What is this product?

Type Accumulation shares (shares for which income and capital growth are retained in the share price) of a sub-fund of a SICAV, a regulated open-ended fund whose sub-funds are independent from a liability point of view.

Investment objectives and policy

Objective(s) To increase the value of your investment over the long term.

Benchmark(s) Euribor 3 Months, a money market rate. Use: performance comparison and performance fee calculation.

Investment policy Under normal market conditions, the sub-fund invests mainly in a balanced portfolio of bonds and shares. The sub-fund may invest worldwide in securities denominated in any currency.

The sub-fund may use derivatives to hedge against market fluctuations and to reduce its costs, and also to generate additional income.

Investment process As part of the active management of the sub-fund, the manager uses macroeconomic, market and financial analysis in order to allocate investments flexibly between different asset classes, sectors and geographical areas, and to identify securities which he/she believes have the potential to outperform the market.

ESG approach The manager incorporates ESG criteria such as carbon footprint intensity, environmental protection and corporate governance into his/her decision-making process. The manager excludes companies that are highly controversial by international standards, as well as companies with significant exposure to socially or environmentally damaging activities such as thermal coal and tobacco.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes that you keep the product for at least **3 years**. The actual risk can vary significantly if you cash in before maturity and you may get back less.

The risk indicator is designed to help you compare the risks of investment products. It uses the required calculation methodology, which includes market movements and the risk that the product manufacturer cannot pay

out as required. The risk indicator is not guaranteed and may change over time.

All investments involve risk. The value of your investment in this product can go up and down, and you could lose some or all of your investment. This product is rated at the medium-low risk level (3 out of 7). Poor market conditions are very likely to reduce the value of your investment.

The sub-fund's risk level reflects the following:

- Investments in stocks and bonds have a higher volatility and risk level than money market instruments.
- The sub-fund applies a balanced investment strategy that aims to reduce the volatility of its performance.

Other important risks partly or completely unreflected in the risk indicator:

- **If your currency as an investor is different from the subscription currency of this product, changes in currency exchange rates could reduce any investment gains or increase any investment losses.**

• Unusual market conditions or unforeseeable events may magnify risks or trigger other risks such as counterparty, liquidity and operational risks (a full description of these risks is available in the prospectus).

• If you place a request to sell (redeem) shares at a time when this product has received many other sell requests, the processing of your order may be delayed, which could affect the price you receive for your shares.

Performance Scenarios

This table shows the money you could get back (net of costs) over different periods, under different scenarios, assuming you were to invest EUR 10,000 in the sub-fund. You can compare this with the scenarios of other products.

The figures shown include all costs of the product itself. The figures do not take into account your personal tax situation, which may affect how much you get back.

What you get out of this product depends on future market performance.

Please note that future market performance is uncertain and cannot be accurately predicted.

Recommended holding period:		3 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum			
Stress	What you might get back after costs	7 780 EUR	8 120 EUR
	Average return each year	-22.20%	-6.71%
Unfavourable	What you might get back after costs	8 830 EUR	9 410 EUR
	Average return each year	-11.70%	-2.01%
Moderate	What you might get back after costs	10 030 EUR	10 500 EUR
	Average return each year	0.30%	1.64%
Favourable	What you might get back after costs	11 080 EUR	11 790 EUR
	Average return each year	10.80%	5.64%

The unfavorable, intermediate and favorable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. The stress scenario shows what you might get back in extreme market circumstances. The markets could evolve very differently in the future.

Unfavorable scenario: this type of scenario occurred for an investment between 30/09/2019 and 30/09/2022.

Intermediate scenario: this type of scenario occurred for an investment between 31/05/2016 and 31/05/2019.

Favorable scenario: this type of scenario occurred for an investment between 31/12/2018 and 31/12/2021.

What happens if Degroof Petercam Asset Services S.A. is unable to pay out?

The sub-fund's assets are segregated from those of the other sub-funds in the SICAV and from Degroof Petercam Asset Services S.A., the product manufacturer and management company of the sub-fund. Even if it were to fail, the product manufacturer could not use the sub-fund's assets to pay its debts.

The only scenario under which an investor could incur a loss is by selling shares at a time when they are worth less than what the investor paid.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

This table shows the amounts deducted from your investment to cover various costs. These amounts depend on the amount you invest, the duration of your investment and the performance of the sub-fund. The amounts shown are illustrations based on a hypothetical investment amount and different investment periods.

We have assumed that:

- for the first year, you get back the amount you invested (0% annual return);
- for the other holding periods, the product evolves as indicated in the intermediate scenario;
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	205 EUR	434 EUR
Annual cost impact (*)	2.1%	1.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period, your average return per year is projected to be 3.10 % before costs and 1,64 % after costs.

Composition of the costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	1,00% of the amount you pay in when entering this investment. This is the most you will pay, you could pay less.	Up to 100 EUR
Exit costs	Nil	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0,72% of the value of your investment per year. This is an estimate based on actual costs over the last year.	72 EUR
Transaction costs	0,09% This is an estimate of the costs incurred when buying and selling investments underlying the sub-fund. The actual amount will vary depending on the quantity bought and sold.	9 EUR
Incidental costs taken under specific conditions		
Performance fees	Commission of 10,00% calculated each valuation day by comparing the performance of the net asset value per share to that of the Benchmark (Euribor 3M) over the same period of time. The percentage of 0,00% represents the average annual performance fee paid over the last 5 years. It is possible that the Manager may receive a Performance Fee even in case of negative performance of a Class of Shares. Please refer to the prospectus for more details on this subject.	24 EUR
