What is this product?

Type

The Shares are a class of shares in Man AHL Alpha Core Alternative (the "Fund"), a sub-fund of Man Umbrella SICAV, which is organised as a public limited company (*société anonyme*) governed by the Luxembourg law of 10 August 1915 concerning commercial companies, as amended (the "**1915 Law**") and organised as an investment company with variable capital (*société d'investissement à capital variable*). The Fund qualifies as undertaking for collective investment in transferable securities (UCITS) within the meaning of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment (the "**2010 Law**"). The assets and liabilities of the Fund are segregated from the other sub-funds of the Umbrella-Fund by law. However, the assets and liabilities of the PRIIP are not segregated from the assets and liabilities of the other classes of shares of the Fund.

Term

The Umbrella-Fund and the Fund were incorporated for an unlimited period. The Umbrella-Fund may be dissolved at any time by a decision of the general meeting of shareholders subject to the quorum and majority requirements outlined in the articles of incorporation of the Umbrella-Fund (the "**Articles**").

Objectives

Investment Objective

The Fund seeks to achieve medium-term capital growth while restricting the associated risks, by trading a diversified portfolio of Investments.

Investment Policy

The Fund aims to perform independently of traditional stock and bond investments thereby providing valuable diversification benefits and enhancing the risk/reward profile of a traditional investment portfolio.

In order to achieve its investment objective the Fund employs a systematic, statistically based investment approach that is predominantly designed to identify and capitalise on upward and downward price trends across global markets. Investment decisions are entirely driven by mathematical models based on market trends and other historical relationships.

The Fund invests in a varied portfolio of financial derivative instruments (i.e. instruments whose prices are dependent on one or more underlying assets ('FDI')), which may include without limitation, futures and forward contracts and transferable securities, including certificates on AHL investment funds pursuing strategies in accordance with this Fund's investment strategy. The Fund may access these global markets directly or indirectly and include, without limitation, stocks, bonds, currencies

Benchmarks. The Fund is actively managed; no benchmark is used as a universe for selection or for performance comparison purposes.

Share Class Policy:

The Fund may retain a significant proportion of its portfolio in cash and/or liquid assets. Any income generated by the Fund will be reinvested to grow the value of shares.

The Fund's reference currency is USD. This share class is denominated in GBP. The Fund will use financial derivatives to the extent reasonably possible with the aim of protecting investors against USD/GBP currency fluctuations.

Processing of subscription and redemption orders

Shares can be bought and sold each Dealing Day.

Intended retail Investor

The Fund is intended for investors who (i) have sufficient experience in investing in this type of product and thereby sufficient experience and theoretical knowledge to assess the risks of investing in the Fund; (ii) have a medium to long term investment horizon; (iii) can bear the loss of their entire investment; and (iv) and are happy to accept the risk level associated with the Risk Indicator displayed in this Key Information Document. The need of the investor to be able to bear the loss of their entire investment is due to several risks, including credit and market risk, which can significantly impact the return on investment. The Risk Indicator, as well associated risks, are further described in the section "What are the risks and what could I get in return?" below.

Risk Indicator

the Fund.

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Fund to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depend on the exchange

rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.man.com/documents>.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		GBP 10 000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	You could lose some or all of your investment.		
Stress	What you might get back after costs	GBP 6 570	GBP 6 520
	Average return each year	-34.28%	-13.28%
Unfavourable	What you might get back after costs	GBP 9 060	GBP 9 610
	Average return each year	-9.42%	-1.31%
Moderate	What you might get back after costs	GBP 10 200	GBP 11 000
	Average return each year	1.99%	3.24%
Favourable	What you might get back after costs	GBP 13 850	GBP 13 030
	Average return each year	38.54%	9.21%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between August 2019 and August 2022.

Moderate scenario: This type of scenario occurred for an investment between April 2019 and April 2022.

Favourable scenario: This type of scenario occurred for an investment between March 2014 and March 2017.

What happens if Waystone Management Company (Lux) is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the PRIIPs Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). If the Fund is not able to pay out what you are owed, you are not covered by any investor compensation or guarantee scheme and you may face financial loss. There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10 000

	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 252	GBP 814
Annual cost impact (*)	2.5%	2.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.8% before costs and 3.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

This product has no required minimum holding period but is designed for long-term investment; you should have an investment horizon of at least 3 years. You may buy or sell shares in the product, without penalty, on any normal business day by submitting a subscription or redemption request in the manner set out in the Prospectus. Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares. If you cash in at an early stage this will increase the risk of lower investment returns or a loss.

How can I complain?
