BlackRock Style Advantage Fund

A sub-fund of BlackRock Strategic Funds

Class X2 GBP Hedged

ISIN: LU1423753034

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to achieve a positive absolute return through a combination of capital growth and income on your investment regardless of market conditions.
- ▶ The Fund will provide exposure to several investment styles including, (i) Value: focuses on investments that appear relatively cheap with the aim of outperformance relative to expensive assets; (ii) Momentum: focuses on investments with relatively strong medium term performance with the aim of benefitting from an asset's recent relative performance continuing in the short term; (iii) Carry: focuses on higher-yielding investments with the aim of benefitting from the higher returns of these assets relative to lower-yielding assets; and (iv) Defensive: focuses on investments with low-risk characteristics with the aim of benefitting from the tendency for lower risk, higher quality assets to generate higher risk-adjusted returns than higher risk, lower quality assets.
- ▶ The Fund will invest on a global basis in any or all of the following asset classes: equity securities (e.g. shares), other equity-related securities, fixed income securities (e.g. bonds), other fixed-income related securities, permitted money market instruments (e.g. debt instruments with short-term maturities), mortgage backed securities (MBS) (i.e. financial securities backed by cash flows from debt), permitted deposits, cash and other funds.
- ▶ The Fund may invest in financial derivative instruments (FDIs). FDIs are investments the prices of which are based on one or more underlying assets. The IA intends to generate market leverage via FDIs (i.e. where the Fund gains market exposure in excess of the value of its assets). A significant portion of the Fund's assets may be invested in total return swaps and contracts for difference that aim to achieve a specified return based on underlying assets such as equity and FI securities.
- ▶ The fixed income securities and money market instruments may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development). The Fund will invest in the full range of fixed income securities which may include investments with a relatively low credit rating or which are unrated.
- ▶ The Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. The Fund intends to pursue a broadly market-neutral strategy (i.e. the intention is not to take a view as to the direction the market will move when selecting assets). At any one time, a substantial amount, or even all of the Fund's assets may be held as cash.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The LIBOR 3 Month Index should be used by shareholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$10,000,000 or other currency equivalent.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Equities and equity-related securities can be affected by daily stock market movements. Fixed Income securities can be affected by changes to interest rates, credit risk and potential or actual credit rating downgrades. Non-investment grade FI securities can be more sensitive to these events. ABS and MBS may have high levels of borrowing and not fully reflect the value of underlying assets. FDIs are highly sensitive to changes in the value of the asset they are based on. The impact is greater where FDIs are used in an extensive or complex way.
 - 'Absolute Return' funds may not move in line with market trends or fully benefit from a positive market environment. Emerging markets are generally more sensitive to economic and political conditions than developed markets.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 30 June 2021. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this share class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
