

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Franklin Global Fundamental Strategies Fund

Class A(acc)EUR-H1 • ISIN LU0316494987 • A sub-fund of Franklin Templeton Investment Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Global Fundamental Strategies Fund (the "Fund") aims to increase the value of its investments and, secondarily, to earn income over the medium to long term.

The Fund invests mainly in:

- equity securities issued by companies of any size located in any country, including emerging markets
- debt securities issued by governments, government-related entities and corporations located in any country

The Fund can invest to a lesser extent in:

- equity securities issued by companies involved in mergers, liquidations or other major corporate transactions
- lower-quality debt securities (including securities in default) issued by governments and corporations
- derivatives for hedging and investment purposes
- mortgage- and asset-backed securities (limited to 10% of assets)

The investment team aims to divide the Fund's assets equally among three different investment strategies: two that look for equity securities worldwide and one that focuses on debt securities worldwide. The investment team uses in-depth analysis to select individual securities that it believes are undervalued

and will provide the best opportunities for increased value over the long term. You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information, Objectives and Investment Policies" of the current prospectus of Franklin Templeton Investment Funds.

The benchmark of the Fund is the Custom 2/3 MSCI World + 1/3 JP Morgan Global Government Bond Index. The benchmark is indicated for information purposes only, and the Fund manager does not intend to track it. The Fund can deviate from this benchmark.

Terms to Understand

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Hedging: A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

Mortgage-backed securities: Securities whose value and income payments are derived from the ownership of a pool of underlying mortgage debts.

Asset-backed securities: Debt securities whose value and income payments are derived from a pool of underlying assets.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in equity and debt securities of companies around the world, including emerging markets. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Credit risk: the risk of loss arising from default that may occur if an issuer fails

to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, non-investment-grade securities.

Derivatives risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Shanghai-Hong Kong Stock Connect risk: the Fund may suffer difficulties or delays in enforcing its rights in China A-shares, including title and assurance of ownership, given that the securities regimes and legal systems of the Shanghai and Hong Kong markets differ significantly.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton Investment Funds.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5,75%
Exit charge	Not applicable
<i>This is the maximum that might be taken out of your money before it is invested.</i>	

Charges taken from the Fund over a year

Ongoing charges	1,85%
------------------------	-------

Charges taken from the Fund under certain specific conditions

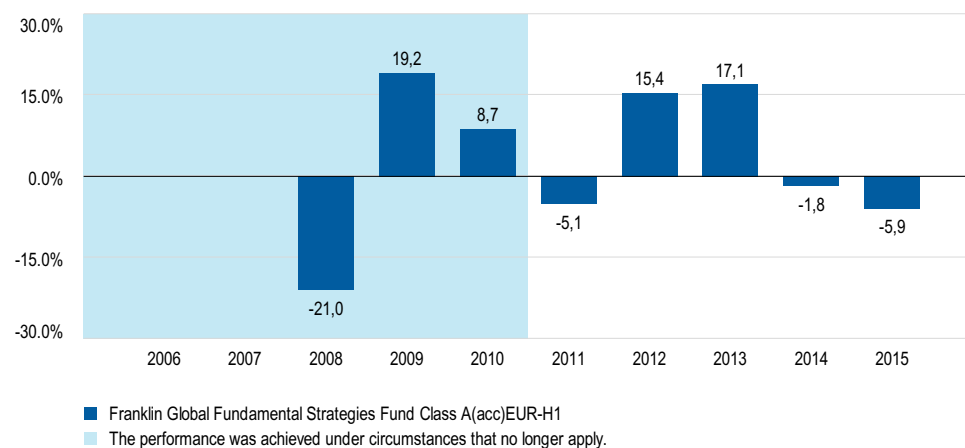

Performance fee	Not applicable
------------------------	----------------

The entry charges shown are maximum amounts; you may pay less in some cases. For more information, please see your financial adviser.

The ongoing charges are based on the expenses for the year ending December 31, 2015. This figure may vary from year to year.

For detailed information about charges, please refer to the section "Share Classes" as well as Appendix E of the current prospectus of Franklin Templeton Investment Funds.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges but not the entry charge.
- Past performance is calculated in the currency of the present share class.
- The Fund was launched in 2007.
