This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## BNP PARIBAS INSTICASH EUR 1D, a subfund of the SICAV BNP PARIBAS INSTICASH

Class "Classic T1 Capitalisation" - ISIN code LU0547770783

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

### Objectives and investment policy

The Fund is a short term variable net asset value money market fund (hereinafter a «MMF») as defined by the regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds (the «Regulation»).

It seeks to achieve the best possible return in EUR in line with prevailing money market rates, over a 1-day period while aiming to preserve capital consistent with such rates and to maintain a high degree of liquidity and diversification, the 1-day period corresponds to the recommended investment horizon of the sub-fund. The sub-fund is rated AAAm by S&P Global Ratings. This rating was solicited and financed by the Management Company. It is subject to a periodic review conducted by Standard & Poor's.

The Fund invests within the limits set out in the Regulation in a diversified portfolio of money market instruments, deposits with credit institutions, repurchase agreements and reverse repurchase agreement, units or shares of short term MMFs and ancillary liquid assets denominated in EUR.

The Fund is not a guaranteed product. An investment in the Fund differs from an investment in deposits, with the risk that the principal invested is capable of fluctuation. BNP PARIBAS InstiCash does not rely on external support for guaranteeing the liquidity of the sub-funds or stabilising the NAV per share. The loss of the principal is to be borne by the shareholders. There is no currency exposure other than to the EUR.

The Fund is actively managed. The benchmark Euro Short Term Rate (EUR) RI is used for performance comparison only. The Fund is not benchmark constrained and its performance may deviate significantly from that of the benchmark.

The Fund may also use financial derivative instruments (interest rate swaps) for hedging purpose only provided they are dealt in on a regulated market. The impact of these financial derivative instruments will be taken into account for the calculation of the weighted average maturity (interest rate risk) of the Fund. These financial derivative instruments will be used in line with the money market investment strategy of the Fund.

It invests in securities of high credit quality. The Management Company performs its own documented assessment of the credit quality of money market instruments and issuers that allows it to consider a money market instrument as being of high quality.

Environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

Incomes are systematically reinvested.

### Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Historical data may not be reliable indication for the future.
- The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
- The lowest category does not mean a risk-free investment.
- Why is the Fund in this specific category?  
This risk category is justified by the investment in eligible money market instruments as per Regulation and short term bonds that have a low volatility.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Liquidity Risk:** This risk arises from the difficulty of selling an asset at a fair market price and at a desired time due to lack of buyers.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.

For more information on risks, please see the risks section of the Fund's prospectus, which is available at <http://www.bnpparibas-am.com>.
