

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Market Corporate Bond Fund

a sub fund of Nomura Funds Ireland plc
 Class 1 USD (IE0007PJ9UL1)
 Bridge Fund Management Limited is the Management Company of the Fund.

Objectives and investment policy

To achieve income and capital growth by investing principally in bonds (which are like loans that can pay a fixed or variable interest rate) that are economically tied to emerging market countries.

The Fund will invest in derivatives, such as forward currency contracts, futures and non-deliverable forward contracts (NDFs). Derivatives are linked to the rise and fall of other assets. In other words, they “derive” their price from another asset. They can generate returns when share prices and/or indices fall. Performance may be strongly influenced by movements in currency rates because the Fund can use derivatives to adjust the influence of currencies.

The Fund will not be restricted by bond ratings, as defined by international agencies that provide such ratings; these may therefore be rated investment grade or below investment grade.

The Fund is considered to be actively managed in reference to the J.P. Morgan CEMBI Broad Diversified Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Fund’s securities may be components of and may have similar weightings to the Index. However, the Fund may deviate significantly from the Index and the Manager may use its discretion to invest in companies or sectors not included in the Index.

Any income the Fund generates will be accumulated and reinvested on behalf of investors.

You can buy and sell shares in the Fund on any working day in Dublin, London and New York.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- The Fund is classified in the category above because of the past behaviour of the share price. Where no share price history is available for any part of the last five years the benchmark history of the Fund is used in its place.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases and that the fund is not guaranteed to always stay in the same category.
- The indicator does not take into account the following material risks of investing in this Fund:
 - Currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
 - Currency hedged share classes aim to deliver a return that is as close as possible to the base currency performance of a fund, by reducing the effect of exchange rate movements between the base currency and the hedged currency. However, these techniques may not be fully effective in completely removing the exchange rate risk.
 - Shares of smaller companies may be more difficult to buy and sell than those of larger companies. This means that the Manager may not be able to buy and sell at the best time or may suffer losses. This could reduce your returns.
 - A full list of risks that may be applicable to this fund can be found in the Prospectus

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.75%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	0
-----------------	---

- The ongoing charges figure is estimated because the share/unit class is relatively new and has insufficient track record for us to calculate it exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure is calculated as at 30/06/2024.
- You can find more details about the charges by looking at the Fees and Expenses section of the Fund's Prospectus which is available from www.nomura-asset.co.uk.

Past performance

There is insufficient data to provide a useful indication of past performance to investors.

- Fund launch date: 12/09/2023.
- Share/unit class launch date: 12/09/2023.
- All charges and fees, except any entry, exit and switching charge, have been included within the performance.
- * JP Morgan CEMBI Broad Diversified
