or assessment made, in connection with this template.

We have reported greenhouse gas emissions data and related carbon footprint and intensity metrics covering Scope 1 (direct), Scope 2 (indirect) and Scope 3 (from a company’s value chain), of these Scope 3 is the least established and hardest to quantify and ideally we would want to ensure information we use is reliable before we incorporate it into our reports, but the regulation stipulates Scope 3 should be used and reported so we have done so based on the information we have available including climate metrics partly based on estimates of emissions from our data providers.

● **...and compared to previous periods?**

Adverse sustainability indicator	Metric	Annual Average 2022	Annual Average 2023
GHG Emissions	Scope 1 GHG emissions	3,461.74	2,026.45
	Scope 2 GHG emissions	1,004.65	980.37
	Scope 3 GHG emissions	52,870.81	40,199.08
	Total GHG emissions	57,376.40	43,296.14
Carbon Footprint	Carbon footprint	747.12	549.48
GHG Intensity of investee companies	GHG intensity of investee companies	1,054.31	986.06
Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	13.47%	11.68%
Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage	76.30%	72.88%
Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	0.35	0.34
Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas	0.00%	0.00%
Board Gender Diversity	Average ratio of female to male board members in investee companies	39.26%	39.84%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Please note the fund does not intend to make sustainable investments in accordance with the definition under the Sustainable Finance Disclosure Regulation. As such, this question is not applicable to the fund for the reference period of January – December 2023.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

1<sup>st</sup> January 2023 – 31<sup>st</sup> December 2023

### How did this financial product consider principal adverse impacts on sustainability factors?

Our exclusions policies set out those exclusions that we apply across the fund. These result in binding consideration of the following corporate social and environmental PAI indicators

- Social PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Social PAI 10 relating to violations of UN Global Compact Principles and OECD Guidelines
- Environmental PAI 4 relating to companies active in the Fossil Fuel sector

### What were the top investments of this financial product?

Largest Investment	Sector	% Asset	Country
INTERMEDIATE CAPITAL GROUP PLC	Financials	5.34%	United Kingdom
SAGE GROUP PLC	Information Technology	4.56%	United Kingdom
MELROSE INDUSTRIES PLC	Industrials	4.26%	United Kingdom
BAE SYSTEMS PLC	Industrials	4.20%	United Kingdom
UNILEVER PLC	Consumer Staples	4.11%	United Kingdom
GLAXOSMITHKLINE	Health Care	3.98%	United Kingdom
CHEMRING GROUP PLC	Industrials	3.34%	United Kingdom
NATIONAL GRID PLC	Utilities	3.33%	United Kingdom
ASHTREAD GROUP PLC	Industrials	3.16%	United Kingdom

### Asset allocation

describes the share of investments in specific assets.

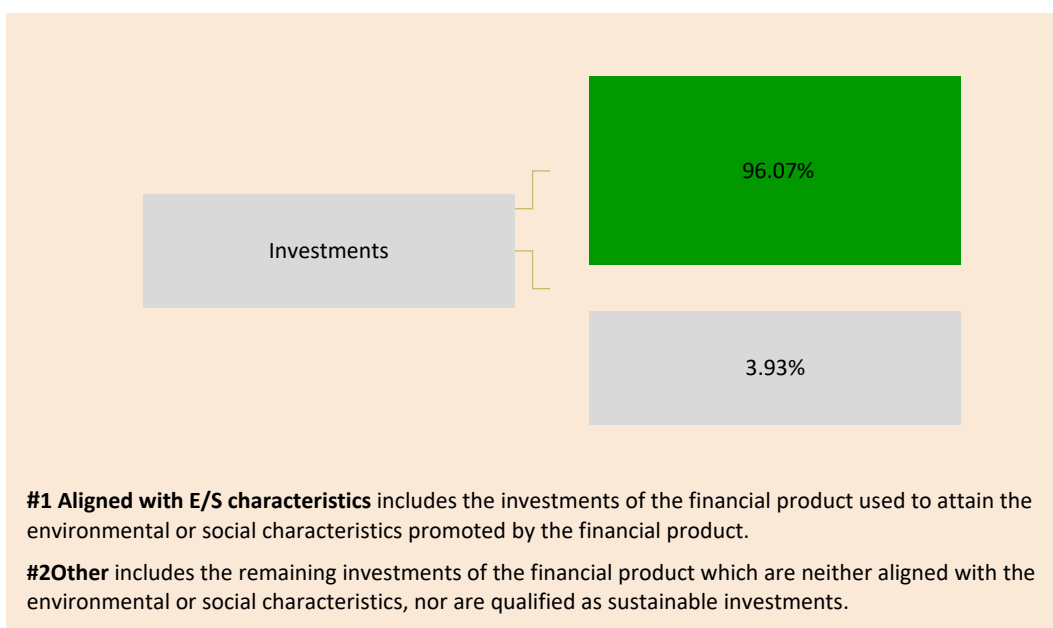

RELX PLC	Industrials	3.07%	United Kingdom
DIAGEO PLC	Consumer Staples	2.87%	United Kingdom
RENTOKIL INITIAL PLC	Industrials	2.77%	United Kingdom
TESCO PLC	Consumer Staples	2.66%	United Kingdom
PHOENIX GROUP HOLDINGS PLC	Financials	2.63%	United Kingdom
SSE PLC	Utilities	2.61%	United Kingdom

### What was the proportion of sustainability-related investments?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

#### ● What was the asset allocation?

#### ● In which economic sectors were the investments made?

Sector	% Proportion
Industrials	27.74%
Financials	16.72%
Consumer Staples	16.50%
Information Technology	9.25%
Utilities	7.37%
Consumer Discretionary	7.37%
Health Care	5.04%
Materials	3.94%
Cash Securities	3.93%
Real Estate	0.99%
Energy	0.67%
Communication	0.48%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not commit to making investments in transitional and enabling activities as defined under the EU Taxonomy. As a result, this is not applicable

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What was the share of socially sustainable investments?**

The Fund does not commit to making Sustainable Investments as defined under SFDR. As a result, this is not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

There may on occasion be investments in financial techniques and instruments and derivatives used for efficient portfolio management purposes, or for liquidity holding purposes (such as ancillary liquid assets, eligible deposits, money market instruments, money market funds, cash FX) which would fall within “#2 Other”. However, given the nature of the Sub-Fund “#2 Other” investments, it is not possible to apply environmental and/or social safeguard tests to such investments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In January 2023, we sent our annual letter to the chairs of companies we invest in, as well as those we do not but would like to use our influence with. This letter set out our stewardship priorities that shaped our voting and engagement activities of 2023: the cost-of living crisis, transitioning to a low-carbon economy and reversing nature loss. The letter reiterates that even though we must re-evaluate and adjust near-term priorities given global macroeconomic and geopolitical events, we must ensure that tactical responses today do not undermine longer-term sustainability objectives. Where engagement with companies, whether on strategic, performance, general ESG or specific voting issues, is undertaken, the effectiveness of such engagements will be measured and evaluated on a regular basis. We maintain a database to record our voting and engagement with companies, which allows us to review the effectiveness of our activities. Where companies do not adequately address our concerns, the matter may be escalated via a number of tools available to us such as voting, collaborative engagement and potentially divestment.

As well as our chair letter, Aviva Investors continued our Climate Engagement Escalation Programme (CEEP) which targets the world's 30 most systemically important carbon emitters across our credit and equity portfolios. This programme will run for between one and three years, depending on individual company circumstances. All engagement activities with these 30 companies are tracked and clear escalation measures are incorporated for non-responsive businesses or those that do not act quickly enough. In 2023, to maximize our impact facilitating real-world decarbonisation, we expanded the programme to focus on hard-to-abate sectors that directly depend on hydrocarbon products, in order to reflect the interlocking nature of supply and demand. We also embraced a more holistic "value chain" approach towards our engagement activity – focusing on bringing together relevant sectors and their respective trade associations and regulatory bodies to discuss shared sector- and value chain-wide and systemic bottlenecks impeding decarbonisation. We began with the aviation value chain – including airlines, engine manufacturers and biofuel producers – in a roundtable to discuss key opportunities and challenges impeding decarbonisation.

### **How did this financial product perform compared to the reference benchmark?**

The fund does not have a designated reference benchmark for the purpose of attaining the environmental and social characteristics that the fund is promoting.

● ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

● ***How did this financial product perform compared with the broad market index?***

Not Applicable.
