You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

This is an open ended Alternative Investment Fund (AIF).

Term

The fund is established for an unlimited period. In certain circumstances the fund may be unilaterally terminated in accordance with legal requirements.

Investment objective

The fund aims to provide long term capital growth by investing in commodity related instruments worldwide.

The fund invests at least two-third of its assets in energy, agriculture, metals and other commodity linked instruments and commodity related derivatives worldwide.

As the fund is index-unconstrained it is managed without reference to an index.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. These include commodity related derivatives, such as futures (e.g. futures on commodity indices), total return swaps (e.g. swaps on physical commodities) and structured notes. Where the fund uses total return swaps, the underlying consists of instruments in which the fund may invest according to its Investment Objective and Investment Policy. In particular, total return swaps may be used to gain long exposure to commodities. The gross exposure of total return swaps will not exceed 100% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher.

The fund also invests in commodity related equity and equity related securities, fixed income securities, convertible securities and warrants of issuers in commodity related industries. The fund may also invest in foreign currency (e.g. forward currency contracts, currency options, and swaps on currencies). The fund may invest in money market instruments and hold cash.

The fund will not acquire any physical commodities directly. Any commodity derivatives that call for physical delivery of the underlying commodity will be liquidated prior to delivery and procedures are in place to ensure that this occurs.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may use leverage and take short positions.

The fund is valued with reference to the net asset value of the underlying assets.

Recommendation: Investors should seek independent advice or satisfy themselves that they have an understanding of the strategies and techniques employed by the manager.

Benchmark: The Company does not tie its portfolio construction to the constituents of any benchmark.

Currency: The sub-fund currency is USD. The share class currency is EUR.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depository: J.P. Morgan SE

Intended retail investor

The fund may be suitable for investors who are more concerned with maximising long term returns than minimising possible short term losses. The fund is not intended for retail investors other than those who are advised by a professional investment advisor or who are sophisticated investors. This investment should form part of a varied investment portfolio.

You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly report and the latest price of shares from the fund's management company at 5, rue Höhenhof, L-1736 Senningerberg, Luxembourg, and from www.schroders.com. A paper copy of these documents is available free of charge upon request. You can also refer to this website for additional information such as remuneration policy or switching eligibility requirements.

What are the risks and what could I get in return?

Risks

 The risk indicator assumes you keep the product for 3 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

Performance Scenarios

We have classified this product as 4 out of 7, which is a medium risk class. The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Be aware of currency risk. In some circumstances you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

You can find more information about the other risks in the prospectus at www.schroders.com.

Note that the figures shown also reflect the maximum redemption fee of 0.00. This fee may be applicable at the discretion of the Directors from time to time, in the event that the Fund would need to make asset sales in the secondary market at a spread to meet redemption requests.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the

product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

The stress scenario shows what you might get back in extreme market circumstances.

The Unfavourable scenario occurred for an investment between 08 2014 to 08 2017

The Moderate scenario occurred for an investment between 04 2018 to 04 2021

The Favourable scenario occurred for an investment between 05 2019 to 05 2022

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

The fund's assets are held in safekeeping by its depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A. In addition, the fund's assets are segregated from the depositary's assets, which limits the risk of the fund suffering loss in case of default or insolvency of the depositary or someone acting on its behalf. However in the event of any loss, there is no compensation or guarantee scheme in place which may offset such loss.

What are the costs?

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 715	EUR 1160
Annual cost impact (*)	7.2%	3.9% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1,0 % before costs and -2,8 % after costs.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
