The Commission de Surveillance du Secteur Financier (CSSF) is responsible for supervising Edmond de Rothschild Asset Management (Luxembourg).

Edmond de Rothschild Asset Management (Luxembourg) is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Production date of the Key Information Document (KID) : 11.12.2024

Warning: You are about to purchase a Product that is not simple and may be difficult to understand.

What is this Product ?

Type

The Product is a sub-fund of EdR FUND II, a public limited liability company (société anonyme), incorporated as a "société d'investissement à capital variable" under Part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment and qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

The lifespan of the Product is unlimited.

Objectives

The Product's objective is to achieve capital growth over the medium term through the active management of a diversified portfolio with a balanced profile made up of international transferable securities.

Benchmark index

None. The Product will be managed actively and it will not follow any benchmark index.

Investment policy

The Product invests mainly in any type of equities and debt securities directly and indirectly via units or shares of UCITS or other UCIs from around the world.

The Product may also invest in closed-ended REITs.

In order to protect its assets and/or achieve its management objective, the Product may use derivative financial instruments traded on Regulated Markets or over-the-counter markets, subject to a limit of 100% of its net assets.

The Product may invest up to 20% of its net assets in shares with embedded derivatives that have underlying assets that are eligible under the investment policy of the Product in order to achieve its investment objective and for exposure or hedging purposes.

The Product may be exposed to currency risk up to 100% of its net assets.

For cash management purposes, the Product may invest up to 25% of its net assets in instruments classified as liquid, such as cash, fiduciary deposits, money market instruments or money market funds.

At least 90% of the companies in the portfolio will have an ESG rating. This will be either a proprietary ESG rating or a rating provided by an external non-financial rating agency.

The selection process applies a negative screening, whereby the Investment Manager has established a formal exclusion policy that integrates the exclusion of controversial companies related to weapon, coal, tobacco, unconventional fossil fuels and issuers that do not respect the United Nations Global Compact ("UNCG") principles. Further details on the responsible investing approach applied on the Product can be found on the Investment Manager website: <https://www.edmond-de-rothschild.com/en/Pages/Responsible-investment.aspx>.

The Product classifies as Article 8(1) SFDR as it promotes a combination of ESG characteristics. Environmental, social and/or governance (ESG) criteria are one of the elements on which management focuses.

In view of its ESG strategy, the Product promotes environmental characteristics but does not make any sustainable investments and therefore the Product does not invest in sustainable investments with an environmental objective that is aligned with the EU Taxonomy.

Currency of the Product: USD

Income allocation: Accumulation

Intended retail investor

The Product is suitable for cautious or less experienced investors, including those who are not involved with or informed about the capital markets, but who regard investment funds as a practical "savings" product. It is also suitable for more experienced investors wishing to achieve defined investment objectives. No experience of capital market products is required. Investors must be able to bear temporary moderate losses and therefore this Product is suitable for investors who can afford to set the capital aside for at least three years.

This share is intended for retail investors.

Practical information

Depositary: Edmond de Rothschild (Europe)

You can buy or sell each day on which banks are generally open for business in Luxembourg, in US and in France and any other day on which the French financial markets are open (official calendar of Euronext Paris S.A.). The Net Asset Value will not be calculated on Good Friday or 24 December (Christmas Eve). Orders must be received by the transfer agent no later than 11:00 a.m. (Luxembourg time) Business Day preceding the relevant Valuation Day.

More detailed information on EdR FUND II, the available sub-funds and share classes, such as the prospectus and the annual and semi-annual reports, may be obtained free of charge, in English, from the registered office of Edmond de Rothschild Asset Management (Luxembourg) at: 4 Rue Robert Stumper, L-2557 Luxembourg.

The latest published prices of the class, the information regarding the net asset value, the calculations of the monthly performance scenarios and the past performances of the Product are available on the website www.edmond-de-rothschild.com.

What are the risks and what could I get in return ?

Risk Indicator

Lower risk

Higher risk

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (3 years). The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Product to pay you.

In addition, you will be exposed to the following risks (not captured in the synthetic risk indicator), namely:

Credit risk : When a significant level of investment is made in debt securities.

Liquidity risk : The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Product, both in the realisation of the prices quoted and the execution of orders at desired prices.

Impact of techniques such as derivative contracts : The use of derivatives instruments can infer a decrease of the asset more significant than the decrease of the invested underlying assets or markets.

Counterparty risk : Where a Product is backed by collateral or has significant investment exposure through contracts with a third party.

Operational risk : The Product may suffer losses due to the failure of operational processes, including those related to the safekeeping of assets.

The occurrence of any of these risks may negatively impact the net asset value.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Beware of currency risk. If an Investment Product is denominated in a currency other than the official currency of the State in which this Product is marketed, the final gain will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator above.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable, scenarios presented represent examples using the best and worst performances, as well as the average performance of the Product and/or the appropriate benchmark indicator over the last 10 years.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment \$ 10,000

The recommended holding period is 3 years		If you exit after 1 year	If you exit after 3 years (recommended holding period)
Scenarios			
Minimum	There is no guaranteed minimum return. You could lose some or all of your investment.		
Stress	What you might get back after costs	\$6,100	\$5,860
	Average return each year	-39.0%	-10.1%
Unfavourable	What you might get back after costs	\$8,170	\$9,680
	Average return each year	-18.3%	-0.6%
Moderate	What you might get back after costs	\$10,430	\$11,420
	Average return each year	4.3%	2.7%
Favourable	What you might get back after costs	\$12,250	\$13,240
	Average return each year	22.5%	5.8%

This table shows the money you could get back over the recommended holding period of 3 years, under the different scenarios, assuming you invest USD 10,000.

Unfavourable scenario : this scenario occurred for an investment between 09/2017 and 09/2022.

Moderate scenario : this scenario occurred for an investment between 01/2015 and 01/2020.

Favourable scenario : this scenario occurred for an investment between 06/2016 and 06/2021.

What happens if Edmond de Rothschild Asset Management (Luxembourg) is unable to pay out ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario ;
- USD 10 000 is invested.

Investment \$ 10,000	If you exit after 1 year	If you exit after 3 years (recommended holding period)
Total costs	\$217	\$1,294
Annual cost impact (*)	2.2%	2.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 4.92% before costs and 2.69% after costs.

We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.

Composition of Costs

Investment USD 10,000 and annual cost impact if you exit after 1 year

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee for this Product.	\$0
Exit costs	We do not charge an exit fee for this Product (but the person selling the Product may do).	\$0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	2.16% of the value of your investment per year. The impact of the costs that we take each year for managing this Product. This figure is an estimate.	\$216
Transaction costs	0.01% of the value of your investment per year. The impact of the costs of us buying and selling underlying investments for this Product. The actual amount will vary depending on how much we buy and sell.	\$1
Incidental costs taken under specific conditions		
Performance fees and carried interest	There is no performance fee for this Product.	\$0

These tables shows the impact the different costs have on the investment return you might get back at the recommended holding period and the meaning of the different cost categories.

If you invest in this Product in the context of a life insurance contract or capitalisation contract, this document does not take into account the fees relating to this contract.

How long should I hold it and can I take the money out early ?

Recommended holding period: 3 years

This Product is designed for short term investments. However, you can redeem your investment without penalty at any time during this time, or hold the investment longer.

You can buy or sell each day on which banks are generally open for business in Luxembourg, in US and in France and any other day on which the French financial markets are open (official calendar of EURONEXT PARIS S.A.). The Net Asset Value will not be calculated on Good Friday or 24 December (Christmas Eve). Orders must be received by the transfer agent no later than 11:00 a.m. (Luxembourg time) Business Day preceding the relevant Valuation Day.

How can I complain ?
