Franklin Income Fund

Class G (acc) EUR • ISIN LU2052244915 • A sub-fund of Franklin Templeton Investment Funds

The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Income Fund (the "Fund") aims to earn income and, secondarily, to increase the value of its investments over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:

- equity and equity-related securities (including equity-linked notes) issued by companies located in, or doing significant business in, the U.S.
- debt securities of any quality (including lower quality) issued by corporations and governments

The Fund can invest to a lesser extent in:

- equity and debt securities traded in the U.S. and issued by corporations located anywhere in the world (limited to 25% of assets)
- equity or debt securities issued by corporations that entitle the holder to receive equity or debt securities of another corporation located anywhere in the world (limited to 25% of assets)
- derivatives for hedging, efficient portfolio management and/or investment purposes

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

The investment team uses in-depth analysis to select individual securities that it believes are undervalued and will provide the best opportunities for income and increased value over the long term.

The benchmark of the Fund is the Linked Blended 50% MSCI USA High Dividend Yield Index + 25% Bloomberg High Yield Very Liquid Index + 25%

Bloomberg US Aggregate Index. The benchmark is used solely as a reference for Investors to compare against the Fund's performance, and the benchmark is neither used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat. The Fund can deviate from the benchmark.

You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information, Objectives and Investment Policies" of the current prospectus of Franklin Templeton Investment Funds.

Terms to Understand

Debt securities: Securities representing the issuer's obligation to repay a loan at a specified date and to pay interest.

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Equity securities: Securities that represent an ownership stake in a company.

Hedging: A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used

instead.

Why is the Fund in this specific category?

The Fund invests mainly in a diversified portfolio of U.S. equity, equity-related and debt securities. Such securities have historically been subject to price movements that may occur suddenly due to equity market- and bond market-specific factors. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Credit risk: the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton Investment Funds.
