Sustainable Enhanced Bond 12M, a subfund of the SICAV BNP Paribas Funds, short named as BNP Paribas

Class "Privilege Capitalisation" - ISIN code LU1819949089

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Fund is actively managed. The composite benchmark 80% cash Index €ster + 20% Bloomberg Euro Aggregate 1-3 years (EUR) RI. is used for performance comparison only.

The Fund is not benchmark constrained and its performance may deviate significantly from that of the benchmark.

The Fund seeks to achieve a performance that is higher than the rate of return of the euro money market over a minimum investment period of 12 months by investing in euro-denominated debt instruments which are chosen given their practices in terms of sustainable development (social responsibility and/or environmental responsibility and/or corporate governance).

It is based on active management based on a systematic and disciplined approach to securities selection, combining extra-financial research, financial research and quantitative analysis.

Exposure to currencies other than the EUR will be less than 5%.

Investment grade structured debts may represent up to 20% of the assets. It may not be invested in equities.

The investment team applies also BNP PARIBAS ASSET MANAGEMENT's sustainable Investment Policy, which takes into account Environmental, Social and Governance (ESG) criteria such as but not limited to reduction of emissions of greenhouse gas, respect of human rights, respect of minority shareholders rights, at each step of the of the investment process of the Fund.

The Fund follows the Enhanced ESG approach which means that the Fund implements more explicit ESG tilts (Invest in the most sustainable companies according to specific criteria and/or incorporating a wider range of exclusions) leading to more stringent ESG and/or Carbon performance targets.

The approach is implemented in order to consistently eliminate at least 20% of the investment universe being bonds issued by private issuers from the Eurozone and having a maturity between 1 to 3 years prior to applying ESG filters.

An extra-financial strategy may comprise methodological limitations such as the ESG Investment Risk as defined by the asset manager

Incomes are systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?
This risk category is justified by the investment in eligible money market instruments as per Regulation and short term bonds that have a low volatility.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.
