What is this product?

Type Distribution shares (shares that distribute income to the holder) of a sub-fund of a SICAV, a regulated open-ended fund whose sub-funds are independent from a liability point of view.

Investment objectives and policy

Objective(s) To increase the value of your investment over the short to medium term.

Benchmark(s) The fund is managed without reference to an index.

Investment policy Under normal market conditions, the sub-fund invests mainly (in)directly (via other funds) in a portfolio of equities and, to a lesser extent, bonds. The sub-fund invests without geographical restrictions and favours sustainable activities such as renewable energy, greenhouse gas reduction, climate change adaptation and the circular economy. It may use derivatives to hedge against market fluctuations, reduce costs or even generate additional revenue.

Investment process Within the framework of active management of the sub-fund, the manager uses macroeconomic and market analysis to allocate assets flexibly between different asset classes, sectors and countries.

ESG approach The manager integrates environmental, social and governance (ESG) criteria such as carbon footprint, natural resource use, working conditions and corporate governance. It favors companies with a high ESG profile ("best-in-class" approach) and excludes companies that do not comply with international standards, as well as companies with significant exposure to socially or environmentally harmful sectors such as thermal coal and tobacco.

SFDR category Article 8 (financial product that promotes ESG characteristics according to the European regulation (SFDR)).

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes that you keep the product for at least **2 years**. The actual risk can vary significantly if you cash in before maturity and you may get back less.

The risk indicator is designed to help you compare the risks of investment products. It uses the required calculation methodology, which includes market movements and the risk that the product manufacturer cannot pay out as required. The risk indicator is not guaranteed and may change over time.

All investments involve risk. The value of your investment in this product can go up and down, and you could lose some or all of your

Performance Scenarios

This table shows the money you could get back (net of costs) over different periods, under different scenarios, assuming you were to invest EUR 10,000 in the sub-fund. You can compare this with the scenarios of other products.

The figures shown include all costs of the product itself. The figures do not take into account your personal tax situation, which may affect how much you get back.

What you will get from this product depends on future market performance.

Note that future market developments are uncertain and cannot be accurately predicted.

Recommended holding period:		2 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 2 years
Scenarios			
Minimum			
Stress	What you might get back after costs	7 750 EUR	8 500 EUR
	Average return each year	-22.50%	-7.80%
Unfavourable	What you might get back after costs	8 640 EUR	8 780 EUR
	Average return each year	-13.60%	-6.30%
Moderate	What you might get back after costs	10 180 EUR	10 470 EUR
	Average return each year	1.80%	2.32%
Favourable	What you might get back after costs	11 760 EUR	11 590 EUR
	Average return each year	17.60%	7.66%

The unfavorable, intermediate and favorable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. The stress scenario shows what you might get back in extreme market circumstances. The markets could evolve very differently in the future.

An index appropriate to the product was used to calculate performance.

Unfavorable scenario: this type of scenario occurred for an investment between 31/10/2021 and 31/10/2023.

Intermediate scenario: this type of scenario occurred for an investment between 30/09/2017 and 30/09/2019.

Favorable scenario: this type of scenario occurred for an investment between 31/12/2018 and 31/12/2020.

What happens if Degroof Petercam Asset Services S.A. is unable to pay out?

The sub-fund's assets are segregated from those of the other sub-funds in the SICAV and from Degroof Petercam Asset Services S.A., the product manufacturer and management company of the sub-fund. Even if it were to fail, the product manufacturer could not use the sub-fund's assets to pay its debts.

The only scenario under which an investor could incur a loss is by selling shares at a time when they are worth less than what the investor paid.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

This table shows the amounts taken from your investment to cover different costs. These amounts depend on how much you invest, how long you hold your investment, and how the sub-fund performs. The amounts shown are illustrations based on a hypothetical investment amount and different investment periods.

We have assumed that:

- for the first year, you get back the amount you invested (0% annual return);
- for the other holding periods, the product evolves as indicated in the intermediate scenario;
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 2 years
Total costs	118 EUR	243 EUR
Annual cost impact (*)	1.2%	1.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period, your average return per year is projected to be 3,4 % before costs and 2,3 % after costs.

Composition of the costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0,0% of the amount you pay at the time you enter the investment. This is the maximum you will pay, and you could pay less.	0 EUR
Exit costs	0,0% costs related to the exit of your investment (redemption fees). This is the maximum you will pay, and you could pay less.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,0% of the value of your investment per year. This is an estimate based on actual costs over the last year.	101 EUR
Transaction costs	0,2% This is an estimate of the costs incurred when buying and selling investments underlying the sub-fund. The actual amount will vary depending on the quantity bought and sold.	17 EUR
Incidental costs taken under specific conditions		
Performance fees	This product does not charge any performance fees.	0 EUR
