

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Franklin Diversified Balanced Fund

Class G (acc) EUR • ISIN LU1573965958 • A sub-fund of Franklin Templeton Investment Funds

The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Diversified Balanced Fund (the "Fund"), which pursues an actively managed investment strategy, aims to earn income and to increase the value of its investments over the long term by targeting an average annual return rate of 3.5% (net of fees) above that of the Euro Interbank Offered Rate (EURIBOR), over a rolling three year period. The Fund aims to achieve its objective with an annualised fluctuation (volatility) of the share price of the Fund ranging between 5% and 8%. There is no guarantee that the Fund will achieve its return objective, nor that it will remain within the aimed-for volatility range.

The Fund can invest up to 75% in equity and equity-related securities from any country or type of issuers directly, and indirectly through among others, derivatives and/or mutual funds. In addition, the Fund can invest directly in debt securities from any country or type of issuers (including low rated or non-investment grade securities, defaulted and distressed debt securities, convertible securities and/or up to 5% of the Fund's assets in contingent convertible securities) or indirectly through among others, derivatives and mutual funds.

The Fund can invest to a lesser extent in structured products and exchange traded notes and indirectly (through mutual funds, exchange-traded funds, derivatives or structured products) up to 10% in other asset classes such as commodities, precious metals, real estate and infrastructure.

Investments in mutual funds into which the Fund may invest is limited to 10% of the Fund's assets.

The Fund can use derivatives for hedging, efficient portfolio management and/or investment purposes.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

The benchmark of the Fund is the Custom EURIBOR 3-Month + 3.5% Index. The benchmark has been selected because the target return of the Fund is to exceed the return of the benchmark. Although the Investment Manager refers to the benchmark for performance measurement purposes, the Fund is not obliged to hold any of the benchmark constituents and may indeed invest up to 100% of its net assets outside the benchmark.

You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information, Objectives and Investment Policies" of the current prospectus of Franklin Templeton Investment Funds.

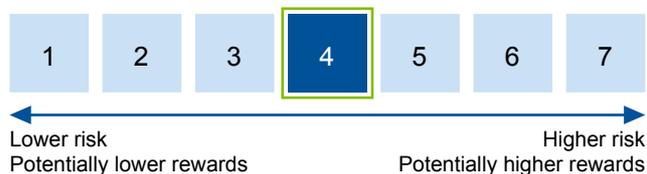

Terms to Understand

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Hedging: A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

Long position, short position: A long position benefits when an investment's price goes up; a short position benefits when the price goes down.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund invests directly or indirectly (through financial derivative

instruments, structured products or collective investment schemes) in equity and fixed income securities, cash and equivalents, and (indirectly only) alternative investments (including commodities or property), with an aim to offer a balanced exposure between equities and debt securities over the long term. Such securities and investment instruments have historically been subject to price movements due to such factors as general stock market volatility, sudden changes in interest rates, changes in the financial outlook or perceived credit worthiness of securities issuers, or fluctuations in commodity prices or real estate values. As a result, the performance of the Fund can fluctuate over time.

Risks materially relevant not adequately captured by the indicator:

Credit risk: the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton Investment Funds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Not applicable*
Exit charge	Not applicable
<i>This is the maximum that might be taken out of your money before it is invested.</i>	

Charges taken from the Fund over a year

Ongoing charges	2.27%
------------------------	-------

Charges taken from the Fund under certain specific conditions

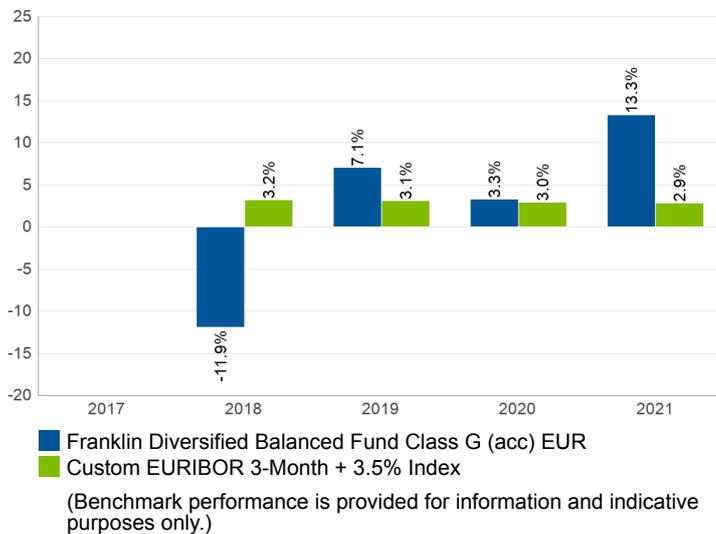

Performance fee	Not applicable
------------------------	----------------

*No entry charge is applied to your investment at the time of purchase. However, a diminishing contingent deferred sales charge of up to 3% will apply if you sell your shares within the first 3 years of purchase. It will decrease annually by 1% until such 3 years period ends.

The ongoing charges are based on the expenses for the year ending 31 December 2021. This figure may vary from year to year.

For detailed information about charges, please refer to the sections "Share Classes" and/or "Performance Fees" (as applicable) as well as Appendix E of the current prospectus of Franklin Templeton Investment Funds.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges but not the entry charge.
- Past performance is calculated in the currency of the present share class.
- The Fund was launched in 2015 and the present share class on 21/04/2017.
- Product performance is not tracking the index.
