a sub fund of **Next Generation Investment Strategies ICAV (the ICAV)**

The Manager is KBA Consulting Management Limited and the Delegated Discretionary Fund Manager is Morningstar Investment Management Europe Ltd.

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund aims to achieve capital growth over a long-term investment horizon, exhibiting a level of risk that is commensurate with global equity markets. The Sub Fund will select passively managed index-tracking collective investment schemes (**Passive Funds**) and exchange trade funds (**ETFs**) based on their ability to fulfill these objectives.

In order to seek to achieve capital growth exhibiting a level of risk that is commensurate with global equity markets, the target Passive Funds and ETFs will primarily invest in equities on a global and regional basis, global real estate (i.e. through indices comprising global real estate companies and real estate investment trusts) and, to a lesser extent, fixed income securities on a global basis.

The Sub Fund may also, for ancillary liquidity purposes, hold and invest in cash, bank deposits and short-term debt instruments which may be fixed or floating rate instruments.

The Sub-Fund is actively managed and is not managed by reference to a benchmark.

Recommendation: this Sub Fund may not be appropriate for investors who plan to withdraw their money within three years.

The base currency of the Sub-Fund is GBP (£).

For full details of the objectives and investment policy please refer to the prospectus and supplement.

There will be no dividend distribution in respect of this share class. You may redeem your investment on demand on every dealing day.

RISK AND REWARD PROFILE

- » The risk and reward category is calculated using historical data which may not be a reliable indicator of the Sub Fund's future risk profile.
- » The risk and reward category may shift over time and is not a target or guarantee.
- » The lowest category (i.e. Category 1) does not mean a risk-free investment.
- » The Sub Fund is in Category 5 because of the high range and frequency of price movements (volatility) of underlying investments by the Sub Fund.
- » The Sub Fund is in a higher risk category because it invests primarily in equities (shares). Shares may offer high long-term growth potential but the prices of shares fluctuate and often go down as well as up.
- » The Sub Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

» The following are additional risks not covered by the risk and reward category:

- The Sub Fund may hold assets, either directly or through its holdings in other investment funds, which may be denominated in or have exposure to a currency other than the currency of the shares in the fund or of the country in which you live. Currency fluctuations may strongly affect the value of your investment.
- The value of investments in passive funds and ETFs will depend on a number of factors, including, but not limited to, market and economic conditions, and geographical region.

» More information in relation to risks in general may be found in the "Risk Factors" section of the Prospectus.
