

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein.

New Capital Japan Equity Fund (the "Fund"), a sub-fund of New Capital UCITS Fund Plc (the "Company")

New Capital Japan Equity Fund JPY O Acc. (the "Share Class") – ISIN: IE00BF4J1936
The Fund is managed by KBA Consulting Management Limited (the "Manager")

Objective and Investment Policy

Objective: The Fund's investment objective is principally to achieve an optimum total return.

Policy: The Fund will primarily invest in equities and equity-related securities, such as warrants and rights, issued by companies which have either their registered offices or conduct the majority of their business in Japan or which, as holding companies, invest mainly in companies which have their registered office in Japan, as well as in other investments as permitted pursuant to the investment policy of the Fund and which may be listed or traded on Recognised Markets.

Normally, at least two-thirds of the assets of the Fund shall be invested in equities and equity-related securities issued by companies which either have their registered offices or conduct the majority of their business in Japan, UCITS eligible open-ended and closed-ended collective investment schemes which invest in Japan equities, as well as derivatives and participatory notes on such investments.

Up to one third of the assets may be invested in equities and equity-related securities issued by companies that do not conduct the majority of their business in Japan, as well as in investment-grade bonds, convertible bonds, convertible notes, warrant issues and notes denominated in freely convertible currencies, money market instruments, derivatives on such investments and units in collect investment schemes that do not invest in Japan equities, the issuers of which will be government or corporate borrowers.

The Fund uses a combination of top-down macroeconomic view that determines the sector allocation and bottom-up stock-picking, that determines a company's financial strengths and weaknesses.

The Fund may use techniques and instruments for investment and/or efficient portfolio management such as futures, options,

forwards and swaps. The use of these instruments may result in the Fund being leveraged. However, the total exposure of the Fund as a result of all positions held by it will not exceed its Net Asset Value.

The Investment Manager has discretion in managing the investments of the Fund.

Distributions on income share classes will be paid bi-annually. Accumulating share classes accumulate income.

Benchmark: The Fund's benchmark is the MSCI Japan Net Total Return Local Index and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Profile of typical investor: The Fund is suitable for investors with a long-term horizon who are primarily seeking to achieve capital growth, who can accept larger fluctuations and a longer-lasting decline in the Net Asset Value of the Sub-Fund Shares and who are aware of the considerable risks an equity investment entails.

Dealing: Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Further Information: Please refer to the Prospectus for more detailed information.

Risk and Reward Profile

The Fund is in category 6 as it has a high level of volatility.

The risk category shown is not guaranteed and may shift over time. Historical data may not be a reliable indicator for the future risk profile of the Fund.

The lowest risk category does not mean a "risk-free investment".

The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator.

Liquidity risk: The risk that assets may not be saleable immediately

at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Hedging risk: The Fund utilises forward exchange rate contracts to minimise currency risk. Forward contracts do not precisely mirror movements in the market exchange rate which can result in differences in performance between share classes.

Further information: The Prospectus for this Fund gives you more details about all the risks for this Fund – see under "Practical Information" for how to obtain a copy.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

Charges taken from the Fund over a year

Ongoing charges	1.67%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry charges shown are maximum charges. In some cases, you might pay less. You can find this out from your financial adviser.

The ongoing charges figure is based on the expected expenses for the year ending 31 December 2021. This figure may vary from year to year and it excludes portfolio transaction costs and any performance fees if applicable.

For more information about charges, please see the "Fees and Expenses" section of the Prospectus.

Past Performance

The Fund was established on 2 July 2018.

The past performance disclosed in the graph for the period until 2 July 2018 is that of New Capital Multinippon, which was an investment fund under Swiss law, and relates to a period when the New Capital Multinippon was domiciled in Switzerland and was not authorised as a UCITS. The assets of the New Capital Multinippon, which had a substantially similar investment policy, strategy and portfolio composition to the Fund, transferred into the Fund in July 2018.

The past performance disclosed in the graph from 2 July 2018 onwards is that of the Fund.

The Fund changed its benchmark variant from MSCI Japan Gross Total Return Local Index to MSCI Japan Net Total Return Local Index in March 2019.

The past performance is calculated in JPY.

The performance figures include all ongoing charges and exclude any entry charges or exit charges. Past performance is not necessarily a guide to the future performance of the Fund.
