### Swisscanto (CH) Vorsorge Fonds 75 Passiv VT CHF (ISIN: CH0353690909)

Swisscanto (CH) Vorsorge Fonds 75 Passiv VT CHF is a unit class of the subfund Swisscanto (CH) Vorsorge Fonds 75 Passiv (hereinafter "fund"), a subfund in the umbrella fund Swisscanto (CH) Vorsorge Fonds. The fund is managed by Swisscanto Fund Management Company Ltd., Zurich.

## **Objectives and investment policy**

The investment objective of the fund is to generate an optimum overall return by means of a balanced risk strategy, mainly by investing in other collective investment schemes (target funds).

#### Important features:

The fund primarily invests directly and indirectly in equities, bonds and money market instruments, and indirectly in real estate and commodities (including precious metals). At least 51% of the fund's assets are invested indirectly via target funds based on the fund-of-funds principle. Investments in units of umbrella funds are not permitted. The aim is for direct and indirect investments in equity securities and rights to account for an average of 75% of the fund's assets over the long term. Units of open-ended real estate funds are not deemed to be equity securities in this context.

Derivatives may be used for achieving the investment objective.

Fund units are issued and redeemed basically on every bank business day in Switzerland.

Earnings and profits of the unit class are not distributed, but reinvested.

#### Additional important information:

The use of derivatives equates to neither leveraging nor short selling with regard to the fund assets.

Recommendation on holding period: this fund is appropriate for investors with a long-term investment horizon (more than five years).

The historical data used for calculating the risk and profit category cannot serve as a reliable indicator of the future risk profile.

The risk and profit category shown may very well undergo changes. Assignment to a category may change over time.

The lowest risk category cannot be equated with a risk-free investment.

Reasons for being assigned to the risk and profit category:

- Yield curve
- Interest-rate premium
- Price fluctuations in the share market and company-specific price fluctuations
- Foreign currency risks

There is no capital guarantee and no capital protection.

higher profit potential >

Further risks that are essential for the fund and not adequately covered by the indicator above:

- Credit risks, because substantial investments are made in interest-bearing securities where repayment default is possible.
