

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DPAM B Equities Europe Index

(a sub-fund of DPAM B SA, a public SICAV under Belgian law)

managed by DPAM SA

Classe B - ISIN: BE6278393689

Objectives and investment policy

Objective

- The fund's objective is to obtain as high a return as possible by investing mainly in European equities. The index is tracked using a passive investment management strategy investing physically and non-synthetically in all securities in the index or a representative sample of these securities, holding each security in a proportion approximately identical to its weight in the index. Each sector is represented in a proportion approximately identical to its weight in the index. The tracking error (standard deviation from the benchmark) is around 1.3%. This is a passively managed fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Investment policy

- The fund invests mainly in equities (and other analogous transferable securities) of European companies, SICAFIs (Belgian REITs), warrants, convertible bonds, subscription rights, VVPR strips and, on an ancillary basis, cash and cash equivalents.

Subscription/Redemption

- Subscription or redemption requests may be made every business day before 1.30 p.m. (Belgian time) to Banque Degroof Petercam SA.

Types of Units

- The units of the fund are capitalisation units, issued in the form of shares, which do not give right to a dividend. All income earned by the fund is reinvested.

Derivatives

- The fund may, on an optional basis, use derivatives such as options and/or futures contracts ("futures" and/or "forwards") in order to achieve the investment objectives and/or for hedging purposes (hedging or exposure off/to interest rate and credit risks).

Investment holding period

- This fund may not be appropriate for investors who intend to withdraw their capital within 5 years of the initial investment.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- All investments being risky by nature, the return (performance) is subject to a high degree of uncertainty. The risk and reward profile of your investment is reflected by a synthetic indicator which ranks the fund over a risk/return scale from the lowest (1) to the highest (7) risk category.
- The computation of this risk/reward profile is based on the portfolio's net asset value fluctuations (volatility) recorded over the past 5 years (or on simulations based on an appropriate benchmark for funds or share classes of less than 5 years). It gives an indication of the fund's potential performance and of your capital risk exposure, but it does not guarantee that the risk/reward profile currently published will remain unchanged.
- Historical data, such as those used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the fund.
- The lowest risk/return category (level 1) does not mean a risk-free investment.
- The risk/return profile mentioned herein is essentially due to the presence of equities in the portfolio.
- The capital invested in this fund is neither guaranteed nor protected. You may therefore lose all or part of your investment.

Certain risks are not (or not adequately) reflected in the risk and reward profile mentioned herein. Amongst those risks, the following could have a material impact on the risk and reward profile of the fund:

- Concentration risk: as the portfolio is mainly composed of equities issued by European companies, it is likely to be more specifically exposed to the economic development of Europe.
- Sustainability risk: the fund's main objective is to track the performance of its index. As a result, the fund may have greater exposure to companies that have a negative sustainability impact.

Charges

The charges are used to pay the costs of running the fund (including the marketing and distribution costs thereof). These costs reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	2.25%
Exit charge	0.10%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.65%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	N/A.
------------------------	------

- The entry and exit charges mentioned herein are maximum figures. In certain circumstances, these charges may be lower. Please contact your distributor or usual advisor to obtain the amount of charges effectively applied.
- The amount of ongoing charges mentioned herein is based on an estimate of the total expected annual costs. This amount may vary from quarter to quarter. These charges include transaction fees incurred by the fund when it subscribes to and/or sells units of another fund, but do not include either (i) the fees incurred by the fund when it makes investments other than subscriptions/sales of units of funds or, where applicable, (ii) the performance fee.
- Specific costs may be charged in case of sub-fund conversion.
- For more information on all the charges and the way they are calculated, please refer to the "Fees and costs" section of the prospectus.

Past performance

- This bar chart illustrates the performance of this share class during the period mentioned therein.
 - This information gives an indication, but may under no circumstances be regarded as a guarantee, of future performance.
 - This sub-fund and this class were created in 2022.
 - Performance is calculated in EUR and includes all the costs and fees charged to the sub-fund (without exception).
