### What is this product?

**Type** Accumulation shares (shares for which income and capital growth are retained in the share price) of a sub-fund of a SICAV, a regulated open-ended fund whose sub-funds are independent from a liability point of view.

### Investment objectives and policy

**Objective(s)** To increase the value of your investment over the medium to long term, while pursuing a sustainable objective.

**Benchmark(s)** The fund is managed without reference to an index.

**Investment policy** Under normal market conditions, the sub-fund invests mainly in government bonds, including high yield bonds, issued in emerging markets.

The sub-fund may use derivatives to hedge against market fluctuations and to reduce its costs, and also to generate additional income.

**Investment process** As part of the active management of the sub-fund, the manager uses macroeconomic, market and credit analysis in order to identify securities with a potential return that is advantageous in relation to the risk incurred.

**ESG approach** In his/her decision-making process, the manager includes sustainability criteria such as the defense of fundamental rights, freedom of expression, education, the environment and healthcare. The manager excludes issuers that are highly controversial by international standards or have an unfavorable sustainability profile.

**SFDR Category** Article 9.

**Base currency** CHF

### Plan your investment

**Product availability** This sub-fund is available, with or without advice, for retail investors with basic financial knowledge and professional investors.

**Investor profile** This sub-fund is intended for investors who understand the risks of the sub-fund and:

- are looking for an investment that combines income generation and capital growth, and has a sustainable dimension
- are interested in exposure to emerging bond markets, either as a core investment or for diversification purposes
- have a medium risk tolerance and can tolerate a moderate loss on this investment.

**Placing orders** You can buy, exchange or sell shares of the sub-fund on any full bank business day in Luxembourg.

### Terms to understand

**article 9** Financial product that has a sustainable investment objective according to European regulations (SFDR).

**ESG** Environmental, social and governance.

**derivative** Any financial security whose value is linked to one or more interest rates, indices, stocks, currencies, commodities or other underlying assets.

**bond** A financial security issued by a corporation, government or entity that generally pays interest. High-yield bonds usually have a higher interest rate but are more likely to default.

*Depository: Banque Degroof Petercam Luxembourg S.A.*

### What are the risks and what could I get in return?

#### Risk indicator

Lower risk Higher risk

The risk indicator assumes that you keep the product for at least **4 years**. The actual risk can vary significantly if you cash in before maturity and you may get back less.

The risk indicator is designed to help you compare the risks of investment products. It uses the required calculation methodology, which includes market movements and the risk that the product manufacturer cannot pay

out as required. The risk indicator is not guaranteed and may change over time.

**All investments involve risk.** The value of your investment in this product can go up and down, and you could lose some or all of your investment. This product is rated at the medium-low risk level (3 out of 7). Poor market conditions are very likely to reduce the value of your investment.

The sub-fund's risk level reflects the following:

- Bond investments have lower volatility and risk than equities and higher risk than money market instruments.
- The sub-fund invests mainly in emerging markets which present a higher risk than developed markets.

Other important risks partly or completely unreflected in the risk indicator:

- **If your currency as an investor is different from the subscription currency of this product, changes in currency exchange rates could reduce any investment gains or increase any investment losses.**

• Unusual market conditions or unforeseeable events may magnify risks or trigger other risks such as counterparty, liquidity and operational risks (a full description of these risks is available in the prospectus).

• If you place a request to sell (redeem) shares at a time when this product has received many other sell requests, the processing of your order may be delayed, which could affect the price you receive for your shares.

## Performance Scenarios

This table shows the money you could get back (net of costs) over different periods, under different scenarios, assuming you were to invest CHF 10,000 in the sub-fund. You can compare this with the scenarios of other products.

The figures shown include all costs of the product itself. The figures do not take into account your personal tax situation, which may affect how much you get back.

What you get out of this product depends on future market performance.

**Please note that future market performance is uncertain and cannot be accurately predicted.**

Recommended holding period:		4 years	
Example Investment:		10 000 CHF	
		If you exit after 1 year	If you exit after 4 years
Scenarios			
Minimum			
Stress	<b>What you might get back after costs</b>	5 910 CHF	6 190 CHF
	Average return each year	-40.90%	-11.30%
Unfavourable	<b>What you might get back after costs</b>	8 500 CHF	8 600 CHF
	Average return each year	-15.00%	-3.70%
Moderate	<b>What you might get back after costs</b>	9 900 CHF	10 300 CHF
	Average return each year	-1.00%	0.74%
Favourable	<b>What you might get back after costs</b>	11 410 CHF	12 680 CHF
	Average return each year	14.10%	6.12%

The unfavorable, intermediate and favorable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product and the appropriate index over the past 10 years. The stress scenario shows what you might get back in extreme market circumstances. The markets could evolve very differently in the future.

An index appropriate to the product was used to calculate performance.

Unfavorable scenario: this type of scenario occurred for an investment between 29/07/2018 and 29/07/2022.

Intermediate scenario: this type of scenario occurred for an investment between 31/05/2017 and 31/05/2021.

Favorable scenario: this type of scenario occurred for an investment between 30/09/2015 and 30/09/2019.

## What happens if Degroof Petercam Asset Services S.A. is unable to pay out?

The sub-fund's assets are segregated from those of the other sub-funds in the SICAV and from Degroof Petercam Asset Services S.A., the product manufacturer and management company of the sub-fund. Even if it were to fail, the product manufacturer could not use the sub-fund's assets to pay its debts.

The only scenario under which an investor could incur a loss is by selling shares at a time when they are worth less than what the investor paid.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Costs over time

This table shows the amounts deducted from your investment to cover various costs. These amounts depend on the amount you invest, the duration of your investment and the performance of the sub-fund. The amounts shown are illustrations based on a hypothetical investment amount and different investment periods.

We have assumed that:

- for the first year, you get back the amount you invested (0% annual return);
- for the other holding periods, the product evolves as indicated in the intermediate scenario;
- CHF 10,000 is invested.

	If you exit after 1 year	If you exit after 4 years
<b>Total costs</b>	<b>343 CHF</b>	<b>806 CHF</b>
<b>Annual cost impact (*)</b>	<b>3.4%</b>	<b>1.9% each year</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period, your average return per year is projected to be 2.60 % before costs and 0,74 % after costs.

## Composition of the costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	2,00% of the amount you pay in when entering this investment. This is the most you will pay, you could pay less.	Up to 200 CHF
