

Key Investor Information

This document provides key investor information about this fund ("Sub-fund"). It is not marketing material. The information is required by law to help investors understand the nature and the risks of investing in this Sub-fund. Investors are advised to read it so to make an informed decision about whether to invest.

Credit Suisse Investment Partners (Lux) Global Investment Grade Convertible Bond Fund, a Sub-fund of CS Investment Funds 1

Share Class UB USD
ISIN LU1144398358
Management Company Credit Suisse Fund Management S.A., 5, rue Jean Monnet, L-2180 Luxembourg

Objectives and investment policy

The Sub-fund invests at least two-thirds of its assets in convertible bonds, convertible notes, warrant bonds, options on bonds (warrants) and similar securities with option rights of public, semi-public and private issuers worldwide and irrespective of currency. At least 75% of the Sub-fund's assets will have a minimum credit rating of BBB- (Standard & Poor's) or Baa3 (Moody's). The Sub-fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Article 8 of Regulation (EU) 2019/2088) through a combination of exclusions, ESG integration and active ownership. The most material ESG factors are combined with traditional financial analysis to calculate an ESG integrated credit rating, which serves as the basis for a bottom-up security selection process. This Sub-fund aims to outperform the return of the Refinitiv Global Convertible Bond Investment Grade benchmark. The Sub-fund is actively managed. The benchmark is

used as a reference point for portfolio construction. The majority of the Sub-fund's exposure to bonds will refer to, and have weightings derived from, the benchmark. The Investment Manager may use its discretion to invest in bonds not included in the Benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Sub-fund will materially deviate from the Benchmark. The Sub-fund may use derivatives to achieve the above aims. The investor can sell shares of the Sub-fund on a daily basis, as further defined in the prospectus. This Share Class does not make regular distribution. The Sub-fund shall bear the costs of standard brokerage and bank charges incurred by the Sub-fund through securities transactions in relation to the portfolio. These charges are not included in the "Charges" section of this document.

Risk and reward profile

Risk profile

The Sub-fund's risk and reward profile shows the variations in value an investment in this Sub-fund would have undergone over the past five years, whereby simulated performance data is used in the case of missing history. The Sub-fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Sub-fund is risk free.

Why is the Sub-fund in the specific category?

Amongst other, equity prices mainly reflect the expected prospects of firms, as estimated by market participants. Expectations tend to fluctuate more strongly in times of higher uncertainty. The risk level of an investment in convertible bonds is mainly driven by their sensitivity to the underlying shares. In addition, their credit quality as well as their currencies may contribute to risk. The Sub-fund holds convertible bonds which may move considerably in line with their underlying shares. The Sub-fund may have a low degree of issuer diversification which makes it more vulnerable. The Sub-fund's application of Swing Pricing also impacts its risk and reward profile.

Are there any other particular risks?

The Sub-fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Sub-fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Sub-fund may not pay income or repay capital when due. Part of the Sub-fund's investments may have considerable credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the Sub-fund's investments may be prone to limited liquidity. The Sub-fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Sub-fund's derivative counterparties may lead to payment or delivery default. The Sub-fund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Event risk: In the case a trigger event occurs contingent capital is converted into equity or written down and thus may lose substantially in value.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Sub-fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

Charges
