

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Dynamic Bond Fund

a sub fund of Nomura Funds Ireland plc
 Class AD EUR (IE00BTL1G288)
 Bridge Fund Management Limited is the Management Company of the Fund.

Objectives and investment policy

To achieve income and capital growth by investing primarily in a globally diversified portfolio of bonds (which are like loans that can pay a fixed or variable rate of interest).

The bonds are issued mainly by companies, governments and other financial institutions from around the world. Up to 30% of the Fund may be invested in bonds of emerging market issuers. The Investment Manager has full discretion when deciding which investments should be held in the Fund but will primarily buy bonds that have been rated by at least one rating agency (Standard & Poors or Moody's). The Fund may purchase up to 30% of its Net Asset Value in unrated securities (which are not rated by a rating agency) if the Investment Manager determines that the security is of comparable quality to a rated security that the Fund may purchase.

The Fund may use derivatives for investment purposes (such as trying to achieve higher returns) or to manage the effect of changes in interest rates and reduce some of the market risks. Derivatives are linked to the rise and fall of other assets. In other words, they derive their price from another asset. They can generate returns when share prices and/or indices fall.

Any income generated by the Fund will be paid to you or can be reinvested in additional shares to grow the value of your investment.

You can buy and sell shares in the Fund on any working day in Dublin, London and New York.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is classified in the category above because of the past behaviour of funds of this type. Where no share price history is available for any part of the last five years, the history of an appropriate benchmark or share class has been used in its place.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases and that the fund is not guaranteed to always stay in the same category.
- The indicator does not take into account the following material risks of investing in this Fund:
 - Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts.
 - This fund may hold bonds that are issued by companies and governments. It can also hold bonds that are traded through brokers or investment banks matching buyers and sellers, which may be less easy to buy and sell in times of market uncertainty. If this happens, the value of your fund may fall and in extreme circumstances redemptions from the fund may be delayed.
 - The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.
 - Currency exchange rate fluctuations may have a positive or negative impact on the value of your investment. 'Hedging' aims to deliver a return that is as close as possible to the base currency of a fund, by reducing the effect of exchange rate movements between the base currency and the hedged currency. However, these techniques may not be fully effective.
- A full list of risks that may be applicable to this Fund can be found in the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	1.33%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	0
-----------------	---

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure is calculated as at 30/06/2024.
- You can find more details about the charges by looking at the Fees and Expenses section of the Fund's Prospectus which is available from www.nomura-asset.co.uk.

Past performance

Source: FE fundinfo 2024

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 30/01/2015.
- Share/unit class launch date: 27/11/2020.
- Performance is calculated in EUR.
- All charges and fees, except any entry, exit and switching charge, have been included within the performance.
