The Financial Conduct Authority (FCA) is responsible for supervising DWS Investments UK Limited in relation to this Key Information Document.

This PRIIP is issued by DB ETC plc, a Jersey company, and authorised in Jersey.

This Key Information Document is accurate as at 29 February 2024.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

ETC - Exchange Traded Commodities (exchange traded secured debt obligations with commodity exposure) – Asset Backed Notes.

Term

This product has a maturity until 15.06.2060. The scheduled maturity date may be postponed by up to ten business days. If this is the case we will provide you with notice of this and how many days such postponement will be. For information on redemption possibilities please refer to section "How long should I hold it and can I take out my money early?". Xtrackers Physical Gold ETC Securities were issued in 2010.

Objectives

The ETC securities provide you with exposure to gold without requiring you to acquire ownership in gold in the physical form. ETC securities can be purchased or sold on one or more stock exchanges. Each ETC security relates to a specific amount of gold, known as the metal entitlement per ETC security. The metal entitlement was initially 0.1 fine troy ounces (one fine troy ounce being 31.1035 grams) of gold and is reduced on a daily basis to reflect the base fee. The relevant auction price for gold used in the ETC securities is as determined by the London Bullion Market Association (LBMA) at 15:00 local London time. The level of the fee and the current metal entitlement is specified on www.etf.dws.com. The issuer publishes a calculated daily value per security which equals the relevant gold price, multiplied with the relevant metal entitlement. This value does not equal the relevant secondary market price (for purchase or sale). The issuer will seek to hold a sufficient amount of gold to cover its obligations under the ETC securities. On redemption, the metal agent (JPMorgan Chase Bank N.A.) will sell the gold and proceeds will be used to pay amounts due to security holders. Subject to any amounts paid to you due to early redemption, no amounts are payable under the ETC security prior to the maturity date. On redemption, it is intended that the ETC security will become payable at an amount equal to the higher of (i) the weighted average prices at which the gold can be sold by the metal agent over a specified period prior to the redemption date multiplied by the metal entitlement on such redemption date and (ii) 10 percent of the issue price of the ETC security. However, since the ability to make such payment is dependent on whether there is sufficient proceeds from the sale of the gold available, security holders may receive no payment or less than 10 percent of the issue price in certain circumstances. ETC securities will not pay periodic interest. If the issuer decides to redeem ETC securities early it is possible that on redemption, an interest amount may be added or subtracted to the redemption amount from the realisation of the gold. The value per ETC security and the secondary market price of the ETC securities can go down as well as up throughout the term of the ETC securities. The ETC securities are not principal protected and you may lose some or all of your investment. Investors should be aware that upon investing, they will not take physical delivery of any gold. More detailed information on the issuer of the ETC securities, such as the sales prospectus (in English and German languages) as well as the annual and semi-annual report (in English language), can be obtained free of charge online at www.etf.dws.com. For more details about the ETC securities, please refer to the sales prospectus, which is available at www.etf.dws.com.

Intended Retail Investor

This ETC product is intended for retail investors who: (i) are seeking a product offering exposure to the performance of the underlying asset(s); (ii) have a long-term investment horizon of at least 5 years; (iii) have basic knowledge and/or experience with similar financial products; and (iv) are prepared to accept a medium-high risk of loss (including up to complete loss) of invested capital.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

If the product currency differs from your investment currency, the following applies: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

You may lose some or all of your investment. The following risks could be of particular significance for the ETC securities: The ETC security value depends on the underlying metal price reacting to economic factors and it could fall for long periods. A more detailed description of risks and other general information can be found in the risk section(s) of the sales prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 12 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between February 2012 and February 2019.

The moderate scenario occurred for an investment between June 2016 and June 2023.

The favourable scenario occurred for an investment between December 2016 and December 2023.

Recommended holding period: 7 years.			
Example Investment: USD 10,000.			
		If you exit after 1 year	If you exit after 7 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	3,930 USD	3,370 USD
	Average return each year	-60.71 %	-14.41 %
Unfavourable	What you might get back after costs	8,520 USD	7,310 USD
	Average return each year	-14.79 %	-4.38 %
Moderate	What you might get back after costs	10,350 USD	14,220 USD
	Average return each year	3.47 %	5.16 %
Favourable	What you might get back after costs	13,730 USD	17,480 USD
	Average return each year	37.29 %	8.30 %

What happens if DWS Investments UK Limited is unable to pay out?

DWS Investments UK Limited as PRIIPS manufacturer of the ETC securities is not obliged to make any payment in relation to the ETC securities. DB ETC plc is obliged to make payments under the ETC securities. If DB ETC plc fails to make a payment when due, the trustee (Deutsche Trustee Company Limited) can enforce the security over the metal deposited with the custodian. Once the trustee has enforced the security it can then sell the precious metal and use of the proceeds of this sale to pay amount owed to you under the ETC securities. The proceeds of such sale may not be enough to cover all amounts owed to you under the ETC securities. The product is a debt instrument and as such is not covered by any deposit protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 7 years
Total costs	25 USD	251 USD
Annual cost impact (*)	0.3%	0.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.4% before costs and 5.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 USD
Exit costs	We do not charge an exit fee.	0 USD
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	0.25% of the value of your investment per year. This is an estimate based on actual costs for the fiscal year ending 31.12.2023.	25 USD
Transaction costs	We do not charge transaction costs.	0 USD
Incidental costs taken under specific conditions		
Performance fees	We do not charge a performance fee.	0 USD

Secondary market investors (those who buy or sell securities on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the security will pay the transaction costs related to their subscriptions and redemptions.

How long should I hold it and can I take money out early?

Recommended holding period: 7 years. The product has a fixed maturity date as of 15 June 2060.

This product has no required minimum holding period but is designed for long term investment. The recommended holding period has been selected due to its nature of the assets held by the issuer and because it is designed for long term investment horizon. It is expected that it will be possible to achieve the investment objective of the security within this time frame. You may request the redemption of securities generally on a daily basis. No fees or penalties will be charged by the manufacturer for any such transaction. The product may terminate early and may also be sold on the secondary market. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity. In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all. The ETC securities may be redeemed prior to the scheduled maturity date, if: (1) we redeem all of the ETC securities in the series following sixty days calendar written notice to you; (2) the programme counterparty exercises its right to terminate the balancing agreement; (3) an event of default occurs; or (4) an early redemption event occurs. A detailed description of early redemption events can be found in the Base prospectus in the Master Terms and Conditions of the ETC securities. There is no change on the risk-return profile of the product if you redeem your securities early.

How can I complain?

Complaints about the behaviour of the person who advised you on the product or sold it to you, should be addressed directly to that person. Complaints about the product or the behaviour of the manufacturer of this product should be directed to the following address:

Postal Address: DWS Complaints Officer, 21 Moorfields, GB - London EC2Y 9DB; Email: complaints.etc@list.db.com

We will then handle your request and provide you with feedback as soon as possible. We have a summary of our complaints handling procedure available free of charge online at www.etf.dws.com.

Other relevant information

Taxation regimes applicable to the security in your jurisdiction may affect your personal tax situation. Prospective investors should inform themselves of, and where appropriate take advice on such taxation regimes. Previous performance scenario calculations can be found under www.etf.dws.com
